1. The DX cluster spots all the DX on the bands. You don't need to listen and tune near as much.
>342 countries confirmed without any spotting aids (but someone has to tune and listen).
2. There are more DXCC entities today. There was 318 when I was first licensed. Now we have 20 more, including a few new ones in our backyard like P4 and FJ.
>Made Honor Roll in 1991 with 318 countries & still NO FJ in my backyard.
3. There are many fewer countries that don't allow or at least have any ham activity. In 1980 you weren't going to hear any signals out of: BY, ZA, XV, XU, 5A, C9, TZ, YA, and probably quite a few others I have forgotten about.
>BY: 1984, ZA: 1991, XV: 1989, XU: 1988, 5A: 1980, C9: 1987, TZ: 1980, YA: 1992
4. The DXpeditions are much better equiped today, so even average stations can work them on several bands (except for BS7 and T5-I never have any luck with those).
>True.

That's admirable, Gary, but it doesn't mean that it is easy without a DX Cluster. Many have done it without any spotting assistance, or on-ringers, or 2-meter alerting repeaters, etc. In fact, some have done it without an amp or with just a tribander at 25 feet. The degree to which you use technology, amplifiers, monobanders and tall towers is a never ending discussion. That's why you can't really compare one person's totals to another.

It would not be so easy today (even if we had sunspots), because you rarely, if ever, find anything by tuning and listening. 10 seconds after a semi-rare DX station calls CQ, the entire world knows his call, his frequency and where he is listening. There is instant bedlam. The days of having 3-5 minutes to get through without a huge pileup are just a distant memory.

My point, Paul, is a lot of the newcomers don't know how the spots get put on clusters - they think it's an automatic thing. As far as comparing totals, you forgot to mention 'location' which can make all the difference. Example - we have Seymour here in CA who has his antenna on a cliff overlooking the Pacific Ocean. For a long time I thought he was ghost talking. N6DX's Rainbow Ridge is another example. 100' utility poles with monobanders per band plus overlooking the ocean. Have I had a 'one' ringer? Yup! & an ocassional 2m spot? Yup.

BTW, a few years ago I found Pee Five on 10m and I was around the third or fourth person to work him and right after alarms musta gone off as the noise level went from Ø to +30 over S9 and I couldn't hear him anymore.

tnx for the comments

No, they're not.

KG6 was the pre-March 1978 prefix for Guam. KG6DX predates the current sequential call sign system.

Same thing with KS6DV -- KS6 was the American Samoa prefix before our current sequential call sign system.

I ran across KG6DX during the WPX contest and thought, just another Left-Coaster. Not until I looked at the call did I realize it was Guam.

Our calls are getting as screwy as the TO calls!!

Hi Rene !
Yes, is the same person, KS6DV is the former call of AH8LG.
If You do a Google search of KS6DV, You will find a bunch of data on Larry.
And, You are correct, KS6 is the "pre" KH8 prefix slot.

Hi guys,
I worked KS6DV on 7 Apr 1980 with a W6 as manager. In DXK it shows USA but I think it wasn't. I ran his call in QRZed and it came up as AH8LG, Pago

Pago, American Samoa with former call of KS6DV. Could KS6 have been there?

I hereby acknowledge that since I started (1973), I've used at one time or another almost every one of the aids mentioned previously AND DXTelnet by Favio, IK4VYX used with a DXCluster connection was my primary source of new DXCC contacts for the last 25 most wanted.

I simply typed in the prefixes and set the alert... audio (at home), email and pager at work.... "Hey Boss, I'm not feeling well" or "I've got a personal emergency at home." and 10 minutes later I'm at home in the shack. http://www.csm-gh.com/AB9M-Shack.htm

My vocation was applications development of radio technology which combined with my hobby, provided lots of opportunity to just work DX when it was on. see http://www.csm-gh.com/projects.htm

I may have been able to work them all in thirty years or less without the DXCluster, DXTelnet and the other aids but given my civilian and military careers, education, and family activities I have doubts..... something would be less now. DXCluster and DXTelnet allowed me to spend necessary time in non-DX activities while putting new ones in the log and on the wall.

I believe much of the value of the DXCluster system is in its spot history. A "sh/dx 20m P5" or "sh/dx 20 40m P5" or any other valid search combination may give you valuable information regarding when and where the DX was first spotted. Please see <http://www.csm-gh.com/N9PE%20DXSpider.htm> for additional search strings.

If you find that a needed DX station is spotted at 02:30 UTC, assume that he is not spotted until the spotting station has worked him. Be waiting on his previous QRG at 02:00 and you may get lucky.....

From: Zack Widup
Topic: 9396 Message: 9408

I have made only one QSO with an EZ. It was per a sked set up with e-mail on internet. I did not, however, have an internet connection at the time of the QSO.

I've used printed DX bulletins, the W6TI Sunday night CW bulletins (thanks again Bob!), phone calls, 2 meter FM DX nets, packetcluster and internet as assistance. I don't see anything wrong with that.

I studied the packet spots of YK1AO on 40 CW for some time once to establish his pattern in order to try to beat the hordes and make a QSO before everyone else got to him. It took a while but it eventually worked. Seemed a lot of others did the same thing.

I do a LOT of listening too, though. I probably spend a lot more time tuning and listening than I do using any of the above aids. I remember one night TL8NG was calling CQ on 40 CW. I called and he came back to me. We ragchewed for a while. There was no pileup or packet spot. After we were done, he called CQ for about 10 minutes with no other takers and went QRT for that night. I guess I got lucky.

I never did take time off from work to try for DX contacts. The ones I needed to try for during the day usually worked out OK on the weekend.

9409. H72W?

Yahoo group: DX-IS (2009)
Date: 2009-03-31 05:03:54 UTC
From: Lance Martin
Topic: 9409 Message: 9409

Hi Guys,

Funny thing. I worked H72W in the CQ WPX contest on 20m. He was coming in loud to VK6 Short path.

When I worked him, intently listened to the call and though maybe it's HQ2W but every time, over and over I heard him say H72W, H72W...

Today, I see it was HQ2W!

Must be an accent thing....did anyone else have this problem, maybe it was my ears?

Paul you are right on.

Been licensed for 6 years in May and been on HF for 5 years from a 50x150 foot lot. Didn't and still don't think of DXing as a contest. Even though I consider the pileup as a challenge to succeed... I hope everyone else makes it too.

I have known nothing but packets, computers, and powerful tools like DXlabs. When I am active, all WW spots are presented. Propogation experience and forecast tools give me a hint as to where and when to try.

I play the ARRL DXCC game but follow their rules plus some of my own. For example, I am lousy at CW so I NEVER log a new country or band on CW. I absolutely can do it but in my mind if I am relying on a computer then it is more of a digital mode not CW! Can you guess how may small DXpeditions I let go with that one!

My goal is to work every DX on every band..Hi And honestly I hope everyone else does to. At 64, however, I am not going to follow a process that take 40 years....just wouldn't make it!

By the way, in those 5 years I have 288 to date. At this point my need list looks like most other people's top 50 except I did snag BS7H. The point being it comes to where most folks have to work through the hard ones why delay getting to that point.

No where near done and loving it....

Not today, Al. Have heard VK9LA on 30/20 the last few
days. Never strong but workable with a lot of effort. Heard a
whisper of VK9GMW yesterday, but not a peep today. No long path, no
short path, no any path on any band.

Bands are OK in that we had a good opening to the Far East this
morning with a 9V and a YB worked on 20 as late as 12:30 PM local
time (a couple hours past prime.) However, Oceania seems to not be
as good as other days. YJ0MXJ was spotted on several bands, but also
not a peep here.

Hi Al,
I know North Carolina isn't Maine or the Atlantic provinces....

They have been hard to get. 160M at 10AM local. 80M too late.
Did manage to work them on 30M yesterday. However I'm logged as VK3KO.
They were on 20M at 2240Z LP, managed to work them there.
Not needed here, but it adds a click to the CQ Marathon totals for '09.

Yes, I saw YJ0MXJ spotted as well and could hear the pile-up -- as I could for the VK9s -- but nary a peep here either. OK -- there's nothing wrong with my antenna and receiver. I'm just in the wrong place :-(.

Not today, Al. Have heard VK9LA on 30/20 the last few days. Never strong but workable with a lot of effort. Heard a whisper of VK9GMW yesterday, but not a peep today. No long path, no short path, no any path on any band.

Bands are OK in that we had a good opening to the Far East this morning with a 9V and a YB worked on 20 as late as 12:30 PM local time (a couple hours past prime.) However, Oceania seems to not be as good as other days. YJ0MXJ was spotted on several bands, but also not a peep here.

Date: 2009-04-01 10:09:40 UTC
From: rmontemerlo
Topic: 9411 Message: 9417

Been tracking VK9L every day for the last week.

From MA I have had no problem working VK9LA on 40ssb, 30rtty, & 80ssb (greyline). Got them on 20rtty long path but it was really hard. Friends in both ME & MA have had a very hard time catching them. 17 is really strange. Prop says I should have a good opening every day. Western states are hearing them really strong and I have heard folks in NY, WMA, & NH work them on ssb. At this QTH absoulutely nothing on 17ssb. It is like I have a 17 meter firewall around the town.

Heard VP9M on 30cw but hoping they will try ssb or rtty at some point.

Log periodic on house attached tower about 35ft over house & 80 dipole so nothing elaborate here.

Good luck

In the recent (April 1) DXNL, it has been annouced that a rule change regarding qsl cards has gone into effect.

This was brought to my attention by a fellow amateur, and I followed it up on the DXNL site. Does not appear to be an April Fools thing.

Any body have any insite, or what it means? I'm mystified.

"DXCC Rule Change: At the request of the Program and Services Committee (PSC)
the DX Awards Committee (DXAC) investigated the impact of an amendment
to the DXCC rules. The DXAC and the PSC have unanimously decided to
bring into force the following rule from April 1, 2009, 0000Z:
To meet the growing outrages of direct-QSLs to put to an end only
bureau mediated QSL-cards will be credited for DXCC. Intended side
effect is a higher degree of organization of radio amateurs in the
respective national associations combined with a strengthening of the
IARU and the total of Amateur Radio."

From: RICHARD SOLOMON
Topic: 9425 Message: 9425

I worked a chap on 80 CW that deals only in IRC's, so I need some.

Anyone got 10 or 20 for sale ?

Interesting, he wants 2 IRC's, I thought only one was required, hmmm ...

That Buro Card only blurb today looks more & more promising !!!

Only one is required. I've never understood, in 23 years of sending for direct QSLs, why one (1) IRC is not enough to get a QSL card returned. I know many DX stations and managers ask for 2 or 3, but it makes no sense. Is there a better explanation that they just want twice as much as they need?

I will say, however, that if the DX wants 2 or 3 IRCs or 2 or 3 GSs, I send it because I WANT the card! :-)

This is just a personal opinion.....not to tell someone how to do something. That established.....I just refuse to use IRCs.....and green stamps for that matter. (I do throw in extra green stamps for rare ones or dx-expetions). The IRC route is just a PITA to me, and not sure it really helps in some ot the areas where the postal system doesn't know how to use it, much less what it is. Add to the fact that the guy on the other end still has to make the trip to the PO just to mail ur card back. Some cases, green stamps are illigal, and he can't qsl from a jail cell :) I think the paypal thing is pretty nifty.

I do buy the return stamps and stick'm on the return envelope.....so all he has to do is verify you in the log, drop the card in the mail, and you hang it up on the wall. If you want, cut a corner off the envelope so they can see there is no money in the envelope, and hopefully it passes throught the PO. I get about a 95% return and figure the other 5% are NIL's, or I just would not get them anyway, regardless of the green stamps. Granted it's more expensive.

I do have to admitt that I did want one so bad that I sent it regersitered! Damn...my card, sase, postage, etc. == almost 15.00! But I got my only A9 I have ever heard in 38 years!

Dale K8TS

BTW: I have to admit, I got suckerd pretty good on that DXCC thing :)

>aa5bt

Indeed, Derek, and the Merriam-Webster Dictionary defines minimum as "the least quantity assignable, admissible, or possible." So . . . were you still managing HC8N, and I sent you a SAE with a US 75-cent stamp on it, that would be the minimum you would need to return a card to Canada. It wouldn't do you any good if I put two 75-cent stamps on it (unless you soaked one off and used it for something else.)

I could also put $10 in, and if you demanded I did, and it was the only HC8 I *ever* worked, and there was no likelihood of ever working another one in the foreseeable future, I probably would put in $10. I would say a bad word about you when I sealed the envelope, but I'd do it! :-)

This doesn't mean that one IRC is not enough. It means the DX or the manager is not satisfied with breaking even. They want something for their trouble. That's why I usually send US managers a GS. 75-cents for the postage and 25 cents for the effort to put the card in the envelope. However, if I have US stamps, I sometimes just send the SASE.

I think this topic has been pounded to death, but my 2nd** most aggravating pet peeve remains the QRZ.COM entries that say "2 IRCs minimum or it goes back by the bureau." One IRC covers the postage. That's what IRCs are. The equivalent of the required return postage to send a letter by air mail to anywhere in the world. You don't need two.

** Number 1 pet peeve are brag DX spots. Today I finally figured out WK9GMW's pattern on 30M and found a W3 sending a 5NN. Whooppie! Got'em, I thought. Before the second N of the 5NN was sent, that same W3 spotted it with "EASY! QSX 10.1" Instantly the entire pileup moved from 10.107-109 to 10.110.1, 27 layers deep. It took me a few minutes to find him again down on 108.2 and darned if another W didn't spot that. After 1 spot we all knew he was on 10.104 QSX up, and we didn't need 15-20 subsequent spots

telling us where the lucky button pushers worked them. Sigh.

20 minutes later I did work them, but it wasn't made easier by all the "helpers" and their "look at me!" spots.

I'm going back in time some but the word "minimum" is key. It was explained to me that that minimum is the smallest weight unit for an an airmail letter. In some places this was, and may
still be the old style "onion skin" envelope. Those envelopes were furnished open and flat and
you wrote on it , folded it up, sealed and mail it. You could not put anything in the envelope and
be in the lowest weight class. Even a single post card was heavier than those envelopes.

Also known as Aerogrammes. Here:

http://en.wikipedia.org/wiki/Aerogram

That was the claim to legitimize the request for 2 IRC's years ago and may still be the case today
in some places. It was only in one of the last few postal increases that the weight for the lowest
rate in the US was increased from 1/2 to a full ounce. The combination of envelopes and QSL I
was using was such that I was right on the edge with 2 "Green Stamps" and when I wanted to send $2 I would send a $2 bill.

I think this topic has been pounded to death, but my 2nd** most
aggravating pet peeve remains the QRZ.COM entries that say "2 IRCs
minimum or it goes back by the bureau." One IRC covers the
postage. That's what IRCs are. The equivalent of the required
return postage to send a letter by air mail to anywhere in the
world. You don't need two.

I agree only 1 is required.

Interestingly, I have just started to look into minimum postage costs and it just takes one to check when one receives a card direct.

So far the minimum I have seen for cost for postage from EU to VK is 0.41 Euro.

So I reckon $1USD would suffice too.

I am guessing that was surface mail, it still got here though.

The insanity started prior to me and thee!

Back in the 60s when I was deeply involved in SWLing, IRCs were very much in use. The stations requested, in addition to your SWL reports, with SINPO, blah, blah, blah, a single IRC for surface mail return of your QSL card and two IRCs for air mail return.

The fight at the post office was the same as today - some people knew exactly what they were and how to use them while others didn't have a clue.

I was first licensed in 1978. In addition to direct and bureau, there were guys like W3KT (5 cents or 10 cents per QSL?) and a host of QSL managers - like W3HNK who is still doing it today.

Now there's eQSL and LotW. With the demise of many incoming bureaus all over the world, the options for getting the QSL have actually been increasing.

Back in the real olden-golden days QST ran an article for a 1KW amplifier using just one [1] 807. [Note for 'younger hams ... the 807 is a 35 watt output pentode ... er ... DeForest Valve ... er ... vacuum tube]

And, it is possible to build such an amplifier ... REALLY!!

The theory goes like this ... simply run the 807 in GG configuration with 400 VDC on the plate. This is very standard bias condition for the 807.

Now, in a GG configuration the driving power is in phase with the output power and ADDS to the output. This is very standard theory stuff. So, to get 1 KW from a single 807 simply drive it with 965 watts. I remember that there was a disclaimer of sorts in the article. The disclaimer stated that the plates turned very red very fast just before they melted. Date of publication: 1 April of course!

However, it was a very well written article full of theory, smoke and mirrors.

>world. You don't need two.

Not true - it pays for the MINIMUM postage for a letter to a foreign country. In some countries, airmail postage rates are different to different countries. The IRC can be exchanged for the MINIMUM rate.

The USPO would be quite justified in giving you only a 72 cent stamp for an IRC, since that is the airmail rate to Canada (perhaps Mexico is less, I'm not sure), and you would then need two of them if you were going to mail a letter to Europe (94 cents).

Someone can correct me if I'm wrong, but I've always understood this to be the reasoning behind DL stations/managers requesting 2 IRCs for mail to the US. It may not apply to everyone everywhere, and certainly a US station or manager doesn't need more than 1 IRC to respond to a QSL request from any other country.

Subject: Re: [DX-IS] IRC's For Sale ??

I'm going back in time some but the word "minimum" is key. It was explained to me that that minimum is the smallest weight unit for an an airmail letter. In some places this was, and may
still be the old style "onion skin" envelope. Those envelopes were furnished open and flat and
you wrote on it , folded it up, sealed and mail it. You could not put anything in the envelope and
be in the lowest weight class. Even a single post card was heavier than those envelopes.

Also known as Aerogrammes. Here:

http://en.wikipedia.org/wiki/Aerogram

That was the claim to legitimize the request for 2 IRC's years ago and may still be the case today
in some places. It was only in one of the last few postal increases that the weight for the lowest
rate in the US was increased from 1/2 to a full ounce. The combination of envelopes and QSL I
was using was such that I was right on the edge with 2 "Green Stamps" and when I wanted to send $2 I would send a $2 bill.

The guy that keeps the postage website notes:

If you Google Foreign Postage it's number one.

All I say about IRCs is that they have on the back of them that one is enough for return postage from any country that's a member of the UPU. I see no need for an IRC chart.

Your IRCs must be different from mine. Mine (expiring Dec 09)
say "... FOR THE MINIMUM POSTAGE.....", and that is the point.

The cost of mail from DL to HB0 is LESS than that from DL to W.

I will try to restrain myself from having to say this again for
a while...

Nope, the 807 is a pentode with a 6 volt filament and 5 pins on the base. The 1625 is basically the same tube with a 12 volt filament and a 7-pin base. Got a bunch around somewhere, The 1625's were used in the ARC-5 command transmitters (of which I have a couple around somewhere too.)

Guess I classify as an Olde Fahrt(tm)!

To all radio amateurs

SB DX ARL ARLD013
ARLD013 DX news

This week's bulletin was made possible with information provided by NC1L, the OPDX Bulletin, DXNL, 425 DX News, The Daily DX, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

MAURITIUS, 3B8. Mart, DL6UAA is QRV as 3B8MM until April 15. He is generally active on 20 meters around 1400z. QSL to home call.

RODRIGUES ISLAND, 3B9. Piotr, SP2JMR and Slavo, SP2JMB are QRV as 3B9/home calls until April 8. Activity is on all bands using CW and SSB. QSL to home calls.

BARBADOS, 8P. Richard, G3RWL is QRV as 8P6DR until April 24. Activity is on 160 to 10 meters using CW and digital modes. QSL via operator's instructions.

MALTA, 9H. Augusto, HB9TZA will be QRV as 9H3JR from April 4 to 14. Activity will be on the HF bands, including 6 meters, in his spare time. QSL to home call.

ANGOLA, D2. Vasil is QRV as D2QMN and has been active using RTTY on 20 meters between 1800 and 1900z. QSL via RZ3EC.

ANTARCTICA. Felix, DL5XL is a member of German team over-wintering from Neumayer III and is active as DP1POL until early 2010. He is active mostly on 40 and 20 meters using CW. QSL via DL1ZBO.

IRAN, EP. Sadegh, EP3HF has been QRV on 17 meters SSB around 0930Z. QSL direct.

ST. BARTHELEMY, FJ. Operators Oscar, EB1HF and Pablo, EC1DPM plan to be QRV as FJ/EB1HF or FJ/EC1DPM from April 7 to 12. Activity will be on 20, 15 and 10 meters using RTTY. QSL direct via EC1AE.

HUNGARY, HA. In commemoration of the 1848 attack on Hungary that prompted their independence, special event station HG160FNY is active until July 31. QSL via HA0DX.

NORWAY, LA. Fred, ON6QR will be QRV as LA/home call from Moskenesoy Island, IOTA EU-076, from April 8 to 12. Activity will be on 40 to 20 meters using CW and QRP power. QSL to home call.

BONAIRE, CURACAO, PJ2. Jan, PA4JJ is QRV as PJ2/home call from Curacao, IOTA SA-006, until April 11. Activity is on all HF bands using RTTY and possibly PSK31. QSL direct to home call.

SEYCHELLES, S7. Bernd, DL7UCX will be QRV as S79UCX from April 6 to 16. Activity is on the HF bands using mostly CW. QSL to home call.

GREECE, SV. Members of the Aegean DX Group are QRV as SX8P from Samos Island until April 12 in celebration of the 2500th anniversary and in honor of the memory of mathematician Pythagoras. Activity is on 80 to 6 meters using mainly SSB with various digital modes. They may also be active on Satellite AO-51. QSL via SV8CYV.

PALAU, T8. Operators JH0IXE and JA0FOX will be QRV as T88CW and T88NF, respectively, from April 4 to 12. Activity will be on 80 to 6 meters using CW, SSB, RTTY, SSTV and PSK31. QSL to home calls.

TURKEY, TA. Members of the Special Wireless Activity Team will be QRV as TC2FLH from the Fenerbahce Lighthouse, ARLHS TUR-021, on April 4 and 5. QSL via operators' instructions.

CANADA, VE. In celebration of the 50 years since the opening of the St. Lawrence Seaway, Canadian amateurs can use special callsign prefixes XL, XM, XN, and XO until May 31.

MELLISH REEF, VK9M. Operators George, AA7JV and Tomi, HA7RY are QRV as VK9GMW until April 6. Activity is on all HF bands. QSL via HA7RY.

CHRISTMAS ISLAND, VK9X. Haru, JA1XGI will be QRV as JA1XGI/VK9 until April 11. Activity is on all HF bands using CW and digital modes. QSL to home call.

INDIA, VU. Frank, DL4KQ, Sarath, VU3RSB and Jose, VU2JOS will be QRV as AT9RS from Grandi Island, IOTA AS-177, from April 5 to 7. North and South American stations QSL via W3HNK and all others QSL via DL4KQ.

CAMBODIA, XU. Nob, JA1FMZ will be QRV as XU7FMZ beginning April 6 for about six weeks. QSL to home call.

SYRIA, YK. Saad, N5FF is QRV as YK1BA until April 10. Activity is mainly on 80, 40 and 30 meters using CW, SSB and RTTY, from around 2000 to 2300z, and the 0200 to 0500z. QSL to home call.

THIS WEEKEND ON THE RADIO. The NCCC Sprint CW Ladder, LZ Open 40-Meter Sprint CW Contest, Montana QSO Party, ARCI Spring CW QSO Party, Poland DX Contest, Spain RTTY Contest, Missouri QSO Party, QCWA Spring QSO Party, RSGB RoPoCo 1 CW Contest, RSGB 80-Meter Club CW Championship, 144 MHz Spring Sprint will certainly keep contesters busy this upcoming weekend. The ARS Spartan CW Sprint is scheduled for April 7. Please see April QST, page 84 and the ARRL and WA7BNM contest web sites for details.

Now you're talking my language Jack!

And you will know how hard the plugs were to come by and how impossible it was to get a splined tuning knob for the BC454!!!!!

73, Lee ZL2AL - Another dinosaur!!

No 935
==========
*** 4 2 5 D X N E W S ***
**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

9A - Once again Zik, VE3ZIK will be active as 9A/VE3ZIK from Bilice, Croatia on 12-21 April. He plans to operate CW, SSB and digital modes on the HF bands, with an emphasis on 80, 40 and 30 metres. He also plans to operate SSB and CW on 20 and 40 metres from Ugljan Island (EU-170) and Pasman Island (EU-170) for one day. QSL via DO7ZZ (e-mail requests for bureau cards can be sent to ve3zik@...). [TNX VE3ZIK]
9H - Augusto, I2JJR will be operate holiday style as 9H3JR from Malta (EU-023) on 10-14 April. He plans to operate SSB mainly on 40 and 17 metres. QSL via home call. [TNX I2JJR]
C9 - The C91FC team [425DXN 919] now includes nine operators from Belgium and South Africa: Steffi/ON3AEO, Filip/ON4AEO, Jose/ON4CJK, Kath/ON7BK, Adele/ZR6APT, Deon/ZS6ABR, Lucas/ZS6ACT, Sid/ZS6AYC and Gert/ZS6GC. They will operate SSB, RTTY, PSK and CW on 80-10 metres from 9 to 13 April. QSL via ON4CJK, direct or bureau. Further information can be found at http://www.c91fc.be
GM - The website for the MM0RAI/p expedition to Rockall (EU-189) [425DXN 933] is now up and running at http://www.rockall.be/. The operators will be Patrick/ON4HIL, Theo/ON4ATW, Marc/ON6CC, Luc/ON4IA and Karel/ON5TN. They will attempt at landing on Rockall between 30 April and 1 May, and, depending on weather and sea conditions, they will be active with two stations on 80-10 metres SSB and CW for about 48 hours. QSL via ON4BR, direct or bureau. [TNX ON4ATW]
HA - In 1849 the Hungarian city of Debrecen was the capital of Hungary for a short time during the Hungarian Revolution and War of Independence. Commemorating the events of 160 ago, special event station HG160FNY (QSL via HA0DX) will be active from 1 April until 31 July. Look for also five HA160 individual special prefixes (HA160DX, HA160KA, HA160NDE, HG160BW and HG160JUV) to be aired during that time frame. Further information on this event and the relevant award can be found at www.qrz.com under HG160FNY. [TNX HA0HW]

HS - Tony, E21IZC and others will be active as E21IZC/p from Lipe Island (AS-126) on 12-13 April. They plan to operate SSB and CW on 20 and 40 metres. QSL via E21IZC. [TNX The Daily DX]
I - Walter, IN3XUG will be active as IC8/IN3XUG from Ischia Island (EU-031, IIA NA-001) on 1-10 April. Look for him mainly on 20 and 40 metres SSB and RTTY. QSL via home call. [TNX IN3XUG]
JT - JH1AWN and three members of the Akita DX Association (JA7AGO, JA7LU and JA7ZP) will be active from Ulaanbaatar, Mongolia on 21-28 April. They will operate CW, SSB, RTTY and PSK31 from two different locations, JT1KAA's shack and their hotel. Plans are to be QRV on 160-6 metres, but 160m activities will depend on local conditions. The callsigns and relevent QSL routes are: JT1AWN via JH1AWN, JT1AGO via JA7AGO, JT1LU via JA7LU, JT1ZP via JA7ZP. Cards can be sent direct or via the JARL bureau. [TNX JA1ELY]
JW - Francois, F8DVD will be active once again from Spitsbergen Island (EU-026), Svalbard on 18-26 April. Look for him to operate as JW/F8DVD from the Longyearbyen ARC, with main activity on 40 and 20 metres SSB and CW. His 16-year-old son Victor, F0EPL will be with him. QSL via home call, direct or bureau. [TNX F8DVD]
KH4 - The dates for the K4M expedition to Miday Island [425DXN 932] are now set for 9 through 19 October. Further information, including details on how contribute to the expedition, can be found at www.midway2009.com.
KL - The KL7RRC IOTA expedition to Ogliuga Island (NA-233, new one) [425DXN 923] is now expected between 23 July and 5 August, IOTA Contest included. Preliminary information can be found at http://www.na-234.com/index.html (click on "NA-233 Plans").
LA - Fred, ON6QR will be active as LA/ON6QR from Moskenesoy Island (EU-076) on 8-12 April. He will operate CW QRP on 40-40 metres during his evenings. QSL via home call. [TNX www.rsgbiota.org]
OA - Marco/CE6TBN, Rene/DL2JRM, Zoli/HA1AG and Jorge/OA4BHY will be active as 4T6I from Isla La Leona (SA-098) on 10-13 April. They plan to operate CW and SSB on 10-80 metres with two stations. QSL via DL2JRM, direct or bureau.
OZ - Ben, DO1BEN will be active again as OZ/DO1BEN from Lolland Island (EU-029) on 9-17 April. He plans to operate SSB and digital modes on the HF bands. QSL via home call, direct or bureau. [TNX www.rsgbiota.org]
PY - A large group of operators from the Teresina DX Group will be active as ZW8BBC from Ilha das Canarias (SA-072) from 29 April to 3 May. Plans are to operate SSB, CW and RTTY on 160-6 metres. QSL via PS8DX. [TNX PS7AB]
S7 - Bernd, DL7UCX will be active as S79UCX from the Seychelles on 5-17 April. He will operate holiday style on 10-80 metres mainly CW, running 100 watts into dipoles and a vertical antenna. QSL via home call, direct or bureau. The log will be uploaded to LoTW. [TNX NG3K]
SP - Eleven special event stations will be active from Poland on 16-19 April to commemorate the World Amateur Radio Day (18 April): 3Z0WARD, 3Z2009WARD, HF2009WARD, HF84WARD, HF9WARD, SN0WARD,

SN2009WARD, SP0WARD, SP2009WARD, SQ0WARD and SQ2009WARD. QSL via SP2FAP. Further information can be found at http://www.ward.pzk.pl/ [TNX SP2FAP]
T8 - JH0IXE (T88CW) and JA0FOX (T88NF) will be active from Palau on 4-12 April. They plan to operate CW, SSB, RTTY, PSK31 and SSTV on 80-6 metres. QSL via home calls. [TNX The Daily DX]
TA - The TC Special Wireless Activity Team (www.tcswat.org) will operate as TC57A on 22-27 April in remembrance of the role played by the 57th Infantry Regiment of the Turkish Fifth Army during the Dardanelles Campaign in 1915. QSL via TA1HZ. [TNX TA1HZ]
TK - Joachim, F6BUL will be active holiday style as TK/F6BUL from Corsica (EU-014) on 8-15 April. He will operate QRP on 40-10 metres CW and SSB. QSL via home call, direct or bureau. [TNX F5NQL]
TK - Look for Gabriele, TK/IZ5FDD and Alessandro, TK/IW5ELA to be active from Corsica on 20-24 May. They plan to operate SSB and CW on 40-6 metres. QSL via home calls, direct or bureau. [TNX IZ5FDD]
VK9M - The VK9GMW operators have passed the 7,000 QSOs mark, with 80 metres as their most productive low band. The weather continues to be fine and they expect to remain on Mellish Reef until 10 April at least. Regular updates and on-line logs can be found at http://www.vk9gmw.com. QSL via HA7RY.
VU - Yamini, VU2YAM and Manju, VU2SMS have joined the team that will operate as AT9RS from Grandi Island (AS-177) between 5 and 7-8 April [425DXN 934]. They will run two stations, one for SSB and one for CW, with verticals and dipoles on the following announced frequencies:
CW 28040, 24920, 21040, 18098, 14040, 10114, 7030, 3530 kHz
SSB 28560, 28460, 24950, 21260, 18128, 14260, 7055, 3765 kHz
QSL via W3HNK (South and North America) and DL4KQ (rest of the world). Further information can be found at either www.vu3rsb.org and www.mdxc.org/at9rs [TNX VU3RSB]
XU - Eddy, XU7AFU (CW) Wim, XU7TZG (SSB and PSK31) will be active as XU7KOH from Koh Russei (Bamboo Island, AS-133), on 3-6 April. QSL via ON7PP (direct only). [TNX The Daily DX]
XU - Reijo, OH4MDY will be active again as XU7MDY from Shinanoukville, Cambodia on 9-21 April. He plans to operate CW, SSB and some digital modes on 80-10 metres. QSL via home call, direct only. [TNX NG3K]

NORTHERN TOUR ---> Maurizio, IW4BLZ will be active on 80-6 metres as OY/IW4BLZ from the Faroe Islands on 27-29 July, and as TF/IW4BLZ from Iceland from 31 July to 11 August. QSL via home call, direct or bureau. [TNX IK3AES]

MMAA CW CONTEST ---> The Manchester Mineira All America CW Contest, sponsored by the Juiz de Fora CW Group, will be held on 16-17 May. Further information, including last year's event results, can be found at www.powerline.com.br/cwjf. Ed, PY4WAS says that a number of major changes will be introduced in 2010.

RADIO MARITIME DAY ---> On 11-12 April (from 12 UTC to 12 UTC) merchant marine radio officers from several countries will be active on the HF bands (1824, 3520, 7020, 14052, 21052 and 28052 kHz) to meet amateur radio operators for the Radio Maritime Day special event. Further information can be found at http://www.radiomaritimeday.org

SP-DX CONTEST ---> Organized by the Polish Amateur Radio Union (PZK) and SP DX Club, the SP DX Contest will be held from 15 UTC on 4 April through 15 UTC on the 5th, on 160, 80, 40, 20, 15 and 10 metres Phone and CW. Complete details can be found at http://www.spdxcontest.info/en/index.php [TNX SP9MRO]

TOP LISTS ---> The latest Topband, Topmode and Toplist listings are now available at http://www.425dxn.org/awards/toplist/index.html. Please note that QSOs confirmed through LoTW or included in on-line logs are eligible for listing. Send send your scores, as well as any request for further information, to Erminio Pandocchi, I2EOW (i2eow@...)

UK POSTAL RATES ---> Postal rates in the United Kingdom will rise on 6 April. The new airmail rates will be as follows:
Europe Rest of the world
up to 10 grams GBP 0.56 GBP 0.62
up to 20 grams GBP 0.56 GBP 0.90
up to 40 grams GBP 0.81 GBP 1.35

WARD AWARD ---> The WARD (World Amateur Radio Day) Award commemorates the World Amateur Radio Day celebrated by IARU on 18 April each year. The award is sponsored by MK QTC (the Polish Amateur Radio Journal) with the Polish Amateur Radio Union's support, and it is issued to licenced amateurs and SWLs for contacts made/heard between 00.00 and 23.59 UTC on 18 April. Details can be found at http://www.ward.pzk.pl [TNX SP2FAP]

WCA ---> The World Castles Award is for working stations operating from castles located in Belarus, Belgium, Czech Republic, France, Germany, Great Britain, Ireland, Italy, Poland, Russia, Slovakia, Switzerland and Ukraine. Complete information can be found at http://www.wcagroup.org [TNX RN1CW]

Propagation Forecast Bulletin 14 ARLP014
>From Tad Cook, K7RA
Seattle, WA April 3, 2009
To all radio amateurs

SB PROP ARL ARLP014
ARLP014 Propagation de K7RA

Our Sun is in the news again, unfortunately not due to any hoped for activity, but for the eerie quiet instead. The Sun is surprisingly calm by several measurements -- including the large number of spotless days -- average 10.7 cm solar flux, and low solar wind pressure.

According to an April 1 release from NASA that I wish was just an April Fool's joke, we are witnessing a 50-year low in solar wind pressure -- a 20-percent drop since the mid 1990s. Of course the advantage to this is geomagnetic storms are very rare. But that is a disadvantage for VHF operators who enjoy using aurora to propagate radio waves.

The news release at http://tinyurl.com/czphz7 claims that 10.7 cm solar flux is at a 55-year low, although this figure has only been tracked for the past 65 or so years. They also tell us that 2008 had more spotless days than any year since 1913 (see http://tinyurl.com/cwfddc).

In this bulletin we have calculated a running 3-month average sunspot number, and the average for January through March -- centered on February -- at 2.1 was the lowest 3-month average since July and August of 2008.

Here are the averages since January 2007.

Jan 07 22.7
Feb 07 18.5
Mar 07 11.2
Apr 07 12.2
May 07 15.8
Jun 07 18.7
Jul 07 15.4
Aug 07 10.2

Sep 07 5.4
Oct 07 3.0
Nov 07 6.9
Dec 07 8.1
Jan 08 8.5
Feb 08 8.4
Mar 08 8.4
Apr 08 8.9
May 08 5.0
Jun 08 3.7
Jul 08 2.0
Aug 08 1.1
Sep 08 2.5
Oct 08 4.5
Nov 08 4.4
Dec 08 3.7
Jan 09 2.3
Feb 09 2.1

Using this table, we have been fooled before, thinking that an up-trend would continue. Take a look at the periods centered on October 2007 or August 2008.

The first Propagation Forecast bulletin of 2008 (http://www.arrl.org/w1aw/prop/2008-arlp001.html) noted that one year prior we commented that 2007 would likely see the transition from Cycle 23 to 24. Then in the fifth bulletin of last year (http://www.arrl.org/w1aw/prop/2008-arlp005.html) we saw that uptick in the 3-month moving average, suggesting that the new cycle was commencing. The same bulletin noted that four years prior to that, in 2004 a reader asked if we might be at the end of Cycle 23.

We've looked at various predictions for the next cycle, and that same NASA article referenced above has a plot of the various predicted maxima at http://tinyurl.com/cjv35r. Quite a range! At one time we were excited by the prediction of Dikpati et al, because it foretold a robust Cycle 24. But note in the chart (that you can zoom in on by clicking) there were actually four predictions more optimistic that her team's projection. My favorite, since it is the most wildly optimistic, is the 2005 forecast by Horstman, which crunched data from the last five solar cycles, starting with 19, of course, for a sunspot peak of 185 in 2010 or 2011.

Right now there are no sunspots, but the 10.7 cm solar flux is up a bit lately. The latest prediction has the usual quiet planetary A index at 8 for April 3-4, then back to 5, then 15 and 10 for April 9-10. Predicted solar flux is 71 for April 3-9, then back to 70 for April 10-22, then to 72 for April 23 and into May.

Recent mail indicates operators are still enjoying the HF bands, even without sunspots. Matthew Chambers, W1JEQ of Newark, Missouri

says he had fun working HI3TEJ, ZW5B, YW4D, PY6HD, and several U.S. stations in a recent DX contest, using just a barefoot transceiver and a 20 meter monoband mobile whip attached to a fire escape. He notes, "If this is what zero sunspots can sound like then I can't wait to hear the bands with sunspots!"

Tim Hickman, N3JON of Timonium, Maryland wrote, "After a more quiet than normal week, if that is even possible, the bands were popping late afternoon and early evening on Thursday April 2 2009. On 20 meters strong signals from CN8KD at 2100 show up in Maryland then VKs and JA start showing up on 20 meters then 2 hours later AG1AB is working the east cost with solid 59s on 40 meters then on the spotters net reports start showing up of DX on 10 meters which I can hear but not well enough to work. It was nice to see the bands come alive at least for a moment - we all can hope this is the harbinger of things to come!"

Russ Ward. W4NI of Nashville, Tennessee likes the new book "Midlatitude Ionospheric Dynamics and Disturbances" by Kintner and Coster, although he says it is very advanced and notes it is "not for the unmotivated. I noticed also that the book is very expensive."

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at, http://www.arrl.org/tis/info/propagation.html. For a detailed explanation of the numbers used in this bulletin, see http://www.arrl.org/tis/info/k9la-prop.html. An archive of past propagation bulletins is at http://www.arrl.org/w1aw/prop/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://www.arrl.org/qst/propcharts/.

Instructions for starting or ending email distribution of this bulletin are at http://www.arrl.org/w1aw.html#email.

Sunspot numbers for March 26 through April 1 were 0, 0, 0, 0, 0, 0, and 0 with a mean of 0. 10.7 cm flux was 69.1, 71.6, 70.6, 70.9, 70.9, 71.2, and 70.8 with a mean of 70.7. Estimated planetary A indices were 7, 4, 4, 5, 4, 4 and 4 with a mean of 4.6. Estimated mid-latitude A indices were 6, 2, 2, 4, 3, 2 and 3 with a mean of 3.1.

9452. 3B9/SP2JMB

Yahoo group: DX-IS (2009)
Date: 2009-04-04 14:35:12 UTC
From: Paul M Dunphy
Topic: 9452 Message: 9452

Anyone in NA hear 3B9/SP2JMB yet? I see him spotted a lot, so
he's quite active. I dutifully go to the frequency indicated and
never hear him. :-(You'd think there would be a whisper on some band.

He's there because I can usually hear a moderate pileup up a
bit. Maybe he has a modest antenna and low power. Anyone know what
he is running?

73, Paul VE1DX

You aren't alone Paul. Same to me ... never heard here
on any band or mode. 73

He must be running low power or just wire antennas, Fred. You
are in a better location to hear him than I am. Oh well, maybe one
of these days he will rise out of the noise!

Paul and Fred,

I worked 3B9/SP2JMB on Apr. 2 at 0250Z on 20 CW short path. Not loud but only a small pileup and fairly easy to work. I'm not sure, but I think the amp hadn't warmed up, so it was with 100 W. I'm in central AZ, so maybe 1/2 way between you guys is the magic spot :)

73, Bud N7CW

9456. Vertical vs Beam

Yahoo group: DX-IS (2009)
Date: 2009-04-05 05:39:52 UTC
From: John Geiger
Topic: 9456 Message: 9456

I have a question for the group about experiences with different antennas:

I was looking at a recent issue of CQ at the local bookstore tonight (it wasn't the April issue) and in a column dealing with semi stealth antennas, they mentioned that a 3/8 or 1/2 vertical will show comparable performance to a 2 element yagi. Is this true? Will such a vertical really do as good as a 2 element beam?

Also, how would a roof mounted 1/4 wave vertical compare to a 2 element tribander at a low height-like 25 feet or so?

73s John AA5JG

9457. Re: [DX-IS] Vertical vs Beam

From: John Peters
Topic: 9456 Message: 9457

The fundamental laws of physics do not change with advertising. The rules I heard in 1948 still apply: The BIGGER and HIGHER the BETTER. No vertical beats a yagi. At the same height 4 el are better than 3. The angle of radiation is determined by the elevation above ground. LOWER gives you a higher angle. Ideally a motorized tower and big yagis let you vary the height for the optimum angle. You can prove it to yourself in a long ragchew by varying the height as the band changes! You can keep the signal level high for a long time. I used to keep a sked with CN8 from Calif and a 20 ft difference in height changed the signals from S9 to nada. I KNEW he was there, and just ran the tower up and down for max signal. And again if he started to fade.

A vertical IS better than nothing. The best "stealth" is a dummy load.

To paraphrase John Peters, something an old European engineer told me back in the '60s:

The measure of an antenna SYSTEM is the tolal amount of metal above ground

While you're absolutely right, John, as usual you fail to acknowledge that most of us are not in your financial position and WE don't have large plots of land on which to plant aluminum trees. When I work DX it is because I work at it -- I don't just open my mouth or send my call on CW. It would be nice (I would like to think) if I could do that but I'd miss the fun of the chase.

Just did a search for 3B9 on DX Summitt.....only 3 of the last 100 spots were from US and I don't recall any VE (although I was not looking for). Spots were about evenly devided between SP 'trst, and some WARC. Maybe we see more of them once contest is over.

He must be running low power or just wire antennas, Fred. You are in a better location to hear him than I am. Oh well, maybe one of these days he will rise out of the noise!

>
>Dale K8TS

Thanks for the info, Dale. Glad to hear it's not just me who
can't hear him. That area of the world isn't great for NA, but you'd
think there would be more spots. Anyhow, that's the way it goes. I
believe he is there for awhile longer, so maybe we'll get a shot at
working him.

Ohio/Penn DX Bulletin No. 903

The Ohio/Penn DX PacketCluster
DX Bulletin No. 903
BID: $OPDX.903
April 6, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q, NG3K, N4AA & QRZ DX, WB4PVT, K8YSE, KU9C, DK8JB, DL2SBY, DL7MAE & The DX News Letter, DX World of Ham Radio Web Site, F5NQL & UFT, G0IAS, HA0HW, I1JQJ/IK1ADH & 425 DX News, I2JJR, IK7JWX, ON4ATW, ON5TN, Pete's-DX-Newsdesk, PS7AB, PS8ET, PY4WAS, RSGB IOTA Web Site, SV1JG, VA3RJ & ICPO, VHF-DX-Portal (MMMonVHF), VK6JB, VU3RSB and ZL2IFB for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 29th/March, through Sunday, 5th/April there were 229 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 3X, 4J, 4L, 4O, 4S, 4U1U, 4X, 5B, 5H, 5N, 5R, 5U, 5V, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 9A, 9H, 9J, 9K, 9L, 9M2, 9M6, 9Q, 9V, 9Y, A4, A5, A6, A7, A9, AP, BV, BY, C3, C9, CE, CE0Y, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JD/m, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, S2, S5, SM, SP, ST, SU, SV, SV5, SV9, T2, T33, T7, T8, TA, TF, TG, TI, TJ, TL, TN, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V4, V5, V6, V7, V8, VE, VK, VK9C, VK9L, VK9M, VK9X, VP2E, VP2V, VP5, VP8, VP9, VQ9, VR, VU, XE, XU, XW, XX9, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD9, ZF, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

2008 MMAA CW CONTEST RESULTS. The results of "2008 Manchester Mineira All America" (MMAA) CW Contest are now available at:
http://www.powerline.com.br/cwjf
The CWJF Web site also has photos and commentaries of the participants at: http://www.powerline.com.br/cwjf/fotos_ing.php
The CWJF group states, "If you were one of the participants, our thanks,

and if you did not participate in 2008, you wait to have the HONOR of your valuable participation in 2009." PLEASE NOTE: In 2010, the Manchester Mineira All America CW Contest will be expanded to include the five continents and to separate the modes of CW and SSB into two different dates. Details will be forthcoming.

3D2, FIJI (IOTA Op). Jan, OK2ZAW, will be on a holiday DXpedition in May and will be active as 3D2ZW. He plans to activate a few IOTA using his IC-706 (w/100 watts) into a vertical and dipole antennas. QSL via his home callsign, direct or by the Bureau. His schedule is as follows:
May 1-8th - Nadi, Viti Levu Group (OC-016); callsign 3D2ZW/p
May 2-4th - Bounty Island (OC-121); callsign 3D2ZW/p
May 4-6th - Manta Ray, Yasawa Group (OC-156)
May 6-8th - Botaira Beach Res., Yasawa Group (OC-156)

40M DX HUNTERS NET. Net Controller John, VK6JB, informs OPDX that he has been in the hospital for 7 weeks and is still recovering. He states, "I have had a skin graft which is healing slowly and is still quite painful. Others were trying to run the net while I was away but conditions were bad and other problems persisted to make it difficult. As of this week, we will be back in full swing with the net, so I hope that you will be able to join us. Our regular nets are as follows: Wednesdays, Fridays and Saturdays -- Usual time is at 1200z. The net is on 7093 +/- QRM. So, starting April 8th, come and join us. We know that conditions are not good but there have been some quirky openings on 40M, so come and be part of the net. Hopefully you can make a contact with a station you really need (a QSL or new country)." For more info about the net and the 40m group, please send an E-mail to: vk6jb@...

5C, MOROCCO (Update/IOTA Op). Alfredo, IK7JWX, updates OPDX on the QSL and log search information for the upcoming DXpedition to activate Mogador Island (AF-065), April 19-25th. He states, "Our plan is to upload logs at least once a day, so you can use the LOGsearch page to see if you're in the log starting the day after your QSO(s). The online lookup function cannot correct any problems we discover in the logs. We will correct them when back home. If your callsign is not in the log and you think it should be, please use the LOGsearch by date and control band and UTC time. Only if you find a typing error in your call, send an E-mail from the form. QSL processing will be handled as follows:
* For 5C2A, 5C2B, 5C2C, 5C2F, 5C2J, 5C2L, 5C2SG, 5C2Z: via IK7JWX, by the ARI Bureau or direct to:
Alfredo De Nisi, PO Box 218, 73100 LECCE Centro, ITALY
* For 5C2Y only: via I0SNY, by the URE Bureau or direct to: NICOLA SANNA, Via Bartolomeo Grazioli, 26, 06132 - S. SISTO (Perugia), ITALY
* Stations in the pacific Area (only zone CQ 28,29,30,31,32) for all callsigns: via VK4FW, by the bureau or direct to:
BILL HORNER, PO BOX 612, CHILDERS, 4660, AUSTRALIA
Direct QSLing requires a SASE and a minimum payment of 3 USDs or 2 Euro. Incomplete requests will be returned via bureau. All surplus funds received will go to the 5C2 DXpedition. If you wish to contribute separately for the 5C2 DXpedition, please click on the 'Donations'

button on the left (on the Web page). You can use also the 'Online QSL Request System' (OQRS) from the LOGsearch menu if you would like to receive your 5C2 QSL automatically sent through the QSL bureau or automatically mailed to you. In this last case your payment should be made via Paypal; you do not need to send us your card. If you use the Online QSL Request Service, please do not send any further cards via the bureau or direct!" For more details, please their Web page at: http://www.mogador2009.altervista.org

8P, BARBADOS (NA-021). Richard, G3RWL, is once again active as 8P6DR from here between now and April 24th. Activity will be holiday style on 160-10 meters using CW and the Digital modes. DO NOT LOOK FOR HIM ON APRIL 8th -- It is his wedding day! Over the past weekend Richard was active on 40/30/20 meters CW. QSL via his home callsign, direct or by the Bureau (E-mail requests for bureau cards can be sent to: g3rwl@...

8Q, MALDIVES. Cliff, SV1JG, will be active as 8Q7SV between April 29th and May 5th. Activity will be mostly CW and digital modes on all bands. QSL via SV1JG, direct or by the bureau.

8R, GUYANA. Operators Dan/KE7TBB and his father Dan/N7EAA will be active as 8R1AD between April 20th and May 3rd. Activity will be on 20 meters using CW, SSB and PSK31. They plan to look for stations who are young ham operators and running low power (kilowatt and under). QSL via N7EAA.

9A, CROATIA (IOTA Op). Zik, VE3ZIK/DO7ZZ, will once again be active as 9A/VE3ZIK from Bilice (Croatian coast) between April 12-21st. Activity will be only on 40 and 20 meters CW/SSB. There will be a one day operations from Ugljan Island (EU-170, CI-134) as well as Pasman Island (EU-170, CI-085). QSL via DO7ZZ, bureau 100%. LoTW and eQSL is also "OK". Zik really prefers paper QSL cards.

9H, MALTA (EU-023). Augusto, HB9TZA/I2JJR, will be on a short holiday in Bugibba (JM75EW), St. Paul's Bay, between April 9-14th. His callsign will be 9H3JR, but will sign /P around the islands if the weather is "OK". His holiday style operations, both /P and from main QTH, will mainly be SSB on 40 and 17 meters, but any band is possible (80-6m). He will use a FT817 for portable operations, and an IC7000 with AH4 for his fixed operations. The antennas will be a long wire, dipoles or a 10m fishing rod, depending on band conditions, places and space available. QSL via his home callsign.

C9, MOZAMBIQUE (Another Chance!). If you missed the C91TX operation you will have another chance to work another team of operators on a DXpedition to Mozambique, and they will sign C91FC from April 9-13th. The "Fox Charlie DXpedition" team is made up of the following operators: Philip/ON4AEO, Kath/ON7BK, Sid/ZS6AYC, Adele/ZR6APT, Gert/ZS6GC, Lucas/ZS6ACT, Jan/ZS5JC, Deon/ZS6ABR, Jose/ON4CJK, Herman/ZS5LH and Steffi/ON3AEO. They hope to activate the following bands, 80/40/20/17/15/12/10 meters using CW, SSB, RTTY and PSK. The QSL Manager is ON4CJK. Send QSLs either by the Bureau or direct. It is requested that direct cards be accompanied with 1 IRC or

2 green stamps with a self addressed envelope (QSLs without this, QSLs will be returned via the Bureau). The QSL address is: JOSE DUYCK, MOLENAKKER 56, 8740 EGEN, BELGIUM. More information regarding the DXpedition can be obtained from their Web site at: http://www.c91fc.be

CT, PORTUGAL (Lighthouse Activity). Members of the Algarve S.T.A.R. DX Team are planning to activate a new lighthouse on April 18th between 0700-1300z. Activity will take place from Doca Olhao (Parsena Olhao) West Lighthouse (ARLHS: POR-129, DFFA (Algarve Lighthouse Award) Fa-32). Callsign will be announced later. Look for updates and more informations at: http://algarvedx.com

CT3/CS9, MADEIRA ISLANDS. Operators Ulf/DL5AXX and Frank/DL8WAA will be active as CS9L during the CQWW WPX CW Contest (May 30-31st) as a Multi-Single entry. QSL via DJ6QT. They are looking for another operator to join their team. If interested, send an E-mail to: dl5axx@...

DP1/DP0L, ANTARCTICA (AN-016). Felix, DL5XL, (member of the first German over wintering team) is now active from the German Antarctic station "Neumayer III" using his personal DP1POL callsign and working CW mostly on 20 and 40 meters. Felix will be at Neumayer 3, until early 2010. QSL via DL1ZBO. A new WAP reference number has just been issued to the Georg Von Neumayer III Station as WAP DEU-08. More details can be found on the WAP Web site (under News & Information page) at: http://www.waponline.it

DU, PHILIPPINES (IOTA Op). Max, M0GHQ, now active from here as DU9/M0GHQ until the end of April, plans to activate the following islands sometime during his stay: Cebu Island (OC-129), Mindanao Island (OC-130), Samal Island (OC-235) and Leyte Island (OC-129). Activity will be on 160-10 meters on SSB, PSK and RTTY using 100 watts and wire antennas. There may be some 6 meter operations. This past weekend Max was heard on 20 meters RTTY. QSL via his home callsign, direct or by the bureau.

HG160, HUNGARY (Special Event). Hungarian amateurs from the city of Debrecen will be active as HG160FNY (as well as special individual callsigns) until July 31st. Activity is to remind everyone of the historical event 160 years ago (in 1849) where the Austrian army occupied the Capital city (back then was Debrecen) and Transdanubium. Look for activity on all HF bands including VHF/UHF using various modes (including digital). QSOs are good towards the Commemorative Diploma. The principal special callsign will be HG160FNY with different operators. QSL Manager is Zoli, HA0DX. Special individual callsigns announced are: HA160DX (Zoli/HA0DX), HA160KA (Istvan/HA0KA), HA160NDE (Vince/HA0NDE), HG160BW (Imre/HG0BW) and HG160JUV (Vili/HG7JUV). Stations with individual special callsigns will not have QSL Managers. QSL cards should be addressed to the Central QSL Bureau in Budapest and should be handled as a conventional card. A special QSL card will be issued for each contact with a special station. For the Commemorative Diploma, you need one contact with a HG160FNY station and two more contacts with stations participating in the event with two different callsigns, independent of mode or frequency. For more details, please visit the following Web pages:

http://www.qrz.com/db/HG160FNY http://www.ha0ka.fw.hu
http://www.mrasz.hu http://www.deol.hu

IOTA NEWS.....
AS-126. Operator Tony/E21IZC and possibly others will be active as
E21IZC/p from Lipe Island, April 12-13th. Activity will be
on 40/20 meters using CW and SSB. QSL via E21IZC.

AS-177. Operators Sara/VU3RSB, Frank/DL4KQ, Jose/VU2JOS, Yamini/VU2YAM
and Manju/VU2SMS are now active as AT9RS from Grandi Island
until April 8th. The following suggested frequencies were
announced:
CW - 28040, 24920, 21040, 18098, 14040, 10114, 7030 and 3530
SSB - 28560, 28460, 24950, 21260, 18128, 14260, 7055 and 3765 kHz
There are two regional QSL routes. QSL via W3HNK (For North/South
America) and DL4KQ (rest of the world). For more information,
please visit the following Web pages: http://www.vu3rsb.org
http://www.mdxc.org/at9rs

EU-076. Fred, ON6QR, will be active as LA/ON6QR from Moskenesoy
Island, Norway, between 2100z, Wednesday, April 8th, and
0800z, Sunday, April 12th. Activity will be only CW running
QRP (5 watts) and mainly on 40-20 meters. QSL via his home
callsign.

EU-189. Theo, ON4ATW, reports that a Belgian team of five "well
prepared and trained Dxpeditioners" will attempt a landing
on Rockall Island between April 30th and May 1st. Depending
on the weather and sea conditions, they will be on the air
with two stations using the callsign MM0RAI/p for about 48
hours. Suggested frequencies are:
Band SSB Extra CW
---- ----- ----- ------
80m 3763 up 5 kHz 3863 RX 3516 up
40m 7063 or 7163 7236 RX 7016 up
30m ----- -- 10116 up
20m 14263 up 5 kHz -- 14016 up
17m 18136 up 5 kHz -- 18084 up
15m 21263 up 5 kHz -- 21016 up
12m 24963 up 5 kHz -- 24906 up
10m 28463 up 5 kHz -- 28016 up
Operators mentioned are: Theo/ON4ATW, Patrick/ON4HIL, Luc/
ON4IA, Karel/ON5TN and Marc/ON6CC. QSL Manager is Carlo,
ON4BR. Please check their Web site for latest news and last
minute updates at: http://www.rockall.be
ADDED NOTES: Rockall is the summit of an old volcano located
between the north tip of Scotland and Iceland, sticking out 20
meters above the Atlantic. Landing on the 500 square meters
rock is very difficult as it has steep slopes at all sides.
The area is infamous for its high seas and very changeable
weather all through the year. For DXCC purposes, it counts

as Scotland (GM).

SA-072. Members of the Teresina DX Group are preparing a DXpedition to the Canary Island (DIB MA-05, DFB MA-11) on the coast of Piaui, Brazil, between April 29th and May 3rd. Callsign will be ZW8BBC. Activity will be on 160-10 meters using CW, SSB, PSK31 and RTTY, including 6 meters, 2 meters (SSB/FM) and the satellites (SSB/FM). Satellites mentioned are: AO-7 (A and B), FO-29, AO-51, VO-52, SO-50 and ISS in repeater mode, if activated. QSL via PS8DX (QRZ.com address): Operators mentioned are: PS8BBC, PS8DX, PS8ET, PS8FSM, PS8HF, PS8JN, PS8NF, PS8PY, PS8RF and PS8TV.

HAMCALL WORLDWIDE CALLSIGN DATABASE NOW TOPS TWO MILLION CALLSIGNS. The Web site at "HamCall.net" grows in popularity and content. It contains data from over two hundred countries. "Buckmaster Publishing" is proud to announce their HamCall Callsign Database now exceeds 2,000,000 world-wide callsigns. First issued in 1989 on CD-ROM, HamCall began with only U.S. callsign data then added International listings in 1993. Since then the database and its features have grown steadily each year.
HamCall is the world's largest callsign database and is available on CD-ROM and on the Internet at http://hamcall.net. A typical callsign listing includes mailing address, e-mail address, accurate latitude/ longitude, grid square, QSL manager, previous callsigns, photo and much more. A new HamCall CD-ROM is published each month.
Buckmaster Publishing is also known for its 6, 7, and 8-Band Off-Center-Fed (OCF) dipole antennas at <http://hamcall.net/7bandocf.html>, Great Circle Maps (Azimuthal Equidistant), and Name Badges. Buckmaster also hosts the web site of the popular CQ Magazine Archives at: http://hamcall.net/cq
Buckmaster products can be found at amateur radio dealers across the U.S. and are widely distributed to over 200 countries by the publisher. For further information, contact: Jack Speer, N1BIC, Buckmaster Publishing, 6196 Jefferson Hwy, Mineral, VA 23117 --or-- info@...

HB0, LIECHTENSTEIN. Kasimir, DL2SBY, will be active from here between April 24th and May 4th. Activity will be on HF bands (80-10m) using CW, SSB and RTTY. Equipment will be a TS2000, FT900AT, Ameritron AL811, HF9V vertical and a monoband vertical for 30/40m. Activity will also take place on 13cm and 23cm using EME. Equipment will be a FT726R, Dish 3, 7m, and 2 amplifier for both bands. Kasmir will use two separate callsigns for this operation. For the HF bands, he will use HB0/DL2SBY and for the EME activity will sign HB0/DF1SR. QSL via DL2SBY, by the Bureau or direct.

KH4, MIDWAY ISLAND (Update). It was announced this past week by team co-leaders Tom/N4XP and Dave/WB4JTT (edited): "We are pleased to announce the anticipated dates for the DXpedition are now set for October 9-19th. These dates have been selected to allow maximum operation for the eleven days we will on the island and most importantly provide Midway Island over two weekends. Logistical planning is under way and equipment is

being arranged. Plans for six stations to be located in two separate locations are proceeding with two antenna fields feeding these two operating sites. Modes will be CW, SSB and RTTY with at least one station on 20 meters 24 hours a day to provide that new entity to those who need it. A link is now provided showing the radio site at the X on the beach area on the north side of the island where the operating positions will be located. The DXpedition web site <www.midway2009.com> is fully functional. New additions are a poll to find out what bands and modes are most needed and a Midway 2009 memorabilia store. Follow the links to tell us your Midway DX needs and to add to your DX memorabilia collection. The team is highly experienced and anxious. We invite you to become familiar with some of the team by visiting: http://www.midway2009.com/meettheops.html "

LZ8, BULGARIA (Special Event). Members of the Bulgarian Federation of Radio Amateurs (BFRA) will be active as LZ8WHST to promote the next World High Speed Telegraphy Championship to be held in Obzor, Bulgaria, in September 2009. This special callsign will be randomly activated by several different BFRA operators from their home QTH and will be active until the end of September. Operation will be 99% CW, with the possibility of some occasional SSB and Digital contacts. Activity will be emphasized during the championship, September 11-15th. QSL via LZ1PJ. QSLing will start after the end of activation.

MRD 2009. Attention all former maritime radio operators and CW operators! The "2009 Maritime Radio Day" will take place between 1200z, April 11th and 1200z, April 12th. For rules to participate and a list of stations to be in this special event, please go to: http://www.radiomaritimeday.org/

QSL INFO AND NEWS.....
7Q7AH and 7Q7HB QSL STATUS. Allan, G0IAS/7Q7AH, informs OPDX that all QSL cards for 7Q7AH and 7Q7HB, that were received during the month that he (G0IAS) was in Malawi, have been answered. Please be aware that ROYAL MAIL will be INCREASING their costs in the middle of April. Allan states, "Thank you everyone who worked 7Q7AH. Radio conditions were not very good in the Southern Hemisphere most days, just the openings in the evening which arrived when it was meal time! Despite this over 100 Countries were worked."

CS6A and CT7FFC QSL cards were received from the printer. Direct QSL requests are in the mail, and E-mail bureau requests will be answered as soon as possible via the bureau. If you received their old CS6A QSL card, please E-mail the Algarve STAR DX Team, and they will send a new CS6A QSL card again at no cost to you. See the new QSL card at: http://algarvedx.com

QSLS VIA LOTW: 4U1UN, HC8A, PW0S and YX0A/YX0LIX

QSLS RECEIVED VIA MAIL: 3V8BB, 4O/K1ZZ, 5B4AII, 5B/AJ2O, 5W0K, 6Y1LZ, 9L0W, 9X0W, C4N, C91LW, CM6RCR, EA9PY, J7N, JT1CO, RW3QC, S21DX, SV9/DJ7RJ, TO3R, VU7SJ and ZK2DF

QSLS RECEIVED VIA THE BUREAU: 9A9Z/P, A45WD, C56YK, DF1RA, DF2EY, DH6JH, DL6ABN, DL6DSA, DL8AX, DL8ER, DL9BH, DO6RO, RA6CY, UA6AF/P and UA9BX

S7, SEYCHELLES. Ben, DL7UCX, will be active as S79UCX between April 5-17th. Activity will be holiday-style on 80-10 meters with operations mainly on CW using 100 watts into a vertical and dipole antennas. QSL via DL7UCX, direct, by the Bureau or the LoTW.

SILENT KEY. OPDX was informed that Bill Hamer, ZL2CD, became a Silent Key on Sunday, March 29th, at Wellington Hospital. Bill received a QSM for services to radio but will be remembered by untold thousands of amateur radio ops all over the world for his QSOs. He was mostly active on CW, but his voice was heard on SSB. OPDX and its readers would like to send out our deepest sympathy to the family and friends of ZL2CD.

SOLAR CYCLE 24 NEWS. There was good and bad news reported this past week. In the middle of the week a good report from Thomas, NZ4O, came out stating, "A huge solar cycle 24 sunspot group has formed near E30N80 in the northern hemisphere of the Sun. It has pushed the solar flux index up from 71 to 155 and 6 meters is open globally via F2 layer propagation." However, bad news reported from NASA indicates that the sun is plunging into the deepest solar minimum in a century. NASA states on April 1st, "The sunspot cycle is behaving a little like the stock market. Just when you think it has hit bottom, it goes even lower. 2008 was a bear. There were no sunspots observed on 266 of the year's 366 days (73%). To find a year with more blank suns, you have to go all the way back to 1913, which had 311 spotless days: plot. Prompted by these numbers, some observers suggested that the solar cycle had hit bottom in 2008. Maybe not. Sunspot counts for 2009 have dropped even lower. As of March 31st, there were no sunspots on 78 of the year's 90 days (87%)." Read the complete report at: http://science.nasa.gov/headlines/y2009/01apr_deepsolarminimum.htm

SY2, GREECE (Special Event). Greek operators from Veria (SV2/Macedonia region) will activate the special callsign SY2DDAY between June 4-7th. Activity is to celebrate the 65th anniversary of the greatest landing operation in history during WWII, with the participation of seven countries on the beach of Normandy. Greece participated with 2 warships and 4 commercial freighter. Activity will be on all modes and bands. QSL only direct via SV2KBB (w/SAE) to: Archelaos Iakovidis, P.O. Box 26, P.C. 59100, Veria Makedonia, HELLAS, GREECE. Please, DON'T send bureau QSL. Operators mentioned are: Kostas/SV2LLB (5B8BG), Andreas/SV2JAO, Archelaos/SV2KBB and Litsa/SW2MIN (XYL SV2JAO). ADDED NOTE: Activity on Echolink R-4 (SV2/ Mt.Vorras) node: 121496, E.P.C. #6504. QSL Manager is also SV2KBB. To see the QSL card, go to: http://www.qrz.com/sy2dday

T8, PALAU. Operators Ryosei/JH0IXE and Nobuhiro/JA0FOX are once again active as T88CW and T88NF, respectively, between now and April 12th. Activity will be on 80-6 meters using CW, SSB, RTTY, SSTV and PSK31. This past weekend they were very active on 40/30/20/17/15 meters, mostly RTTY with some SSB on 15 meters. QSL via their home callsigns.

VK9M, MELLISH REEF (Update). Operators George/AA7JV and Tomi/HA7RY, continue to be very active from Mellish Reef. As this was being typed, their log shows that the operators have worked almost 10k QSOs. They are working very hard on the lower bands and may try to work more on the higher bands. Their Web page states, "We intend to remain on Mellish Reef at least until April 10th. After that we will be looking for a favorable WX window for the return trip to the Australian mainland. We have supplies until April 15th - maybe 18th, if we stretch them and reduce power on the higher bands." QSL via HA7RY, direct, LoTW or by the Bureau (remember, they have an "Online QSL Request Service"). For updates and more info, please visit the VK9GMW Web page at: http://www.vk9gmw.com

VK9X, CHRISTMAS ISLAND. Just a reminder. By the time you read this Haru, JA1XGI/W8XGI, should be active as JA1XGI/VK9 between now and April 11th. Activity will be on all bands including the lower bands using CW and the digital modes. QSL via JA1XGI, by the bureau or direct.

YK, SYRIA. Saad, N5FF, in Damascus, is now active as YK1BA until April 10th. He will return home to Texas on April 11th. As usual, the purpose of the trip is not a DXpedition, so his operating will be spotty, but he states that he will try to put in as much radio time as possible. He suggests that his operating hours will be between 2000-2300z or between 0200-0500z and possibly some occasional activities between 1200-1400z. Saad says, "I suspect that 30, 40, and 80 meters will be the bands of choice, and I will be active on SSB, CW, and RTTY." However, he was heard this past weekend on 20 meters SSB. QSL via N5FF (QRZ.com for details).

Just out of curiosity , I looked up my 3B7C card. Worked him on 40 @0244 and on 30 @2113. Might give a hint at when to be really looking for him.

Just a thought. I want him too! (any band is fine)

It's just condx guys. Oh the times I have wanted to express these sentiments about certain Caribbean or east Pacific stations.

3B9/SP2JMB has been quite good sigs. on most bands here.

A bit of patience and the propagation will come your way, don't forget to have a look on W6EL for some possible good propagation times...

Thanks for the info, Dale. Glad to hear it's not just me who can't hear him. That area of the world isn't great for NA, but you'd think there would be more spots. Anyhow, that's the way it goes. I believe he is there for awhile longer, so maybe we'll get a shot at working him.

Hello World !!
We ask for support, help and solidarity!
73's -
Greg, SP3V

AN APPEAL FOR SOLIDARITY

I am writing to you in the name of PZK Headquarters with an appeal for co-operation in addressing the Polish Ministry of the Environment which is carrying out a `process of consultations´ before issuing a planned Ministerial Decree on "Installations requiring licensing" and on "Requirements on licensing of installations emitting electromagnetic fields".

Let me state `in a nutshell´: both these Ministerial decrees, if issued as Polish executive regulation, will limit the operation of Polish amateur radio stations operating in the Amateur Radio and Amateur Satellite Services almost to nonexistence. The planned decrees treat amateur radio stations on the same level as commercial radio stations (broadcasting and television transmitters, radiocommunication transmitters) requiring measurements of electromagnetic field intensisties in various directions of the field radiated by the antenna, registration of technical properties of equipment etc. etc.

I would add that, completely unexpectedly, the Polish Ministry of the Environment - who protects the environment from "pollution and electromagnetic fields", did not ask PZK, representing several thousand "emitters of e.m. energy", about our opinion on this subject.

In view of the possible implications of these envisioned governmental regulations, horror and fright inspired our members to organize a protest action consisting of sending thousands (hopefully) e-mails, letters and facsimile messages to the Minister and personally contacting our MPs, with the aim of making "them" understand the nature of our hobby, the practical and technical difference in operation between amateur and commercial `emitters´ etc.

This action of protest is currently taking place in Poland. We, PZK, think that perhaps help from abroad, from our companion amateur radio Societies , the IARU and individual hams, could reinforce and intensify our action. We would be very grateful for your letters sent to the Polish Minister of the Environment, expressing solidarity with Polish hams and, perhaps, explaining the nature of our hobby, which is not only

a `private´ hobby and leisure activity, but a social
service of great importance. We are confident that such international
support will make some impression upon the decision makers in our
country, no doubt.

That is why we start this request for help with the title "Appeal
for Solidarity"...

One never knows if and when some unknowing government employee in
another country might come to a similar idea.

In our case, Polish hams would be compelled to use exlusively EIRP
levels of 15 Watts, if the expense of providing measurement proofs to
the Government would be too high for individual amateurs. The
requirement of registering (licensing) technical apparatus, including
antennas, limits any attempts at experimentation, the essential feature
of our `hobby´.

If you feel you might help PZK by sending a letter, fax or e-mail to the
Polish Ministry of the Environment, please do it!

On behalf of PZK,

Wes Wysocki, SP2DX

9469. Noise -- hard to describe

Yahoo group: DX-IS (2009)
Date: 2009-04-06 22:39:09 UTC
From: Alan Leith
Topic: 9469 Message: 9469

Can anyone tell me what the pulsating signal that seems to be from 14013-14017? It almost sounds like random key clicks but I can't find a strong signal that would be producing this type of QRM and I don't have the NB on in my rig. I've been hearing it most (if not every) times I have been on 20M in the last few weeks.

Now I'm hearing it down at 14010. I suspected that it was OTHR or something similar. It has been as strong as S9 and at that strength it is hard to copy anything through it. Conditions don't seem to be particularly good up here tonight so it won't be interfering with my not operating :-)

I've been hearing it in the North Atlanta area for several weeks now.
I figured it was just more of the electronic pollution in my apt complex.
At 7 pm the band is all but dead, but the noise is very loud.
To me it sounds like someone very rapidly playing a spoon against their
cheek while varying the shape of the cavity just as rapidly.
I hear it 14013.50 to 14017.50 and 14028.50 to 14033.50.

Really strange stuff - I wonder if it's the same you're hearing.

I just read this email and thought I would tune around 20 a little

I am hearing it here in North Texas near Ft Worth on my vertical in texas now, I only have a vertical so cant be helpful on
direction, but the sound it exactly as you described, I am hearing it between 14.006.98 and 14015.09 with a null in the center of
these little band of frequencies.

Yes, Frank, I hope so too. Now, I just worked UA9OA on 14017 and there's no sign of the pulse. Very strange.

Well, unless there are multiple transmission sites, how can we both be hearing the same stuff when the band is dead for anything but close proximity ground wave?
I hope we get a better idea of all the places it's being heard.

It hasn't changed a bit here Al.
Is there another group that might be interested in this - like the RFI reflector?
Arrl? FCC? (chuckle)

9480. RE: [DX-IS] Noise -- hard to describe

Yahoo group: DX-IS (2009)
Date: 2009-04-06 23:54:23 UTC
From: AD5VJ Bob
Topic: 9469 Message: 9480

Here is what I am hearing with a narrow CW filter in my MP:

14011.45 low edge of signal
between 14012.00 and 14013.45 a null in signal
14016.45 high edge of signal

and if you tune into the null and sit for a while, you can hear the signal shift into the null on a periodic basis - coming into the
null and then leaving it again, shifting in frequency up and down. Signal level here is a fairly constant S-7 with some fluctuation
due to QSB.

It is very weak (barely audible) in KH6. Must be beaming to the US east coast OR near there.

I recall the Russian Woodpecker on 40 quite well, and there really wasn't anything anyone could do about it. Eventually it went away with the demise of the Cold War.

Assuming this noise on 20 is military in origin, is there any likelihood of anyone doing something to stop it? For all we know, it might be "us" and not "them." Just an observation . . . not that like it any better than anyone else. My guess is we are stuck with it until whoever is doing it decides to turn it off or go elsewhere.

hmmm,
NS - WVA - GA - TX are along a line (more or less) - need more input
from those with directional antennas.

The drug cartels probably has more dough than our FCC devotes to the airwaves.
Maybe it's encrypted communications from Mexico to their operatives in the States.

You are in their log on 30 and 40m CW. QSL direct to VK4FW at his callbook address.

I think you can include a donation with your QSL.

There is no donation info in the on line LOGBOOK.

Folks

It is on the main VK9LA page at the bottom is you want to submit/donate electronically.

The OQRS process is

1. Download their PDF form, fill it out woth QSOs, and email it
2. Then hit the donate button on the same page and note your call sign.

Its on the main page not the log page.

9490. Re: Noise -- hard to describe

Yahoo group: DX-IS (2009)
Date: 2009-04-07 12:20:42 UTC
From: Art Burke
Topic: 9469 Message: 9490

During our recent stint in VP5, Marsha and I competed in the Russian DX contest. Around 1 AM, my ears ringing, I pulled the plug and hit the sack. Woke up around 3 AM and decided to see who was still on and had hopes of getting out to the far west of the U.S. and maybe into Japan.

The bands weren't as active as I had hoped, but I came across a PY7 station I had not yet worked. Each time I tried to call him, there was no hesitation on his end, the CQ TEST just kept rattling off about 30 WPM. I thought maybe he was working QSK and just didn't hear me very well, so I kept tuning around slightly, but he never wavered in his CQ TEST. I figured there was a guy "...asleep at the wheel!"

About half an hour later, he found me, gave me a huge number, and moved on. Maybe toward another cup of coffee!

As for the OTHR or whatever is was/is, I heard it on the low end of 20 CW as well. Amazingly, the NB on my K3 blanked it quite effectively. I didn't try to determine it's bearing from here (central Florida) and a few minutes later it was gone. I saw the post on the cluster from AD5VJ, but by the time I looked near the frequency he stated, I couldn't hear it any more.

Is this a pulse going at maybe 6 times a second? I hear that now but it almost sounds like ignition noise of some sort. Seems to be audible from about 14015 to 14040.

I also hear soe sort of digital signal on 14005 right now that almost sounds like MFSK16 but different. First time I've heard a digi signal so low in frequency.

Apr 7 - Tuesday morning 1315z update.
Noise is very loud in four places - also has very slow (minutes) QSB
from about S5 to S9+
14003 - 14009
14013 - 14017
14028 - 14033
14044 - 14049
I'm trying to figure out how to record it if there is a way to share the
recording with the group.

Ok, one more update and I'll stop chattering about this noise.
I called Chuck K0BOG at ARRL and they are aware of the noise and have
reported it to the FCC.
FCC status is "we are working on it - no information yet"
ARRL will post news about it on their web site (ARRL.ORG) if status changes.

The digi signal I heard just kept going for at least a half hour. I listened while I had coffee and read my e-mails this morning. It seemed to be sending some traffic and then went into idle for 20 minutes. I heard it on 14005 and what might have been the same signal, although weaker, around 14014. I doubt it was an amateur signal. I am not familiar with the mode used but it was some sort of an MFSK signal.

Folks

It is on the main VK9LA page at the bottom is you want to submit/donate electronically.

The OQRS process is

1. Download their PDF form, fill it out woth QSOs, and email it
2. Then hit the donate button on the same page and note your call sign.

Its on the main page not the log page.

Dale

I have to say that the QSL approach taken is not the most user friendly.

I was able to click the cursor in each field and then type in the data.

Good luck

Want to calculate the sunspots on any day within the past couple hundred years? The above NASA website can show you in graph form a plot on sunspots for virtually any day in the recent past couple centuries. The current sunspot plot as of today looks like a flat line on a cardiac heart monitor--dead.

9498. RFI from Plama TV's affecting Ham radio

Yahoo group: DX-IS (2009)
Date: 2009-04-09 04:12:57 UTC
From: Lance Martin
Topic: 9498 Message: 9498

Hi Guys,

Over the past year, I have been getting RFI on 18073, 14012, 14250, plus and minus a few Khz and large parts of the 30, 40 and 80m band.

Signals up to S9 if I bring the beam around to the source. This is tremendously annoying, especially when trying to work a rare weak DX station.

I recently contacted the ACMA (Australian Communication and Media Authority) and they came out to do some local testing.

A long story short, the offending product is a Samsung PS50Q91HD, 50 inch plasma TV. Which is located in a neighbouring unit, probably within 10m of my antennae.

Now get this. The Australian standards only test for conductive interference from these devices below 30Mhz and not RFI! The RF testing is only done above 30Mhz. So the product is legal!! This Samsung (and LG have also been reported) is legally generating large amounts of damaging RF for probably 20m or more in all directions below 30Mhz..... Can you imagine living in a country that allows the marketing of such a product! Hilarious!

What's more its the screen that is the problem. The ACMA guy said short of putting a faraday cage around the unit, I am stuck with it.

Do you guys in the US, Canada, Brazil, Europe have similar issues? Or does your country protect your HF band spectrum better?

Which is why I won't have a plasma TV in my house and whenever a neighbor asks, and they do, I try and steer them to LCD. Whist LCD can also have issues, why beg for trouble by having a plasma generator in the neighborhood? Plasma after all is ionized gas which emits RF, it's what makes radio astronomy possible. I believe in the US if the set interferes with a licensed service, the owner of the source of interference is responsible for fixing the problem. Easier said than done and how far do you want to push it with a neighbor who is also a friend. The same is true here in Canada AFAIK. Not really a new issue however as anyone who worked 80/75m in the early days of TV (yup I'm old enough to have done so) remembers the drone of the sync oscillators spaced about every 15.75 Kc (in those days). Only the frequencies have changed to protect the guilty. One of the joys of the digital age.

It was suggested on one of the other reflectors that this is a "bubble jammer" - I've heard it frequently on 17m the last few years - late afternoon/early evening - centered around 18.080. And now on 20m. First time I heard, sounded like turkey gobbles. Seems to come from the SW (from IL) as others have noted.

Gobbles, bubbles, it doesn't belong. What would they be jamming on 17 or 20, unless it's harmonic or spurious radiation to some SW broadcast frequency jam?

Over a year ago someone reported on the Florida Contest Group reflector that a plasma TV was effectively wiping out 80 meters.

I decided when the time came to buy another TV (I currently own a Samsung DLP HDTV - it's technically a form of rear-projection), we would stick to either an LCD or another DLP.

From: Art Burke
Topic: 9502 Message: 9502

One of those weird ones this morning. Woke up around 5:30 AM local (0930z) and found VK9GMW on 40 CW. His signal was actually better than the guys he was working here in the U.S.

I heard him work a number of U.S. stations before I got through. He was 579, pretty steady, sometimes better. But the stations I could hear him working seemed way down in the noise.

Numerous times he had to reinforce that he was trying to work NA and SA.

Even with somebody CQing almost right on top of him, he was working several per minute. Around 1030z he QSYed to 160.

That too was a new one for me this AM. Really oddball propagation and just made it. Was listening to him for about 3 hours before my sunrise and he was ESP. Not worth calling as I couldn't make out calls, and he was in and out of the noise. Just heard the occasional 5NN. Could hear the pileup OK, but not him.

Classic greyline! He came out of the noise just as it got daylight about 539, and I found the last guy, and then sent my call. He came back with VE1? and then VE1DX 5NN. Phew. It gets better. He worked 4-5 more and then went to 160 (where I couldn't hear a peep.) Talk about a short window and the last chance. Even if he had stayed on 40, I probably had only another 20-30 minutes tops.

These guys have given me a new band country on 80/40/30 so I really have to hand it to them. They said it is a low band CW operation, and they are sticking to their word. The last report said they had a really bad storm yesterday, but that they are OK now. Say their computer (that had gotten wet) is now operational, so RTTY is possible. Time is running out for this operation, but they have done a superb job. Especially with the sun flat-lined, exhibiting zero spots for the last 31 days.

ARLD014 DX news

This week's bulletin was made possible with information provided by NC1L, XU7MDY, QRZ DX, the OPDX Bulletin, DXNL, 425 DX News, The Daily DX, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

TUNISIA, 3V. A group of SWL operators will be QRV with special event station TS1LYMC from April 12 to 30. Activity will be on 80 to 10 meters using CW, SSB, RTTY, SSTV and PSK. QSL direct via operators' instructions.

MALTA, 9H. Augusto, I2JJR is QRV as 9H3JR until April 23 while on Easter holiday. Activity is on the HF bands, using mainly SSB on 40 and 17 meters. QSL to home call.

MOZAMBIQUE, C9. A group of operators are QRV as C91FC until April 13. Activity is on 80 to 10 meters using CW, SSB, RTTY and PSK. QSL via ON4CJK.

CAPE VERDE, D4. Uli, DF8KN is QRV as D44TEP from Boa Vista, IOTA AF-086, until April 13 using CW and QRP power. QSL to home call.

PHILIPPINES, DU. Max, M0GHQ is QRV as DU9/homecall until the end of April. During his stay, he plans to activate Cebu Island, IOTA OC-129, Mindanao Island, IOTA OC-130, Samal Island, IOTA OC-235 and Leyet Island, IOTA OC-129. Activity is on 160 to 10 meters, including possibly 6 meters, using SSB, RTTY and PSK. QSL to home call.

SPAIN, EA. In celebration of the end of the International Polar Year, special event station EG3IPY will be QRV from April 13 to 19. QSL via EA2RC.

THAILAND, HS. E21IZC and others will be QRV as E21IZC/p from Lipe Island, Satul Province, IOTA AS-126, on April 12 and 13. Activity

will be on 40 and 20 meters using CW and SSB. QSL direct to home call.

PERU, OA. Operators CE6TBN, DL2JRM, HA1AG and OA4BHY are QRV as 4T6I from La Leona Island, IOTA SA-098, until April 13. QSL via DL2JRM.

ALAND ISLANDS, OH0. Anne, OH2TL is QRV as OH0/homecall until April 14. Activity is on the HF bands using CW and SSB. QSL to home call. In addition, operators OH3LQK and OH3FM are QRV as OH0LQK and OH0/OH3FM, respectively, until April 15. They are active on 80 to 10 meters using CW and digital modes with two stations. QSL to home calls.

WESTERN SAHARA, S0. A large group of operators will be QRV as S04R from April 12 to 17. Activity will be on 160 to 10 meters using CW, SSB and various digital modes. QSL via EA5RM.

CORSICA, TK. Joachim, F6BUL is QRV as TK/homecall south of Bastia until April 15. Activity is on 40 to 10 meters using CW and SSB. QSL to home call.

KAZAKHSTAN, UN. Operators UN7BS, UN7BJ and UN7BBJ will be QRV on April 11 and 12 using special callsigns UN12B, UP21B and UP18B during a two day mobile operation from landing places of Soyuz space rockets. Activity will be on 80, 40 and 20 meters, including 2 meters, using CW, SSB and PSK31. QSL via operators' instructions.

CHRISTMAS ISLAND, VK9X. Haru, JA1XGI is QRV as homecall/VK9X until April 11. Activity is on all bands, with an emphasis on the low bands, using CW and digital modes. QSL to home call.

CAMBODIA, XU. Retu, OH4MDY is QRV as XU7MDY from Sihanoukville until April 21. Activity is on 80 to 10 meters using CW, SSB and some digital modes. QSL to home call.

MACEDONIA, Z3. Members of the Macedonia Telegraphic Group are QRV with special event callsign Z30MCWG until December 31. Activity is on the HF bands using mostly CW. QSL direct via Z35M.

THIS WEEKEND ON THE RADIO. The Japan International DX CW Contest, NCCC Sprint CW Ladder, PODXS 070 Club PSK31 Flavors Contest, Radio Maritime CW Day, EU Spring CW Sprint, Georgia QSO Party, Yuri Gagarin International DX CW Contest, SKCC Weekend CW Sprint, UBA Spring SSB Contest, The Low Power Spring CW Sprint is scheduled for April 13. The 222 MHz Spring Sprint is scheduled for April 14. The NAQCC Straight Key/Bug CW Sprint and RSGB 80-Meter Club SSB Championship are both scheduled for April 15. The ARLHS Annual Spring Lites QSO Party runs until April 19. Please see April QST, page 84 and the ARRL and WA7BNM contest web sites for details.

9505. Re: [DX-IS] Re: RFI from Plama TV's affecting Ham radio

Yahoo group: DX-IS (2009)
Date: 2009-04-09 22:59:23 UTC
From: John P.
Topic: 9498 Message: 9505

Not to long ago (2 months ??) there was something on QRZ.com about this. Apparently theowner of the TV receiveda letter from the FCC to discontinue using it as it was causing interference in the ham bands.

Over a year ago someone reported on the Florida Contest Group reflector that a plasma TV was effectively wiping out 80 meters.

I decided when the time came to buy another TV (I currently own a Samsung DLP HDTV - it's technically a form of rear-projection) , we would stick to either an LCD or another DLP.

SB PROP @ ARL $ARLP015
ARLP015 Propagation de K7RA

ZCZC AP15
QST de W1AW
Propagation Forecast Bulletin 15 ARLP015
>From Tad Cook, K7RA
Seattle, WA April 9, 2009
To all radio amateurs

SB PROP ARL ARLP015
ARLP015 Propagation de K7RA

Today the bulletin is out on Thursday, April 9, because ARRL Headquarters is closed tomorrow on the Good Friday holiday.

Just as we reported in the last three bulletins, again there were no sunspots this week. In this time of the quiet Sun, Spaceweather.com has a new feature keeping track of all these days with no spots. On the left side of the page at http://www.spaceweather.com below the image of the Sun and the current daily sunspot number, it says "New: Spotless Days." Early on April 9 it says "Current Stretch: 14 days, 2009 total: 89 days (87%), Since 2004: 597 days, Typical Solar Min: 485 days."

But if we show no spots in this bulletin plus the past three, that accounts for at least 28 days, so why do the new Spotless Days numbers say it has been 14 spotless days since the last sunspot? The last run of sunspots we show is over two days, March 6-7, so through yesterday, April 8, there have been 32 spotless days.

If we use the archive feature on the Spaceweather page (look in the upper right side of the page) and go back to March 26, although Spaceweather shows the sunspot number is zero, the text beneath the Daily Sun image says "A proto-sunspot is struggling to emerge at the circled location." So if no sunspots emerge later today, April 9, that would account for 14 days since March 26.

Recently the 45 day forecast for daily solar flux and planetary A index at http://www.swpc.noaa.gov/ftpmenu/forecasts/45DF.html has consistently predicted a solar flux at 70 for every day into the future. The last of these was on March 24.

Then on March 25 the prediction was for solar flux at 72 for March 28-31. On March 26 that changed showing solar flux at 72 on March 28 through April 2. On March 27 the solar flux rose to 72 (actually 71.6) and the forecast was the same, but extended the 72 number

through April 3. Solar flux has not reached 72 since then, but the March 28 forecast extends the reading of 72 through April 4.

On March 29 it extends to April 5, and on March 30 to April 6. On March 31 it extends 72 until April 9, three additional days, but it also shows a new period with a flux of 72, April 23 to May 6. April 1 is the same, but April 2 the flux is dropped to 71 for April 3-9. The April 3 prediction gives up on the slightly higher flux values for the near term, but still predicts 72 for April 23 to May 6. The forecast remains the same until April 7, when the 72 flux for April 23 to May 6 is shortened to April 23-29. So it appears that even these near term predictions for a very small increase in activity are continually revised downward.

In the April 8 forecast, it shows the planetary A index for April 9-10 at 15 and 8, then dropping to 5 until April 21. Early on April 9 we are experiencing the effects of a solar wind stream, and planetary K index rose from 3 to 4 at 0300z.

Geophysical Institute Prague predicts quiet to unsettled conditions April 10, quiet April 11-14, quiet to unsettled April 15, and unsettled April 16.

Robin McNeill, ZL4IG of Invercargill, on New Zealand's South Island has been on HF for about a year, and is another of many new operators I am hearing from who are enjoying HF propagation at the bottom of the sunspot cycle.

Robin wrote, "With the sunspots and thus the MUF as very low as they are, surely this means that 40 meters is currently as good as it ever gets? In fact, shouldn't 40 meters currently be as good as any band ever gets? I base this assertion on the fact that 40 meters is currently very close to the MUF and, as you note in the last bulletin, there are now few QRN causing solar events."

He continues, "But that doesn't explain why only a handful of European superstations and very few others find their signals into ZL for hams like me on 40 meters with modest wire antennas and urban QRM, even using the grey line. (That said, I have had a handful of QRP SSB QSOs into Europe recently, though I was working hams who have 3-el beams with presumably low QRM locations- one of them, in fact, seemed surprised I was running 5 watts PEP and not 500 watts PEP output, which surprised us both). Or have I overlooked something?"

40 meters is a good band right now, but it isn't "as good as any band ever gets." When solar activity returns, the MUF will rise enough to use the 10-20 meter bands, which typically will have less absorption than 40 meters. In addition, the average ham is more likely to have greater antenna efficiency on the higher HF bands.

Another factor affecting Robin is that Europe is clear on the other side of the planet from him. For instance, from his location to England is over 19,000 km (over 11,000 miles) away. Yet Los Angles is over 11,500 km (nearly 7,200 miles) from him.

If we do some propagation projections using W6ELprop using a smoothed sunspot number of 3 for today, it shows a very narrow period of strong signals over the path to England, from 1900-1930z, when the MUF is 10.9-11.2 MHz. A couple of hours later the MUF briefly reaches a peak of 14.7 MHz.

But for the path to Los Angeles, a 40% shorter route, the opening is very strong on 40 meters from 0530-1430z, and then MUF reaches a peak of 22.4 MHz at 2330z. In fact, toward Los Angeles, 20, 17 and 15 meters are good possibilities as well, but not on the path to England.

Carl Zelich, AA4MI of Chuluota, Florida sent a tip about an interesting NASA presentation called, "NASA Science Update to Discuss Anatomy of Solar Storms," at 1:00 PM EDT (1700z) on Tuesday, April 14. You can watch this live on NASA TV on the internet at http://www.nasa.gov/multimedia/nasatv/. In many areas NASA TV is carried on basic cable via academic research channels, such as the University of Washington's UWTV in Seattle. For the complete NASA announcement, check http://tinyurl.com/cyorsd.

Another message in, this time from Rich Zwirko, K1HTV of Amissville, Virginia, about the joys of the extended solar minimum and the resulting quiet geomagnetic field.

Rich writes, "I'm now in my 4th month of retirement. I retired after 48 years in broadcasting (the last 28 at the Voice of America). Based on what the 'experts' were saying a number of years ago, I figured that soon after retirement I would be using the F2 layer to add more DX countries to my 148 country total on 50 MHz. Boy, were the experts wrong!"

He continues, "Well, as they say, if life hands you lemons, make lemonade. With the extended solar minimum and very low MUF numbers, my lemonade is being made on 160 Meters. Shortly after retirement my XYL Phyllis (K1WSN) and I moved to a new QTH in Virginia. The first antenna to go up was a 160 meter Inverted-L. At the old Maryland QTH I had worked 200 countries on the Topband with 100 Watts."

Rich goes on to say, "After 6 weeks of operating, five new ones have been added to the K1HTV 160 meter low power country total. They include K5D, CP4BT, OA4TT, T2OU and, a few days ago, VK9GMW on Mellish Reef became 160 Meter country #205."

He ends with, "So, keep the solar minimum going. We Topband folks are loving it!"

Thanks, Rich. I recall some years ago when our propagation bulletin reported constant geomagnetic storms, week after week. Those in higher latitudes, like much of Canada and especially Alaska, had almost no HF communications as a result. We've almost forgotten what those times were like!

Check out the K1HTV bio at, http://www.qrz.com/db/k1htv.

Another great and positive message, forwarded by KF7E, who says, "this man is clearly an optimist for whom 'the glass is half full,' never half empty. It is a refreshing viewpoint." His friend Mickey, K5ML of Paradise Valley, Arizona lives in a development with a strict homeowner's association, and that means "No Antennas Allowed."

Mickey writes, "Got back on the air in January '07 after being QRT for over 2 decades. I was told that we were at the bottom of the sunspot cycle but the cycle would be turning up soon. There has been no significant upturn in the cycle since then. However, since getting back on the air using a ground mounted vertical and very low wire antennas, I've worked 206 countries and 39/40 zones. And I know from experience that it's much easier to work DX with a beam or a quad."

He ends with, "Like everyone else, I'd like to see the sunspots come back. But the other day a question popped into my mind: 'When the sunspots return, what am I going to work then that I'm not working now?' We will work DX on higher frequencies more frequently than now, but that's about it. I'm beginning to think all this talk about sunspots is overrated. I'm glad I didn't wait for the sunspots to come back before getting back on the air."

Thanks, Mickey!

See Mickey's bio and more about his antennas at, http://www.qrz.com/db/k5ml.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at, http://www.arrl.org/tis/info/propagation.html. For a detailed explanation of the numbers used in this bulletin, see http://www.arrl.org/tis/info/k9la-prop.html. An archive of past propagation bulletins is at http://www.arrl.org/w1aw/prop/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://www.arrl.org/qst/propcharts/.

Instructions for starting or ending email distribution of this bulletin are at http://www.arrl.org/w1aw.html#email.

Sunspot numbers for April 2 through 8 were 0, 0, 0, 0, 0, 0, and 0 with a mean of 0. 10.7 cm flux was 70.6, 70.4, 70.1, 70.4, 68.8, 70.2, and 70 with a mean of 70.1. Estimated planetary A indices were 3, 2, 2, 4, 3, 2 and 5 with a mean of 3. Estimated mid-latitude A indices were 0, 2, 0, 3, 2, 2 and 4 with a mean of 1.9.

Sorry Paul

I'm not impressed. Any DX effort is worth it!!! but they made no effort on RTTY (after promoting it)and even less to hit the east coast.

Their Blog now says...
"Tonight we intend to start on 80 at 2000 to give the East Coast a chance."
What 'east coast' is that?

Tracked them for the whole time hoping for Digital. Okay things happen but if they tried a few mixed modes up front a few of us may have made it.

I have had a lot better experience with the JA ops who activate islands out there. Had VK9X in the first day.....

Again great effort for CW another next time for RTTY. No wonder there are so few on the RTTY HR.

From: RICHARD SOLOMON
Topic: 9502 Message: 9508

The last two expeditions to the "Reef" did a lot of RTTY, knocked it

down the "Most Wanted" list quite a bit. It's been a while since the

last expedition, so I expect all the new guys need it.

DX and patience go together hand in hand.

These two guys announced long ago that this was primarily a "Low-

Band" operation, and they have done yeoman work in filling the need

in that respect. So you haven't worked them on 10 Mtr PSK or what-

ever your favorite Band-Mode is, they are only two guys and can't

be everywhere. They need to sleep too.

I for one think they are doing an excellent job and should be applauded,

not chastised.

Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

3V - Special event Scout station TS1LYMC (I Love You My Country) will be activated from Tunisia on 12-30 April. Expect activity on 80-10 metres CW, SSB, RTTY, PSK and SSTV. QSL to TS1LYMC, 33 Rue plaine Lune Borj Louzir, Ariana 2073 Tunis, Tunisia.
C6 - Joe/AA4NN (C6DX), Carl/N4AA (C6AAA), Janet/W8CAA (C6AYL) and Joe/W8GEX (C6DX) will be active from Eleuthera (NA-001), Bahamas on 17-24 April. They will operate CW, SSB and RTTY on all bands. QSL C6AAA via N4AA, QSL C6AYL and C6DX via W8GEX. [TNX The Daily DX]
CN - Announced frequencies for the upcoming multi-operator activity from Morocco, including Mogador Island (AF-065) [425DXN 931], are the following:
SSB 28455, 24955, 21255, 18145, 14255, 7055, 3775, 1845
CW 28025, 24895, 21025, 18075, 14025, 10115, 7025, 3525, 1825
RTTY 28085, 24920, 21085, 18100, 14085, 10145, 7040, 3585
BPSK31 28075, 24915, 21075, 18100, 14075, 10145, 7040, 3595
Activity is also expected on 2m and 6m. The current roster includes nine operators: I0SNY (5C2Y), I2FUG (5C2F), I8LWL (5C2L), I8YGZ (5C2Z), IK2AQZ (5C2A), IK6CAC (5C2C), IK7JWX (5C2J), IS0AGY (5C2B) and IZ7ATN (5C2SG). Activity is expected to start on 19 April and to finish on the 25th: the callsign to be used from Mogador will be 5C2J/p, while on the mainland each operator will use his individual callsign (/m from lighthouses). Please note that the QSL routes have changed: QSL 5C2Y via I0SNY (direct) or EA4URE (bureau), all others via IK7JWX (direct or bureau); stations in CQ Zones 28, 29, 30, 31 and 32 can QSL via VK4FW (direct or bureau) for all callsigns. Further information, including online logs (to be updated on a regular basis during the expedition) and an Online QSL Request System (OQRS) for requesting your direct or bureau card, can be found at www.mogador2009.altervista.org
D4 - Uli, DF8KN will be active as D44TEP from Boa Vista (AF-086), Cape Verde until 13 April. He operates QRP using a "very short aerial". QSL via home call, direct or bureau. [TNX DXNL]

DL - DF6LPC, DJ9IE, DL3HBZ, DL5HAQ and DL8HAL will be active as DK0RZ from Hooge Island (EU-042) on 15-17 April. QSl via bureau. [TNX www.rsgbiota.org]
EA - Celebrating the end of the International Polar Year,, special event station EG2IPY will be active on 13-19 April. QSL via EA2RC. [TNX F5NQL]
GM - The Camb-Hams will be active as either GM3PYE/p and GS3PYE/p from the Island of Harris (EU-010) on 18-25 April. 2M0OVV, 2M0TXY, G0BOE, G0DDX, G1SAA, G4HUN, M0VFC, M1BXF and MM1BJP. They plan to operate on most HF bands with two stations (SSB and digital modes), with activity also on 6, 4 and 2 metres. QSL via G4HUN, direct or bureau. Further information can be found at http://www.camb-hams.com/coming-events/2009-dxpedition
LA - The Radio Club of Gardermoen will be active as LN2G for the Norsk Hammeeting 2009 (http://www.hammeeting.no/) that will take place in Eidsvoll on 17-19 April. Expect main activity on 20 and 40 metres SSB, RTTY and PSK31. QSL via LA2G. [TNX LA7VK]
OH - Jukka, OH3OJ will be active as OH3OJ/p from Kustavi Island (EU-096) on 8-11 April. He will operate CW, SSB and digital modes on the HF bands, with main activity on 20-40 metres. QSL via home call, bureau preferred. [TNX OH3OJ]
VK9M - The VK9GMW team on Mellish Reef is likely to go QRT on 12 April around 20 UTC. While they have been operational sporadically on SSB, they have given up on RTTY as "it is just too much for such a small team". However, neither SSB/RTTY nor the high bands have ever been a priority for the two operators: they clearly stated from the very beginning that they specialize in low band operations, and that their focus would be on 160, 80 and 40 metres. "Many large DXpeditions do a great job of working the high bands, SSB and digital modes", they say, and "there is a very good chance that one will be on Mellish Reef soon". Regular updates and on-line logs (15,880 QSOs at 20.20 UTC on 9 April) can be found at http://www.vk9gmw.com. QSL via HA7RY.

Direttore Responsabile I2VGW

425 DX NEWS MAGAZINE ---> The latest issue (March 2009) is now available at http://www.425dxn.org/monthly/index.html. Articles and pictures should be sent to Nicola Baldresca, IZ3EBA.

3B7FQ ---> Although propagation and conditions were poor, Rachid, 3B8FQ made 1,500 CW QSOs during his February activity from St. Brandon. He operated just a few hours each day, in between maintenance on the meteorological equipment on the island. Operation was concentrated on 30 and 17 metres, with limited activity on 40 and 20m. By the tenth day, the battery was not recharging properly, which resulted in reduced power and

sending by hand key. Colour QSL cards have been printed and are being mailed. The QSL manager for all of Rachid's operations is K5XK (Ron Evans, 2 Pembroke Drive, Bella Vista, AR 72715-8823, USA). [TNX K5XK]

A43LH ---> The Royal Omani Amateur Radio Society (ROARS) operated as A43LH from Ras Ayqah Lighthouse at Sur on 9-10 April, for the ARLHS Spring Lites QSO Party. QSL via A47RS. [TNX A41MA]

H40FN ---> Siegfried, DK9FN has posted a report on his recent H40FN activity from Pigeon Island (OC-065), Temotu Province on http://hari-ham.com/h40fn [TNX DXNL]

INTERNATIONAL MARCONI DAY ---> Organized by the Cornish Radio Amateur Club, G4CRC/GB4IMD, the International Marconi Day (IMD) is a 24-hour amateur radio event held annually to celebrate the birth of Guglielmo Marconi (25 April 1874). It is not a contest, but an opportunity for amateurs around the world to make contacts with historic Marconi sites using HF communications techniques. This year's event will be held on 25 April, from 00.00 UTC through 23.59 UTC. Details, including information on the relevant Award Certificates and the listing of participating stations, can be found at http://www.gb4imd.org.uk/

LOGS ---> A log search for the recent AT9RS operation from IOTA group AS-177 can be found at http://www.logsearch.de/

LOGS ---> A log search for the recent HZ1FS/p operation from IOTA group AS-192 can be found at www.7z1sj.com.

+ SILENT KEYS + Recently reported Silent Keys include Theodor Flick (DL1BO), Will L. Pounds (K7ROK), Donald W. Jones (N4TN), Alex Desmeules (VE2AFC), Charles P. Alter (W9UC) and William R. Hamer (ZL2CD).

9517. Poor judgement

Yahoo group: DX-IS (2009)
Date: 2009-04-12 19:32:51 UTC
From: Paul M Dunphy
Topic: 9517 Message: 9517

Today during the GC contest, there was a 9V1BH spotted on 20 CW. I went there, and he as S3-S4 over the pole, but not worth calling in a contest situation, in my view, anyhow. While I was listening, a needle pinning carrier appeared on top of him with the characteristic variable intensity of a guy tuning up. Took him about 30 seconds to get it to his satisfaction, then he sent W4xx (twice) and the 9V came right back to him and worked him. 5NN and the ITU zone both ways, and Bob's your uncle.

Except the W4 was a LID. Plain and simple. Instead of finding a clear frequency to tune up, or better yet, using a dummy load, he took his good old time getting his AL-1500 or QRO-2500 or whatever it was just the way he wanted it. Then pumped out his call into his 4-5 element monobander and worked the guy with one call. He was a good CW op too. He was just too rude to tune in the proper manner. He's the same kind of guy who will dump on the new kid for getting an Extra class license without passing the CW requirement like he had to 30-40 years ago. That was 5-6 hours ago, and I'm still disgusted with that W4.

He represents my era, when we were taught to "do it the right way." I guess he feels he's been around along enough to ignore courtesy and common sense. He got what he wanted, but he sure didn't exercise good judgement by tuning on top of the DX. (A GOOD OP can tune in 5 seconds, not 30 for another thing.) Oh well, I got that off my chest! Back to our regularly scheduled programming.

From: Dave AA6YQ
Topic: 9517 Message: 9518

I don't know how we "fix" this unless you get the W4's address from QRZ, get his or her phone number from http://www.zabasearch.com/ , place the call, and ask "was that you who spent 30 seconds tuning up on top of 9V1BH earlier today?". Even if they slam down the phone or respond that someone else was using their call, the message gets sent.

We're supposed to be self-policing. Its a pain, but its our responsibility.

73,

Dave, AA6YQ

9519. RE: [DX-IS] Poor judgement

Yahoo group: DX-IS (2009)
Date: 2009-04-12 19:46:33 UTC
From: Alan Leith
Topic: 9517 Message: 9519

The full moon the other night may have something to do with it, Paul. I've just stopped calling S04R on 30M, like my 100W and inverted vee have a chance. Since I've been listening to him, there have been countless tuner-uppers, stations calling on his frequency and at least one DXers' call that I recognized calling him on his frequency. Several people told the N2 to move up but he called for several minutes more anyway. I assume someone in his area called him on the LL to tell him to bugger off, if indeed it was him and not someone bootlegging his call.

The S0 has peaked to S-9 but quickly fades back into the mud. I have not heard him work anyone outside Europe.

From: Alan Leith
Topic: 9520 Message: 9520

So far, I'm not impressed. I've been listening on 10104 for many hours, except in the hour from 2040 - 2130 when I went to eat. I have not heard one North American get through and when I came back from eating he was S9 and working JAs. Did any North Americans get through while I was away? It is now 2145 and he's faded back down to S3.

I worked them at 17:30, but I happened to be on 30 at the time
all tuned up and saw the first spot. Was there in 10 seconds and got
through on the first call, but then all hell broke lose and it
appeared they were just working EU. Then, as you say, only JA. I
didn't listen all the time, so other NAs might have worked them.

They will be easy in a few days. This is the normal first day frenzy.

73, Paul VE1DX

9522. RE: [DX-IS] S04R

Yahoo group: DX-IS (2009)

Topic: 9520 Message: 9522

I heard N4NN and another lower-down east coaster get through. But so far they're the only ones. They're working EU and the strongest NA and sadly, this week coming I have little time to devote to the radio. I only need them on 17 CW/SSB, 30 and 80 CW. The latter two are possible but I won't be able to put a lot of effort into it.

I can't imagine the pileups they're experiencing, mind you, but I'm still disappointed -- even if it is the first day.

Things ain't what they used to was.

The Ohio/Penn DX PacketCluster
DX Bulletin No. 904
BID: $OPDX.904
April 13, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NC1L, NJ1Q, W2VU, NG3K, WP3GW, AJ4RW, K4WW, N4AA & QRZ DX, K5XK, K6LSN, K8YSE, N8OFS, W9DX, 9A2WJ, 9A5YY, DK8JB, DL2SBY, DL7MAE & The DX News Letter, DX World of Ham Radio Web Site, F5NQL & UFT, I1JQJ/IK1ADH & 425 DX News, I1HYW, IK7JWX, IZ0IEN, Pete's-DX-Newsdesk, PS7AB, PT7WA, PY2SEX, RSGB IOTA Web Site, VA3RJ & ICPO, VE1QD, VE2EBK, and VHF-DX-Portal (MMMonVHF) for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 5th-April, through Sunday, 12th-April there were 223 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4X, 5B, 5H, 5N, 5R, 5T, 5U, 5V, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A4, A5, A6, A7, A9, AP, BV, BY, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FR, FY, G, GD, GI, GM, GU, GW, H4, HA, HB, HB0, HC, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JD/m, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, S2, S5, S7, SM, SP, ST, SU, SV, SV5, SV9, T7, T8, TA, TF, TG, TI, TK, TL, TN, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V4, V5, V7, V8, VE, VK, VK9M, VK9X, VP2V, VP5, VP8, VP9, VQ9, VR, VU, XE, XT, XU, XX9, YA, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

** SPECIAL NOTICE. PLEASE stay clear of the following frequencies
-- 3.640 kHz LSB and 7.045 kHz LSB --
as they are assigned as emergency frequencies for Italian Earthquake Emergency - the Earthquake happened on April 6th, around 0140z.

3B7FQ ST. BRANDON ISLAND WRAP-UP REPORT (via K5XK). Rachid, 3B8FQ, reports on his recent February trip to St. Brandon Island, operating as 3B7FQ. All his contacts were CW only due to loud generator noise. Operations was concentrated on 10 MHz and 18 MHz, with limited operations on 40 & 20M. By the 10th day, the battery was not recharging properly which resulted in reduced power and sending by hand key. Although propagation and conditions were poor, 1,500 QSOs were made operating just a few hours each day, in between maintenance on the meteorological equipment on the island. Color QSLs have been printed and are being mailed this week. QSL all of Rachid's operations (3B7FQ, 3B6FQ, 3B8FQ, and his upcoming July trip to 3B9FQ) via K5XK. Some QSL databases are not correct, since Ron moved to a new QTH last summer. This address is correct and it is also OK on QRZ.com: Ron Evans, K5XK, 2 Pembroke Drive, Bella Vista, AR 72715-8823 USA.

3B8, MAURITIUS (AF-049). Operators Piotr/SP2JMR and Slavo/SP2JMB will be active as 3B8/homecall between now and April 17th. Activity will be on all bands using CW and SSB. QSL via their home callsign.

5C, MOROCCO (Update/IOTA Op). Alfredo, IK7JWX, and a team of operators will activate Mogador Island (AF-065), April 19-25th. He announced this week, "After the terrible earthquake in Abruzzo - center Italy on 6th April, we decided that all surplus funds received will be assigned to the many people in that region who are suffering the effects of the earthquake. We will use official channels to send the money, and we will publish on these pages a paper certifying the donation. So we invite you, if you like and you can, to send any possible amount of money, that will be assigned to the earthquake victims." For more details on this IOTA DXpedition, please visit their Web page at: http://www.mogador2009.altervista.org

C6, BAHAMAS. A group of stateside operators will be active from Eleuthera (NA-001) with each using their own individual callsigns between April 17-24th. Activity from the group will be on all bands using CW, SSB and RTTY. Operators mentioned are: Joe/AA4NN (C6DX), QRZ DX Editor Carl/N4AA (C6AAA), Janet/W8CAA (C6AYL) and Joe/W8GEX (C6DX). QSL C6AAA via N4AA. QSL C6AYL and C6DX via W8GEX.

CQ MAGAZINE NAMES PUBLIC SERVICE EDITOR. In a news release by Richard Moseson/W2VU, Editor of CQ Amateur Radio, dated April 6th, 2009, it was reported: "Richard Fisher, KI6SN, of Riverside, California, has been named Public Service Editor of 'CQ Amateur Radio' magazine, Editor Rich Moseson, W2VU, announced today. Fisher, a veteran journalist, succeeds Bob Josuweit, WA3PZO, whose final column will appear in the May issue of 'CQ'. Josuweit, who has covered amateur radio emergency and public service communications for 'CQ VHF', and then for 'CQ', since 1996, is stepping down due to increased time demands at his full-time job. Fisher has been a professional journalist for 35 years, working in various capacities for daily newspapers on both the east and west coasts. He is also a prolific writer on amateur radio matters, writing the 'Washington Beat' column for 'Popular Communications' and the 'Trail-Friendly Radio' column for 'WorldRadio Online'. He was previously QRP (low-power) editor of

'WorldRadio's' print edition. A ham since 1965, Fisher enjoys a wide variety of amateur radio activities, including QRP CW operating, outdoor operating, experimenting with antennas and building equipment. He is a co-founder of the Adventure Radio Society. ' I've loved 'CQ' since before my Novice days,' notes Fisher, 'so joining the team will be a thrill.' Editor Rich Moseson added, 'While I will miss the close working relationship I have shared with Bob Josuweit for over a decade, and wish him all the best in the future, I look forward to working closely with Richard and to the added benefits he will bring to the column as a veteran professional journalist.' Fisher's first column will appear in the July 2009 issue of CQ."

DAYTON HAMVENTION (RTTY Contesting Forum). The Dayton RTTY forum will be held Saturday, May 16th, between 1200-1300, in Room 3 and will have a panel discussion on how best to accommodate the diversity of participants in RTTY contests. The vast majority of participants are not super-serious competitors and may only be on for a few contacts to work a new state/province/country or to try out their station or simply to enjoy some RTTY contacts which are more scarce outside of contest periods. Each panelist will give a short statement of their perspective on participant diversity in RTTY contests and then be available to address questions and comments from the audience. Panelist will include K5DU, K4GMH, W2QO, and K4IA.

DAYTON HAMVENTION ARRL AWARDS CARD CHECKING. Bill Moore, NC1L, announced that card checking will be done at the ARRL National Convention in Dayton during all operating hours of the convention Friday, Saturday and Sunday, May 15-17th, 2009. There are some important guidelines that will help make the card checking process run smoothly at the following Web page: http://www.arrl.org/blog/Century%20Club%20Awards

EG, SPAIN (Special Event). Look for EG2IPY (WAP-174) to be active between April 13-19th. Activity is to celebrate the end of the International Polar Year 2007-2009. Operations will be on all bands and modes. QSL via EA2RC.

HB0, LIECHTENSTEIN (Update/Correction). Operators Kasimir/DL2SBY and his friend Georg/DF1SR will be active from here between April 24th and May 4th. Activity will be on HF bands (80-10m) using CW, SSB and RTTY. Equipment will be a TS2000, FT900AT, Ameritron AL811, HF9V vertical and a monoband vertical for 30/40m. Activity will also take place on 13cm and 23cm using EME. Equipment will be a FT726R, Dish 3, 7m, and 2 amplifier for both bands. Kasmir and Georg will use two separate callsigns for this operation. For the HF bands, they will use HB0/DL2SBY and for the EME activity they will sign HB0/DF1SR. QSL via DL2SBY, by the Bureau or direct.

IOTA NEWS.....
EU-010. After a very successful DXpedition in 2008 to the Island of Mull, the members of the Camb-Hams have decided to go to the Island of Harris which is off the north west coast of Scotland. Activity will be on all HF bands (including 5 MHz) using SSB and Digital modes. There will also be activity on 6m, 4m, 2m and possibly

70cm (SSB, JT6m and MS). There will be lots of portable operations around the islands (possible interest to WAB chasers) and 3 very energetic climbers activating SOTA summits all week. The callsign will be the CRG (Cambridgeshire Repeater Group) callsign G3PYE, as the activation is in Scotland the prefix becomes GM3PYE/P or GS3PYE/P, both of which will be used. They plan to be active during the week starting April 20th, possibly starting Saturday April 18th through April 25th. For skeds on the VHF bands (voice or data), please E-mail: skeds@...

EU-042. Operators Siggi/DL3HBZ, Uli/DJ9IE, Helge/DF6LPC, Lothar/DL8HAL and Harry/DL5HAQ will be active as DK0RZ from Hooge Island (N-22 for the German Islands Award), April 15-17th. Activity will be on all bands and modes, propagation permitting. QSL via the DARC Bureau.

EU-090. The Team of German and Croatian operators will be active as 9A0CI from Palagruza Island (IOCA CI-084, WLOTA-0057, CLH-100, ARLHS-012) between May 9-16th. Activity will be on bands 160-6 meters (including 30/17/12m) using CW, SSB and the Digi modes. A online log will be available on the Web site at:
http://ov-c07.de/aktivitaeten/insel-leuchtturm-aktivierungen/2009-palagruza/9a0ci-2009-palagruza-onlinelog.html

NA-058. Randy, AJ4RW, will be active from Cumberland Island, off the coast of Georgia, May 2nd. He will be on the air from approx. 1500-1930z on the frequencies of 14260 and 7225 kHz, alternating between the two bands as there is only one station scheduled as of right now, but this might change as soon as they move closer to the date of operation. Frequencies may also vary depending upon band conditions. This will be SSB operation only. QSL via his home callsign.

NA-083. Members of the QCWA Chapter 119 will do a combination special event station and RSGB IOTA Contest (July 25-26th) effort from Tangier Island, VA, in Chesapeake Bay. The callsign will be W4T commemorating the 400th anniversary of the mapping of Chesapeake Bay and Chapter 119's 30th anniversary. The history of Tangier Island will be promoted as part of this operation. The group's contest effort will be a Multi-Op entry. Operators mentioned are: Quint/K4CQW, Stu/K4MIL, Butch/KE4AZL, Terry/KI4RXC, Talley/W4TVG, Vic/W4VIC, Barry/K5VIP and Ron/W8RJL. The group will operate three stations - CW, SSB, and RTTY on all bands 80-6 meters as conditions permit. QSL via LoTW or K5VIP. Logs will be uploaded to LoTW and eQSL at the conclusion of the expedition.

NA-128. Members of the NA-128 Contest Group will activate the special callsign CG200I (Charly Golf Two Hundred India) from Ile Verte (C.IS.A QC-015, Grid FN58, ARLHS CAN-224, WLOTA 1404) between

July 23-26th, during the IOTA Contest to commemorate the 200th anniversary of the lighthouse. Operators will be: Frank/VA2RC, Martin/VA2ZO, Eric/VE2EDA, Dany/VE2EBK, Jean/VE2FSK, Steve/VE2TKH, Martin/VE2MTK and Guy/VE2QRA. The group will operate many stations from the lighthouse keeper's quarters on all bands (160-6 meters) and all major modes (AO-51, SSB, CW and RTTY/PSK31). During the IOTA Contest a station will be dedicated to the contest exclusively on SBB or CW. QSL via VE2CQ (bureau or direct). ADDED NOTE: Built in 1809, the Ile Verte lighthouse is celebrating its 200th anniversary and many special activities will take place all summer long. This lighthouse is the oldest in the St-Laurence River and the third oldest in Canada. It was declared a historical monument in 1976 by The Historic Sites and Monuments Board of Canada. A special stamp showing the lighthouse was released by Canada Post in 1984. The lighthouse is 54 feet high and is the main attraction on the island. It is open to the public, and there is also an inn where you can stay overnight. Any money received through their QSL manager will be given to the Corporation des maisons du phare de l'Ile Verte in order to help them with the restoration of the lighthouse. If you would like to make a donation, you can do so by visiting the Corporation's Web site at: http://www.ileverte.net/maisonsduphare/index.html Virtual visit: http://www.ileverte.net/maisonsduphare/diapo.html ISLAND NOTE: NA-128 is made up of more than 45 islands, rocks and smaller reefs and more than half of them are accessible for future NA-128 expeditions.

NA-191. Just a reminder that operators Klaus/DK6AO, Gunter/TI7WGI, Andy/DH8WR (EA2CRX), Norbert/DL2RNS, Rene/DL2JRM and Daniel/DL5YWM will be active as TI7*** (TBA) from San Jose Island (Guanacaste Province), Costa Rica, between April 17-20th. Activity will be on 80-10 meters using CW, SSB, RTTY and PSK31. QSL via DK6AO, direct or by the bureau. For updates and more info, please visit their Web page at: http://ti7.info

SA-079. Members of the Rio DX Group and Labre will activate Rasa Island (DIB RJ-07, DFB-RJ-10, ARLHS - BRA-047) off the coast of Rio de Janeiero, as PT1R, May 1-5th. Activity will be on 160-2 meters using CW, SSB and the Digital modes with two stations. There will be also a station active on 6m and 2m for operations in the Araucaria VHF Contest. Operators mentioned are: PY1ZV, PY1NB, PY1YB, PY1IBM, PY1KN, PY2WC, PY2NDX, PY4OG and PY4OY. QSL via PY1NB. More details are forthcoming on: http://riodxgroup.dxwatch.com/rasa

LN2, NORWAY (Special Event). Members of the Radio Club of Gardermoen (LA2G) will be active using the special callsign LN2G between April 17-19th. This special callsign has been authorized in conjunction with the "Norwegian Hammeeting" (See http://www.hammeeting.no). Activity will be mostly on 40 and 20 meters, SSB, PSK31 and RTTY. QSL via the

club station LA2G.

MDF IN NOVA SCOTIA. The Halifax Amateur Radio Club (HARC) invites DXers, contesters and HF enthusiasts to the 6th Annual Maritime DX Forum (MDF). On Friday, August 7th. A reception and registration will begin at 7:00 pm. The MDF program on Saturday, August 8th, will run from 8:30 am - 4:45 pm, followed by reception and the DX banquet at 6:00 pm.
The speakers - active and outstanding members of our ham radio community - include:
* MARTTI LAINE, OH2BH: Turning New Stones: Building Passion for Amateur Radio
* JOE TAYLOR, K1JT: Advances in Weak Signal Communications
* GEORGE NICHOLSON, N4GRN: 2009 Desecheo Island DXpedition
* DOUG ZWIEBEL, KR2Q: QRP Contesting from Home Stations
The MDF will be held in the Rosaria Centre of Mount St. Vincent University in Halifax, Nova Scotia. Inexpensive accommodations are available at the University. This is a great opportunity to combine a top-notch ham radio event with a tourist visit to Canada's Maritime Provinces. The cost of the Maritime DX Forum is $45 and the banquet is $35 Registration materials can be downloaded from the HARC Web site (http://www.halifax-arc.org/), or requested directly from the MDF Chair, Scott Wood, VE1QD. Scott would like to know of your intention to attend, and will gladly answer any questions. He can be contacted at: ve1qd@... or at (902) 823-2761.

OA4/OA7, PERU (Satellite Op). Neven, 9A5YY, intends to operate on the satellites AO-51, AO-27 and SO-50 with his handheld Yaesu VX-7R and vertical antenna AL-800 during his stay in Peru between now and April 19th. Look for him to use the callsigns 9A5YY/OA4 from Lima and as 9A5YY/OA7 from Cuzco. Neven states, "I will be limited with time because of other obligations. I hope I will succeed to do some satellite QSOs. Please, listen and respond to me when you hear my CQ on the birds!"

OH0, ALAND ISLAND. Operators Mikko/OH3FM and Pertti/OH3LQK will be active as OH0/homecall through April 15th. Activity will be on 80-10 meters using CW and Digital modes. QSL via their home callsigns.

P2, PAPUA NEW GUINEA (Update/IOTA Op). Operators Hans/SM6CVX (CW), Derek/G3KHZ (CW), Luis/CT1AGF (SSB/RTTY), Gordon/G3USR (SSB) and David/M0VTG will activate three Papua New Guinea IOTA islands between October 22nd and November 9th. The announced schedule and callsigns are as follows:
OC-102 - Tanga Island; callsign P29VCX (via SM6CVX); October 22-26th
OC-231 - Green Island; callsign P29VLR (via SM6CVX); October 27-31st
OC-205 - Woodlark Island; callsign P29NI (via G3KHZ); November 2-9th
Activity will be on 160-15 meters using CW, SSB and RTTY modes. The team will be using new single band vertical dipoles for 30-15 meters and a ground plane for 40 meters. Hans, SM6CVX, will activate D'Entrecasteaux (OC-116) as P29VCX (via SM6CVX) between November 11-13th. A Web page is available at: http://www.425dxn.org/dxped/p29_2009/index.html

QSL INFO AND NEWS.....
The C91TX DXpedition's log is now available online as well as some new pictures at: http://www.tdxs.net/c91.html

QSLs for EG2ANT (WAP-171) have been printed; direct requests have been posted already. Bureau cards will be put in the box this week. More info available at the WAP Web site: http://www.waponline.it

QSLS VIA LOTW: 4U1UN, 4W6R, CT1ILT, EF8R, F8DBF, FS5KA, HC8A, HH4/K4QD, J7OJ, J75KG, NP2KW, PY2WC, RW0LT, TI5N, TM6M, UN1L, V5/DJ4SO, VP2E, WP2Z, YN2DD and ZZ6Z

QSLS RECEIVED VIA MAIL: 4K9W, 5H3EE, 6W/DL2RMC, ER4DX, ET3JA, FS5KA, FW5RE, HC2/SM7BUA, HC2/SM6FKF, J7N, JD1BMM, LY2ZZ, NH0AA/NH2, PX200JMU, T27OU, T30XX, T33ZZ, T88CD, V6C, V6P, V7XX, VK9AA, VP2V/SP7VC, VR2XMT, XW1B, YB2UTX and ZL3IX

QSLS RECEIVED VIA THE BUREAU: 1A4A, 4O/DD5FZ, 4Z1UF, 9M4DXX, AM5R, CT1BOL, CT1DIZ, EA6AAC, EU2MM, F/OR7S/P, HB9H, JA3JOT, OE2008MCU, OE8PPK, OL4HQ, RZ4CWW, SV9CVY, TM0BRZ, TM6ACO, TM6I, UR7GO/P, UW1GZ, YU105NT and YW5AS

S0, WESTERN SAHARA (Update). By the time you read this, an international team of operators (known as the Tifariti Gang) composed of Agustin/EA1KY, Roberto/EA2RY, Antonio/EA5RM, Manuel/EA7AJR, Alain/F6ENO, Bernard/F9IE, Fabrizio/IN3ZNR and Valery/UT7CR will be on the air from Western Sahara until April 17th using the callsign S04R. Activity will be on all bands from 160-10 meters using CW, SSB and the Digital modes. QSL via EA5RM. Ruben, EA5BZ, will be the pilot station. For more information, please visit the S04R Web site at: http://www.dxfriends.com

S2, BANGLADESH. By the time you read this Ramon, DU1UGZ, is expected to be active as S21UGZ from Dhaka City until June 20th, depending on his work schedule. He will be using a low band dipole at first, so his emphasis will be on 80/40 meters SSB and RTTY. From May through June, he will be using a beam for 10, 12, 15, 17 and 20 meters. He hopes to have a linear in use starting in May as well. QSL via DU1UGZ.

SPECIAL EVENT. Members of the Sonoma County ACS (Aux. Comm. Service) and the Sonoma Mountain Repeater Society (SMRS) will activate special event station K6P from Petaluma, CA, on April 25th, between 1600-2300z. This activity takes place during the "Butter & Egg Day Parade", honoring Petaluma as egg capital of the world. Suggested frequencies are: 14260, 7260, 7050 kHz and 146.91 MHz. QSL via KE6LPO, Matt Ilonummi, PO Box 2922, Petaluma, CA 94953-2922. Visit the K6P Blog page at: http://k6p.blogspot.com

SUMMER HOLIDAY TOUR (OY and TF Ops). Maurizio, IW4BLZ, will be on a summer holiday and plans to be active as OY/IW4BLZ from Faroe Islands between July 27-29th, and as TF/IW4BLZ from Iceland between July 31st and August 11t. Activity will be on 80-6 meters using his ICOM IC706 MK2-G (w/100 watts) into a vertical antenna. QSL via IW4BLZ, by the Bureau or direct (w/2 USDs) to: Maurizio Bergonzi, via Pedora 30, 40052 Baricella, Bologna, ITALY. Visit his Web page at: http://digilander.libero.it/IW4BLZ/index.html

TS1, TUNISIA (Special Event). The Tunisian Scouts will be using the special callsign TS1LYMC between April 12-30th. Activity will take place during a Festival "I Love You My Country" and to celebrate the 75th anniversary of the Tunisian Scouts. Activity will be on all bands 160-10 meters using CW, SSB, RTTY, PSK and SSTV. For more details and the QSL address, please go to: http://www.qrz.com/db/ts1lymc

USI ACTIVITY. Members of the Michiana Amateur Radio Club (W9AB) will activate Monkey Island (Not an IOTA, USI IN-005R), located in the St. Joseph River in Mishawaka (St. Joseph County, WW Loc. EN61WQ, Indianna), on April 18th, between 1400-1700z. Suggested frequencies are: 7030, 7225, 14060, 14225 kHz (+/- QRM). QSL via W9AB (w/SASE) to: Michiana Amateur Radio Club, 3220 E Jefferson Blvd., South Bend, IN 46615-3028 U.S.A.

VK9LA WRAP-UP AND COMMEMORATIVE T-SHIRT AUCTION. The VK9LA DXpedition made 30,160 QSOs. Breakdown of the QSOs are as follows: 18842/CW, 9261/SSB and 2057/RTTY. By bands: 160m/627, 80m/3347, 40m/9111, 30m/4458, 20m/6714, 17m/3579, 15m/2158, 12m/2158, 10m/161 and 6m/5.
Now is your chance to bid on a piece VK9LA memorabilia. To help raise some funds to repair equipment that failed on the island, a special commemorative Icom VK9LA T-shirt with all operators listed on it, will be auctioned off to the highest bidder. The bids will end April 30th. Current bid (as of press time) was 157 USDs. To see the shirt and place a bid, go to: http://www.odxg.org/vk9la.htm

VK9M, MELLISH REEF (Update). Operators George/AA7JV and Tomi/HA7RY, have had a tough job during this DXpedition -- fighting storms with heavy rains and winds. By the time you read this the operation should be over. On their last day of operation (April 12th), they reported that some of their antennas were destroyed, and the latest storm almost knocked down their tent. They also had to cannibalize parts of their beverage antenna to shore up the tent again. As of print time, their online log showed 17663 QSOs in the database (as of 2039z, April 10th). PLEASE NOTE that their "Log Search" has not been updated with the QSOs that took place between April 9th, 2020z and April 10th, 0920z. There seems to be some issue with the WriteLog file for that period which they hope to fix later. Please QSL via HA7RY, direct, LoTW or by the Bureau (remember, they have an "Online QSL Request Service"). For updates and more info, please visit the VK9GMW Web page at: http://www.vk9gmw.com

VP2M, MONTSERRAT. John, KB4CRT, will be active as VP2MRT between June 12-19th. His activity will include CW, SSB, possibly PSK, and the June VHF Contest. Asian stations are suggested to look for him on 20 meters between 1200-1300z. QSL via KB4CRT.

VP9, BERMUDA (NA-005). Paul, G4BKI, will once again be active as VP9KF from Hamilton Parish, until April 22nd. Activity will be CW only on all bands. QSL via W4/VP9KF: Paul Evans, 6809 River Road, Tampa, FL 33615. Visit his Web page at: http://vp9kf.com/
Please, DO NOT send to the VP9 bureau.

WP4, PUERTO RICO (Special Event). A group of operators will activate special event station WP4NPC to commemorate World Amateur Radio Day 2009. Operations will be on the Digital modes, SSB and possibly CW starting about 1600z, mainly between 15 and 20 meters. QSL via WP4NPC.

XR0, JUAN FERNANDEZ ISLAND. A multi-national team will be active as XR0ZN between November 24th and December 3rd. Activity will take place before and during CQWW DX CW Contest (November 28-29th). Operations will be on CW, SSB and RTTY. Operators mentioned are: Marko/CE6TBN, Terje/LA8BCA, Yuri/RA0FU, Ole/LA6EIA, Rag/LA6FJA, Hakon/LA-M, Arne/LA7WCA, Johnny/LA5FJA and RA0FU's brother. QSL direct to Manager. Logs will be uploaded to LoTW in 6-9 months. For more details and updates, visit their Web page at: http://www.la6fja.eu/dx/XR0ZN

ZD8, ASCENSION ISLAND (Update). Karol, G0UNU, will be active as ZD8KR between May 4-11th. Activity will be mainly on 20 meters CW and SSB. Activity will only be during his spare time, but hopefully daily using IC-7000 and an inverted V dipole. Further details will be available through the QRZ.com Web page under ZD8KR once it is set up at the end of this month. QSL via the RSGB Bureau or direct by using the address under G0UNU on QRZ.com.

Same here. Could hear a murmur at times but I couldn't tell if it was them or some QRM. Never picked out even a syllable, so not a lot of point calling. That advantage of being 500 miles or so further south is paying off in this case!

I wrote W4XX an e-mail, telling him what a lunkhead he is!

Just kidding!

Heard lots of interesting stuff this weekend. I was stumbling around mostly in the Georgia QSO Party. Virtually all the action was on 40. Tuned on 20 a few times, but that was mostly filled with GC contest participants.

A friend of mine has a high-power auto-tuner. He seems to think he *must* be on the exact freq to tune the antenna as well as the W4xx you refer to. Why can't people either (a) get a noise bridge or something to help them tune their required-tuning antenna or (b) move off freq at least a little bit? I have one of those little gadgets from Palomar engineering (they call it a Tuner Tuner) - works like a champ to tune the G5RV without putting out any power at all.

Marsha (N4BU) said she got up early this morning. She could hear them on 40 SSB well enough but could never get through.

What a gutsy performance from those two guys!

The VK9-M operation is apparently now QRT. They may still be on the reef, but the station is either dismantled or in the process. Now they're apparently waiting on the winds to abate sufficiently that they can depart. Gotta be a bummer when you're ready to go home and can't!

I was stunned yesterday afternoon. During a lull in the Georgia QSO Party, I glanced at the cluster and saw the VK9-M spotted on 15 CW. Someone from Florida even posted them as having a 579 signal. I tuned them in. While I certainly wouldn't rate the signal I heard as 579, it was very readable - and workable. Their signal stayed readable from her (central FL) for perhaps as much as half an hour.

There was a lot of complaining on the cluster about this operation, but I wonder how many of the gripers took the time to discover (a) they worked hard to accomplish their stated goals for the trip and (b) it was only two guys! There stated goal was to focus heavily on the low bands and they did that. I never did hear them well enough on 80 to get through, but I did get several band fills and Marsha finally got through on 20 SSB.

The guys who voiced complaints should look at what these guys did - I don't think I'm that brave! - and consider whether they would ever have attempted what the VK9-M crew accomplished.

I have thought of writing down the callsigns of people in pileups who just keep calling and calling the DX when the DX is sending and then finding their e-mail addresses and asking them why they do that.

As for needing to tune right on top of another station, someone must have a pretty bad antenna to have to do that. Even on 160, where I have a bandwidth of maybe 20 kHz, I can still tune 5 kHz or so away from the station I want to work before trying to call him.

Here Here

Two guys and boat

Fantastic operation

Folks will complain just to complain; but how many have ever gone on an expedition??

DX is more than just 10-15 and some WARC bands and these guys found time to make a few happy outside their goals.

If your Mission Statement says what your goal is and you accomplish it- well that's all that can be said !!!

Great Job Great Guys and for the most part some great conditions on 40/80 and even 160

The problem with Dave's (AA6YQ) suggestion and yours is that I
am not 100% certain the guy who tuned was the same guy who called
5-10 seconds later. Likewise, in the heat of a pileup, people get
calls mixed up, and although I have been 99% sure it was W1AW who
called out of turn, it could have been WA1W. In both cases, you
"know", but in both cases you are not certain. That's why I didn't
give the W4's call here.

I have a problem with accusing others of something I am not
certain of. Forget the legalities. I have been accused of some
things I did, and also of some things I did not do. I sure didn't
like it, especially when the accuser got the call and story wrong
and/or exaggerated what he thought he heard. Vigilante justice isn't
the answer. I don't know what is. We are supposed to police
ourselves, but we do not have the means.

Anyhow, I got over it! :-)

Good onya mate! Forgive and forget (well, maybe not forget). Oh, and to give poor ole Hiram a break! When I was active this happened all the time. People have the urge to tune on the TX freq. of the DX. Having a tube final rig and two tube amps it's only necessary to tune within 50 kc's of where you're gonna transmit. There were two hams in my area in L.A. that had to tune on top of the DX. They were easy to spot watching the signal strength of the tune signal. One is a club member and I used to get on to him on the air but it did no good.

Art,
I called Palomar about the Tuner Tuner (product name PT-340) and they are no longer manufacturing anything - the owner has retired.
I wonder if I could use their plain noise bridge (switching it out when transmitting)?
Do you have any doc on the PT-340 - I would be glad to pay for it if my noise bridge would work to kludge up a PT-340 box.

Frank, I found the "manual" (which includes the schematic) for the PT-340. I can't make out your e-mail from what's listed here - I can respond to you, but can't make an attachment (I don't think!).

Fire me a quick e-mail to

aburkefl at comcast dot net

and I'll send you a scanned copy. It looks like it's four pages, but the "guts" are only the inside two pages - the verbage describing how to use it and the schematic.

I think you can do something similar with a noise bridge, but I'm guessing, as I've never used one!

9542. S04R in the log

Yahoo group: DX-IS (2009)
Date: 2009-04-13 23:46:51 UTC
From: Alan Leith
Topic: 9542 Message: 9542

I sat for 3 minutes outside the edge of the pile-up and I'm pretty sure he came back to me on 40 CW. I say pretty sure because there were at least two stations calling him on his frequency while I was working him. The timing was perfect and so I'm putting him in the log. Cheesh, you'd think S0 was rare or something.

Calling within the confines of the pile-up was fruitless. I know, because I did it for a long time and I simply don't have a big enough signal to compete. You do what you gotta do and I hope I can do that on 30 and 80 where I do need it.

9544. To QSK or not QSK - that is the question!

Yahoo group: DX-IS (2009)
Date: 2009-04-14 18:11:07 UTC
From: Paul M Dunphy
Topic: 9544 Message: 9544

I posted this on an amp forum, and all I got were answers from contesters and such saying QSK was easier to operate, some saying they could not do without it. I agree it is better from a pure "working the pileup" point of view. However, it can't be good on the gear, can it?

==========

Sending VE1DX switches the relays in the rig and the amp twice, once to put things in XMIT and once to go back to RX. ..._ . .---- -.. -..- switches the relays 34 times. It's not the noise of the relays clicking that concerns me. It's the excessive switching that the relays in the radio and the amp have to do. A 17:1 increase just to send my call can't be a good thing from a mechanical point of view.

I understand it's nice to be able, in a DX pileup, the hear the DX send N2 instead of VE. Then I can stop my transmission without completing my call, but at 24-25 WPM it doesn't seem to make a lot of difference. It is better for most operating, I agree, but I question whether it is worth the excessive wear on the relays.

Relays may be inexpensive, but it would take me a week or two to acquire and replace one in the amp. I don't know what I would do with my PRO3 (probably have to get a professional repair shop to do it if I could find one or send it back to ICOM) . . . I'm not technically inclined enough to take it apart and replace the relay in it. I somehow can't get my mind around the idea that full QSK in not abusing the gear. Things break and wear out, but there seems to be no need to hasten the process by a factor of 15-20, if my theory is correct. Maybe it isn't, but I don't want to chance it.

Do I have this wrong? All modern gear says "supports full QSK." Does that mean it is no harder on the equipment than not using it? No one has ever answered this. (From the technical standpoint -- I'll concede crack CW OPS love it and are fast enough to break their sending as soon as the DX starts with someone else's call.)

Hi Paul,
I'm by no stretch a 'crack operator' - but I would hate to work a pileup without qsk.
If I were to send my complete call and then listen - very often, the dx would already have gone back to someone.
I then have only two options.
1) Wait 'awhile' to see if he is working someone.
2) Assume he is still listening and call again.
Essentially, I would be 'out of sync' with the dx a great deal of the time.
Effectively, I think it would greatly reduce the time my call is being sent *while he is listening*

I had to spend more for my QSK Master than I spent for the amp itself, but it is worth every penny to me

You could fix that with a shorter callsign or faster sending
(one good reason for living in Texas!).

Thanks, Frank. I understand what you are saying, and after over 23 years of operating (never with QSK), I have "gotten used to" doing it without it. I guess it is equivalent to transmitting SSB and hearing the other guy between syllables and word (like talking on the telephone!)

Anyhow, I don't need to be convinced on the operating advantage . . . some times I send my call a couple of times and when I go back to RX I hear "X 5NN." I have no idea if he came back to me or another station ending in X. I have to wait and see if he sends it again. From a pure operating standpoint, I'm convinced.

The question no one seems to be able to answer is if it beats the crap out of your gear. My impression is that with modern relays it does not, but I gave this vision of the old relays in things like Dentron MLA-2500s and SB-200s stuck in my mind (and the equivalent stuck relays in those amps!)

Hi Paul,

Well the best answer would be.... That depends!

In a modern radio that 99.9% of the actual switching is
done electronically are you
going to wear out the pin diodes or transistors, no... So it is reduced
to a mechanical question with
the relays. The two AMPS you used as examples the answer is most likely
it is very bad and a
failure would be imminent. Those relays are not fast enough and you
most likely would end up hot
switching. If you did the timing sequencing necessary it would be
"break in" at only quite slow
speeds. Also those open frame relays I would wonder about their
mechanical life also with wear
from the raw quantity of use. You could research the MTBF for them.

Now my TS930 uses a reed relay for antenna switching.
Kenwood uses it for break in
switching and it is fast enough for me. I have 2 AMPS that have break
in. My SB220 that has
been modified to do it. It uses the Kenwood relay to switch the input
and a Jennings vacuum
relay on the output. Been working like that for well over 25 years.
Fast enough for me in the
25-30 WPM range. Maybe the 40-45WPM guys wouldn't be happy but I can
hear and stop in the
middle of my call when the DX station replies to someone.

I also have an Ameritron AL811 with the external QSK box
that I use sometimes, but
only on 160, I would say that it is only marginally satisfactory. It
switches the large open frame
relay in the AMP once and then after some delay drops it out. I suspect
that the first dot or dash
is hot switched looking at the SB610 scope. Another problem with that
setup is then when it
releases the AMP relay it induces a large audible spike in the receiver
(again the TS930).
Sometimes quite irritating if using headphones. But I live with it as
I don't operate 160 a lot.
Were I to get serious about 160 I would modify the amp for electronic
bias switching to keep
the tubes cutoff between characters and get rid of the built in
relay. I bought it used as a

package and just use it as such. I've had no failures and as far as I
know K2TA who I bought it
from didn't either.

So properly done I wouldn't worry about it at all. But as
said many times, Your Mileage
May Vary....

I'm with you Paul. Now in my 52nd year of chasing DX, mostly on CW, I don't use QSK, and want no part of it. I use my left hand to key the xmtr with the hand Mic, and operate the keyer with my right hand.

Many years ago I purchased an AEA QSK-1 at Dayton and have had it installed "forever" on my 3OL-1. It failed me once, when one of the vacuum relays gave up, and I was able to find a single replacement for it. I have never had another problem with it, until recently, when it started to "stick" every once in a while and would not key. A tap with a pair of pliers on the box (not a slam) seems to bring it back to life.

I have not been able to locate the manual that came with it and I haven't taken it off the rig in years to look inside. But I'd sure like to know of a source for the vacuum relays.

More to the point, Paul, there have been tens of thousands of make/break contacts, and I have always liked the ability to hear between breaths on SSB and characters on CW.

Great idea. Years ago I used a foot switch, but got away from it. Just
can't remember why. I saw it out in the shack a few days ago. May have
to see if I can generate enough coordination to still be able to do that.

Now that the subject has been brought up and I have gone to the DK-mod site and downloaded the schematic for the AEA QSK-1, I have another question.

The QSK-1 uses a K41C334 relay. Brand new, these babies are outrageously expensive. Does anyone have any good ones that are surplus to their needs (I don't think many people would want them these days) that they'd be willing to part with for a reasonable price? I'd just like to have one or two on hand in case this unit ever dies again.

PS - I think it is difficult to find a schematic for the QSK-Master - proprietary info I guess.

9556. K41C334 vacuum relay

Yahoo group: DX-IS (2009)
Date: 2009-04-14 23:28:55 UTC
From: Alan Leith
Topic: 9556 Message: 9556

Now that the subject has been brought up and I have gone to the DK-mod site and downloaded the schematic for the AEA QSK-1, I have another question.

The QSK-1 uses a K41C334 relay. Brand new, these babies are outrageously expensive. Does anyone have any good ones that are surplus to their needs (I don't think many people would want them these days) that they'd be willing to part with for a reasonable price? I'd just like to have one or two on hand in case this unit ever dies again.

I'm pretty much in the same boat. I have 320 confirmed on CW and have NEVER worked QSK. I have a foot switch to engage the PTT when I want or need it, but, on CW, I generally use semi-break-in.

On CW I only use the foot switch if I answer someone who's running really slow CW. Without staying in transmit, the VOX (for semi-break-in) keeps dropping out between the letters/words.

My amp (AL-82) is "old style" and not equipped for QSK. I do understand the argument for QSK in a pileup, but I've never felt all that handicapped by not using it.

9558. I need to make an offering to the DX gods

Yahoo group: DX-IS (2009)

From: Mark Lunday, WD4ELG
Topic: 9558 Message: 9558

I worked S04R Monday night on 20 CW, second call to him. Blind "forest gump" luck, but DX IS and I will take it. So last week's offering to the prop gods was accepted, and Monday night's results are the proof.

Tue and this morning I heard XU7MDY calling CQ on 20 CW in the clear and nooone was responding. I thought he had me at one point when he said "ERG?" but then no reply to my repeated attempts.

Running a 2 ele hex beam at 40 foot with 100 watts for XU7. That should be enough, esp when no one else is calling him. And XU7MDY is a good op (OH4MDY, I believe).

What is an appropriate offering for the polar path gods, as this route still gives me fits? I have yet to work VR2, HS from this QTH. JA is not that common from here for my station. I never hear V8 or 9M or 9V, I only finally worked BY last Aug during Olympics on20 CW, and had to repeat call 8 times.

Since the purchase of my Titan 425 (Dayton Hamvention 1990), I've operated nothing but QSK while chasing DX or an occasional CW contest. My original Corsair II, (1988 I think) and Omni VI Plus are still driving the Titan 425 just fine. Obviously there is some finite number of operating cycles for every relay but I'm not going to get to overly concerned; I'll worry about replacing the relays when the time comes to do it. In the mean time I'll just enjoy QSK done with Ten-Tec and Bencher...

Subject: [DX-IS] To QSK or not QSK - that is the question!

I posted this on an amp forum, and all I got were answers from contesters and such saying QSK was easier to operate, some saying they could not do without it. I agree it is better from a pure "working the pileup" point of view. However, it can't be good on the gear, can it?

==========

Sending VE1DX switches the relays in the rig and the amp twice, once to put things in XMIT and once to go back to RX. ..._ . .---- -.. -..- switches the relays 34 times. It's not the noise of the relays clicking that concerns me. It's the excessive switching that the relays in the radio and the amp have to do. A 17:1 increase just to send my call can't be a good thing from a mechanical point of view.

I understand it's nice to be able, in a DX pileup, the hear the DX send N2 instead of VE. Then I can stop my transmission without completing my call, but at 24-25 WPM it doesn't seem to make a lot of difference. It is better for most operating, I agree, but I question whether it is worth the excessive wear on the relays.

Relays may be inexpensive, but it would take me a week or two to acquire and replace one in the amp. I don't know what I would do with my PRO3 (probably have to get a professional repair shop to do it if I could find one or send it back to ICOM) . . . I'm not

technically inclined enough to take it apart and replace the relay in it. I somehow can't get my mind around the idea that full QSK in not abusing the gear. Things break and wear out, but there seems to be no need to hasten the process by a factor of 15-20, if my theory is correct. Maybe it isn't, but I don't want to chance it.

Do I have this wrong? All modern gear says "supports full QSK." Does that mean it is no harder on the equipment than not using it? No one has ever answered this. (From the technical standpoint -- I'll concede crack CW OPS love it and are fast enough to break their sending as soon as the DX starts with someone else's call.)

Paul, in reviewing the replies to your post (and your answers), it seems to me that your ICOM Pro probably can support QSK for as long as you'll use it, the real issue is will your amp unless it was designed to operate QSK or has a reliable mod or add on to make it so.

I find QSK to be invaluable for working DX from the pile-up. Also for "hunt and pounce" contesting. But for setting and calling "CQ Test" its really not needed. But like many other things, it's a matter of taste, style, and habits.

One CW QSK experience you probably won't experience with PTT; hearing your own CW echoes due to "long path propagation" or polar path reflections.

Hi Mark,

Congratulations on the S04R. They have been extremely difficult
to work from NA, and given that S0 isn't that rare, I'm surprised at
the huge pileups.

Don't feel bad about XU7MDY. You are doing fine for 100 watts
and a 2-el beam. The Far East is a tough path for east coast NA. We
have two good shots at them, one during the spring equinox and
another in the fall. Regrettably, the spring one is over, or almost
so. Starting in early March I was working HL, DU, XW, BY, BV, XU,
VR2, etc almost every day. I have also logged a 9M2, a 9M6 and a
couple of JTs and about a dozen UA0/9 stations in zones 18 and
19. All of this on 20/30 metres.

Around 10-11 April someone flipped the propagation switch
off. They are all gone. I managed to work XU7MDY this morning with
1KW and a TH5 aimed right at him (about 15 degrees, just a little

east of due north.) It wasn't easy and he struggled several times with the prefix. He was, as you say, calling CQ and getting few takers. The rest of them are all gone. I'm sure EU stations are working them, but the season is over for us. In a week propagation has shifted.

Were we at a point higher in the solar cycle, these openings would last longer and the signals would be a lot stronger, but we can't do it without sunspots. It's disappointing and there isn't a lot we can do about it except hope that the sunspots return soon. The other thing about the polar path is that the slightest geomagnetic upset will attenuate signals in a big way. If there is any good to be said about the current minimum, it's that there have been very few of these magnetic storms.

With the upswing of the cycle we'll also see openings on the higher bands at different times of the day, and lots of fun stuff to work. Right now, the only thing on the horizon is sporadic-E season that should start in mid-May and last until mid-July. This will open up 6M, and to a lesser degree 10/12M. It isn't a lot of fun being a DXer at the bottom of a prolonged solar cycle trough.

I have been through a couple of solar cycles, being first licensed in 1980. I don't remember a solar minimum lasting this long, though. Is this something unique or have other cycles had minimums this long? If it is unique, does anyone have any idea as to what is going on?

Don't feel bad about XU7MDY. You are doing fine for 100 watts and a 2-el beam. The Far East is a tough path for east coast NA. We have two good shots at them, one during the spring equinox and another in the fall. Regrettably, the spring one is over, or almost so. Starting in early March I was working HL, DU, XW, BY, BV, XU, VR2, etc almost every day. I have also logged a 9M2, a 9M6 and a couple of JTs and about a dozen UA0/9 stations in zones 18 and 19. All of this on 20/30 metres.

Around 10-11 April someone flipped the propagation switch off. They are all gone. I managed to work XU7MDY this morning with 1KW and a TH5 aimed right at him (about 15 degrees, just a little east of due north.) It wasn't easy and he struggled several times with the prefix. He was, as you say, calling CQ and getting few takers. The rest of them are all gone. I'm sure EU stations are working them, but the season is over for us. In a week propagation has shifted..

Were we at a point higher in the solar cycle, these openings would last longer and the signals would be a lot stronger, but we can't do it without sunspots. It's disappointing and there isn't a lot we can do about it except hope that the sunspots return soon. The other thing about the polar path is that the slightest geomagnetic upset will attenuate signals in a big way. If there is any good to be said about the current minimum, it's that there have been very few of these magnetic storms.

With the upswing of the cycle we'll also see openings on the higher bands at different times of the day, and lots of fun stuff to work. Right now, the only thing on the horizon is sporadic-E season that should start in mid-May and last until mid-July. This will open up 6M, and to a lesser degree 10/12M. It isn't a lot of fun being a DXer at the bottom of a prolonged solar cycle trough.

73, Paul VE1DX

9565. Re: [DX-IS] I need to make an offering to the DX gods

It's funny how different people need different things along their path on DXCC. I worked S2 as one of my first 100. I didn't even know what I'd worked at the time as my DXCC Countries List was several years old and didn't even have Bangladesh on it! That was at a sunspot peak and I had no trouble working them on 15 meters, wherever they were. :-)

The rest of deep Asia is pretty difficult. JA's are on a different path and I've had no trouple working JA.

The Middle East also seems tricky here. Maybe it's because they are somewhat rare, but I have yet to work an A9, YA or EP. I've worked a couple 7O's but neither counted for DXCC. :-(

Also, I think this is a very unusual solar cycle. I've only been through 4 but I understand there hasn't been one with this long a minimum in a long time. How do we coax the Palos Verdes Sundancers to give us a hand?

Two of my first 100 were KH7K (then just KH7) and KH4. Still need the KH7 on CW, though. I didn't realize how rare Kure was for some time. Another of my first 100 was Mali which was quite rare back then. I still need XU, XX9, 9N and S2, which all have ham populations.

ARLD015 DX news

ZCZC AE15
QST de W1AW
DX Bulletin 15 ARLD015
>From ARRL Headquarters
Newington CT April 16, 2009
To all radio amateurs

SB DX ARL ARLD015
ARLD015 DX news

This week's bulletin was made possible with information provided by F8DVD, IK7JWX, K9WZB, LA7VK, NC1L, the OPDX Bulletin, DXNL, 425 DX News, The Daily DX, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

UNITED ARAB EMIRATES, A6. In celebration of World Amateur Radio Day on April 18 members of the Emirates Amateur Radio Society will be QRV as A60WARD. QSL via IZ8CLM.

BAHAMAS, C6. Operators AA4NN, W8GEX, N4AA and W8CAA are QRV as C6DX, C6AAA and C6AYL from Eleuthera Island, IOTA NA-001, until April 24. Activity is on all bands using CW, SSB and RTTY. QSL C6AAA via N4AA, and C6AYL and C6DX via W8GEX.

MOROCCO, CN. A large group of operators will be QRV as 5C2A, 5C2B, 5C2C, 5C2F, 5C2G, 5C2J, 5C2L, 5C2SG, 5C2Y and 5C2Z from Mogador Island, IOTA AF-065, from April 18 to 26. Activity will be on 160 to 10 meters using CW, SSB, RTTY and PSK31. QSL via operators' instructions.

CEUTA AND MELILLA, EA9. Look for special event stations EE9IB, EE9RY and EE9CF to be QRV from Melilla from the Bonete Lighthouse, ARLHS CEU-011, on April 18 and 19. QSL EE9IB via EA9IB, EE9RY via EA9RY and EE9CF via EA9CF.

ITALY, I. Adriano, IT9CCB will be QRV as IO9ROTA from April 19 to May 19 in celebration of the 141st birthday of Paul Harris, the founder of the Rotary International Club. Activity will be on 40, 20 and 15 meters. QSL via operator's instructions.

MONGOLIA, JT. Operators JH1AWN, JA7AGO, JA7LU and JA7ZP will be QRV as JT1AWN, JT1AGO, JT1LU and JT1ZP, respectively, from Ulaanbaatar from April 21 to 28. Activity will be on 160 to 6 meters using CW, SSB, RTTY and PSK31. QSL to home calls.

SVALBARD, JW. Francois, F8DVD will be QRV as JW/homecall from Spitsbergen, IOTA EU-026, from April 19 to 25. Activity will be on all HF bands using CW and SSB. QSL to home call.

PUERTO RICO, KP4. A group of operators will be QRV as special event station WP4NPC in commemoration of World Amateur Radio Day. Activity will be mostly on 20 and 15 meters using SSB, various digital modes and possibly CW. QSL via WP4NPC.

NORWAY, LA. Members of the Radio Club of Gardermoen are QRV as LN2G until April 19 in conjunction with "Norwegian Hammeeting." Activity will be mostly on 40 and 20 meters using SSB, RTTY and PSK31. QSL via LA2G.

BANGLADESH, S2. Ramon, DU1UGZ is QRV as S21UGZ from Dhaka City until June 20. He will be active on 80 to 10 meters using SSB and RTTY in his spare time. QSL to home call.

SEYCHELLES, S7. Davide, IZ3EFL is QRV as S79DF for about one year. He is currently active on 20 meters but hopes to be QRV on other bands as well. He may also try to activate Aldabra Island, IOTA AF-025. QSL via IV3TDM.

POLAND, SP. In celebration of World Amateur Radio Day, special event stations 3Z0WARD, 3Z2009WARD, HF2009WARD, HF84WARD, HF9WARD, SN0WARD, SN2009WARD, SP0WARD, SP2009WARD, SQ0WARD and SQ2009WARD are QRV until April 19. QSL all calls via SP2FAP.

CAYMAN ISLANDS, ZF. Sharon, K7WZB and Garry, K9WZB will be QRV as ZF2ZB from Cayman Island, IOTA NA-016, from April 21 to May 6. Activity will be on 160 to 6 meters using CW, SSB, RTTY and PSK31. QSL direct via K9WZB.

THIS WEEKEND ON THE RADIO. The ARLHS Annual Spring Lites QSO Party, World Amateur Radio Day, NCCC Sprint CW Ladder, Holyland DX Contest, TARA Skirmish Digital Prefix Contest, ES Open HF Championship, Feld Hell Sprint, Michigan QSO Party, EU Spring SSB Sprint, EA-QRP CW Contest, Ontario QSO Party and the YU DX CW Contest will certainly keep contesters busy this weekend. The Run for the Bacon QRP CW Contest is scheduled for April 20. The SKCC CW Sprint and 432 MHz Spring Sprint are scheduled for April 22. Please see April QST, page 84 and the ARRL and WA7BNM contest web sites for details.

No 937
==========
*** 4 2 5 D X N E W S ***
**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

3D2 - Jan, OK2ZAW will be active from the Fiji Islands between 1 and 8 May. His itinerary is as follows:
1 May Viti Levu OC-016 3D2ZW/p
2-4 May Mamanuca Group OC-121 3D2ZW/p
4-8 May Yasawa Group OC-156 3D2ZW
8 May Viti Levu OC-016 3D2ZW/p
He will be running 100 watts into a vertical antenna and dipoles. QSL via OK2ZAW, direct or bureau.
8Q - Cliff, SV1JG will be active as 8Q7SV from the Maldives (AS-013) from 29 April to 5 May. He plans to operate mostly CW and digital modes, on all bands. QSL via home call, direct or bureau. [TNX SV1JG]
9A - Aniko/HA5TAA, Feri/HA5AZZ, Neno/9A5AN, Livio/9A3KS and Tom/9A2AA will be active from a number of Croatian islands for a few days starting on 18 April. Islands named are Krk (EU-136, IOCA CI-046) and Sv. Marko (EU-136, IOCA CI-117), but the team plans to visit and operate from several other nearby islands. [TNX 9A2AA]
C6 - K3IXD, K4QO, W2GJ and W3PP will be active from Crooked Island (NA-113), Bahamas on 23-27 July. They will participate in the IOTA Contest as C6APR; before and after the IOTA event C6APR will be on 80-10 metres CW and SSB. The team will sign C6AXD on RTTY and C6AQO on 6 metres (grid FL22). The calls are good for Bird Rock Lighthouse (ARLHS BAH-005). All QSLs via K3IXD. [TNX K3IXD]
CE0Z - CE6TBN, LA5FJA, LA6EIA, LA6FJA, LA7WCA, LA8BCA and RA0FU will be active as XR0ZN from Juan Fernandez (SA-005) from 24 November to 3 December, CQ WW CW Contest included. QSL route TBA. Preliminary information can be found at http://www.la6fja.eu/dx/XR0ZN/ [TNX NG3K]
CT - The Algarve S.T.A.R. DX Team (http://algarvedx.com) will be active as CS6A from the lighthouse Doca Olhao W. (ARLHS POR-129) on 18 April, from 7 to 13 UTC. They plan to operate SSB and CW on 40, 30, 20 and 17 metres with two stations. QSL via CT1GFK, direct or bureau. [TNX CT1END

DL - Helmut, DL7VOX will be active as DL7VOX/p from Usedom Island (EU-129) from 27 April to 16 May. He will operate holiday style mainly CW on 160-10 metres, with 100 watts and wire antennas. QSL via DL7VOX, direct or bureau. [TNX DL7VOX]
EA9 - Look for EE9IB (QSL via EA9IB), EE9RY (QSL via EA9RY) and EE9CF (QSL via EA9CF) to be active from Bonete Lighthouse (ARLHS CEU-011), Melilla on 18-19 April. [TNX The Daily DX]
GM - Charlie/MM0GNS, Willie/GM4ZNC and Rodger/GM3JOB will be active as MS0TJT/p from the Island of Coll, Inner Hebrides (EU-008) on 3-8 May. They hope to be QRV on 80-6 metres, and plan to operate mainly SSB, with a little CW and PSK. QSL via GM4ZNC. [TNX GM3JOB]
HB0 - Look for Kasimir, DL2SBY and Georg, DF1SR to be active from Liechtenstein from 24 April to 4 May. They will be signing HB0/DL2SBY on 80-10 metres SSB, CW and RTTY and HB0/DF1SR on 13 and 23cm via EME. [TNX DL2SBY]
I - Ezio/IT9OJW, Sebastiano/IT9ZIR, Dario/IT9ZZO, Vincenzo/IW9EJP, Filippo/IW9FRB, Giovanna/IW9GVP and Ferdinando/IW9HSK will be active as IG9/homecall from Linosa Island (AF-019, IIA AG-003) on 24-26 April. They plan to operate SSB, PSK and RTTY on 10-80 metres. QSL via home calls. They have a web page at www.iw9frb.it/linosa.htm [TNX IT9EJW]
I - Giordano/IK0XFD, Alberto/IK0ZCW, Andrea/IZ0EHO, Vincenzo/IZ0FKE, Alberto/IZ0FMA and Claudio/IZ0GKX will be active as ID9N from Vulcano Island (EU-017) on 25-30 April. They plan to operate CW, SSB and digital modes on 160-6 metres, with a focus on the low bands. QSL via IZ0GKN. Further information can be found at www.id9n.com [TNX IZ0EHO]
I - Claudio, IZ0KRC will b active as IC8/IZ0KRC from Ischia Island (EU-031) from 29 April to 4 May. He plans to operate SSB on 10, 15, 20 and 40 metres. QSL via home call, bureau preferred. [TNX IK0YQJ]
JD1_oga- Koji, JI1LET will be active as JI1LET/JD1 from Chichijima (AS-031), Ogasawara from 29 April to 5 May. He plans to operate SSB, CW and RTTY on 40-10 metres, and on 6 metres. QSL via home call, direct or bureau. [TNX JI1LET]
JW - Francois, F8DVD will once again be active as JW/F8DVD from the Longyearbyen ARC on Spitsbergen Island (EU-026), Svalbard on 19-25 April. He plans to operate CW and SSB on all HF bands. QSL via home call, direct or bureau. [TNX F5NQL]
OZ - Dominic/ON4AZP, Michel/ON4CAQ, Francois/ON6VP, Herman/ON7FH and Maurice/ON7KS will be active as OZ5K from Romo Island (EU-125) on 17-23 May. They will operate on 80-10 metres, as well as on 2m. QSL via ON4AMM, direct or bureau. The web pages for the activity are at http://www.on4dst.be/iota_eu125_1.html [TNX ON4CAQ]
PY - Nine operators (namely PY1ZV, PY1NB, PY1YB, PY1IBM, PY1KN, PY2WC, PY2NDX, PY4OG and PY4OY) will be active as PT1R from Ilha Rasa (SA-079, DIB RJ-07) on 1-4 May. They plan to be be QRV on 160-10 metres SSB, CW and digital modes with two stations, while another station will be active on 6 and 2 metres during the Araucaria VHF Contest (details at http://www.avhfc.com/). QSL via PY1NB, direct

or bureau. The web page for the operation is at
http://riodxgroup.dxwatch.com/rasa [TNX PY1NB]
S2 - Ramon, DU1UGZ will be active as S21UGZ from Dhaka, Bangladesh
until 20 June. He operates in his spare time using a low band
dipole. For the time being, he will focus on 40 and 80 metres SSB
and RTTY, but in May he should get a beam for 10, 12, 15, 17 and
20 metres and hopefully a linear amplifier as well. QSL via home
call. [TNX NG3K]
SM - Kjell, SM4DDS will be active as 7S5A from Boko Island (Stora Alo,
EU-177) on 17-19 April. He will operate CW and SSB on 10-80 metres
using a G5RV. QSL via SM4DDS, direct or buro. [TNX SM4DDS]
TI - TI7KK is the callsign to be used by Klaus/DK6AO, Gunter/TI7WGI,
Andy/DH8WR, Norbert/DL2RNS, Rene/DL2JRM and Daniel/DL5YWM during
their 17-20 April IOTA activity from the Murcielago Islands
(NA-191) [425DXN 927]. They plan to operate around the clock on
160-10 metres SSB, CW, RTTY and PSK31. QSL via DK6AO, direct or
bureau. The website for the expedition is at www.ti7.info. [TNX
DL5YWM]
TI - Look for Orrin, TI6/K9KEJ (QSL via EB7DX) and Don, TI6/W9YOR to be
active on 40, 20 and 17 metres SSB from Costa Rica from 28 April
to 1 May. [TNX K9KEJ]
TK - Manu, F4FLQ will operate holiday style as TK/F4FLQ from Corsica in
11-29 May. Plans are to concentrate on the digital modes and 30,
17 and 12 metres. QSL via home call. [TNX F4FLQ]
TK - Gabriele, IZ5FDD and Alessandro, IW5ELA will be active as TK/
homecall from Corsica (EU-014) on 20-24 May. They plan to operate
SSB and CW on 40-10 metres, plus 2m. Their planned activity on
50 MHz [425DXN 935] has been cancelled as 6m are not allowed in
Corsica. QSL via home calls, direct or bureau. [TNX IZ5FDD]
V6 - Look for JA7HMZ (V63DX) and JH7IOS (V63CW) to be active on 40-6
metres from Pohnpei (OC-010), Micronesia on 11-16 May. QSL via
home calls. [TNX NG3K]
VE - Celebrating the 50th anniversary of the George Massey tunnel, the
Delta Amateur Radio Club (www.deltaamateurradio.com) from Delta,
British Columbia will be active as CG7GMT from Deas Island (CisA
BC-045) on 23-24 May. Look for activity on 80 and 20 metres
between 17 and 1 UTC. QSL via VE7SUN. [TNX VE7HRA]
VE - Eight members of the "NA-128 Contest Group" (VA2RC, VA2ZO, VE2EDA,
VE2EBK, VE2FSK, VE2TKH, VE2MTK and VE2QRA) will be active as
CG200I from Ile Verte (NA-128) on 23-26 July, IOTA Contest
included. The special callsigns celebrates the 200th anniversary
of the lighthouse located on the island, and the group will
operate many stations from the lighthouse keeper's quarters. Look
for them on 160-6 metres all modes. QSL via VE2CQ, direct or
bureau. Further information can be found at www.qrz.com under
CG200I. [TNX VE2EBK]
VK - Nao, JK1FNL will be active as JK1FNL/VK4 from Hamilton Island
(OC-160) on 5-9 May. QSL via home call. [TNX JK1FNL]
W - Eight operators from QCWA Chapter 119 (K4CQW, K4MIL, K5VIP,
KE4AZL, KI4RXC, W4TVG, W4VIC and W8RJL) will be active as W4T from

Tangier Island (NA-083) on 23-26 July, IOTA Contest included. They will run three stations on 80-6 metres CW, SSB, and RTTY. QSL via K5VIP. [TNX W4VIC]
XU - Wim, XU7TZG will be active again as XU7KOH from Koh Russei (Bamboo Island, AS-133) from 17 April until around 5 UTC on the 20th. He plans to operate SSB with some PSK31 on 80, 40, 20, 17, 15, 12 and 10 metres. QSL via ON7PP. Log search and further information at www.xu7tzg.be [TNX K1XN]
YV - The Asociation de Radioaficionados de Venezuela will participate in the International Marconi Day (25 April) as 4M5M. Look for activity on 160-10 metres SSB, CW and digital modes. QSL via W4SO (mail drop). [TNX YY5RNC]

Direttore Responsabile I2VGW

C91TX ---> New pictures and a Log Search web page for the recent Texas DX Society's operation from Mozambique can be found at http://www.tdxs.net/c91.html [TNX W9DX]

H44MS ---> Bernard, DL2GAC (H44MS) is back home. His activity from the Solomon Islands finished on 9 April, earlier than planned, because he could not extend is visa beyond three months. [TNX DL2GAC]

QSL GI5K & MI0LLL ---> With immediate effect, G3SWH is the new QSL manager for GI5K and MI0LLL. Phil will add a log search page for each callsign to his web site (www.g3swh.org.uk). He is also arranging for any unanswered, direct QSL requests to be forwarded to him and for the RSGB QSL bureau sub-manager to forward cards directly to him. [TNX K1XN and The Golist]

QSL KB5GL/4 ---> Silvano operated from IOTA group NA-213 on 26-28 March. He should like to remind island chasers that he QSLs direct (Silvano Amenta, 5028 Hearst Ave, Metairie, LA 70001, USA) provided that return postage is included (he says 1 USD or 1 IRC for the US, others 2 USD or 2 IRC)

SRT DX CONVENTION ---> The 6th International DX Convention organized by the Strange Radio Team (18 April) will be broadcast live on www.strangeradioteam.com and www.mogulus.com/idxclive starting at 12 UTC. [TNX IZ7AUH]

VK9GMW ---> George, AA7JV and Tomi, HA7RY went QRT from Mellish Reef at 4 UTC on 13 April, after fighting storms, strong winds and heavy rains over the last few days on the island. They made 20,058 QSOs (2,028 were on 160 metres). The Online QSL Request System (OQRS) has been activated for both direct and bureau cards (check http://www.vk9gmw.com for details). The ordinary QSL route is via HA7RY.

VK9LA ---> Band and mode statistics for the 22 March-3 April expedition to Lord Howe Island can be found at http://www.odxg.org/vk9la.htm. The most productive band was 40m (9111 QSOs), followed by 20m (6714 QSOs) and 30m (4458 QSOs). The grand total is 30,160 QSOs (18842 CW, 9261 SSB and 2057 RTTY).
A special piece of VK9LA memorabilia is being auctioned (see the website for the details). The money raised from the auction will be used to repair equipment that failed whilst the team was on the island. The closing date for placing your bid is 30 April.

+ CONDOLENCES + We are close in thoughts and prayers to Lucio Antonini, IK6SNR, whose daughters Genny (24 years old) and Giusy (22) lost their lives in the earthquake that struck L'Aquila on 6 April.

+ SILENT KEY + Philippe Lutty, LX2A reports the passing of his uncle and mentor Charly Hausemer, LX1AJ. The doyen of amateur radio operators in Luxembourg, Charly passed away on 7 April at 89 years of age. He had been licensed for more than 60 years and was a founding member of the Reseau Luxembourgeois des Amateurs d'Ondes Courtes.

QSLs received direct or through managers: 3B8CF, 3D2NB, 3D2OU, 3DA0VB, 3G1F, 3V8BB, 4K9W, 4O/K1ZZ, 4O3A, 5B/AJ2O, 5B4AII, 5H3EE, 5L2MS, 5N/LZ1QK, 5W0K, 5Z4/DL8NBE, 6W/DL2RMC, 6Y1LZ, 9H1LC, 9J2BO, 9J3A, 9M2AX, 9M2MRS, 9M6/N2BB, 9V1F1, 9V1RA, 9X0W, 9Y4D, A25/DL7DF, A25VB, A43DLH, A62ER/ND, A92GE, AH0F/KH2, C4N, C6AKQ, C91LW, C91VB, C98LW, CE1/K7CA, CM6RCR, CN2M, CO8LY, CW5W, D20VB, DU3NXE, E44M, E51SIX, E74AW, E74EBL, EA9PY, EF8M, EK3GM, EK6LP, ER0WW, ER4DX, ES8DH, ET3JA, EX2A, FH/G3SWH, FM5BH, FP/KV1J, FS5KA, FW5RE, GM7R, HC2/SM6FKF, HC2/SM7BUA, HD2M, HP1WW, HR9/IK2QPR (NA-057), HR9/K0UU (NA-057), HR9/WQ7R (NA-057), J20SE, J20VB, J39BS, J7N, J88XF, JA7GAX/6 (AS-047), JD1BMM, JT1CO, KL7RA, KP2/K3CT, KP4MS, L0W, LU2DVI/H, LY2ZZ, NA1SS, NH0AA/NH2, NI5DX/p (NA-143), OA4BQE, OA4TT, OA4WW, OX2A, P29NI (OC-181), P29NI (OC-283), P29VCX (OC-153), P29VCX (OC-284), P29VLR (OC-256), P40YL, PJ5NA, PX200JMU (SA-080), PY6KW, R35NP, RW0AJ, RW0CN, RW0CWA, RW3QC, S21DX (AS-127), S21RC/p (AS-127), ST2VB, SV9/DJ7RJ, SV9COL, T20RE, T27A, T27OU, T30XX, T31DX, T33ZZ, T88CD, T88CJ, T88WW, TF3GB, TI5N, TN5SN, TO3R, UA0CW, UA0SR, V25OP, V26G, V26MN, V47NT, V6C, V6P, V6T, V73M, V7XX, V85SS, VE0ICE (NA-047), VE0ICE/VE2, VE2XAA/2, VK9AA, VK9DWX, VP2ETN, VP2V/SP3IPB, VP2V/SP7VC, VP2VVA, VP8DLQ, VP9/W6PH, VQ9LA, VR2O/p (AS-006), VR2XMT, VU7SJ, XQ4CW, XR5L (SA-070), XV4BX (AS-128), XW1B, YB2UTX, YN4SU, YW1TI (SA-066), Z2/UA4WHX, Z30U, ZD8UW, ZK2DF, ZK3RE, ZL3IX, ZS1JX, ZS6BQI, 5B4XF, 5N/LZ1QK, 6Y5/W5ZL, 7P8BA, AH2R, E51QQQ, ES1RA, FG5LA, HK3JJH/HK0B, HP2/CX2AM, HS0ZEE, JW/SM0MDG, PY0S/PS7JN, V25WY, VP5/W5CW, VP6DX, ZS1JX.

PERIOD CALL REF

till 19/04 3Z0WARD, 3Z2009WARD, HF2009WARD, HF84WARD: Poland 935
till 19/04 7S5A: Boko Island (EU-177) 937
till 19/04 EG2IPY: special event station 936
till 19/04 HF9WARD, SN0WARD, SN2009WARD, SP0WARD: Poland 935
till 19/04 LN2G: special event callsign 936
till 19/04 SP2009WARD, SQ0WARD, SQ2009WARD: Poland 935
till 20/04 KG4CN: Guantanamo Bay (NA-015) 930
till 20/04 TI7KK: San Jose Island (NA-191) 937
till 20/04 XU7KOH: Koh Russei (AS-133) 937
till 21/04 9A/VE3ZIK: Croatia 935
till 21/04 XU7MDY: Cambodia 935
till 24/04 8P6DR: Barbados (NA-021) 933
till 24/04 C6AAA, C6AYL, C6DX: Eleuthera (NA-001), Bahamas 936
till 24/04 PA30EPC: special callsign 931
till 30/04 OE100M: special event station 931
till 30/04 TS1LYMC: special event station (Tunisia) 936
till April OD5/IV3YIM: Lebanon 915
till April VK2LNX and VK2FSNJ: Maatsuyker Island (OC-233) 909
till April VQ9JC: Diego Garcia (AF-006) 921
till 05/05 5X1NH: Uganda 931
till 31/05 XL, XN, XM, XO: special prefixes (Canada) 934
till 20/06 S21UGZ: Bangladesh 937
till June 5X4X: Uganda 923
till June AP2AHSF: Pakistan 929
till 02/07 TT8CF: Chad 930
till 24/07 5N0OCH and 5N0EME: Nigeria 933
till 31/07 HG160FNY and HA160: special event station and prefixes 935
till 31/08 LY1000: special prefix 924
till 31/08 VR2/F4BKV: Hong Kong Island (AS-006) 908
till September LZ8WHST and LZ17ARDF: special event stations 924

till 30/11 FT5WO: Crozet Islands (AF-008) 916
till November HF0APAS: South Shetlands (AN-010) 921
till November OD5/W5YFN: Lebanon 915
till 31/12 9A09P: special event station 932
till 31/12 9A48IFATCA: special event station 926
till 31/12 9A800VZ: special event callsign 933
till 31/12 GB250RB: special event call (Scotland) 925
till 31/12 GB40WAB: special callsign 922
till 31/12 HE8 and HB8: special prefixes (Switzerland) 921
till 31/12 IA3GM: special callsign 927
till 31/12 II2RAI: special callsign 924
till 31/12 Z30MCWG: special callsign 928
18/04 CS6A: lighthouse Doca Olhao 937
18/04-19/04 EE9IB, EE9RY, EE9CF: Bonete Lighthouse 937
18/04-25/04 GM3PYE/p and GS3PYE/p: Island of Harris (EU-010) 936
18/04-26/04 JW/F8DVD: Spitsbergen Island (EU-026) 935
from 18/04 9A: Croatian islands tour * by HA5TAA and HA5AZZ 937
from 18/04 9A: Croatian islands tour * by 9A5AN, 9A3KS, 9A2AA 937
19/04-25/04 5C2J/p: Mogador Island (AF-065) 936
19/04-25/04 5C2A, 5C2B, 5C2C, 5C2F, 5C2J: Morocco 936
19/04-25/04 5C2L, 5C2SG, 5C2Y, 5C2Z: Morocco 936
19/04-19/05 IO9ROTA: special callsign 927
19/04-25/04 JW/F8DVD: Spitsbergen Island (EU-026), Svalbard 937
21/04-16/05 DL7VOX/p: Usedom Island (EU-129) 937
21/04-28/04 JT1AWN, JT1AGO, JT1LU, JT1ZP: Mongolia 935
21/04-06/05 ZF2ZB: Cayman Islands (NA-016) 933
22/04 5W8A and 5W0DW: Samoa (OC-097) 929
22/04-24/04 KH8/N9YU: American Samoa 929
22/04-27/04 TC57A: special event station (Turkey) 935
24/04-04/05 HB0/DL2SBY and HB0/DF1SR: Liechtenstein 937
24/04-26/04 IG9/IT9OJW, IG9/IT9ZIR, IG9/IT9ZZO: Linosa (AF-019) 937
24/04-26/04 IG9/IW9EJP and IG9/IW9FRB: Linosa Island (AF-019) 937
24/04-26/04 IG9/IW9GVP and IG9/IW9HSK: Linosa Island (AF-019) 937
24/04-27/04 MM0BQI/p: Lunga Island (EU-108) 925
25/04 3D2AD and 3D2DW: Fiji Islands 929
25/04 4M5M: International Marconi Day (Venezuela) 937
25/04-30/04 ID9N: Vulcano Island (EU-017) 937
27/04-29/04 T30M and T30DW: Western Kiribati 929
28/04-01/05 TI6/K9KEJ and TI6/W9YOR: Costa Rica 937
29/04-05/05 8Q7SV: Maldives (AS-013) 937
29/04-04/05 IC8/IZ0KRC: Ischia Island (EU-031) 937
29/04-05/05 JD1BLK and JD1BLY: Ogasawara (AS-031) 933
29/04-05/05 JI1LET/JD1: Chichijima (AS-031), Ogasawara 937

Topic: 3412 Message: 9572

SB PROP @ ARL $ARLP016
ARLP016 Propagation de K7RA

ZCZC AP16
QST de W1AW
Propagation Forecast Bulletin 16 ARLP016
>From Tad Cook, K7RA
Seattle, WA April 17, 2009
To all radio amateurs

SB PROP ARL ARLP016
ARLP016 Propagation de K7RA

Still no sunspots, and again we saw a prediction for slightly higher solar flux slip away. If you go to http://www.swpc.noaa.gov/ftpmenu/forecasts/45DF.html and click on any forecast prior to April 14, you will see solar flux numbers at 72 predicted for the end of this month. But in the few days since then, any predicted values over 70 have vanished, including another set of slightly higher numbers in late May.

NASA had a recent release with new information about coronal mass ejections as observed by the STEREO mission. See it at http://science.nasa.gov/headlines/y2009/14apr_3dcme.htm.

Hank Pfizenmayer, K7HP of Phoenix, Arizona has been using beacons to let him know when bands are open, and he is discovering what others have reported, that when a band is quiet, this doesn't mean the openings are not there.

Hank wrote, "While the VK9GMW folks have been on, I have been checking the beacons on 17 and 15 meters and on 15 specifically, well over half the days between 2000z and 0300z I hear the ZL6B beacon - usually hear the KH6, sometimes the W6. This is with a KT34 at 42 feet in a noisy suburban location. Interesting I have not heard the VK beacon at all - about 1900 miles farther but essentially same beam heading Of course the LU and OA beacons are there almost every day even with the antenna on VK/ZL. Several days I can copy the ZL6B beacon at the 100 mW step."

Jeff Hartley, N8II of Shepherdstown, West Virginia had some thoughts to share with Mickey, K5ML, who had comments featured in last week's bulletin.

He writes, "I saw your comments in the ARRL prop bulletin and felt compelled to say few things about conditions now vs. the top of the cycle."

He continues, "Some parts of the world, mainly some days are much better than others as was the case this week on April 7th when Spain was worked on 17M at 2130z and 30M was wide open to EU, AF working 3B8MM, and the western Pacific at the same time allowing me to catch Mellish Reef for a new one on 30M."

He goes on to say, "SE Asia (even JAs are not easy from here near DC) are extremely difficult to work here at the bottom of the cycle especially mid-winter, because there is essentially no useable ionosphere around the north pole. Also, many ops are poorly equipped for 10 MHz and below with very limited antennas, but have a tribander for 10-20M. Some days are much better than others as was the case this week on April 7th when Spain was worked on 17M at 2130z and 30M was wide open to EU, AF working 3B8MM, and the western Pacific at the same time allowing me to catch Mellish Reef for a new one on 30M."

He ends with, "With your vertical and a good 10M opening, you will be amazed how strong long haul DX signals are and how easy they are to work. I was fairly new to DXing in the fall of 1978 and had just put up a 4 el Yagi for 10M at 45 ft and it was a real killer into everywhere from central Asia, to Europe, Africa and SA. RH8EAA in Turkmenistan was S9+ in Oct 78, day after day and I was able to call CQ and get many answers from UA9 and UL7 (now UN). During one CQWW CW contest, G4BUO called me running less than one milliwatt and I was able to copy him on the 2nd try! So, long story shortened it is a lot more fun with higher solar activity. 6 meters will be full of activity at the cycle peak, and I can't wait for the next one. In the meantime, I'm having fun chasing countries on 160 and 30 meters primarily and hunting counties as well."

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at, http://www.arrl.org/tis/info/propagation.html. For a detailed explanation of the numbers used in this bulletin, see http://www.arrl.org/tis/info/k9la-prop.html. An archive of past propagation bulletins is at http://www.arrl.org/w1aw/prop/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://www.arrl.org/qst/propcharts/.

Instructions for starting or ending email distribution of this bulletin are at http://www.arrl.org/w1aw.html#email.

Sunspot numbers for April 9 through 15 were 0, 0, 0, 0, 0, 0, and 0 with a mean of 0. 10.7 cm flux was 70.1, 69.4, 69.3, 69.3, 68.4, 69.4, and 69.4 with a mean of 69.3. Estimated planetary A indices were 12, 8, 9, 8, 4, 2 and 3 with a mean of 6.6. Estimated mid-latitude A indices were 9, 6, 7, 4, 3, 1 and 2 with a mean of 4.6.

9573. How bad can it get?

Yahoo group: DX-IS (2009)
Date: 2009-04-18 14:22:37 UTC
From: Paul M Dunphy
Topic: 9573 Message: 9573

Propagation sure has taken a nose dive the past couple of days. Not only are the AS stations no longer being heard, but even east coast NA to EU is muted. The A & K are up a bit, but don't seem that bad. Must be seasonal. I worked a few EU stations today that were S5-S7 and thought it was opening up, but they all turned out to be running monobanders and/or stacks and lots of power. Contest stations. The regular guys with 100 watts and a tribander are just not getting through. Time to go do some yard work and paint my row boat, I guess. When a guy can't even work EU on 20, things are bad!

In case anyone missed it for the past year, the propagation forecast for the flux is the same: 70 for the foreseeable future, occasionally skyrocketing to 71 or plunging to 69.

73, Paul VE1DX

9574. Re: [DX-IS] How bad can it get?

Hi Paul,

OMG !! HOW RIGHT YOU ARE ! Sitting in front of my radio on 20M right now.Propagation has been terrible.Europe is barely getting through to London never mind crossing the Atlantic. There has been a few exceptions, China, Cambodia but very weak signals. I have a very high noise level on 20M too to make matters worse. OMG, I just dont understand this minimum, we seem to have had three troughs but this is definately the worst.I only hope things will improve soon.

Going to cut my grass more productive than 20M....hi hi!

73 have a good weekend

Propagation sure has taken a nose dive the past couple of
days. Not only are the AS stations no longer being heard, but even
east coast NA to EU is muted. The A & K are up a bit, but don't seem
that bad. Must be seasonal. I worked a few EU stations today that
were S5-S7 and thought it was opening up, but they all turned out to
be running monobanders and/or stacks and lots of power. Contest
stations. The regular guys with 100 watts and a tribander are just
not getting through. Time to go do some yard work and paint my row
boat, I guess. When a guy can't even work EU on 20, things are bad!

In case anyone missed it for the past year, the propagation
forecast for the flux is the same: 70 for the foreseeable future,
occasionally skyrocketing to 71 or plunging to 69.

It is pretty awful today. I'm never very impressed with summer propagation on 20m, so maybe we're headed that way.

Equinoxes are much better.

I have to say, I've had a very satisfying 2009 in terms of radio contacts.

Four all time new ones:

H40FN, VK9AA, VK9GMW and S04R. S04R didn't require any propagation to speak of but VK9AA certainly did. Right place, right time.

and I worked sixteen new countries on 160m, bringing me up to 114.

Would I like 15m to be full of HL and VU stations right now? Sure, but I have to go mow the lawn too.

Guys,
Mowing the lawn doesn't help. Just got in from doing so. Bands still
bad.

Here is a quote from the July 2007 QST front cover:
"Welcome cycle 24".

It sure must have been a short cycle, I entirely missed it.

Congratulations on the new ones, Dan! The Pacific stuff is
especially nice. And anything over 100 on 160 shows you've put a lot
of time into it. DXing on 160 and 6 takes a person with a lot of
patience and knowledge of when and where things will be open.

Yes, the days of the polar path to Asia on 15 and even 10 seem
to be a distant memory. As dismal as it seems now, if this silly
cycle 24 ever does start up again, it won't take much to get things
rocking and rolling. I followed more than one cycle down and a flux
of 100 seems to be the switch that opens and closes propagation on
10M. Flux = 105 and 10 is open most of the day. Flux = 95 and 10M
is closed most of the day.

We don't need the flux to be 150-180 to have world wide
propagation on all the HF bands. That will help the 6M types, but
for the HF DXers, anything above 100 is good enough. Then other
factors (like the equinox enhancements we just went through, etc.)
seem to be more significant drivers once we get to that point.

There are all kinds of predictions out there, and personally I like the one that shows cycle 24 squashed down and drawn out a bit longer. I'd be really happy if it got to 120-130 maximum, and stayed up above 100 as long as possible. There are a lot of holes in everyone's check sheet on 15/12/10 (especially 12/10) that this would take care of. Anyhow, cross your fingers. It has to start up sooner or later!

My original post was basically just a comment on how quick we went from DX everywhere (on 20/30) to almost nothing. In 4-5 days it just went away. Good thing there are no major DXpeditions planned for the next couple of months.

9578. Missing Digests

Yahoo group: DX-IS (2009)
Date: 2009-04-18 18:34:03 UTC
From: John Becker
Topic: 9578 Message: 9578

I haven't received a digest from this mailing list for several days, even though there are 21 new messages since I last received one. Groups that I have set to receive individual messages are still working, but none of the ones I get in digest form are working. Yahoo was doing "maintenance" on Groups earlier in the week, and I wonder if this is the cause. Has anyone received a digest since #637 on April 15?

I also didn't receive QRZ-DX this week, and my email to N4AA has gone unanswered. Carl is usually very prompt in answering his email. Did anyone receive the April 15 issue of QRZ-DX?

Thanks and 73,

John, K9MM

Anybody here who uses the W8 buro got a line on some cheap 6x4 envelopes like my sorter would like to use?

Can't see special ordering a box of 100 @ ~20.00 to use at very most maybe 6 or so a year. What are you using? or do you have some you would be willing to sell.

My old buro (when I had a K 9 call) would allow you to buy the envelopes and postage from them. Not so "up here"

=(

Sri John, the W8 buro Dale was mentioning requires one to send envelopes unlike the W6 buro:
a.. The W6 QSL Bureau prefers to supply envelopes for you. Each envelope, including one first class stamp, is 70 cents each. You must send a self-sticking label with your call sign, name and address for each envelope ordered. The Bureau suggests you order a minimum of four (4) envelopes and no more than ten (10) at one time.
a.. If you normally receive many DX QSLs, please send additional funds to purchase stamps for additional postage.

The reason being uniformity. The W6 buro (when I was presorting) used pigeon hole boxes like at the post office and only a certain size envelope will fit in and some QSL cards are larger than a legal size envelope.

As postage is going up May 11 so most Buro's I would think want you to send in Forever stamps.

John,

I received my QRZ-DX? on schedule but I think I remember he may of had a server problem. Carl was to be going to C6 (operating as C6AAA) for a week or so. I normally provide him with a 20M PSK-31 QSN Report; he sent me an email reminding me not to send a report this week (for the April 22nd issue). Cut and paste below.....

"Please remember that I will be gone from Thursday, April 16 through Friday, April 24, getting home on Saturday, April 25th. Unless it's really necessary, don't send any email before the 24th to prevent overloading my in box. The next issue of QRZ DX will be # 16, dated April 29th.

I'm looking forward to hearing you from "the other side"as C 6 A A A for the next several days."

73,
Carl, N4AA

John, please send me a email (direct) if you still need a copy of this week's QRZ-DX?.

Various bureaus work differently. Some bureaus will take anything; others only want specific types of envelopes; others want nothing but money, and they will provide stamps and labels.

I understand the rationale on the third method. #1 its efficient for the bureau to be able to adjust postage and envelopes based on the volume patterns of the users; #2 its better for the users as they aren't likely wasting postage when they decide to stick four Forever stamps on a single envelope, yet are lucky to get 20 cards a year; #3 it saves the bureau sorter the agony of having to decypher if the US flag stamp with the blue background is worth $0.39 or $0.41 or if the "markup stamp" is a $0.41 or $0.42 stamp. #4 the bureau can figure out which types of envelopes to obtain for bureau business (claps are now a no-no for bureau mailings unless the user wants the postage rate to double owing to the "non-machineable" rates that clasps and paper clips incur).

I also understand the desire to have uniformity in envelopes, although 5 x 7 envelopes are not easily obtainable and are significantly more expensive ($25.00 for 100) versus 6 x 9 envelopes. 5x7s also hold few cards than 6x9s given that you can place two stacks of standard size QSLs side by side in a 6x9 envelope.

Try this Method of obtaining envelopes:

Contact one or more vendors in your area and ask if they would be willing to donate a supply of envelopes to your bureau. In return they (the vendors) would be given free advertising by allowing them to place their logo on the reverse side of the envelop.

Some bartering may also allow you to have the vendor add the bureau's return address on the front side of the envelope with a space for "remaining envelope credits."

I usually buy my envelopes off Ebay from closeout sales. Very inexpensive. They're typically standard 6x9s and they'll hold up to 24 or 25 cards (if you go over than, you run a risk of being categorized in the "flats" cateogory which nearly doubles the cost of the postage).

Try this Method of obtaining envelopes:

Contact one or more vendors in your area and ask if they would be willing to donate a supply of envelopes to your bureau. In return they (the vendors) would be given free advertising by allowing them to place their logo on the reverse side of the envelop.

Some bartering may also allow you to have the vendor add the bureau's return address on the front side of the envelope with a space for "remaining envelope credits."

Granted, the VE1 bureau is miniscule compared to the US bureaus but I have always simply sent $20. to the bureau when the time comes. They send me cards, periodically, supply the container (sometimes a box, sometimes a large envelope), they print the label that shows the cost of my current mailing and the balance against my $20.00, and when it gets down to a buck or two, then I send another "donation." They take great care of me.

For those heralding the end of paper QSLs, I can only hope you're wrong. While confirmations are great for awards, they aren't the real thing. I use the bureau at least once a year for outgoing cards and look forward to the cards I receive. You can't put LoTW credits in an album or on the wall. And you sure as hell can't impress visitors to your shack with LoTW.

What is all this fuss?

First of all I have to agree with Al regarding the VE1 buro --
really efficient and have been so for decades. I believe sending
them the funds allows them the flexibility to handle it any what they
want. Some of us get 10 cards a year, others 1000 or more. By
having funding on hand, they can decide what size envelope or box to
use. It's a good system. Maybe there are reasons why this theory
can't scale up to the volume the major US buros have to handle, but
it works great here.

I disagree with Al regarding electronic QSLs to a point. Sure,
I want to have at least one paper card (preferable a nice photo one!)
for each of the 338 DXCC things plus deleted ones I worked years
ago. I don't need 700 cards from Italy and Germany for 20 metres. I
also don't need 700 W4 QSLs. If P5 ever comes on again, I'd like to
have a nice card like the "booklet" the VP6DX guys put out. If P5
becomes as common as Italy, I won't want 700 20 meter P5 cards.

I don't need cards for band fills. If I need HB0 on 12 metres,
and I find one, I'd rather a LoTW match that costs 15 cents and will
be there in a few days as opposed to me spending $5 to get the card
(or chancing that it will make it through the buro system after
several years.)

It's nice to get a buro shipment, and I enjoy looking at them, but as I said previously, I don't need 700 IK or DL cards. It just means I have to file them away, etc. I believe the ideal situation is having the option of both. Many DX stations do this. You can do a LoTW match and be done with it. Or, you can send direct or use the buro to get a paper card. I don't like the stations that are electronic only. Some DXers want a paper card, and even though it is fairly common, it might be the first one they've ever worked. No database match will replace the thrill of a new one showing up in the mail.

On the other hand I've gotten some nice confirmations in the last year or so from places I've always been concerned about sending direct, and have no bureaus. I work the guy -- a new band country! 2 days later it is confirmed by a LoTW match. That works fine for me. I don't need 10-15 cards from every country to cover 160-6 on CW/SSB/RTTY.

Oh, I agree, Paul, LoTW has its place. Like you, I need another card from almost every country in Europe like I need another hole in my head. For that, LoTW will be fine for me when I get around to joining. But some of the cards produced today are magnificent compared to those cards we got (especially from the then Soviet Union) all those years ago.

I'm not decrying the value of LoTW. I'm simply stating my enjoyment of tangible confirmations.

As for the bureau comments I made, I don't see why "our" system can't be employed by all. But, to each his own.

And I still QSL 100% to anyone who wants one of mine.

??? I agree with the statements made by Paul, but would
like to add this.? LOTW is not only a reasonable means
to chase awards from ARRL, but it is also an archive of
log books.? If a Qsl Manager uploads the logs of their clients
(in due time) to LOTW, if something happens to the dx station
or the Qsl Manager, the logs are preserved.
??? The paper Qsl card is still and will forever be an important
part of our hobby. The excitement of waiting for that card to come
in the mail is an important part of ham radio. New DXers need
to have that excitement and hopefully it will spread to us old timers.

Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q, W2VU, K3IXD, NG3K, N4AA & QRZ DX, K8GG, K8YSE, W8UVZ, K0HB, DK8JB, DL2SBY, DL7MAE & The DX News Letter, DL8EBW, DX World of Ham Radio Web Site, F5NQL & UFT, G3SWH, I1JQJ/IK1ADH & 425 DX News, IT9EJW, IZ0FKE, LX2A, Pete's-DX-Newsdesk, RSGB IOTA Web Site, VA3RJ & ICPO, and VHF-DX-Portal (MMMonVHF) for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 12th-April, through Sunday, 19th-April there were 210 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4X, 5B, 5H, 5N, 5R, 5V, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A4, A6, A7, A9, AP, BV, BY, C2, C3, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FP, FR, FT5W, FY, G, GD, GI, GM, GU, GW, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J7, J8, JA, JD/m, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, S0, S2, S5, S7, S9, SM, SP, ST, SU, SV, SV5, SV9, T7, TA, TF, TG, TI, TK, TL, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V4, V5, V7, V8, VE, VK, VK9M, VP2M, VP2V, VP8, VP9, VR, VU, XE, XU, XW, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZC4, ZD7, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

2009 W0DXCC CONFERENCE. Make plans to attend the 2009 WØDXCC and Contest Central Conference, July 18th, in Rochester, Minnesota. It is a "FULL Day" dedicated to HF Contesting and DXing! There will be DX and Contest forums, vendors, QSL card checking and a DX Dinner Banquet. Guest speakers mentioned are: John/ON4UN (on Low Band DXing), Rich/N6BV (on HF antennas), Carl/K9LA (on Sunspots and propagation), Rob/NC0B (on HF receivers), Ward/N0AX on Contesting and DX Banquet speakers will feature Desecheo

DXpedition operators (including Glenn/W0GJ and Ralph/K0IR as speakers). For more details, please visit: http://www.rahrahrochester.com/events/2009_W0DXCC_and_Contest/index.aspx

5H, TANZANIA. Operators Hermann/DL2NUD and Joachim/DL9MS are planning to be active as 5H1HP and 5H1MS, respectively, from Zanzibar, between May 16th and June 2nd. Activity will be on the HF bands and 6 meters, but an emphasis will be on VHF (EME/MS). Grid squares to be activated are: KI93RU and KI94RA.

8Q, MALDIVES. Hiroshi, 7M2VPR, is now active as 8Q7HN. Length of his operation is unknown at this time. He was spotted Sunday on 15 meters SSB -- between 0530-0800z on 21235 kHz and 1300-1330z on 21244 kHz. QSL via 7M2VPR.

8R, GUYANA. The 6 Meter Beacon Project, Inc., is happy to announce a HF-50 MHz DXpedition here between June 16th and July 6th. Antenna for 6 meters will be a 6M7JHV yagi at 45 ft. on the Atlantic Ocean pointed towards EU and NA, and using a 3CPX800A7 amp. Activity will be split between two teams: 11 days will be by Chris/W3CMP and Dave/N3DB, the other 11 days by Terry/K4RX and Ken/AC4TO. They hope to get some decent openings to, amongst other places, Northern EU, 5B/4X and W6/W7. They expect to have internet access most of the time. Operating frequencies and Web site will be announced at a later date.

AN8, CANARY ISLANDS. Operators Luis/EA8AY, Jeronimo/EA8NC, Pedro/EA8QP and Juan/EA8TT will use the special callsign AN8R during the CQWW WPX CW Contest (May 30-31st) as a Multi-Multi entry. QSL via EA8AY. Visit the special AN8R Web page at: http://www.ea8ay.com/an8r_wpx/

AX, ANTARCTICA (Special Callsign). Bob, VK0BP, currently employed by the Australian Antarctic Division as a Communications Tech from Davis Base Station (WABA VK-03, WAP AUS-03, IOTA AN-016), Antarctica, will be using the special callsign AX0BP on April 25th, to celebrate ANZAC Day. ANZAC Day is a national public holiday to commemorated and honor the members of the Australian and New Zealand Army Corps (ANZAC) who fought at Gallipoli in Turkey during World War I. This holiday is observed by Australia and New Zealand, as well as the Cook Islands, Niue, Samoa and Tonga. Bob can only use this callsign from midnight to midnight (local time -- Davis is +7 hrs UTC). However, Bob will not be able to operate the full 24 hours but will do his very best to operate as long as possible that day. Australian operators can only use the AX prefix just 3 times per year -- Australia Day (January 26th), ANZAC Day (April 25th) and World Telecommunications Day (May 17th). QSL via VK2CA, direct only (2 USDs and a SAE is preferred).

C6, BAHAMAS. Look for C6APR to be active again from the Crooked Island Lodge, Pittstown Point, Crooked Island (NA-113), Bahamas. Activity will take place between July 23-27th, and during the RSGB IOTA Contest (July 25-26th) as a Multi-Op/Mixed-Mode/High-Power/DXpediton entry. Operators mentioned are: Pete/W2GJ, Ed/K3IXD, Dallas/W3PP and Jim/K4QO. Operations before and after the contest by C6APR will be on 80-10 meters including

the 30/17/12 meter bands using CW and SSB. Also, look for C6AXD to be on RTTY and C6AQO on 6 meters (grid FL22). All three callsigns are good for Bird Rock Lighthouse (ARLHS BAH-005) as well as IOTA NA-113 and Grid Locater FL22tt. All QSLs go to K3IXD.

CQWW DX CONTEST BREAKS 10,000 LOG BARRIER! A press release (dated April 15th) from CQ Communications, Inc., states: "For the first time, more than 10,000 logs have been submitted for the CQ World Wide DX Contest, according to Contest Director Bob Cox, K3EST. In addition, Cox reports that the number of CW logs have exceeded the number of phone logs for the first time in more than 20 years.
According to Cox, there were a total of 5013 SSB logs and 5272 CW logs submitted for the 2008 running of the event, for a total of 10,285 logs. This is the first time that the CQWW -- already the world's most popular amateur radio contest -- has broken the 10,000 log mark. Of these, nearly 98% were submitted electronically.
It is also the first time since 1986 that more CW logs have been submitted than SSB logs. 'This is a clear indication,' says Cox, 'not only of the health of contesting and of CW, but of ham radio as a whole.' In addition, the logs contained the callsigns of more than 50,000 different amateur stations making at least one contest contact, indicating that many more stations participate in the CQWW Contest than submit logs.
SSB results of the 2008 CQWW Contest will be published in the August 2009 issue of 'CQ' magazine; CW results will appear in the September issue."

DAYTON TOP-BAND DINNER BANQUET FULLY BOOKED. George/K8GG and George/W8UVZ announced: "Despite the economic turn-down, the response for the 2009 Dayton Topband Dinner has been steady and growing. We are now fully booked with a long waiting list for this May. We are sorry to report we cannot handle any further reservations and have been turning away repeat attendees for over a week now. We will do it again in 2010, assuming the Dayton Hamvention(r) continues, so if you missed this year and want to attend next year, please mark you calendars to contact us in late February or early March next year. We will announce the details on The Topband Reflector, and various DX e-bulletins as we have on the past. Thanks for your understanding, and we hope to see you next year."

GD0, ISLE OF MAN (EU-116). Stewart, GM4AFF, will be active as GD0F during the RSGB IOTA Contest (July 25-26th) as a Single-Op/All-Band/SSB/24-Hrs/ Island entry. QSL via M0CMK.

HB0, LIECHTENSTEIN (Update). Operators Kasimir/DL2SBY and his friend Georg/DF1SR will be active from here between April 24th and May 4th. Activity will be on HF bands (80-10m) using CW, SSB and RTTY. Kasimir informed OPDX that he has bought Spiderbeam for 10/12/15/17/20m which will improve his signal. Other equipment includes a TS2000, FT900AT, Ameritron AL811, HF9V vertical and a monoband vertical for 30/40m. Activity will also take place on 13cm and 23cm using EME. Equipment will be a FT726R, Dish 3, 7m, and 2 amplifier for both bands. Kasmir and Georg will use two separate callsigns for this operation. For the

HF bands, they will use HB0/DL2SBY and for the EME activity they will
sign HB0/DF1SR. QSL via DL2SBY, by the Bureau or direct.

HI, DOMINICAN REPUBLIC. Ronny, OT4R, will be active as HI7/OT4R from
Punta Cana between May 9-30th. Activity will be on 20/15/10 meters SSB.
Suggested frequency for 20 meters maybe 14300 kHz. QSL via OT4R.

IOTA NEWS.....
AF-019. Operators Vincenzo/IW9EJP, Filippo/IW9FRB, Giovanna/IW9GVP (YL),
Ferdinando/IW9HSK, Ezio/IT9OJW, Sebastiano/IT9ZIR and Dario/
IT9ZZO will be active as IG9/homecalls from Linosa Island
(IIA AG-003, MIA MI-128) between April 24-26th. They plan
to operate on SSB, PSK and RTTY on the HF bands, 80-10 meters.
QSL via their home callsigns, direct or by the Bureau. Visit
their Web page at: http://www.iw9frb.it/linosa.htm

AF-065. (Update) By the time you read this, 8 operators should be
active as 5C2J/p (possibly other callsigns) from Mogador
Island until April 26th. For details, visit their Web page
at: http://www.mogador2009.altervista.org
For suggested frequencies:
http://www.mogador2009.altervista.org/index.php?option=com_content&view=article&id=57&Item
id=65
For questions and skeds, contact their pilot station:
http://www.mogador2009.altervista.org/index.php?option=com_content&view=article&id=47&Item
id=62
Operating locations:
http://www.mogador2009.altervista.org/index.php?option=com_content&view=article&id=58&Item
id=64
Remember to also look for operators to be active from Essaouira
and Marrakesh. For QSL info, please see their Web page or
refer to OPDX.903.

AS-077. (Special Event) Look for 8J6SL to be active from the Kumamoto
Museum between May 1st and October 31st, to celebrate the 100th
anniversary of Hisatsu (Railroad) Line (Steam Locomotive) on
the Island of Honshu (JIIA AS-077-001). Activity will be on
all bands and modes. Possibly 5 stations will be on the air.
QSL via the JARL Bureau.

AS-133. This was a late one to report, but hopefully you can get him
on the last date. Wim, XU7TZG, will be active as XU7KOH from
Koh Russei (aka Bamboo Island) again, between 0500z, Friday,
April 17th, and 0500z, Monday, April 20th. Activity will be
SSB only (and possibly PSK31). Suggested IOTA frequencies are:
3755, 7055, 14260, 18128, 21260, 24950, 28460 and 28560 kHz.
QSL only direct with SAE and 2 USDs to the QSL Manager ON7PP:
Patrick PIESEN, Hermans-Lybaertstraat 35 b.1, 8301 KNOKKE-HEIST,
BELGIUM. Look for logs to be online after April 24th at:
http://www.xu7tzg.be

EU-017. (Update) Members of the Noantri DX & Contest Team will be active as ID9N from Vulcano Island (Eolian Group) (IIA ME-018, MIA MI-122, WLOTA 1001), April 25-30th. Look for activity on the HF bands, CW, SSB and the Digital modes. They will have two high power stations from this dangerous outpost. During operations they will have a 6m beacon active from grid square JM78lj (ID9N/B 50.006 MHz). Operators mentioned are: Andy/ IZ0EHO, Vincenzo/IZ0FKE, Alberto/IZ0FMA, Claudio/IZ0GKX, GiorDano/IK0XFD and Alberto/IK0ZCW. QSL via IZ0GKN. Sked requests available at: id9n@...
An InterNet link will be available, so look for daily updates online (Log and Pictures) at: http://www.id9n.com

EU-123. Operators Colin/G3VCQ, Sharon/M3VCQ, Andy/M0GAV, Joanne/2E0JOX and Tim/2E0TJX will be active as MM3M from Ilse of Arran, Scotland, during the RSGB IOTA Contest (July 25-26th). QSL via G3VCQ. They will possibly be active as GS3RCM/p before and after contest. QSL OK via RSGB Bureau or direct.

EU-123. Operators Tom/MM0BHX, Gordon/MM0GPZ, Phil/GM0LIR, Iain/GM0OQV and John/GM0NBM will be active as GM0B from the Isle of Bute, Scotland, during the RSGB IOTA Contest (July 25-26th). QSL via MM0BHX.

EU-189. (Update) A Belgian team of five operators will attempt a landing on Rockall Island between April 30th and May 1st. They will be on the air with two stations using the callsign MM0RAI/p for about 48 hours. A report from the "Maciverblog" indicates that they are "hoping to achieve a world first by shooting a video on the rock, more than 240 miles west of mainland Scotland, and streaming it live on the internet on each of the three days they plan to spend there. A Scottish cameraman is also going to be in the landing party and, if conditions are good and the technology works, hopes are high of the first live TV news broadcast from the rock. Rockall, the summit of an ancient volcano, stands about 60 feet above the Atlantic. Landing on the rock is very difficult as it is steep even on its easiest side. The area is infamous for its high seas and very changeable weather throughout the year."
Read the complete blog by journalist Iain Maciver at:
http://maciverblog.co.uk/2009/04/15/belgian-hams-bid-to-broadcast-from-rockall/
Also, check-out the Rockall Web site for latest news and last minute updates at: http://www.rockall.be

NA-191. Operators Klaus/DK6AO, Gunter/TI7WGI, Andy/DH8WR (EA2CRX), Norbert/DL2RNS, Rene/DL2JRM and Daniel/DL5YWM will be active as TI7KK from San Jose Island (Guanacaste Province), Costa Rica, until April 20th. Activity will be on 80-10 meters using CW, SSB, RTTY and PSK31. QSL via DK6AO, direct or by the bureau.
For updates and more info, please visit their Web page at:
http://ti7.info

SA-021. Members of the Radio Club Grupo DX Bahia Blanca will be active as L21D from Ariadna Island, located 70km south of Ingeniero White Harbour, in the natural reserve of Bahia Blanca, May 1-3rd. Activity will be on 80-10 meters using CW, SSB and PSK. QSL as per operator's instructions.

K4, UNITED STATES (Special Event). Operators from ARES in the Summerville, SC, area (Dorchester County, Grid locater EM93), will activate the special callsign K4E during an ARES Earthquake Emergency Communication Awareness Exercise, April 21-22nd. When not passing event traffic, K4E will be available for QSOs on 80-15 meters, as well as 2 meter FM local QSOs. QSL via W4NSC. This training exercise is to demonstrate the cooperation needed between the firemen, policemen, hospital workers, hams, and other public service personnel throughout South Carolina in time of an emergency. South Carolina is prone to hurricanes, and it has been determined that a major earthquake occurring in the greater Charleston, SC, area would divide the area into 18 "islands" due to damage to infrastructure such as bridges and roads. Each of these "islands" is equipped with a structure containing various emergency supplies and Amateur radio equipment and antennas. Each POD (Points of Distribution) has a generator and is environmentally controlled. This exercise is a test of one of those "islands".

QSL INFO AND NEWS.....
4S7NE QSL NOTE. Nelson, 4S7NE, states: "Please send GS (green stamps). It's very difficult to exchange IRCs here. If you are sending mail without registering, please secure the envelope well. (See QRZ.COM)"

NEW QSL ROUTE (GI5K and MI0LLL). Phil, G3SWH, announces that effective immediately, he has been appointed the QSL manager for GI5K and MI0LLL. Phil states, "I will shortly be adding a log search page for each callsign to my Web site <http://www.g3swh.org.uk/>. I am also arranging for any unanswered, direct QSL requests to be forwarded to me by Chris and for the RSGB QSL Bureau sub-manager to forward cards directly to me."

QSLS VIA LOTW: C91TX

QSLS RECEIVED VIA MAIL: 3D2NB, 3D2OU, 4A7L, 5L2MS, 6Y5/W5ZL, AH2R, AH0F/KH2, C91LW, C98LW, CQ3T, E51QQQ, EK3GM, FH/G3SWH, FW5RE, HP2/CX2AM, HS0ZEE, J88XF, JT1BH, KH8Q, KP2/K3CT, OX2A, PY0S/PS7JN, SV9COL, T27A, T27OU, T47C, T88WW, TF/G3SXW, TG9AHM, TT8PK, TY6A, V73M, VK9DWX, VP2V/SP3IPB, VP5/W5CW, VP6DX, VP8DLQ, VP8YLE, VP8YLI, W3A, XW1B, YU1EXY, YW1TI, ZD8UW, ZF2AM, ZK3RE and ZS1JX

QSLS RECEIVED VIA THE BUREAU: ER1BG, ER1OI, ER1RR, ER1WK, ER10KDR, ER4DX, ER570C, ER7C and ER0ITU

S0, WESTERN SAHARA (Update). The Tifariti Gang, signing S04R, is now QRT as of 0500z, April 18th. Operation netted 37,005 QSOs (CW - 20,274, SSB - 14,342 and RTTY - 2,389). The S04R log is now available online at: http://www.dxfriends.com/s04r/log.php
QSL via EA5RM. For more information, please visit the S04R Web site at: http://www.dxfriends.com

S2, BANGLADESH. By the time you read this Ramon, DU1UGZ, is expected to be active as S21UGZ from Dhaka City until June 20th, depending on his work schedule. He will be using a low band dipole at first, so his emphasis will be on 80/40 meters SSB and RTTY. From May through June, he will be using a beam for 10, 12, 15, 17 and 20 meters. He hopes to have a linear in use starting in May as well. QSL via DU1UGZ.

SILENT KEY. Philippe, LX2A/LX7I, informs OPDX that Charly Hausemer, LX1AJ, from Differdange, Luxembourg (LX), became a "Silent Key" (SK) on April 7th, at the age of 89. He was the oldest ham in LX-land and was a licensed amateur for more than 60 years. He was a keen DXer and had contacted nearly all the DXCC entities on SSB. He was part of a group of hams who established amateur radio in Luxembourg, and also the "Reseau Luxembourgeois des Amateurs d'Ondes Courtes (RL) (in English, Luxembourg Amateur Radio Society). He was one of the first hams who got licensed. Philippe, LX2A, states, "He was my uncle and introduced me into amateur radio and always supported me in this great hobby. Putting up the contest station LX7I would never have been possible without his help. He was a great OM and I hope to be able to promote amateur radio in Luxembourg and worldwide like he has always done it." OPDX and its readers would like to send out our deepest sympathy to the family and friends of LX1AJ.

SX5, DODECANESE (GIOTA Op). Members of the Dodecanese Radio Amateur Association (DRAA) will be active as SX5SYMI from Symi Island between July 31st and August 3rd. Activity is good for the GIOTA (Greek Island On The Air) as DKS 032 and also the IOTA as EU-001. QSL direct to SV5FRI.

TI6, COSTA RICA. Operators Orrin/K9KEJ and Don/W9YOR will be active as TI6/homecall between April 28th and May 1st. Activity will be SSB only on 40/20/17 meters. QSL via TI6/K9KEJ via EB7DX and TI6/W9YOR to his home callsign.

V63, MICRONESIA. Operators Shoji/JA7HMZ (V63DX) and Masayuki/JH7IOS (V63CW) will be active from Pohnpei Island (OC-010) between May 11-16th. Activity will be on 40-6 meters using CW and SSB. QSL via their home callsigns.

VK9M, MELLISH REEF. The VK9GMW DXpedition went QRT at 0400z on April 13th, making 20,058 QSOs, of which 2028 were on 160 meters. The team has arrived safely at the Australian mainland (Airlie Beach) on April 16th (0600z). QSL via HA7RY. Remember, the "Online QSL Request System" (OQRS) is available for both direct and Bureau cards on their Web page at: http://www.vk9gmw.com

YW0, AVES ISLAND. The 4M5DX Group, which was expecting to activate YW0A from Aves Island in March, is still waiting for a scheduled day by the Venezuelan Navy for transportation.

ZS8, MARION ISLAND. This is per the ZS8T Web page <http://zs8t.net>: "ZS8T is now QRT. He leaves the island soon and is expected back in ZS mainland in the middle of May. QSLs will be uploaded to LoTW. Additionally, all QSLs which are sent to the manager will be answered.

Any questions regarding his operation from Marion Island should now be
directed only to ZS6GCM.

Actually I'm surprised at the call to begin with. VE0 is reserved for ships, and in not normally issued to land based operations. I understand we are going though a month where Canadian amateurs can replace VE with XM and other funny prefixes (eg XM3EJ was on today for the Ontario QSO party.) XO0ICE *should* be a modification of VE0ICE (an unissued call) so my theory on a ship is shot! QRZ.COM says it is in Quebec City and celebrates the 50th anniversary on the entry in service of the St. Lawrence Seaway. I think it is a couple of VE2s in a rowboat in the St Lawrence!

Maybe it is not a Canadian call at all, although XJA-XOZ is allocated to Canada under the ITU. It might be Seborga. They haven't tried to get recognised as a separate DXCC country in awhile.

No idea what WPX would count it for.

73, Paul VE1DX

9602. RE: [DX-IS] XO0ICE/2 WPX

Yahoo group: DX-IS (2009)

From: John Geiger
Topic: 9597 Message: 9602

It looks like it would count for XO2, according to the rules from the CQ website:

C. In cases of portable operation in another country or call area, the
portable designator would then become the prefix. Example: WN5N/7
would count as WN7, J6/WN5N would count as J6, KH6/WN5N would
count as KH6, etc.

Hi Al,

S0 is a particularly nasty one from VK, especially when we are at best (@90 degrees) side on, to any main DX path for them.

I managed to get them on 30CW by chance but spent many hours on 20CW to no avail.

Still need S0 on SSB and RTTY. Will have to wait for the next team...

S0 is rare for us, yes.

Subject: [DX-IS] S04R in the log

I sat for 3 minutes outside the edge of the pile-up and I'm pretty sure he
came back to me on 40 CW. I say pretty sure because there were at least two stations calling him on his frequency while I was working him. The timing was perfect and so I'm putting him in the log. Cheesh, you'd think
S0 was rare or something.

Calling within the confines of the pile-up was fruitless. I know, because
I did it for a long time and I simply don't have a big enough signal to compete. You do what you gotta do and I hope I can do that on 30 and 80 where I do need it.

I'm with you Paul. Now in my 52nd year of chasing DX, mostly on CW, I
don't use QSK, and want no part of it. I use my left hand to key the
xmtr with the hand Mic, and operate the keyer with my right hand.

Hello Lance,

Congrats! If it was harder for you to work them than it was for me, I feel sorry for you but I'm glad you got them. I managed to work them on 30, 40 & 80 CW but didn't try for any SSB and am not on any digital modes. The easiest QSO was 80M (2nd call) but 30 & 40 were very rough. I never did hear them on 17.

I don't need Midway for a new one but I'll be in there and you'll have the table reversed, hi!

Enjoy your glory, mate.

I sat for 3 minutes outside the edge of the pile-up and I'm pretty sure he came back to me on 40 CW. I say pretty sure because there were at least two stations calling him on his frequency while I was working him. The timing was perfect and so I'm putting him in the log. Cheesh, you'd think

S0 was rare or something.

Calling within the confines of the pile-up was fruitless. I know, because I did it for a long time and I simply don't have a big enough signal to compete. You do what you gotta do and I hope I can do that on 30 and 80 where I do need it.

73

Al, VE1AL

Actually I'm surprised at the call to begin with. VE0 is reserved for ships, and in not normally issued to land based operations. I understand we are going though a month where Canadian amateurs can replace VE with XM and other funny prefixes (eg XM3EJ was on today for the Ontario QSO party.) XO0ICE *should* be a modification of VE0ICE (an unissued call) so my theory on a ship is shot! QRZ.COM says it is in Quebec City and celebrates the 50th anniversary on the entry in service of the St. Lawrence Seaway. I think it is a couple of VE2s in a rowboat in the St Lawrence!

Maybe it is not a Canadian call at all, although XJA-XOZ is allocated to Canada under the ITU. It might be Seborga. They haven't tried to get recognised as a separate DXCC country in awhile.

No idea what WPX would count it for.

Subject: RE: [DX-IS] XO0ICE/2 WPX

It looks like it would count for XO2, according to the rules from the CQ website:

C. In cases of portable operation in another country or call area, the

portable designator would then become the prefix. Example: WN5N/7

would count as WN7, J6/WN5N would count as J6, KH6/WN5N would

count as KH6, etc.

9617. RE: [DX-IS] XO0ICE/2 WPX

Yahoo group: DX-IS (2009)
Date: 2009-04-21 01:57:18 UTC
From: John Geiger
Topic: 9597 Message: 9617

Hi Al,

Here are some recent examples of FCC logic. Can Industry Canada top these?

1. If you can copy CW at 13wpm (Advanced class) you get LESS cw priviledges than if you can't copy CW at all (Extra class).

2. If you can copy CW at 5wpm (Novice class) you get less CW priviledges than if you can't copy CW at all (Extra class).

3. From 1991 to 2000 there were 2 point of entry licenses, the novice and the technician. If you got the novice, which required a 5wpm code test and a 25 question written test, you were limited to 25 watts on 222mhz and 5 watts on 23cm because the FCC stated that you didn't have the experience to run higher power at frequencies where RF could be dangerous. If you got the technician class license, which required no code test but a 35 question written test (which many thought was easier than the novice written), which didn't test at all about microwave radiation, you were allowed to run 1500 watts on 10ghz.

4. If you get a squentially issued call, it will be from your call district, which were established by the FCC. If you apply for a vanity call, you can apply for one from any call district, so the FCC can't figure out if their call districts matter or not.

5. The FCC sets aside special prefix blocks like KP1, KP5, KH1, KH5 for certain US territories. However, the FCC refuses to issue calls for these territories. DXpeditions that go there end up getting 1 x 1 special event calls instead, which makes these prefix blocks worthless.

6. If you upgrade from general to extra, you get extra CW priviledges just by taking a written test that asks nothing about CW. Somehow extra electronics knowledge makes you a better CW operator.

Points well taken, John. And no, I can't top that. Nor would I want to.

If I visit the US, I can operate almost everywhere I can now with Extra Class privileges. And I can even write the Extra exam and find a post office box so I can have a US call. That just makes so much sense...like all those "ferners" taking valuable US 1x2 calls so they can put them on their QSLs, or get permission to operate portable from exotic US islands.

Don't worry tho', I'm not gonna do anything until I can get K1AL, N1AL or W1AL and move to Arizona, next to Dick.

2. If you can copy CW at 5wpm (Novice class) you get less CW priviledges than if you can't copy CW at all (Extra class).

3. From 1991 to 2000 there were 2 point of entry licenses, the novice and the technician. If you got the novice, which required a 5wpm code test and a 25 question written test, you were limited to 25 watts on 222mhz and 5 watts on 23cm because the FCC stated that you didn't have the experience to run higher power at frequencies where RF could be dangerous. If you got the technician class license, which required no code test but a 35 question written test (which many thought was easier than the novice written), which didn't test at all about microwave radiation, you were allowed to run 1500 watts on 10ghz.

4. If you get a squentially issued call, it will be from your call district, which were established by the FCC. If you apply for a vanity call, you can apply for one from any call district, so the FCC can't figure out if their call districts matter or not.

5. The FCC sets aside special prefix blocks like KP1, KP5, KH1, KH5 for certain US territories. However, the FCC refuses to issue calls for these territories. DXpeditions that go there end up getting 1 x 1 special event calls instead, which makes these prefix blocks worthless.

6. If you upgrade from general to extra, you get extra CW priviledges just by taking a written test that asks nothing about CW. Somehow extra electronics knowledge makes you a better CW operator.

Actually I'm surprised at the call to begin with. VE0 is reserved for ships, and in not normally issued to land based operations. I understand we are going though a month where Canadian amateurs can replace VE with XM and other funny prefixes (eg XM3EJ was on today for the Ontario QSO party.) XO0ICE *should* be a modification of VE0ICE (an unissued call) so my theory on a ship is shot! QRZ.COM says it is in Quebec City and celebrates the 50th anniversary on the entry in service of the St. Lawrence Seaway. I think it is a couple of VE2s in a rowboat in the St Lawrence!

Maybe it is not a Canadian call at all, although XJA-XOZ is allocated to Canada under the ITU... It might be Seborga. They haven't tried to get recognised as a separate DXCC country in awhile.

No idea what WPX would count it for.

Points well taken, John. And no, I can't top that. Nor would I want to.

If I visit the US, I can operate almost everywhere I can now with Extra Class privileges. And I can even write the Extra exam and find a post office box so I can have a US call. That just makes so much sense...like all those "ferners" taking valuable US 1x2 calls so they can put them on their QSLs, or get permission to operate portable from exotic US islands.

Don't worry tho', I'm not gonna do anything until I can get K1AL, N1AL or W1AL and move to Arizona, next to Dick.

Subject: RE: [DX-IS] XO0ICE/2 WPX

Hi Al,

Here are some recent examples of FCC logic. Can Industry Canada top these?

1. If you can copy CW at 13wpm (Advanced class) you get LESS cw priviledges than if you can't copy CW at all (Extra class).

2. If you can copy CW at 5wpm (Novice class) you get less CW priviledges than if you can't copy CW at all (Extra class).

3. From 1991 to 2000 there were 2 point of entry licenses, the novice and the technician. If you got the novice, which required a 5wpm code test and a 25 question written test, you were limited to 25 watts on 222mhz and 5 watts on 23cm because the FCC stated that you didn't have the experience to run higher power at frequencies where RF could be dangerous. If you got the technician class license, which required no code test but a 35 question written test (which many thought was easier than the novice written), which didn't test at all about microwave radiation, you were allowed to run 1500 watts on 10ghz.

4. If you get a squentially issued call, it will be from your call district, which were established by the FCC. If you apply for a vanity call, you can apply for one from any call district, so the FCC can't figure out if their call districts matter or not.

5. The FCC sets aside special prefix blocks like KP1, KP5, KH1, KH5 for certain US territories. However, the FCC refuses to issue calls for these territories. DXpeditions that go there end up getting 1 x 1 special event calls instead, which makes these prefix blocks worthless.

6. If you upgrade from general to extra, you get extra CW priviledges just by taking a written test that asks nothing about CW. Somehow extra electronics knowledge makes you a better CW operator.

Industry Canada (God bless 'em) makes rules and then breaks them. It is a habit of all Canadian government departments and is endorsed by the Canadian Progressive Conservative party.

And just how does XO0ICE signify the anniversary of the St. Lawrence Seaway? The mind boggles.

    Actually I'm surprised at the call to begin with. VE0 is reserved for ships, and in not normally issued to land based operations. I understand we are going though a month where Canadian amateurs can replace VE with XM and other funny prefixes (eg XM3EJ was on today for the Ontario QSO party.) XO0ICE *should* be a modification of VE0ICE (an unissued call) so my theory on a ship is shot! QRZ.COM says it is in Quebec City and celebrates the 50th anniversary on the entry in service of the St. Lawrence Seaway. I think it is a couple of VE2s in a rowboat in the St Lawrence!

    Maybe it is not a Canadian call at all, although XJA-XOZ is allocated to Canada under the ITU... It might be Seborga. They haven't tried to get recognised as a separate DXCC country in awhile.

    No idea what WPX would count it for.

Points well taken, John. And no, I can't top that. Nor would I want to.

If I visit the US, I can operate almost everywhere I can now with Extra Class privileges. And I can even write the Extra exam and find a post office box so I can have a US call. That just makes so much sense...like all those "ferners" taking valuable US 1x2 calls so they can put them on their QSLs, or get permission to operate portable from exotic US islands.

Don't worry tho', I'm not gonna do anything until I can get K1AL, N1AL or W1AL and move to Arizona, next to Dick.

Subject: RE: [DX-IS] XO0ICE/2 WPX

Hi Al,

Here are some recent examples of FCC logic. Can Industry Canada top these?

1. If you can copy CW at 13wpm (Advanced class) you get LESS cw priviledges than if you can't copy CW at all (Extra class).

2. If you can copy CW at 5wpm (Novice class) you get less CW priviledges than if you can't copy CW at all (Extra class).

3. From 1991 to 2000 there were 2 point of entry licenses, the novice and the technician. If you got the novice, which required a 5wpm code test and a 25 question written test, you were limited to 25 watts on 222mhz and 5 watts on 23cm because the FCC stated that you didn't have the experience to run higher power at frequencies where RF could be dangerous. If you got the technician class license, which required no code test but a 35 question written test (which many thought was easier than the novice written), which didn't test at all about microwave radiation, you were allowed to run 1500 watts on 10ghz.

4. If you get a squentially issued call, it will be from your call district, which were established by the FCC. If you apply for a vanity call, you can apply for one from any call district, so the FCC can't figure out if their call districts matter or not.

5. The FCC sets aside special prefix blocks like KP1, KP5, KH1, KH5 for certain US territories. However, the FCC refuses to issue calls for these territories. DXpeditions that go there end up getting 1 x 1 special event calls instead, which makes these prefix blocks worthless.

6. If you upgrade from general to extra, you get extra CW priviledges just by taking a written test that asks nothing about CW. Somehow extra electronics knowledge makes you a better CW operator.

Industry Canada (God bless 'em) makes rules and then breaks them. It is a habit of all Canadian government departments and is endorsed by the Canadian Progressive Conservative party.

And just how does XO0ICE signify the anniversary of the St. Lawrence Seaway? The mind boggles.

Actually I'm surprised at the call to begin with. VE0 is reserved for ships, and in not normally issued to land based operations. I understand we are going though a month where Canadian amateurs can replace VE with XM and other funny prefixes (eg XM3EJ was on today for the Ontario QSO party.) XO0ICE *should* be a modification of VE0ICE (an unissued call) so my theory on a ship is shot! QRZ.COM says it is in Quebec City and celebrates the 50th anniversary on the entry in service of the St. Lawrence Seaway. I think it is a couple of VE2s in a rowboat in the St Lawrence!

Maybe it is not a Canadian call at all, although XJA-XOZ is allocated to Canada under the ITU... It might be Seborga. They haven't tried to get recognised as a separate DXCC country in awhile.

No idea what WPX would count it for.

Points well taken, John. And no, I can't top that. Nor would I want to.

If I visit the US, I can operate almost everywhere I can now with Extra Class privileges. And I can even write the Extra exam and find a post office box so I can have a US call. That just makes so much sense...like all those "ferners" taking valuable US 1x2 calls so they can put them on their QSLs, or get permission to operate portable from exotic US islands.

Don't worry tho', I'm not gonna do anything until I can get K1AL, N1AL or W1AL and move to Arizona, next to Dick.

9629. Sunspots (and lack of them)

Yahoo group: DX-IS (2009)
Date: 2009-04-21 17:52:31 UTC
From: John Geiger
Topic: 9629 Message: 9629

I have been through a couple of solar cycles, being first licensed in 1980 and getting bit by the DX bug in 1981. I have also seen a couple of solar minimums, but have any of you seen a solar minimum this bad? Seems like the solar minimum started around late 2006 and 2 1/2 years later it is still here! Any idea as to what is going on or when the sunspots will start appearing again? Wish we could get a 2.5 to 3 year peak!

Hi John,

I suspect hams were the first to notice something was not quite "normal"
for cycle 24.
Of course, how many complained when cycle 23 had a dual sunspot peak?

Date: 2009-04-22 02:22:48 UTC
From: Lee Jennings
Topic: 9633 Message: 9633

Hi ALL
For those of you that fret and worry, the ZL7T cards have been ordered and I expect delivery in a few weeks from EU. The QSOs and envelopes have been processed and thanks to those who put a little extra in to cover our freight costs.

I am hoping to have the first cards in the mail in about 45 days if all goes well.

We are considering the idea of doing ZL7 Chatham Island again next year late February or early March with better antennas and enhanced operation on 160m and 80m and the WARC bands.

John, you have TIM [The Inquiring Mind] of a natural physicist ... "Why does this happen/"

During the current SS Minimum, have you considered taking a post doctoral sabbatical to study and report upon the reason[s] for the lousy propagation, that way you can teach all of us 'WHAT HAPPENED and Why!" :-) Hopefully the current 66 - 70 SSN would be a little higher as you complete the study :-) ... I hope !

I've been licensed and active since 1955, I think :-(and I agree, this is a long one.

Icebergs been gone for about three weeks now. Ice out on the Lake occurred last Saturday.

We are about to get our first taste of the lousy weather that continues for the next five months. The WX gessers are predicting 85 - 90F for Boston this weekend ... I don't understand how anyone can tolerate temps above 72F. Last weekend I had to turn on the A/C in the car. The temp exceeded 62 F ... outrageous for this early in the season.

Seriously stated.

DD, W1MCE

BTW: When did you get your vanity callsign? W1KS :-)

Rene,

They (the FCC) did stop those who were abusing the Vanity Call System. They did leave the door open for club Trustees to hold a reasonable number of Vanity Call Signs..... As N1SF Radio Club (a State Farm Insurance Employees Activity Association member club) trustee, we hold N1SF (our primary), WX9WX (a second station which was dedicated for weather related disaster recovery communications), and N9PE which is held in memory of Paul Hammond, a club member and DXer.

Best regards,

I remember from some innocuous source that you can be a trustee for only one club station. Is my memory correct or faulty?

And don't forget the individuals who have 5 or 6 clubs so they can have lots of 1 x 2 calls.

Points well taken, John. And no, I can't top that. Nor would I want to.

If I visit the US, I can operate almost everywhere I can now with Extra Class privileges. And I can even write the Extra exam and find a post office box so I can have a US call. That just makes so much sense...like all those "ferners" taking valuable US 1x2 calls so they can put them on their QSLs, or get permission to operate portable from exotic US islands.

Don't worry tho', I'm not gonna do anything until I can get K1AL, N1AL or W1AL and move to Arizona, next to Dick.

Subject: RE: [DX-IS] XO0ICE/2 WPX

Hi Al,

Here are some recent examples of FCC logic. Can Industry Canada top these?

1. If you can copy CW at 13wpm (Advanced class) you get LESS cw priviledges than if you can't copy CW at all (Extra class).

2. If you can copy CW at 5wpm (Novice class) you get less CW priviledges than if you can't copy CW at all (Extra class).

3. From 1991 to 2000 there were 2 point of entry licenses, the novice and the technician. If you got the novice, which required a 5wpm code test and a 25 question written test, you were limited to 25 watts on 222mhz and 5 watts on 23cm because the FCC stated that you didn't have the experience to run higher power at frequencies where RF could be dangerous. If you got the technician class license, which required no code test but a 35 question written test (which many thought was easier than the novice written), which didn't test at all about microwave radiation, you were allowed to run 1500 watts on 10ghz.

4. If you get a squentially issued call, it will be from your call district, which were established by the FCC. If you apply for a vanity call, you can apply for one from any call district, so the FCC can't figure out if their call districts matter or not.

5. The FCC sets aside special prefix blocks like KP1, KP5, KH1, KH5 for certain US territories. However, the FCC refuses to issue calls for these territories. DXpeditions that go there end up getting 1 x 1 special event calls instead, which makes these prefix

blocks worthless.

6. If you upgrade from general to extra, you get extra CW priviledges just by taking a written test that asks nothing about CW. Somehow extra electronics knowledge makes you a better CW operator.

Industry Canada (God bless 'em) makes rules and then breaks them. It is a habit of all Canadian government departments and is endorsed by the Canadian Progressive Conservative party.

And just how does XO0ICE signify the anniversary of the St. Lawrence Seaway? The mind boggles.

XO0 would be a new prefix for me. XO2 would likely be a new prefix. I have scads of VE2s.

73

Al, VE1AL

Actually I'm surprised at the call to begin with. VE0 is reserved for ships, and in not normally issued to land based operations. I understand we are going though a month where Canadian amateurs can replace VE with XM and other funny prefixes (eg XM3EJ was on today for the Ontario QSO party.) XO0ICE *should* be a modification of VE0ICE (an unissued call) so my theory on a ship is shot! QRZ.COM says it is in Quebec City and celebrates the 50th anniversary on the entry in service of the St. Lawrence Seaway. I think it is a couple of VE2s in a rowboat in the St Lawrence!

Maybe it is not a Canadian call at all, although XJA-XOZ is allocated to Canada under the ITU.... It might be Seborga. They haven't tried to get recognised as a separate DXCC country in awhile.

No idea what WPX would count it for.

Come and spend some time in Sydney Australia.
Temps are between 60 and 70F at the moment.
Winter is on the way.

Bob

Icebergs been gone for about three weeks now. Ice out on the Lake occurred last Saturday.

We are about to get our first taste of the lousy weather that continues for the next five months. The WX gessers are predicting 85 - 90F for Boston this weekend ... I don't understand how anyone can tolerate temps above 72F. Last weekend I had to turn on the A/C in the car. The temp exceeded 62 F ... outrageous for this early in the season.

Seriously stated.

DD, W1MCE

BTW: When did you get your vanity callsign? W1KS :-)

It's going to be 88F in central Florida today. You can perspire in the shower during the summer!

On a positive note, Marsha and I both snared V8AQM on 20 SSB the other morning. It was an odd time for good band condx from that part of the world. Marsha nabbed it for a new one and it was a new one on phone for me.

In the last few days I've seen a number of V8 and V88 calls spotted. Has there been a sudden licensing rush in Brunei? Judging by the info at QRZ.COM, these guys are all "locals" and not, apparently, involved in a dxpedition.

Boy, I hope so... yesterday I heard V88HTL at ESP levels on 20CW, and that was the first time I have EVER heard anything out of V8.

That said, V88HTL is ex-V85TT, and I think he's been active for a long time.

HTL are his initials, so maybe it's just that they instated vanity callsigns in V8 :-) But you're right, there were three spotted yesterday morning.

I heard about 0.1 of them.

To all radio amateurs

SB DX ARL ARLD016
ARLD016 DX news

This week's bulletin was made possible with information provided by IZ0EHO, JA6REX, NC1L, SV1JG, the OPDX Bulletin, DXNL, 425 DX News, The Daily DX, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

MALDIVES, 8Q. Cliff, SV1JG will be QRV as 8Q7SV from April 29 to May 5. Activity will be on all HF bands using mostly CW with some digital modes. QSL to home call.

KUWAIT, 9K. Yaser, 9K2YM is QRV from Failaka Island, IOTA AS-118, and has been active on 40, 30, 20 and 15 meters using SSB and RTTY. His length of stay is unknown. QSL via EA5KB.

TONGA, A3. David, W6ZL will be QRV as A35KL from Vava'u, IOTA OC-064, from April 25 to May 6. Activity will be mostly on 40 to 10 meters using CW. QSL to home call. In addition, Paul, A35RK will be joining David on April 25, but may not be active until May 6. He will be QRV as A35RK/p until June 1. Activity will be on all HF bands using CW and SSB. QSL via W7TSQ.

BHUTAN, A5. Hisa, JA1DOT is QRV as A52DT until May 6. Activity is on 160 to 10 meters using CW, SSB and RTTY. QSL to home call.

ENGLAND, G. Look for special event station GB6MD to be QRV on April 25 from Weston-super-Mare close by the Brean Down Peninsula in celebration of International Marconi Day. Activity will be on the HF bands using CW, SSB and RTTY. QSL via operator's instructions.

ISLE OF MAN, GD. Operators M0MJH, 2E0WMG, 2E0XIS and M0ZZO will be QRV as MD0MJH, 2D0WMG, 2D0XIS, MD0ZZO, respectively, and using the club calls GT3CO and GT7SRA from April 26 to May 1. Activity will be mainly on 80, 40 and 20 meters, and possibly 160 meters using SSB. QSL via operators' instructions.

SCOTLAND, GM. Jim, MM0BQI/p is QRV from Lunga Island, IOTA EU-108, until April 27. QSL to home call.

ITALY, I. Members of the Noantri DX and Contest Team will be QRV as ID9N from Vulcano Island, IOTA EU-017, from April 25 to 30. Activity will be on all HF bands, including 6 meters, with a beacon on 50006 kHz, using CW, SSB and various digital modes. QSL via IZ0GKN.

OGASAWARA, JD1. Koji, JI1LET will be QRV as homecall/JD1 from April 29 to May 5. Activity will be on 40 to 6 meters using CW, SSB and RTTY. QSL to home call.

AUSTRIA, OE. Special event station OE100M will be QRV on April 25 in celebration of International Marconi Day. Activity will be on 160 and 80 meters. QSL via OE1WHC.

BRAZIL, PY. A group of operators from the Teresina DX Group will be QRV as ZW8BBC from Canarias Island, IOTA SA-072, in memory of Doctor Flavio Araujo, PS8BBC. Activity will be on 160 to 6 meters, using CW, SSB and various digital modes. This includes activity on all the current active Satellites. QSL via PS8DX.

POLAND, SP. A group of operators will be QRV with special callsign 3Z0LH from Chelminek Island from April 30 to May 9. This includes activity from several Lighthouses. QSL via SP1TMN.

TURKEY, TA. Special event station TC57A is QRV until April 25 in commemoration of the battle of Gallipoli in the Dardanelles. QSL via TA1HZ.

COSTA RICA, TI. Operators K9KEJ and W9YOR will be QRV as TI6/homecalls from April 28 to May 1. Activity will be on 40, 20 and 17 meters using SSB. QSL TI6/K9KEJ via EB7DX and TI6/W9YOR to home call.

VANUATU, YJ. Kaku, JA6REX will be QRV as YJ0KS from Espiritu Santo, and Tanna Island, both IOTA OC-035, from April 28 to May 3, and then from May 5 to 7, respectively. Activity will be on 160 to 6 meters using CW, SSB, RTTY and PSK31. QSL to home call.

VENEZUELA, YV. Members of the Association de Radioaficionados de Venezuela will be QRV as 4M5M on April 25 in commemoration of International Marconi Day. Activity will be on 160 to 10 meters using CW, SSB and various digital modes. QSL via W4SO.

THIS WEEKEND ON THE RADIO. The SP DX RTTY Contest, NCCC Sprint CW Ladder, Helvetia Contest, QRP to the Field, International Marconi Day, Florida QSO Party and the Nebraska QSO Party are all on tap for this weekend. Please see April QST, page 84 and the ARRL and WA7BNM contest web sites for details.

9641. RE: [DX-IS] Re: XO0ICE/2 WPX

Yahoo group: DX-IS (2009)
Date: 2009-04-24 01:54:24 UTC
From: Lance Martin
Topic: 9597 Message: 9641

Hi Art,

Congrats on the new one.

V8 used to be quite rare back in the 80s and when I got back on the air in 2005, I set out to get every V8 contact possible.

Since May 2005 I have had 52 QSOs with 16 different V8 ops, so not that rare anymore.

There is a rent-a-shack there now and lots of foreign ops. are going in.

It does help to be close and have an equatorial path, I guess it's the same deal with you and the Caribbean/South America hey?

DX has been flat here of late, still trying to get C3 on CW. Couldn't hear C31CT this morning on 40CW, oh well, one day.

I need ZF on SSB too and seeing I managed to snare KG4CN on SSB the other week, I reckon I may have a chance with these guys too, I have emailed them with the SP and LP beam headings for VK6, so that might help, hi hi.

GL with the DX!,

Penticton 10.7 cm Flux
Observed 23 Apr 071
Predicted 24 Apr-26 Apr 070/070/070
90 Day Mean 23 Apr 070

Same as it was this time last year! Bands are particularly dismal today, presumably because of a slightly elevated GMF (string of K indices >2), and we are coming off the "enhancement" from the equinox. Uncharted solar territory.

How much of this can a DXer stand? We have a muted 20/30M; nothing on 17 and up, and static on 40/80/160. Arrgghhhh! I've even gone to 20M phone to check out interesting DX spots, and invariably someone is calling CQ on top of them.

No 938
==========
*** 4 2 5 D X N E W S ***
**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

A3 - Dave, W6ZL will be active as A35KL from Vava'u (OC-064), Tonga from 25 April to 6 May. He will operate mainly CW on 40-17 metres with 100 watts and a vertical dipole; QSL via home call or LoTW. Also expect Paul, A35RK to operate CW and SSB as A35RK/p from the same location until at least 1 June; QSL via W7TSQ or LoTW. [TNX The Daily DX]
A5 - Hisa, JA1DOT will be active as A52DT from Bhutan from 24 April to 6 May. He plans to operate CW, SSB and RTTY on 160-10 metres. QSl via home call. [TNX The Daily DX]
CN - Darouf, CN8VO will be active as 5F1ROM from 26 April to 10 May for the FIA Touring Car Grand Prix that will be held in Marrakech on 1-3 May. QSL via EA7FTR. [TNX F8REF]
CY0 - The expedition to Sable Island (NA-063) [425DXN 925] is now scheduled to take place on 19-26 October. Look for N0TG/CY0, WA4DAN/CY0 and AA4VK/CY0 to be active on 160-10 metres CW, SSb and RTTY with three stations (one station will be operated during the CQ WW DX SSB Contest). QSL for all callsigns via N0TG. The website for the expedition is at http://www.cy0dxpedition.com/. On 30 April-2 May the team will conduct a "CY0 simulation test" from Core Banks (NA-067, see below).
DL - Look for Juergen, DL1IAI/p to be active from Borkum Island (EU-047) between 27 April and 18 May. He also plans to operate from DL0BRF, the club station on the lightvessel "Borkumriff", during that time frame. QSL via bureau. [TNX DXNL]
F - F4EKT, F5SL, F6GCP, F6GCT and F6ICX will be active as TM6KBK from 25 April to 10 May to celebrate the 40th anniversary of their radio club (F6KBK). Expect activity on all of the HF bands CW, SSB, RTTY and PSK31. QSL via F6GCP. [TNX F6GCP]
F - Johann, F4FEP will be active as F4FEP/p from Saint-Nicolas Island (EU-094) on 1 May (13-16 UTC) and again on 19 May (9-16 UTC). He plans to operate with 100 watts battery powered into a vertical antenna on the beach. Look for him on 20 metres SSB (+/- 14260 kHz). QSL via home call, direct or bureau. [TNX www.rsgbiota.org]

[TNX F4FEP]
G - On 7th May 1909 the Admiralty began a process that was to lead to the formation of the Fleet Air Arm. Celebrating the centenary year of Naval Aviation, the Royal Naval ARS (www.rnars.org.uk) will operate special event station GB100FAA on 1-15 and 19-21 May. Expect activity on 80-10 metres CW and SSB. QSL via operator's instructions. [TNX VA3RJ]
GD - Mark/M0MJH, Kevan/2E0WMG, Matt/2E0XIS and James/M0ZZO will be active from the Isle of Man (EU-116) from 26 April to 1 May. They will operate SSB on the HF bands (mainly 80, 40 and 20 metres) from most locations across the island, with the addition of VHF/UHF during SOTA activities. Look for them to sign MD0MJH, 2D0WMG, 2D0XIS and MD0ZZO, as well as GT3CO and GT7SRA. Updates will be posted to http://m0mjh.blogspot.com/ [TNX www.rsgbiota.org]
I - Celebrating the 100th anniversary of the Nobel Prize in physiscs awarded to Guglielmo Marconi, ARI Frosinone (IQ0FN) will be active as IY0NGM between 25 April and 20 July. [TNX IZ0EWJ]
I - The 24-26 April activity form Linosa Island (AF-019) [425DXN 937] has been postponed and is now scheduled to take place on 1-3 May. IT9OJW, IT9ZIR, IT9ZZO, IW9EJP, IW9FRB, IW9GVP and IW9HSK plan to operate as IG9/homecall on 10-80 metres SSB, PSK and RTTY. QSL via home calls. [TNX IT9EJW]
I - Celebrating the 20th anniversary of the local ARI branch, special callsign II2ERBA will be aired on the HF bands SSB, CW and digital modes from Erba (Como) on 1-25 May. QSL via IQ2ER. [TNX IZ2DPX]
I - Members of ARI San Dona di Piave will be active as IL3T from Torcello Island (EU-131, IIA VE-011) between 1 and 31 May. QSL via IQ3SD, direct or bureau. Log search at http://www.arisandona.it/il3t.html [TNX I5JKI]
I - IW4BDG, IW4CEZ, IW4EKS, IW4ELT, IZ1JKW, IZ4FUA, IZ4IPI, IZ4IPU and IZ4OSA will operate special event station II4CRI from Piacenza on 2-8 May for the World Red Cross Day and to commemorate the 150th anniversary of the Battle of Solferino, whose terrible aftermath (some 40,000 soldiers died or were wounded) eventually led to the establishment of the International Red Cross. QSL via IZ1JKW, direct or bureau. [TNX IZ1JKW]
LU - The Bahia Blanca DX Group will be active as L21D from Ariadne Island (SA-021) on 1-3 May. Seven operators (LU1EUU, LU4DBP, LU4DBT, LU4ETN, LU5DEM, LU7DSY and LU8DWR) will be active on 80, 40, 20, 15 and 10 metres SSB, CW and PSK31. QSL via LU7DSY, direct or bureau. [TNX LU7DSY]
SP - Seven operators from Poland and Germany will be active as 3Z0LH from Chelminek Island (not IOTA) and several lighthouses from 30 April to 9 May. QSL via SP1TMN. [TNX The Daily DX]
UR - Commemorating the 64th anniversary of the end of World War II, UU2JQ, UU5DX and UU5WW will operate special event station EO64JM on 1-15 May. QSL via K2PF. [TNX K2PF]
VE - Steve, VE2TKH will be active as XO0ICE/2 from Quebec City (CQ Zone 5) until 3 May and again on 14-31 May to celebrate the 50th anniversary of the entry in service of the St. Lawrence Seaway.

QSL via LoTW only (paper QSLs will not be available). [TN The Daily DX]
W - N0TG, WA4DAN and AA4VK will be active from Core Banks (NA-067) from 23 UTC on 30 April through 15 UTC on 2 May. The island is similar in environment (terrain, sand, sea, remoteness, etc.) to Sable Island, and the purpose of the operation will be a "test" of seven potential antennas for use at CY0 in October. AA4VK will also test the feasibility of including operating FM satellites (SO-50, AO-51, and AO-27) in the CY0 operations. Frequencies and modes of operation from NA-067 will be posted to http://www.cy0dxpedition.com/.
W - The Fall River Amateur Radio Club will be active as W1ACT/p from Martha's Vineyard (NA-046) on 1-3 May, including the New England QSO Party. QSL via N1JOY. [TNX VA3RJ]
W - Randy, AJ4RW and a couple of other operators will be active for a few hours from Cumberland Island (NA-058) on 2 May. They plan to be QRV on 20 and 40 metres SSB from around 15 UTC until around 19 UTC. [TNX AJ4RW]
YJ - Kaku, JA6REX will be active as YJ0KS from Vanuatu between late April and early May. He will operate CW, SSB, RTTY and PSK31 on 160-6 metres from Espiritu Santo (OC-035) on 28 April-3 May and from Tanna Island (OC-035) on 5-7 May. QSL via home call. [TNX JA6REX]

**** GOOD TO KNOW ... ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

A65 ---> The Daily DX reports that a few A65 callsigns have been issued to foreign residents in the United Arab Emirates (A61 is for UAE nationals, A62 for clubs and A60 for special event stations): G4BWP is A65BD (QSL via G5LP), G3XHZ is A65BE (QSL via G3XHZ), G4THN is A65BF, PA5M is A65BG (QSL via PA7FM), F8CUP is A65BH (QSL via F8CUP), F5LTB is A65BK (QSL via SM5DJZ).

HZ1FS/P ---> A photo gallery of the 19-26 March operation from Hibar Island (AS-192) can be found at http://www.laselki.net/vb/showthread.php?t=3680

MDXC DX CONVENTION ---> The 4th DX Convention organized by the Mediterraneo DX Club will take place on 23-24 May at the San Luca Hotel & Congress Centre, Battipaglia (Salerno). Details can be found at www.mdxc.org/meeting.asp

NEW IRCS ---> The new International Reply Coupons (the "Nairobi model", see www.dailydx.com/images/2008-08-08_irc.jpg) will go on sale on 1 July 2009, and are expected to remain valid until 31 December 2013. They will replace the current IRCs (see www.dailydx.com/images/irc2007.jpg), which must be redeemed before the end of the year, as they will expire on 31 December 2009.

QSL A61BK ---> Effective immediately, NI5DX is the QSL manager for Kahlid, A61BK. Kahlid has send his log file already, but there will be a delay in replying until the new cards arrive from the printer. [TNX K1XN and The Golist]

QSL HG1S ---> MTTOSZ Radio Club of Gyor ((http://www.mttosz.t-online.hu/) is receiving a large number of cards for QSOs made with HG1S that cannot be confirmed as they are not-in-logs. Since HG1S is a "direct only" station, you'd better check the on-line log and/or e-mail the Radio Club before running the risk of wasting your money. Also please note that local postage stamps cannot be used in Hungary! [TNX HA1DAE]

S04R ---> The expedition to Western Sahara went QRT around 5 UTC on 18 April, after five days and 37,005 QSOs (20274 CW, 14342 SSB and 2389 RTTY). The most productive bands were 20m (7650 QSOs), 17m (6914) and 30m (6389 QSOs); 1332 contacts were made on 160 metres. A log search can be found at http://www.dxfriends.com/s04r/index.php

USA POSTAL RATES ---> Effective 11 May, the postal rates in the US will increase. First-Class Mail for a letter up to one ounce (28.3 grams) will cost USD 0.44; First-Class Mail International for a letter up to one ounce to Canada will cost USD 0.75, to Mexico USD 0.79 and to all other countries USD 0.98.

VK9GMW: QSO DATA LOST ---> While on Mellish Reef, the VK9GMW team realized that there was "some issue" with the WriteLog file for the period between 20.20 UTC on 9 April and 09.20 UTC on the 10th. They hoped to fix it later, but unfortunately their "support team's efforts to recover the WriteLog QSO data have not produced results yet" and they are now "seeking help from WriteLog". In the meantime, please refrain from sending any QSLs or OQRS requests for any contact that took place during those 13 hours: "we apologize, understanding how this may disappoint those who have made the QSOs, but as long as we can not recover the data, we will not able to QSL these QSOs".

+ SILENT KEY + Franz Brechtken, DL3PS (HB9EHQ) died of heart attack on 10 April, at 45 years of age. He operated from many locations in the past, including TF/DL3PS from EU-071 and EU-168 (July-August 2008) and D44TXS (11-25 March 2009). A group of his friends will try to confirm the outstanding QSL requests, especially those for the most recent activity from Cape Verde.
Other recently reported Silent Keys include Robert J. Hajek, Sr. (K9LTN), David C. Zulawski (KA5TQF) and Jivanlal N. Adiecha (VU2JF).

Subject: [DX-IS] Same thing

Penticton 10.7 cm Flux
Observed 23 Apr 071
Predicted 24 Apr-26 Apr 070/070/070
90 Day Mean 23 Apr 070

Same as it was this time last year! Bands are particularly
dismal today, presumably because of a slightly elevated GMF (string
of K indices >2), and we are coming off the "enhancement" from the
equinox. Uncharted solar territory.

How much of this can a DXer stand? We have a muted 20/30M;
nothing on 17 and up, and static on 40/80/160. Arrgghhhh! I've even
gone to 20M phone to check out interesting DX spots, and invariably
someone is calling CQ on top of them.

73, Paul VE1DX

Guess it depends what you are looking for, Dale. I can find a EU station on 160-20 (of course enhanced at grey line, and 160 is shot because of static until November) and occasionally the odd semi-rare DX station. I'm just recalling the days when there was wall to wall DX on 15/12/10. We've done our time in the trenches and then some, that's all. I don't particularly like low band DXing. During a cycle bottom (this is #3 for me) I know that is when you concentrate on 160/80/40 and to a lesser degree 30 to fill in the holes.

I'm sitting at 250+ on 80/40/20 and almost 200 on 160. I simply can't find anything "new." I have more on 80 and 40 than I do on 12 and 10! I'm tired of contesting.

Yes, I can find a HL or a JA on 40 grey line, and maybe even a DU or a UA0. I already have them worked and confirmed. After 4 years of low banding (plus 2-3 years during two other minima), I'm getting tired of 15 minute openings on these bands (static filled between April and the end of October.) It's much more frustrating this time because this trough is unlike any in recorded history. We are 2 years beyond when it should have started back up up.

The "sunspots" reported by NASA and NOAA are really just specs that last a day or two and do not drive up the 10.7 cm flux. 100+ years ago we would not have had the technology to see them. It's only because of advanced satellites and newer high tech solar telescopes that they are being detected at all.

NASA moves the goalposts ever few months as to when the minimum will occur. We are essentially seeing a 12-24 month period of no sunspots, and all the gurus are scratching their heads. You can read all the mathematical theories by the experts in the message boards at:

http://www.solarcycle24.com/

What has developed there is a highly intelligent set of arguments by people with PhDs in solar physics shooting each other's

theories down as to why this is happening. No one is daring to say it is "normal", when/if it will rebound, or why it has stalled. All they do is run the historical data through different complex computer models and/or find obscure papers that support their point of view. There is a lot of interest by non-Hams who consider this exciting. It is exciting and unusual if you do not care if the flux rises again. It's good for satellite communications and the like (few to no solar storms.) I just isn't a lot of fun for us who depend on F2 ionisation for propagation.

Guess it depends what you are looking for, Dale. I can find a EU station on 160-20 (of course enhanced at grey line, and 160 is shot because of static until November) and occasionally the odd semi-rare DX station. I'm just recalling the days when there was wall to wall DX on 15/12/10. We've done our time in the trenches and then some, that's all. I don't particularly like low band DXing. During a cycle bottom (this is #3 for me) I know that is when you concentrate on 160/80/40 and to a lesser degree 30 to fill in the holes.

I'm sitting at 250+ on 80/40/20 and almost 200 on 160. I simply can't find anything "new." I have more on 80 and 40 than I do on 12 and 10! I'm tired of contesting.

SB PROP @ ARL $ARLP017
ARLP017 Propagation de K7RA

ZCZC AP17
QST de W1AW
Propagation Forecast Bulletin 17 ARLP017
>From Tad Cook, K7RA
Seattle, WA April 24, 2009
To all radio amateurs

SB PROP ARL ARLP017
ARLP017 Propagation de K7RA

Teased again, on Wednesday, April 22 we saw sunspot 1015 fade away, just as it was about to slip over our Sun's western limb. It emerged only briefly, late on April 21, and by Thursday it had disappeared.

10.7 cm solar flux (2.8 GHz radio energy, measured in Penticton, British Columbia with a parabolic antenna that tracks the Sun) rose slightly with the sunspot appearance, to 71 and 71.1. Average solar flux for the week increased slightly over the previous week, from 69.3 to 70.2. Both planetary and mid-latitude average A index declined, from 6.6 to 5.1 and 4.6 to 3.9, respectively.

Sunspots have become so rare that many of us were happy to see anything at all, and of course a low geomagnetic index is welcome. One thing about this extended solar minimum: With solar wind declining and not much to upset our earth's magnetosphere, it is great for 160 meters.

Calvin Branch, KA1WOR of Hudson, Florida sent a link to an interesting BBC item about the extended solar minimum. You can read it at, http://news.bbc.co.uk/2/hi/science/nature/8008473.stm. Some interesting observations in the article include the assertion that the twentieth century saw high solar activity, and perhaps that is now quieting down. Many of us were hoping that the activity fifty years ago during Cycle 19 was normal, and had hoped that it might return, but that doesn't seem to be the case. Too bad, because most of us get to experience only a few solar cycles. I was licensed as a Novice when I was a pre-teen, so I've seen four complete cycles, and I will probably see five. But six, or seven? One can hope.

The BBC seems to do a good job of science reporting, but I'm still seeing lots of confusion about what the solar cycle is actually doing. Tonight I read a blog post making fun of climatologists which claimed the current solar minimum has been ongoing for nine

years now. Of course, this is nonsense. The average daily sunspot number for each year since 1999 is:

1999 146.3
2000 173
2001 170.3
2002 176.7
2003 109.2
2004 68.6
2005 48.9
2006 26.1
2007 12.8
2008 4.7

Those numbers were derived by adding up each year's daily sunspot data presented in this bulletin, then diving by 365, or 366 in the case of 2000, 2004 and 2008.

I queried the blogger for more info on his data, but haven't seen anything yet.

We are beginning to receive reports for the Spring sporadic-E season.

Mike Schaffer, KA3JAW in grid square EL87 (Tampa, Florida area) looks for Central American and Caribbean television signals, and on April 18 sent his first sporadic-E observation since February 22, when he last received a Guatemala station. At 2113z he copied WKAQ in San Juan, Puerto Rico, and 2145z he copied WIPM in Mayaguez.

He wrote, "The distance to both stations is 1,232 miles with a heading of 118 degrees from Tampa, Florida. I noticed on AccuWeather.com that a satellite that measures water vapor content had shown dry air over the Bahamas at 2145z. The half-way point was 616 miles, 45 miles east-northeast from Clarence Town, Bahamas, the same general area where there was dry air overhead. The event lasted a total of forty-five minutes before the plasma cloud drifted out-of-range with no further signals being detected."

On April 19 at 1146 and 1200z he picked up an unidentified station broadcasting music on channel 2, and on channel 3 the Mexican TV network Televisa.

He also wrote, "I believe that springtime Es has officially arrived. I say this because this is when Mexican, Central American, and South American stations are detected during the early morning hours at my location. During the winter months, it's the reverse, late afternoon or early evening hours."

Mike continues, "While I was recording various programming, the logo from El Super Canal, TGV, Guatemala City, Guatemala showed itself with a white number three at the top/right of the screen multiple

times. At 1300z (9:00 AM EDT) the last program that was seen before it vanished was a Spanish religious service."

Vince Varnas, W7FA of Aloha, Oregon reported lots of 10 meter activity on April 23 from 0100-0330z (April 22 his local time). At 0108z he worked LU7KAT, he thinks on trans-equatorial propagation and shortly after worked KH7XS in Hawaii, he believes on sporadic-E. He also worked New Mexico and Arizona on sporadic-E. At 0325z he worked ZL1BYZ, he thinks on F2 propagation. He was most surprised by the last contact, 7,000 miles at 8:25 PM his local time.

Charles Preston, KL7OA of Anchorage, Alaska sent along information on WSPRnet, the "Weak Signal Propagation Reporter Network." They have a web site at http://wsprnet.org/drupal/wsprnet/map. I don't know the details, but it appears to be an automated network that tells users what bands are open between a number of locations. On their interactive map, you can restrict the display by time or to a particular band.

Charles also mentioned using the network for comparing antenna performance. He has a paper on this at, http://tinyurl.com/cjphes.

Doug Wetzel, K7IP of Everett, Washington sent in a link (http://www.kg7hq.wetnet.net/node/55) to a page of propagation info that his friend KG7HQ maintains. The map shows overhead foF2 MUF based on real-time data from ionospheric sounders, or ionosondes. The data originates at http://www.ips.gov.au/, the Australian Space Weather Agency.

The outlook for the near term is more of the same, quiet conditions. Geophysical Institute Prague predicts quiet conditions for April 24-30. USAF and NOAA predict a nice quiet planetary A index of 5 until May 6-9, when the expect to see a planetary A index of 15, 8, 8, and 8.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at, http://www.arrl.org/tis/info/propagation.html. For a detailed explanation of the numbers used in this bulletin, see http://www.arrl.org/tis/info/k9la-prop.html. An archive of past propagation bulletins is at http://www.arrl.org/w1aw/prop/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://www.arrl.org/qst/propcharts/.

Instructions for starting or ending email distribution of this bulletin are at http://www.arrl.org/w1aw.html#email.

Sunspot numbers for April 16 through 22 were 0, 0, 0, 0, 0, 0, and 11 with a mean of 1.6. 10.7 cm flux was 69.9, 69.8, 69.9, 70.1,

69.8, 71, and 71.1 with a mean of 70.2. Estimated planetary A indices were 6, 5, 8, 4, 4, 5 and 4 with a mean of 5.1. Estimated mid-latitude A indices were 3, 4, 8, 4, 3, 3 and 2 with a mean of 3.9.

Exactly right Lance. In 30+ years of hamming, I have a whopping total of three (3) calls in the log from Brunei! One on 20 CW, one on 40 CW and the one the other day on 20M SSB.

It's so frustrating sometimes to see posts of places like V8 and know they're heard much better from the west coast - 3,000 miles away from me!

And yes, with contest QSOs included, I have literally hundreds, perhaps thousands, of contacts with stuff in the Caribbean that is difficult for you. We are close enough to places like Jamaica, Cuba, Cayman Islands, etc., that 10M/12M is difficult because the signal goes right over us. Typically have to work them on back-scatter modes when that kind of prop is available.

Now that Marsha is retired, we spend a lot of time in the shack on a daily basis. Standing in the "blind" with gun ready can sometimes be very rewarding when chasing DX. The prop that isn't supposed to be there sometimes is!

Art makes a good point. Caribbean: yup - I need FJ for a new one.
Brunei - worked VS5 19 times and V8 2 times for a total of 21 contacts to Brunei but only on 10, 15, & 20m.

Wow, what a coincidence! In 28 years of DXing, I have worked 3 V8 calls-on 10 SSB, 20 SSB, and 40CW! That is a kind of difficult path from the midwest as well, but probably not as bad as from the East Coast. I just have a little finger-gun station.

From my little corner of the world, gentlemen, I can count seven different calls from Brunei in my log. The first was in 1979 and the last was in 1994. I believe I can honestly say I have not heard hide nor hair of a V8 in 15 years.

But I have scads of FPs, CY9s and CY0s.

BTW, all of my QSOs with V8 were on 20M only.

I heard that its better to be "lucky" rather than be "good". Isn't that the truth known only by the "Deserving"?

From the BLACK HOLE.

73 es DX,

Gary - AB9M

Subject: [DX-IS] Re: XO0ICE/2 WPX

Exactly right Lance. In 30+ years of hamming, I have a whopping total of three (3) calls in the log from Brunei! One on 20 CW, one on 40 CW and the one the other day on 20M SSB.

It's so frustrating sometimes to see posts of places like V8 and know they're heard much better from the west coast - 3,000 miles away from me!

And yes, with contest QSOs included, I have literally hundreds, perhaps thousands, of contacts with stuff in the Caribbean that is difficult for you. We are close enough to places like Jamaica, Cuba, Cayman Islands, etc., that 10M/12M is difficult because the signal goes right over us. Typically have to work them on back-scatter modes when that kind of prop is available.

Now that Marsha is retired, we spend a lot of time in the shack on a daily basis. Standing in the "blind" with gun ready can sometimes be very rewarding when chasing DX. The prop that isn't supposed to be there sometimes is!

Close. He can talk to the guys on CY9 with a normal voice, but needs a shout at the guys on FP. Actually FP, CY0 and CY9 are tough for us on anything above 40/30 because they're too close. 20/17/15/12 and 10 are back scatter only. For us the one shot QSOs from 160-6 are in the Caribbean.

Let's put it this way, John...when I was at CY9DXX I could see FP on a clear day!

It is also possible to work all three of them from my QTH, albeit with difficulty, on 20 and above.

I have cards from both Vietnam and Brunei on 40M. In this day and age of on-line logs, I showed up in neither one, but sent the card anyway. I'm either obstinate or ......

Both came through with flying colors. There was a small group in Brunei some months ago and I worked a Frenchman on 40 CW. One of those "ESP" type of contacts where you pray you really heard what you think you heard! Almost exactly the same for the contact with Vietnam.

In both cases, a rotary dipole at 70 feet (the add-on part of a 4-el SteppIR) with approximately 1,000 watts.

From: RICHARD SOLOMON
Topic: 9658 Message: 9658

I just worked RW0IM/P on 20 and one spot I saw said RDA MG-04.

What does that mean ? Some contest or celebration ?

73, Dick, W1KSZ

9659. Re: [DX-IS] Russian Contest ??

Hello Dick,

RDA stands for Russian District Award Program.
MG-04 is the abbreviation for the district RW0IM/P is working in (Magadan oblast, Severo-Evensky Area).

More info about RDA You find at www.rdaward.org (http://www.rdaward.org).

73 & gl,

Axel Schernikau, DL6KVA

2009 W5DXCC DX DINNER/FORUMS AT HAM-COMM. The Lone Star DX Association (LSDXA) is pleased to sponsor the 2009 W5DXCC programs and DX Dinner in conjunction with Ham-Com on June 12-13th, in Plano, Texas. The DX Dinner will be Friday evening, June 12th, at the Plano Centre in the Windhaven Room. The evening will begin with a cash hospitality bar in the Plano Centre from 5:00 to 6:30 PM. Dinner activities will begin promptly at

6:30 PM. Dinner will be Char-Broil Prime Rib with salad, rolls, baked potato, seasoned vegetables, and cheesecake for desert. A vegetarian option will be available upon request. The DX dinner program will be the 2009 KP5 Desecheo DXpedition (www.kp5.us). On October 1, 2008, the U.S. Fish and Wildlife Service (USFWS) selected the KP1-5 Project team led by K4UEE and W0GJ to be the first USFWS-approved DXpedition to Desecheo Island in fifteen years. DXpedition co-leader Bob Allphin, K4UEE, will present what promises to be a very interesting program. Friday DX Dinner door prizes are: Yaesu FT-2000 Transceiver, Force 12 C-3S Yagi Antenna, Array Solutions AIM 4170 Antenna Analyzer and Begali Sculpture Paddle. Dinner ticket price is 40 USDs and can be ordered on the Ham-Com Web site, <http://www.hamcom.org> by clicking the "Admission" button. Because of the banquet room capacity, only 200 tickets are available. Tickets will be sold until all 200 are gone or June 1st, whichever comes first. Tickets can be picked up at the Lone Star DX Association booth. The Saturday, June 13th, W5DXCC programs presented in conjunction with Ham-Com include:
K5D Desecheo Round Table/Q&A by K5D operators K4UEE, K5AC, K5AND, & NA5U
VK9LA Lord Howe by W5SL
Cycle 24 and More by K9LA
How to DX on 6 Meters by K5AND
DXCC QSL card checking, including deleted and 160 meter cards will be offered on Friday and Saturday at the LSDXA booth. Please have all paperwork filled out before submitting cards for checking. Additional information is available on the LSDXA and Ham-Com Web sites at:
http://www.hamcom.org
http://www.dxer.org

2D/GT3/GT7/MD0, ISLE OF MAN (EU-116). By the time you read this, operators Mark/M0MJH (MD0MJH), Kevan/2E0WMG (2D0WMG), Matt/2E0XIS (2D0XIS) and James/M0ZZO (MD0ZZO) will be active until May 1st. Activity will be on SSB on the HF bands mainly on 80/40/20m, but there may be possible activity on the higher bands if conditions allow and 160m if space allows, as well as VHF/UHF. Also, look for GT3CO, the callsign of the Colchester Radio Amateurs Club (of which Kevan, Matt and James are members) and GT7SRA, the callsign of the Sudbury and District Radio Amateurs Clun (of which Mark is a member). Matt and James are SOTA enthusiasts and are planning to activate all five IOM SOTA Summits over two days on the 27th and 28th. They may be accompanied by Mark or Kevan on some or all of these summits. Look for updates and possibly further information on their activities on Mark's Blog page at: http://m0mjh.blogspot.com

4TH MDXC CONVENTION. The 4th Mediterraneo DX Club Convention will be held in Battipaglia (Salerno), Italy, May 23-24th. Complete details are available at: http://www.mdxc.org/meeting.asp

5F, MOROCCO (Special Event). It's the event of the year in Morocco, the "Race of Morocco", and Abder, CN8VO, is now operating with the special callsign 5F1ROM for the FIA Touring Car Grand Prix which will be held in Marrakech. Activity will last until May 10th. QSNs show he was on 40 and 20 meters SSB this past weekend. QSL via EA7FTR. Visit his Web page at:

http://www.cn8vo.com

5R8, MADAGASCAR. Wayne, W5KDJ, will be active as 5R8KD between July 1-15th. Activity will be on 160-6 meters using CW and RTTY. QSL via his home callsign. Also on LoTW and eQSL.

6V, SENEGAL. Seb, F8IJV, informs OPDX that he will be on his honeymoon here between October 17th and November 1st. He plans to be active in the CQWW DX SSB Contest (October 24-25th). He will try to operate before and after the contest as 6V7Q on 160-6 meters, mainly on SSB and the Digital modes. He will be operating from Jean-Francois, 6W7RV, QTH in La Somone. QSL via F8IJV. More details will be forthcoming.

9M2, WEST MALAYSIA. It has been reported that Richard, PA0RRS, will be permanently moving to Penang Island (AS-015, WLOTA 2743), West Malaysia, on May 1st. He will be active as 9M2MRS from Penang Island, but initially only on 20 meters using a dipole. He prefers CW but will go on SSB if requested. QSL via 9M2MRS, by the 9M2 QSL Bureau or direct to: Richard Smeets, Reef Apartment Building, 54-7-12 Jalan Low Yat, 11100 Batu Ferringhi, Penang Island, Malaysia. QSLs sent "via PA0RRS" will still be possible, but you will have to be patient as Richard will only be back to the The Netherlands for a limited time each year.

8R, GUYANA (Update). The 6 Meter Beacon Project, Inc., (HF-50 MHz DX-pedition between June 16th and July 6th) now has a Web page online at:
http://6meterbeaconproject.org/8R2009.html
Watch for updates and operating frequencies to be posted.

A3, TONGA. David "Kawe" Lee, A35KL, will be active from Vava'u (OC-064), beginning April 25th through May 6th. His operation will be mainly CW, on 40-17 meters. QSL via W6ZL (w/SASE or IRC, or via LoTW). Paul, A35RK, will join Dave on the 25th, but will probably not begin his solo operation until after Dave leaves. Paul will be working the HF bands on CW and SSB, using a FT-450 and a G5RV until June 1st, and possibly a bit longer signing A35RK/p. QSL A35RK/p via W7TSQ or via LoTW.

A5, BHUTAN. Hisato, JA1DOT, is now active as A52DT until May 6th. Activity will be on 160-10 meters using CW, SSB and RTTY. QSNs show most of his operations have been on 30 and 80 meters CW. QSL via his home callsign. Updates will be posted on the Nippon DX Association (NDXA) Web site at:
http://www.ndxa.net

A6, UNITED ARAB EMIRATES. Philippe, F5LTB/9Q1TB, is expected to pick up his new license sometime this week and will now be active as A65BK. Activity will be mainly on SSB. His QSL Manager will continue to be SM5DJZ, direct ONLY (eQSL are welcome for eDX100, eWAS and eZ40).
More details are forthcoming.

C5, THE GAMBIA. Eric, SM1TDE, is planning an operation to take place between December 10-31st. More details should be forthcoming.

CY0, SABLE ISLAND (Update). The CY0 Team has re-adjusted their arrival date on Sable Island so the CY0 Team can provide a CY0 country multiplier to contesters during the CQWW DX SSB Contest weekend (October 24-25th). The team plans to operate only one station in the contest and also continue to maintain CW and 30/17/12m operations for those DXers who are not in the contest. The complete operation will take place between October 19-26th, and operators will sign homecall/CY0. Operators mentioned are: Murray/WA4DAN, Randy/N0TG and Ron/AA4VK. Activity will be on all bands 160-10 meters using CW, SSB and RTTY. QSL via their home callsigns. Visit their Web site periodically for continuing updated details and information (see below).
ADDED NOTE BY RANDY, N0TG, (CY0-Preparation): A Simulation Test by N0TG, WA4DAN and AA4VK will be performed from IOTA NA-67, on the Outer Banks of North Carolina on an island that is similar in environment (terrain, sand, sea, remoteness, etc.) to Sable Island during the period 2300Z on April 30th through 1830Z on May 2nd. The purpose of the operation will be a "test" of potential antennas for use at CY0 this coming October. Testing of antenna layout will be conducted to assess inter-station interference. DXers from the U.S. and other countries are welcome to call in and participate in the CY0 simulation "test". The DXPedition for Sable Island is scheduled for mid-October. All Dxpedition details and updates are available on the Web site: http://www.cy0dxpedition.com

DF0, GERMANY (Green Days/WFF Op). Operators Gabi/DF9TM, Frank/DL2SWW and Ric/DL2VFR will be active as DF0WFF during the "Green Days" weekend, June 13-14th. Activity is good for the WFF Award (new DLFF-024). QSL via DL2VFR (also via DL Bureau). For information about German WFF activities, please visit: http://www.wff-dl.de --or-- http://www.wff44.de

EO64, UKRAINE (Special Event). Operators Rustam/UU2JQ, Eugene/UU5DX and Sergey/UU5WW will activate special event station EO64JM from May 1-15th. The operation will commemorate the 64th anniversary of victory in the Great Patriotic War. QSL via K2PF.

F, FRANCE (LH Activity). Jean-Loup, F8DYR, will spend his holiday week activating Eckmuhl lighthouse (ARLHS FRA-256, Grid IN77tt) in south Brittany between April 27th and May 2nd. Activity will be on 6 and 2 meters, with a low power portable station, between 0600-0800z every morning and possibly other times. QSL via his home callsign.

H4, SOLOMON ISLANDS. The "DX World of Ham Radio" Web page is reporting that Mike/KM9D (H44MY) and Jan/KF4TUG (H44TO) are once again in the Solomon Islands staying in Honiara. Mike has indicated that there are no plans to be immediately active. Any activity may be announced at short notice.

II2, ITALY (Special Event). Members of the "Sezione di ERBA" ARI Radio Club will activate the special callsign II2ERBA between May 1-24th. Activity will be on the HF bands using CW, SSB and the Digital modes. QSL Manager is IQ2ER. NO E-QSL.

IOTA NEWS.....
AF-019. (POSTPONED) Operators Vincenzo/IW9EJP, Filippo/IW9FRB, Giovanna/IW9GVP (YL), Ferdinando/IW9HSK, Ezio/IT9OJW, Sebastiano/IT9ZIR

and Dario/IT9ZZO have postponed their activity as IG9/homecalls from Linosa Island (IIA AG-003, MIA MI-128) until May 1-3rd (not April 24-26th as first announced). They plan to operate on SSB, PSK and RTTY on the HF bands, 80-10 meters. QSL via their home callsigns, direct or by the Bureau. Visit their Web page at: http://www.iw9frb.it/linosa.htm

AS-077. Look for 8J6DON to be active from Kyushu Island during the upcoming Hakata "Dontaku" Port Festival between April 29th and May 5th. QSL via the JARL Bureau.

AS-192. (Pictures of recent activity) Suli, 7Z1SJ, one of the operators from the recent (March) HZ1FS/P operation to Hibar Island in the Red Sea Coast South (Jizan Province) Group, provides OPDX readers with a URL link to see many pictures of this activity at: http://www.laselki.net/vb/showthread.php?t=3680
Remember to QSL via EA7FTR.

EU-008. Operators Charlie/MM0GNS, Willie/GM4ZNC and Rodger/GM3JOB will be active as MS0TJT/p from the Island of Coll, Inner Hebrides, May 3-8th. Activity is planned for 80-6 meters, mainly SSB, but with a little CW and PSK. QSL via GM4ZNC.

EU-031. Claudio, IZ0KRC, will be active as IC8/IZ0KRC from Ischia Island (IIA NA-001, MIA MI-042, WLOTA 0689) between April 29th and May 4th. Activity will be SSB only on 40/20/15/10 meters. QSL via his home callsign, Bureau is preferred.

EU-047. Juergen, DL1IAI, will be active as DL1IAI/p from Borkum Island (N-001 for the German Islands Award) in the Niedersachsen State Group between April 27th and May 18th. He will also try to activate the club station DL0BRF on the lightship "Borkumriff" on SSB and maybe also PSK31/RTTY on 80-2 meters during this time. QSL ONLY via the bureau (PLEASE). Also, visit: http://www.dl1iai.de

EU-065. Member of the Charente DX Group will activate TM0M from Molene Island (DIFM AT002 - French Island Award), May 23-30th. Four stations will be on air 24/7, with operations on 80-10 meters using CW, SSB, RTTY and PSK. Operators mentioned are: Joel/F1BLQ, Jean/F4EEK, Michel/F5EOT, Eric/F5LOW, Sibard/F5NBQ, Laurent/F5MNK, Bertrand/F6HKA and Leon/ON4ZD. QSL via F6ANA, direct or by the bureau.

EU-094. Johann, F4FEP, will be active as F4FEP/p from the beach of Saint-Nicolas Island (DIFM AT-010) possibly 1 to 3 days during the month of May, depending on the weather and a boat. He will be active on May 1st (1400-1700z) and May 19th (1000-1700z). Watch 14260 kHz (+/- QRM); he will be use an ICOM-706 w/100 watts, battery power and a G5RV antenna. QSL via his home callsign, direct or by the Bureau.

EU-125. Operators Gabi/DF9TM, Frank/DL2SWW and Ric/DL2VFR will be active as OZ0FR from Romo Island (NS-001 for the Danish Islands Award) between July 23-26th, including the IOTA Contest (July 25-26th). Activity will be high power on CW and SSB into a yagi antenna for 20-10 meters, a SteppIR vertical (BigIR) for 40-10 meters and dipoles for 80 and 40 meters. This activity will also count for the World Flora and Fauna Award (WFF - for OZFF-004). QSL OZ0FR via DL2VFR (also via the DL Bureau, do not send QSLs via OZ Bureau). More details will be forth-coming on: http://www.iota-expedition.de

EU-129. Helmut, DL7VOX, will once again be active as DL7VOX/p from Usedom Island (O-013 for the German Islands Award) between April 27 and May 16th. Activity will probably be CW on 160-10 meters.QSL via his homecall, direct or by the Bureau.

EU-178. Uwe, DL3BQA, will be active as ES8/DL3BQA from Kihnu Island, Estonia, between June 15-22nd. Activity will be holiday style on 80-6 meters, mostly on SSB and possibly some RTTY. QSL via his home callsign, by the bureau or direct.

EU-189. Just a reminder that a Belgian team of five operators will try to land and activate Rockall Island between April 30th and May 1st. Operation will depend on the weather and sea conditions. The team will have two stations on the air using the callsign MM0RAI/p. Activity will be on 80-10 meters using CW and SSB. QSL via ON4BR, direct or by the Bureau. Please visit their Web site for latest news and updates at: http://www.rockall.be

SA-021. (Update) Members of the Radio Club Grupo DX Bahia Blanca will be active as L21D from Ariadna Island, located 70km south of Ingeniero White Harbour, in the natural reserve of Bahia Blanca, between 0000z, May 1st, and 1800z, May 3rd. Activity will be on 80/40/20/15/10 meters using CW, SSB and PSK. Operators mentioned are: Carlos/LU7DSY, Osmar/LU8DWR, Carlos/LU4ETN, Gerardo/LU1EUU, Enrique/LU5DEM, Nestor/LU4DBP and Willy/LU4DBT. QSL via LU7DSY, by the bureau or direct to: P.O. Box 709 (8000) Bahia Blanca, ARGENTINA. Visit the group's Web page at: http://www.grupodxbb.com.ar

SA-072. (Update) Members of the Teresina DX Group are preparing a DX-pedition to the Canary Island (DIB MA-05, DFB MA-11) on the coast of Piaui, Brazil, between April 29th and May 3rd. Callsign will be ZW8BBC. Activity will be on 160-10 meters using CW, SSB, PSK31 and RTTY, including 6 meters, 2 meters (SSB/FM) and the satellites (SSB/FM). Satellites mentioned are: AO-7 (A and B), FO-29, AO-51, VO-52, SO-50 and ISS in repeater mode, if activated. QSL via PS8DX (QRZ.com address): Operators mentioned are: Ray/PS8BBC, Junior/PS8DX, Jesus/PS8ET, Chicao/ PS8FSM, Milton/PS8HF, Joca/PS8JN, Nelson/PS8NF, Joao/PS8PY, Piraja/PS8RF, Dalton/PS8TV and YL Milena/PS8ML. Sugguested frequencies are:

CW - 1830, 3530, 7030, 10114, 14040, 18098, 21040, 24920 and 28040
SSB - 1970, 3765, 7055, 14260, 18128, 21260, 24950 and 28460
RTTY - 3577, 7037, 10127, 14080, 18101, 21080, 24920 and 28080 kHz
6m - CW/50.107 and SSB/50.127 MHz

A web page is now active for this operation at:
http://zw8bbc.blogspot.com/

IOTA SPECIAL NOTES:
* IOTA Contest 2008 Credits: The RSGB are pleased to announce that they can now accept QSOs made in the 2008 IOTA contest for credit without QSL Cards.
* Interruption of service from RSGB HQ: The RSGB regrets that as the result of the sudden resignation of the IOTA Coordinator at HQ, there will be an interruption in its service to the IOTA community pending the filling of the post. This means that there will be a delay, possibly as long as a month, in the issue of certificates, plaques and trophies and in the handling of emails addressed to: iota.hq@...
A notice will be posted when normal service resumes.
* NEW IOTA Directory available: Now celebrating 45 years of Island collecting -- The "IOTA Directory" is the essential guide to partici-pating in the Islands on the Air (IOTA) award program. For details on how to get one:
http://www.rsgbshop.org/acatalog/Online_Catalogue_IOTA_42.html

IRC NEWS. Just a reminder for those who like to stockpile International Reply Coupons (IRCs)-- the current IRC will expire at the end of year. Unlike the old style coupons, the current types all have an expiry date, giving them a maximum life of 3 years. If you purchased a current IRC today, they will still expire on December 31, 2009. Ken, ZL2HU, advises us on the following information from International Postal Union in Geneva: "The current issue (Beijing 2) IRC may be exchanged up to 31 December 2009 (date printed on coupon). In principle, Beijing 2 coupons will no longer be sold from 31 August 2009. The new international reply coupon (Nairobi model) is due to go on sale from 1 July 2009, and will be valid for exchange until 31 December 2013." Ken states, "So make sure you aren't holding any of the Beijing 2 coupons at the end of this year."
To see what the new IRC looks like, go to:
http://www.upu.int/news_centre/2008/en/2008-08-08_irc.shtml

JD1, OGASAWARA. Koji, JI1LET, will once again be active as JI1LET/JD1 from Chichijima Island (AS-031) between April 29th and May 5th. Activity will be on 40-6 meters, CW, SSB and RTTY. QSL via JI1LET, by the JARL Bureau or direct.

JW, SVALARD. Operators Jan/OK1JK, Jiri/OK1JST, Pavel/OK1IPS and Jiri/K1IEC will be on a Czech Polar DXpedition to Longyearbyen, Spitsbergen Island (EU-026, WLOTA 0125), June 5-15th. Look for them to sign JW/homecall and be active on all HF bands using CW, RTTY, PSK and SSB. QSL via their home callsigns. More information can be found on their Web site at:
http://jan.kepic.cz/view.php?cisloclanku=2009030003

LN3, NORWAY. Members of the Vestfold Contest Club (LA3Z) of Stavern will be active as LN3Z during the CQ World Wide WPX CW Contest (May 30-3st), as a Milti-Single entry. Operators mentioned are Svein/LA3BO, Harald/LA5UF, Paul/LA6YEA, Jon/LA8HGA and Gaute/LA9TJA. QSL via LA9VDA, direct (see details on QRZ.com) or by the bureau. Bureau QSL cards can also be requested by E-mail to: la9vda2003-at-yahoo.no
Visit the club's Web page at: http://www.la3z.com

NCDXF PRESS RELEASE (by Al Burnham, K6RIM, NCDXF Director). At its Board of Directors meeting on April 17, 2009, in Visalia, CA, the Northern California DX Foundation elected Bruce Butler, W6OSP, as President and Glenn Johnson, W0GJ, as Vice President. Outgoing President Len Geraldi, K6ANP, and Vice President Al Burnham, K6RIM, remain on the board as Directors. Information pertaining to the Northern California DX Foundation is available at: http://www.ncdxf.org

NEW CONTEST WEB PAGE. Pete, N4ZR, announced that "The Contesting Compendium is up and running at: http://wiki.contesting.com
With the help of KM3T, K5TR, K5ZD and N5KO, the objective of this Web page is "to make this into a one-stop source for information on contesting, and to ensure that all the good stuff that is now scattered across the Internet doesn't succumb to the ravages of time, hard drive failures, or other accidents of history." Pete states he is looking for contributors/authors to contribute material and to keep the Web page up to date. Check it out!

QSL INFO AND NEWS.....
4M5M via W4SO. Members of the Association of Radioamateurs of Venezuela activated a special event station for the International Marconi Day on April 25th. W4SO address is: Scott Cronin, 5020 Pierce ST., Hollywood, FL 33021.

QSL AX6JB via M0URX. Special prefix for ANZAC Day. Operator was John, VK6JB.

NEW QSL ROUTE. Buzz, NI5DX, reports that, effective immediately, he is the QSL Manager for Kahlid, A61BK. Kahlid has already sent his log file to Buzz. QSL cards will be ordered, so there will be a delay in replying to cards until the new cards arrive from the printer. PLEASE NOTE: Phil, ex-9Q1TB, has just been issued the callsign A65BK. To avoid confusion, those requesting cards for either station should make certain they send their request to the proper QSL Manager.

GB8GM via M0DOL. Special event station for the International Marconi Day on April 25th. M0DOL's address is: Chris Darlington, 24 Westridge, Northampton, England, U.K.

CHECK YOUR HG1S QSO. It has been reported that the MTTOSZ Radio Club of Gyor is receiving a large number of cards for QSOs made with HG1S that cannot be confirmed as they are "not-in-logs". Since HG1S is a "direct only" station, you'd better check the online log and/or E-mail the Radio Club before running the risk of wasting your money. Also, please note that local postage stamps cannot be used in Hungary! To check your QSO, go to: http://www.mttosz.t-online.hu/

KL7J - NO BUREAU QSLS. Fred, K3ZO, from the Third Call Area Incoming QSL Bureau, reports: "This Bureau continues to receive cards directed to KL7J via his QSL Manager, N3SL. Please note that KL7J has asked his manager not to accept cards coming in via Bureau. Any such cards received by this bureau are passed on to an elementary school teacher we know who uses the cards as an instructional tool with her kids."

ZL7T QSL STATUS. Lee, ZL2AL, reports that the ZL7T cards have been ordered, and he expects delivery in a few weeks from Europe. The QSOs and envelopes have been processed, and he thanks those who put a little extra in them to help cover their freight costs. Lee states, "I am hoping to have the first cards in the mail in about 45 days if all goes well. We are considering the idea of doing ZL7 Chatham Island again next year late February or early March with better antennas and enhanced operation on 160m and 80m and the WARC bands."

QSLS VIA LOTW: None reported this week!

QSLS RECEIVED VIA MAIL: CX3CCC, E70T, EL2DX, ET3JA, FK8CP, FM5LD, FW5RE, LY8O, MU0FAL, NP4A, RO9O, T27A, TF3CW, TJ3SL, UA2FCC, V25WY, VK9AA, VP2V/SP3IPB, VP8KF and Z36A

QSLS RECEIVED VIA THE BUREAU: 3XM6JR, 4K7Z, 4X0C, 4X0V, 7P8FC, 7U5CI, 9A73AA, 9K2HN, BD7JLR, BG7JLR, BT1OB, C4EURO, EN600Y, ER61V, EU5ROPE, EU940OR, EV7DP, EV9P, H44MS, HB0/DL4IAL, HD2A, IF9A, J48MDC, J6/DL7AFS, JI2ZJS, PJ7/DL7DF, RI1OTA, S79SG, T32CXX, T77WI, TC85TC, TO5FJ, UK8AJ and YI1DZ

S7, SEYCHELLES. Davide, IZ3EFL, is now active as S79DF from Aldabra Atoll (AF-025) for the next year. Activity has been only on 20 meters SSB, but he has promised to appear on other bands soon. Watch between 1600-1730z on 20 meters. QSL via IV3TDM, direct or by the bureau.

T30, WESTERN KIRIBATI ISLANDS (Also 3D2). By the time you read this Hrane/YT1AD and Miki/YU1DW should be active as T30M and T30DW, respectively, from Tarawa Island for a few days until April 29th. Their Pacific trip is to make plans for their upcoming operations to Tokelau Island (ZK3) in 2010 and Conway Reef (3D2C) in 2011. The duo will leave T30 and end their Pacific trip in Fiji. They will be active as 3D2AD (YT1AD) and 3D2DW (YU1DW) until May 4th. QSL all callsigns via their home call, direct or by the Bureau.

TA7, TURKEY. Operator Berkin, TA3J, will be active as TA3J/7 from Erzincan City (KM99RS) between now and May 3rd. Activity will be on all bands using CW, SSB and the Digital modes. He was heard this past weekend on 20 meters SSB. QSL via TA3YJ QSL Service at: http://www.aydogmus.gen.tr/ta3yj/qslservice.htm

TK, CORSICA (IOTA/SOTA/LH/QRP). Laurent, F8BBL, will be on holiday on the main island of Corsica (EU-014, DIFM TK-001, MIA MCO-001, WLOTA 1390) between August 1-15th. His QTH will be located in the Valinco Gulf, near the city of Olmeto (Department South Corsica/2A, WW Loc. Loc JN41KQ). His activity will be QRP using a FT-817 and a new MP1 antenna. He will

be signing TK/F8BBL/QRP and will be on the HF bands, mainly CW, but some SSB during his spare time. On August 8th, Laurent will climb the summit Punta di Buturetu (SOTA TK/TK112, 870m ASL, WW Loc. JN41KR) and expects to be on the air around 1000z. Suggested frequencies are: 7032 kHz/CW, 7096 kHz/SSB and 10118 kHz/CW. He will also make another one day trip to the Island of Sanguinaires (EU-104, DIFM TK-002, MIA MCO-022, WLOTA 0098, Loc JN41HV) during his second week (weather and sea conditions permitting and boat rental). QSL via his home callsign, direct or by the Bureau.

TK, CORSICA (IOTA/LH/Mills/Towers Op). Claude (Jim), F5MCC, will be on holiday from the main island (EU-014, DIFM TK-001, MIA MCO-001, WLOTA 1390) between May 22nd and June 11th. He will be signing TK/F5MCC or possibly TK/F5MCC/p. Tony, TK5XN, may be with him. Look for Jim to activate some lighthouses which count for the "French Onshore Lighthouses Award" (DPLF) with the following references: PB 074, PB 068, PB 087, PB 091, PB 287 and PB 292 (with weather permitting, possibly PB 170 and PB 171). Also, a very difficult lighthouse (PB 289) may be activate which is hard to reach and for this activation, Tony, TK5XN, will go with Jim. There is another planned activation from the Island of Lavezzi (EU-164, TK-011, MCO-007, PB 175 and WLOTA 755), but this depends on the renting of a boat. On May 23rd and 30th, Jim will also activate (along with Denys/TK5JU) some Mills or Genovese Towers (not yet chosen). Activity from all locations will be on the HF bands 80-10 meters CW/SSB. QSL TK/F5MCC via F5MCC, TK5XN via F2YT and TK5JU direct to his home callsign.

TY, BENIN. In close cooperation between the DAGOE Foundation, Mercy Ships and 5 Dutch radio amateurs, a new DXpedition is on its way. If everything goes according the plan, the team foresees a visit to Benin between October 7-30th. The team expects to be on air from October 10th-27th and will also participate in the 2009 CQWW DX SSB Contest (October 24-25th). QSL Manager is PA3AWW (direct or by the Bureau). An online QSL REQUEST service will be available. More details are forthcoming, but a Web page is up and running at: http://www.benin2009.com/home.php

VK9GMW, MELLISH REEF (News - QSO Data Lost!). George, AA7JV, reports on April 22nd: "We both made it home, safe and sound (but dog tired). Unfortunately our support team's efforts to recover the WriteLog QSO data have not produced results yet. We are now seeking help from WriteLog. In the meantime, please do not send any QSLs or OQRS requests for any QSO that took place between 4/9 2020 UTC and 4/10 0923 UTC. We apologize, understanding how this may disappoint those who have made the QSOs, but as long as we can not recover the data, we will not able to QSL these QSOs."
ADDED NOTE: George, AA7JV, also, reports: "I have been getting a lot of requests for info on the antenna we used on Mellish." Read about their multi-band antenna at: http://vk9gmw.com/documents/VK9GMW_ANTENNA.pdf

YB0, INDONESIA (IOTA Op). Hotang, YC0IEM, will be active as YB0IEM/P from Borneo Island (OC-088) between April 27th and May 15th. Bands and modes of activity were not provided. QSL via IZ8CCW.

YJ, VANUATU (IOTA Op). Kaku, JA6REX, will be active as YJ0KS for 10 days from two different islands. Activity will be from Espiritu Santo (OC-035) between April 28th and May 3rd, and from Tanna Island (OC-035) between May 5-7th. Look for activity to be on 160-6 meters using CW, SSB, RTTY and PSK31. QSL via his home callsign.

YS, EL SALVADOR. Operators Michael/G7VJR, Bob/MD0CCE and Nigel/G3TXF will be active as YS1G between May 17-23rd. Activity will be focused on CW on 160/80/40/30 meters, and possibly the other higher bands depending on the conditions. Mario, YS1MAE, is expected to join the team and operate SSB. QSL via G3TXF.

YW0, AVES ISLAND (Update). The 4M5DX Group, which is expecting to be active as YW0A from Aves Island, received on Monday, April 20th, a schedule from the Venezuela Navy to travel to Aves Island. From their Web they state, "The stay time that they can give us on Aves Island is no less than 30 days (can be more, depending of vessels availability). No one operator or team member can stay for so long time on the island. For that, we are still looking for no more than 7 or 12 days to operate from YV0." The YW0A Web is at: http://yw0a.4m5dx.info/news.html

ZF, CAYMAN ISLANDS. Dave, W9CGI, will be active as ZF2GC from the Grand Cayman Island (NA-016, WLOTA 1042) between July 29th and August 10th. Activity will be mainly on 17 and 12 meters using PSK31 and SSB. He will use a vertical antenna with under 50 watts. QSL via his home callsign, eQSL preferred; direct w/SASE or by the Bureau. Sorry no LoTW.

ZL, NEW ZEALAND (Island Names To Be Decided!). New Zealanders are being asked what they would like to call their two main islands, currently North Island and South Island. The BBC News reports: "The country's Geographic Board, which assigns and approves place name changes, has announced consultations on alternative English and Maori names. The move follows the discovery that the geographically correct names, used for 200 years, were not legally registered." The Maori names are Te Ika a Maui (the fish of Maui) for the North Island and Te Wai Pounamu (the waters of greenstone) for the South Island. Read the complete story at: http://news.bbc.co.uk/go/em/fr/-/2/hi/asia-pacific/8011846.stm

Hello Dick,

RDA stands for Russian District Award Program.
MG-04 is the abbreviation for the district RW0IM/P is working in (Magadan oblast, Severo-Evensky Area).

More info about RDA You find at www.rdaward.org.

Hello Dick,

there is an official award program for the russian club SRR, named "Russia". This one practically is the same as the old oblast award with some new directions (multi-band etc.).

The RDA is an award program of the Tambov Award group with RX3RC beeing the award manager. Here You have to work not only the oblast, but the districts of every oblast (like counties of US-states). Currently there are 2745 RDA in 89 oblasts (like 3077 counties in 50 states).

You know conditions are terrible when the only activity you can hear (from this QTH) on 30M is a huge pile-up on a CO. Earlier today I saw a spot for an ID9 so I went there and COULDN'T hear him. I can never not hear an Italian. :-)

Dick:

This is the "Russian District Award" district identifier.
Russia doesn't use counties like we do, and one of their award clubs has
identified and broken Russia down into about 2,800 "districts".
See: Internet: http://rdaward.org/rda_rules_eng.htm (English Text)
And, yes, there are "expeditions" to the rare districts.

I know exactly what you mean. Dont know what it is about Italian stations but they are almost always 30/9 here.

I always here them, when I may not hear any other EU stations well at all. Of course it may be since I always hear most of them I
talk to on CW are using "homemade 4 element yagi" "homebrew 5 element quad" and they seem to all be up at 90 or 120 feet.

And, almost all of them are running power, how much I dont know buy they usually report 1000W.

Conditions were not the same here last night as they were for you though. I went to many spots last night on 40 Meters with my newly
made 40 Meter Double Bazooka and Italy was literally blasting in here as normal. I also worked a ton of Swedish stations but I heard
little else, now that was strange for me here.

I think most of us are suffering through these bad conditions, Bob.
Perhaps we hear those Italians because they run such big antennas and lots of power. And perhaps we don't hear the other Italians just because they don't. :-) I recall listening to an I station on 20 CW who was running 5W into a 6-el monobander at 130' and QSO after QSO he was between 30 and 40 over 9. I think my receiver would have melted if he'd been running 100W.

Al, the answer is simple. They don't have to put up with the
neighborhood covenant BS that we do. Also, on several occasions I have
been told that along with the big antennas, the big guns in Italy run
between 5 & 10 KW output, and the government ignores them.

Oh, my goodness, Mike -- I didn't know :-).

Anything over my 600W and there'd be a lynching in my neighbourhood (maybe even in my house). Guess that's why I keep buying lottery tickets. It isn't to support the government and they folks who win (I never do) but because maybe one day my luck will change. If I win someday I'll move way out of town, put up an antenna farm and have no one to bother me. Right now the only luck I have is bad luck.

Propagation is an interesting subject, and there seems to be some constant paths from one's QTH to certain locations that don't occur near as nicely for adjacent locations. From my QTH, the S5 stations, as well as 9A and YU always come in louder than most other parts of central/eastern EU. Not sure why that is, but that is how it is. Italy also comes in pretty nicely most of the time.

Had a nice evening on 40 last night as well. Worked CX and YL within a couple of minutes of each other.

I think there are quite a few US stations running a "Texas Kilowatt" as well without Governmnet interference. When is the last time you heard of the FCC busting someone for running over the legal limit?

And the legal limit is 3KW in Somalia. That would make a T5 DXpedition almost worth it.

Al, I had a surprise last night.... I worked UA0AV on PSK-31 over the pole at 02:53 UTC!

Subject: RE: [DX-IS] Conditions are so bad.....

You know conditions are terrible when the only activity you can hear (from this QTH) on 30M is a huge pile-up on a CO. Earlier today I saw a spot for an ID9 so I went there and COULDN'T hear him. I can never not hear an Italian. :-)

That I can barely hear FL stations on 20m working the FLQP. Never thought I would see this day. I can hear some of the stations working them, though, including G4 and CU2.

I worked 13 EU stations on 30M this afternoon/early evening
between 20:12 and 22:15 UTC:

EY8AN, UV5ERY, DK3WM, EA7AJR, LZ50AA, YO50IE, S59AA, Z30U, HA8VK,
9A5V, OK1AN, OK1KW and EA1BRB.

None of them were needle pinners, but 2-3 of them were
S9+. Oddly I never heard a single Italian station on 10.1 MHz, and
that was the prime time of day for it. There seemed to be not a lot
of propagation to southern EU. This was not a normal day, I agree,
and Italian stations are usually plentiful and loud on 40/30/20.

I don't know that they all (or even a few) run 5 to 10 KW, but
they might. I don't think that is specific to any one country as we
all have our crop of "home brew enthusiasts" who like to see how many
3CX1500A7 tubes they can cram into a single box. (I've seen one in
the USA that had three in it.)

It is a boring time for DXers. I built a device for gettering
NOS 4CX800A tubes this week. I have a chimney made from a 2-litre
Coke bottle, and I'm blowing air into the bottom with a computer
power supply fan. You run 5 volts across the filament for 2-3 hours
(draws 1.6 amps) and then up it to 12 volts and let it cook with ~3.4
amps for 12-15 hours.

It's real fun to watch but gets tiring after the first 6-7
hours. I have four of them to do, and the second one is half
done. (You need the cooling chimney because even without the HV, it
still has to dissipate ~40 watts just from the heater.) It reminds
me of waiting for 6M to open. Lots of time to contemplate life!

Time to go watch the fan spin some more . . .

Yesterday (and Saturday) was the Florida QSO Party. I think my wife worked every one in Canada except you and Al! There were a lot of VE/VA/XM stations on the air over the weekend.

Dupe sheets, or the electronic equivalent, seem to have gone by the wayside! Couldn't believe how many stations called me more than once.

Oh, my goodness, Mike -- I didn't know :-).

Anything over my 600W and there'd be a lynching in my neighbourhood (maybe even in my house). Guess that's why I keep buying lottery tickets. It isn't to support the government and they folks who win (I never do) but because maybe one day my luck will change. If I win someday I'll move way out of town, put up an antenna farm and have no one to bother me. Right now the only luck I have is bad luck.

Al, the answer is simple. They don't have to put up with the neighborhood covenant BS that we do. Also, on several occasions I have been told that along with the big antennas, the big guns in Italy run between 5 & 10 KW

output, and the government ignores them.

This is the time when we sit in the shack looking through old "QST"s, dusting the equipment, arranging and re-arranging accessories, and listening for that alarm to go off for a new band/mode/ spot. I know that the New Country alarm will not go off until possibly October when Gloriso might appear. This is also a good time to do a little experimenting with antennas. That is, if the weather would cooperate!

I have had a few new ones on RTTY and 17 and 30 meters. That keeps the DX blood boiling. Like others have mentioned, I could barely hear Florida stations on 40 meters yesterday. Even stations 600 miles south of me were weak.

A question: Do any of you ever have your transceivers aligned after several years of use? I have had a FT-1000MP for 8 years and have never had any trouble with it. I read in the "NCJ" that many contesters periodically have their rigs aligned.

Hi Tom,

I assume by aligning you mean verifying the rig is on frequency.
and if not, adjusting it so that it is. Years ago I used to be
diligent with this, but around 1990 I got a TS940 and it never
drifted in 8-9 years! I used to zero beat WWV, etc all the time and
it never was off. (In the late 80s my rig did drift a bit and
required tweaking up now and then.)

I am always aware of this, but I don't think it is a factor
anymore. I only have anecdotal evidence. For example, if a spot
appears on the DX Cluster I QSY to that frequency and mode. If
someone spots a DX station on 14.0103 and I QSY to that frequency, 9
times out of 10 I'm zero beating the DX perfectly. This tells me
that my rig (and those of the spotters) are all on the same page. I
don't think it has been an issue in the past 15 years or so. If I
were consistently high or low compared to the DX Spots, I'd
investigate further.

This is a good point. Not everyone is using a new rig, and even
with new ones, I expect drift is possible. Used to be fun prior to
1991 working the old Soviet Union stations that had the buzz saw hum
and drifted all over the place during the QSO. I sure learned the

usefulness of RIT!

Anyhow, back to watching my cooling fan spin . . .

Good Morning Paul & All:

Your comments bring back fond memories. I will be doing that again. I was recently (re)smitten by the AM bug, and acquired a HQ-129X & a Johnson Ranger. Some old friends are hanging out on 3880, so I will sneak up on them. Many years ago I had a HQ-129X and Harvey Wells TBS-50D, and lost both in Hurricane Carla in Sept, 1961. AHHHH, those were the days, heterodynes and all. The Johnson ranger belongs to a friend who also has a DX-100. The ranger needs some work and was just gathering dust, so I got it on looooong term loan. I will repair it, use it, and then it goes back when I start pushing up daisies. If anyone has a 3880 Xtal, I would be glad to negotiate a deal with you.

Well I only have 2xFP on 40CW, 1xCY9 also 40CW and 1xCY0 on SSB 1984....

I won't go through all the Caribbean but to give you an idea, I still need ZF and SSB, VP2M on CW, FJ on SSB. KG4CN was a new one on SSB for me the other week.

Any DX from the Caribbean and South America is very much appreciated over this way,

Btw, every now and then the north pole has been opening up on 20m at around 1100 - 1200z, I worked VE1WT and K1DAT/1 (at 1150z) last night on CW, thought that was quite interesting, nothing else much coming in at that time...(except Asia of course).

From my little corner of the world, gentlemen, I can count seven different
calls from Brunei in my log. The first was in 1979 and the last was in 1994. I believe I can honestly say I have not heard hide nor hair of a V8
in 15 years.

But I have scads of FPs, CY9s and CY0s.

BTW, all of my QSOs with V8 were on 20M only.

Exactly right Lance. In 30+ years of hamming, I have a whopping total of three (3) calls in the log from Brunei! One on 20 CW, one on 40 CW and

the
one the other day on 20M SSB.

It's so frustrating sometimes to see posts of places like V8 and know
they're heard much better from the west coast - 3,000 miles away from
me!

And yes, with contest QSOs included, I have literally hundreds, perhaps
thousands, of contacts with stuff in the Caribbean that is difficult for
you. We are close enough to places like Jamaica, Cuba, Cayman Islands,
etc., that 10M/12M is difficult because the signal goes right over us.
Typically have to work them on back-scatter modes when that kind of prop
is
available.

Now that Marsha is retired, we spend a lot of time in the shack on a
daily
basis. Standing in the "blind" with gun ready can sometimes be very
rewarding when chasing DX. The prop that isn't supposed to be there
sometimes is!

Did you "sound it out" to see what it said?
Yesterday was the birthday of Samuel F. B. Morse!

Technically speaking, Vail invented the code, but Morse was the first one to file the patent!

I saw the other day that a JA was operating as A52DT *and* he has permission for high power. I see also he was on 40 and 80 this morning, but too late for prop to my part of the world.

I got lucky last year with a couple of A5 stns on SSB, but I still need that one on CW.

9689. Rationale for spotting

Yahoo group: DX-IS (2009)
Date: 2009-04-28 14:24:16 UTC
From: Paul M Dunphy
Topic: 9689 Message: 9689

There are a lot of opinions on spotting DX, and I tend to spot "easy" stuff like DLs and UAs on 17/20/30 metres probably more than most. My rationale is twofold:

(1) It tells others the band is open and to where

(2) More importantly it tells the hordes that the frequency is NOT mine (I don't spot my log -- sit on a frequency and work 20 stations, spotting them even though others can't work them.) This is my main reason. I hear UA6xxx calling CQ, so I answer him and we have a QSO. As soon as I send UA6xxx DE VE1DX BK there are usually 4-5 other stations calling me before he gets a chance to finish his side of the conversation. No matter how many times I send AS, QSY or QRX, I get bombarded by others calling on top of my QSO partner. I find spotting the other station *near the end* of the QSO reduces the QRM dramatically. I won't "steal" anyone's frequency by work those calling, and surprisingly it seems those who call can read the cluster better than they can copy AS or QRX!

That's my story and I'm sticking to it!

Hi Paul,

Where are these stations who are calling you? I'd tend to want to work the UA6 first, not that I wouldn't like to work you, but the UA6 is the farther away DX to me.

Usually it is DLs and IKs who call. We don't have great propagation to anywhere, but on 20M we *usually* have most of EU between 1300-1600 UTC. I'm not rare by any measure, but I guess they look at it the same as I do. If I hear an EU station calling CQ I work him because conditions are so dismal right now anything outside of your own continent is rare DX.

I guess what is going on is that a EU station will hear me sign with another EU (and not be copying the other guy because they are too close) and figure they should call me. It's OK, except I rarely call CQ and hence the frequency is almost always occupied by the other guy, not me. I just worked DJ3AS on 14.010 and he was S6. Those guys are starting to fade now, but you might get a shot at them in an hour or two.

Pretty bad when we are plotting propagation to work western Europe on 20M from central/east coast NA!

A and S run together and it means stand by or wait. Same as
QRX, I suppose, but faster to send. Used a lot.

What I consider real DX from this QTH, Lance, is all of the Pacific, all of eastern Asia from Turkey to the Pacific, and Australia/New Zealand (which are, of course, Pacific area). So you see, my friend, where you have many, many QSOs with those areas (natch), I don't. But there's nothing to working the Caribbean from here. So, to quote the old saying, "one man's "garbage" is another man's "gold."

Sadly, I am not able to take advantage of those (morning for me) openings you mention. Only on rare occasions do I hear LP openings on 20 & 40 to your area. But, as you know, I have heard you on 40, even if you didn't hear me calling :-(.

Subject: RE: [DX-IS] Re: XO0ICE/2 WPX

Well I only have 2xFP on 40CW, 1xCY9 also 40CW and 1xCY0 on SSB 1984....

I won't go through all the Caribbean but to give you an idea, I still need ZF and SSB, VP2M on CW, FJ on SSB. KG4CN was a new one on SSB for me the other week.

Any DX from the Caribbean and South America is very much appreciated over this way,

Btw, every now and then the north pole has been opening up on 20m at around 1100 - 1200z, I worked VE1WT and K1DAT/1 (at 1150z) last night on CW, thought that was quite interesting, nothing else much coming in at that time...(except Asia of course).

Exactly right Lance. In 30+ years of hamming, I have a whopping total of three (3) calls in the log from Brunei! One on 20 CW, one on 40 CW and the one the other day on 20M SSB.

It's so frustrating sometimes to see posts of places like V8 and know they're heard much better from the west coast - 3,000 miles away from me!

And yes, with contest QSOs included, I have literally hundreds, perhaps thousands, of contacts with stuff in the Caribbean that is difficult for you. We are close enough to places like Jamaica, Cuba, Cayman Islands, etc., that 10M/12M is difficult because the signal goes right over us. Typically have to work them on back-scatter modes when that kind of prop is available.

Now that Marsha is retired, we spend a lot of time in the shack on a daily basis. Standing in the "blind" with gun ready can sometimes be very rewarding when chasing DX. The prop that isn't supposed to be there sometimes is!

QSO Data Lost (04-22-2009 from AA7JV)

Apr 22, 1900 UTC, Miami Beach.
We both made it home, safe and sound (but dog tired).

Unfortunately our support team's efforts to recover the WriteLog QSO data have not produced results yet. We are now seeking help from WriteLog. In the meantime, please do not send any QSL-s or OQRS requests for any QSO that took place between 4/9 2020 UTC and 4/10 0923 UTC. We apologize, understanding how this may disappoint those who have made the QSO-s, but as long as we can not recover the data, we will not able to QSL these QSOs.

As a "prosign" the A and R are "run together," i.e., sent with no space in between, and means your are through.

I don't know how to duplicate it here, but when you see a prosign written out, it will be the appropriate letters with a line drawn over the top of them, to indicate they are sent with no spacing in between the letters.

SK = transmission all over, nothing else coming
AR = I'm through sending but I'm still here
AS = please wait - stand by

There are others, but those are the ones I hear far more often than any other.

As an interesting note, SOS is also sent as a prosign -
di-di-di-dah-dah-dah-di-di-dit - not individual letters.

Of course, in this day and age where the "radioman" on a modern ship operates far differently than they did a generation ago, there probably isn't anything to generate Morse code anyway! The radioperson would probably grab a microphone and start calling "Mayday!" (from the French m'aider - help me).

Another one I used a lot many years ago (I don't use it so much anymore) is dididdahdit (SN sent as a prosign) which means "I copy" or "I understand." Sometimes also can send "N SN" which means "no copy" or "don't understand."

Art is pretty much bang on with the three that are in common use
today, although I hear a lot of stations send SK and then your call
and their call and a couple of 73s, so if there is nothing more
coming I believe SK should be the last thing sent. That's the way I
do it anyhow. We are amateurs and not professional telegraphers so I
guess the "when in Rome . . . " philosophy applies.

Regarding SN (although not run together as a prosign), I notice in the last year or two HPE C U AGN seems to be being replaced with HPE C U SN (presumably SN being the abbreviation for soon.) I will plead guilty to that now and then, again using the "when in Rome . . . " defense. Had not heard the SN as a prosign, Zack, and it makes a lot of sense. It's a lot quicker and easier to send N SN than trying to send QSB QSB QRM NW 22N PSE AGN or whatever to indicate you are losing the guy.

For the most part, I send VE1DX (as few times as possible) and then R 5NN TU because we are DXers, not rag chewers. However, in the lack of any DX, it's pretty hard to just 5NN as western EU station and move on when he wants to exchange basic information.

From: Lance Martin
Topic: 9597 Message: 9702

Well, Al, let's hope those Sunspots start appearing soon and we can have a QSO.

Still getting hammered by my neighbours plasma TV over here, make working anything difficult on 40m at around our Sunset these days.

I have heard the odd VE in the mornings here around 2200 - 2300z through this coming season (our winter, your summer), so that maybe a better time for you. These days I tend to be on around 2230 - 2300z weekdays before going to work, usually sniffing around for DX, occasionally I put out a CQ...

What I consider real DX from this QTH, Lance, is all of the Pacific, all of eastern Asia from Turkey to the Pacific, and Australia/New Zealand (which are, of course, Pacific area). So you see, my friend, where you have many, many QSOs with those areas (natch), I don't. But there's nothing to working the Caribbean from here. So, to quote the old saying, "one man's "garbage" is another man's "gold."

Sadly, I am not able to take advantage of those (morning for me) openings you mention. Only on rare occasions do I hear LP openings on 20 & 40 to your area. But, as you know, I have heard you on 40, even if you didn't hear me calling :-(.

Subject: RE: [DX-IS] Re: XO0ICE/2 WPX

Well I only have 2xFP on 40CW, 1xCY9 also 40CW and 1xCY0 on SSB 1984....

I won't go through all the Caribbean but to give you an idea, I still need ZF and SSB, VP2M on CW, FJ on SSB. KG4CN was a new one on SSB for

me the other week.

Any DX from the Caribbean and South America is very much appreciated over this way,

Btw, every now and then the north pole has been opening up on 20m at around 1100 - 1200z, I worked VE1WT and K1DAT/1 (at 1150z) last night on CW, thought that was quite interesting, nothing else much coming in at that time...(except Asia of course).

From my little corner of the world, gentlemen, I can count seven different
calls from Brunei in my log. The first was in 1979 and the last was in 1994. I believe I can honestly say I have not heard hide nor hair of a V8
in 15 years.

But I have scads of FPs, CY9s and CY0s.

BTW, all of my QSOs with V8 were on 20M only.

Subject: [DX-IS] Re: XO0ICE/2 WPX

Exactly right Lance. In 30+ years of hamming, I have a whopping total of three (3) calls in the log from Brunei! One on 20 CW, one on 40 CW and the
one the other day on 20M SSB.

It's so frustrating sometimes to see posts of places like V8 and know they're heard much better from the west coast - 3,000 miles away from me!

And yes, with contest QSOs included, I have literally hundreds, perhaps thousands, of contacts with stuff in the Caribbean that is difficult for

you. We are close enough to places like Jamaica, Cuba, Cayman Islands,
etc., that 10M/12M is difficult because the signal goes right over us.
Typically have to work them on back-scatter modes when that kind of prop
is
available.

Now that Marsha is retired, we spend a lot of time in the shack on a
daily
basis. Standing in the "blind" with gun ready can sometimes be very
rewarding when chasing DX. The prop that isn't supposed to be there
sometimes is!

9703. RE: [DX-IS] Rationale for spotting

Yahoo group: DX-IS (2009)
Date: 2009-04-30 03:08:11 UTC
From: Lance Martin
Topic: 9689 Message: 9703

My rationale is very similar to Pauls.

I like to spot something, so that others (and I am talking about VKs and VK6 in particular) know that the band is open and the station is workable or audible... Just yesterday I spotted PY2XB on 10105. I was not able to work him but soon after spotting VK6APK promptly appeared and got through straight away...(I will have to send some cotton wool buds to Fred, to get him to clean his ears out, hi hi!), so at least one VK got through...

I probably over use the cluster and have been known to try and get the attention of the DX! ...well why not, many of them don't beam this way and quite a few don't even know where VK6 is! (I know this sounds strange but not all DXers take a great circle map with them on DXpeditions).

If we get a good opening into EU (which seems quite rare these days) and I call one, quite often I wind up in the same spot as Paul, so I can understand the spotting of non-rare stations in this instance.

Thus endth my story...

73, Lance - VK6DU

From: DX-IS@yahoogroups.com [mailto:DX-IS@yahoogroups.com] On Behalf Of Paul M Dunphy
Sent: Tuesday, 28 April 2009 10:24 PM
To: DX IS!
Subject: [DX-IS] Rationale for spotting

There are a lot of opinions on spotting DX, and I tend to spot "easy" stuff like DLs and UAs on 17/20/30 metres probably more than most. My rationale is twofold:

(1) It tells others the band is open and to where

(2) More importantly it tells the hordes that the frequency is NOT mine (I don't spot my log -- sit on a frequency and work 20 stations, spotting them even though others can't work them.) This is my main reason. I hear UA6xxx calling CQ, so I answer him and we have a QSO. As soon as I send UA6xxx DE VE1DX BK there are usually 4-5 other stations calling me before he gets a chance to finish his side of the conversation. No matter how many times I send AS, QSY or QRX, I get bombarded by others calling on top of my QSO partner. I find spotting the other station *near the end* of the QSO reduces the QRM dramatically. I won't "steal" anyone's frequency by work those calling, and surprisingly it seems those who call can read the

cluster better than they can copy AS or QRX!

That's my story and I'm sticking to it!

Newington CT April 30, 2009
To all radio amateurs

SB DX ARL ARLD017
ARLD017 DX news

This week's bulletin was made possible with information provided by NC1L, PS7AB, QRZ DX, the OPDX Bulletin, DXNL, 425 DX News, The Daily DX, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

FIJI, 3D2. Jan, OK2ZAW is QRV as 3D2ZW/p until May 8 from Viti Levu, IOTA OC-016, the Mamanuca Group, IOTA OC-121, the Yasawa Group, IOTA OC-156, and Viti Levu, IOTA OC-016. Activity is on the HF bands. QSL to home call.

WEST MALAYSIA, 9M2. Richard, PA0RRS has moved here permanently and is QRV as 9M2MRS from Penang Island, IOTA AS-015. Activity is generally using CW with SSB on request. QSL via operator's instructions.

MOROCCO, CN. Abder, CN8VO is QRV using special event call 5F1ROM until May 10 to commemorate the ''FIA Touring Car Grand Prix'' which takes place in Marrakesh from May 1 to 3. QSL via EA7FTR.

ETHIOPIA, ET. Peter is QRV as ET3BN is QRV from Addis Ababa and is here for a few years. Activity is generally on 80 to 10 meters using CW and SSB. QSL direct.

ENGLAND, G. In celebration of the centenary year of the UK Royal Naval ARS, special event station GB100FAA is QRV until May 15 and then from May 19 to 21. Activity is on 80 to 10 meters using CW and SSB. QSL via bureau.

SCOTLAND, GM. A group of operators will be QRV as MS0TJT/p from Coll Island, Inner Hebrides, IOTA EU-008, from May 3 to 8. Activity will be on 80 to 6 meters using mostly SSB with some CW and PSK. QSL via GM4ZNC.

ITALY, I. To commemorate the 150th anniversary of the Battle of Solferino, a battle that lead to the establishment of the International Red Cross, a group of operators will be QRV using special event station II4CRI from May 2 to 8. QSL via IZ1JKW.

SARDINIA, IS0. Operators DH7FB and DF2ZC are QRV as IS0/homecalls until May 5. They are active using 2 Meters EME, transmitting on 144.124 MHz and listening on 144.082 MHz. QSL via operators' instructions.

OGASAWARA, JD1. Koji, JI1LET is QRV as JI1LET/JD1 from Chichijima Island, IOTA AS-031, until May 5. Activity is on 40 to 6 meters using CW, SSB and RTTY. QSL to home call.

BULGARIA, LZ. In commemoration of the inventors of the Cyrillic Alphabet, St. Kiril and Methodius, members of the Bulgarian Federation of Radio Amateurs are QRV as LZ2009KM during the month of May. QSL via LZ1PJ.

BELGIUM, ON. Special event station ON769MS will be QRV on May 2 and 3. QSL via ON6MS.

DENMARK, OZ. Paolo, I2AE is QRV as OZ/I2AE/p from various Danish islands and from at least 19 Lighthouses on these islands. Activity is on 40 and 20 meters using SSB. QSL to home call.

BRAZIL, PY. Members of the Rio DX Group are QRV as PT1R from Rasa Island, IOTA SA-079, until May 4. They are active on 160 to 10 meters using CW, SSB and various digital modes, with two stations. QSL via PY1NB.

SAN MARINO, T7. A group of operators are QRV as T70A until May 3. Activity is on 160 to 10 meters using CW, SSB and RTTY. This includes an entry in the ARI International contest. QSL via bureau.

TURKEY. TA. Berkin, TA3J is QRV as TA3J/7 from Erzincan City until May 3. Activity is on all band using CW, SSB and various digital modes. QSL via TA3YJ.

UKRAINE, UR. A group of operators are QRV as EO64JM in commemoration of the 64th anniversary of victory of the Great Patriotic War. QSL via K2PF.

INDONESIA, YB. Hotang, YC0IEM is QRV from Borneo Island, IOTA OC-088, until May 15. QSL via IZ8CCW.

ASCENSION ISLAND, ZD8. Karol, G0UNU will be QRV as ZD8KR from May 4 to 11. He will be active mainly on 20 meters using CW and SSB. QSL to home call.

OPERATIONS APPROVED FOR DXCC CREDIT. The following operations are approved for DXCC credit: Western Sahara, S04R, 2009 operation; North Cook Island, E51QQQ, 2009 operation.

THIS WEEKEND ON THE RADIO. The New England QSO Party, 10-10 International Spring CW Contest, 10-10 International Spring Digital Contest, ARI International DX Contest, NCCC Sprint CW Ladder, AGCW QRP/QRP CW Party, MARAC QSO Party, Microwave Spring Sprint, 7th Call Area QSO Party, Portuguese Navy Day Contest, Indiana QSO Party and the AGCW DL QRP Party will certainly keep contesters busy this upcoming weekend. The RSGB 80-Meter Club SSB Championship is scheduled for May 4. The ARS Spartan CW Sprint is scheduled for May 5. Please see May QST, page 80, and the ARRL and WA7BNM contest web sites for details.

Topic: 9706 Message: 9707

It should cause as much QRM as a toaster.

Subject: [DX-IS] Electric Heating RFI

Has or is anyone using an electric underfloor heating system in their home? We are putting an addition on our home and I was wondering about putting one of those under floor electric radiant heat systems under the ceramic in the bathroom. It won't be used all the time, just something to warm the floor as we have a forced air furnace as well. To stay on topic, will this cause so much QRM that I won't be able to tell if the sunspots come back at all?

Why not put hot water pipes underneith the floor, and use pumps to
move the water. Further more, why not use solor water heater up on
the roof, save you a lot of money! :-)

After the past couple of years, I think it was more appropriate to say "IF" instead of "WHEN", unfortunately.

Well I considered that but not until the slab was already poured and we are laying the ceramic right over the concrete, hence the electric mat. I may put a small HW heater in the garage and run Pex tubing under the 5 foot wide concrete apron and front walk to keep from having to put slat down on the new concrete.

It *really* isn't looking great. The current "sunspot" is about to rotate out of sight and its position and magnetic polarity indicate it is a Cycle 23 straggler, not a Cycle 24 spot. It did nothing to bump up the flux. There have been a few speckles with Cycle 24 characteristics, but for the most part it things have stalled, and all we are seeing are the remnants of Cycle 23 winding down.

There still is DX, but it isn't the rare stuff we were expecting by now. We are in uncharted waters, at least in recorded history. Perhaps there are indeed prolonged periods where the flux sits at 68-70.

I think the measure of how much we like Ham radio and DXing will be tested over the next couple of years. We are likely to lose a lot of HF types who will get tired of the low bands and a bit of Es on 6M. So far I'm happy to work EU and the occasional Asian station on the polar path, and I think I could put up with this for a few more years. The only other options are to get interested in the weak signal digital modes, EME or the VHF/UHF aspect, where a 100 mile 339 exchange brings as much excitement as a 599 from the other side of the world on 28 MHz!

Anyhow, back to 20M . . . managed to work DU1/OE3SGU on 14 MHz earlier and that still was a rush. Even at the best of times the Philippines from VE1 is not easy.

73, Paul VE1DX

Pumps are driven by electric motors, which can generate RFI. An electrical heating element has no RFI generating component (well at least in our radio bands). For a specialized "spot use" situation like you describe, I would not expect any problem with your plan.

From: WB6PSY
Topic: 9706 Message: 9714

Have you checked into Pex tubing and is it 'time' proven?
Rene
----- Original Message -----

Subject: Re: [DX-IS] Electric Heating RFI

Well I considered that but not until the slab was already poured and we are laying the ceramic right over the concrete, hence the electric mat. I may put a small HW heater in the garage and run Pex tubing under the 5 foot wide concrete apron and front walk to keep from having to put slat down on the new concrete.

Phil

Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

3D2 - JA1NLX will be active as 3D2YA from Mana Island (OC-121), Fiji from 29 June to 3 July. He will operate CW and RTTY on 80-10 metres. QSL via home call, direct or bureau. He will upload the log to LoTW. [TNX NG3K]
5H - Hermann, DL2NUD (5H1HP)and Joachim, DL9MS (5H1MS) will be active from Zanzibar Island (AF-032) from 16 May to 2 June. They will operate on 2m EME/MS, with activity also on the HF bands and 6 metres. QSL via home calls. [TNX DL9MS and DL8EBW]
9A - Neno, 9A5AN and Tom, 9A2AA will be active from Drvenik, Oblik, Zlarin and a few other islands in the EU-170 IOTA group between 1 and 5 May. [TNX 9A2AA]
A6 - Philippe, F5LTB reports that at the end of the day the callsign issued to him is A65BI (not A65BK as expected, 425DXN 938). He will be in France on 6-20 May, and hopes to be QRV from the UAE by the end of the month. QSL via SM5DJZ. [TNX F5NQL]
BV - Rene, DL2JRM will be active as BW9/DL2JRM from Kinmen Island (AS-102) until 3 May. He operates CW on 80-10 metres. QSL via DL2JRM. [TNX The Daily DX]
BY - David, BA3CE and several other operators will be active as BY3CN/4 from Heng Tian Island (claimed to count for AS-150) on 1-3 May. Expect activity on 80, 40, 20, 17, 15 and 10 metres SSB, CW and RTTY. [TNX BA3CE]
BY - Terry, BA7NQ will be vacationing with his family on Hainan Island (AS-094) on 24-26 May. Depending on local conditions, he plans to operate holiday style mainly on 20, 30 and 40 metres CW around 4, 10, 16 and 23 UTC (i.e. when his daughter sleeps!). [TNX BA7NQ]
DL - DL2SWW, DF9TM and DL2VFR will be active as DF0WFF from the Nature Reserve of Flusslandschaft Elbe during the "Green Days" weekend (13-14 June). QSL via DL2VFR, direct or bureau. Information about the German World Flora & Fauna Award (WFF) activities can be found at www.wff44.de [TNX DL2VFR]
ES - Uwe, DL3BQA will be active as ES8/DL3BQA from Kihnu Island (EU-178) on 15-22 June. He will operate holiday style on 80-6

metres, mainly SSB with possibly some RTTY. QSL via home call,
direct or bureau. [TNX DL3BQA]
F - Look for a group of French operators to be active as TM5EL from
Penfret Island (EU-094) on 8-10 May. They will be operate SSB, CW
and digital modes with four stations (three for the HF bands and
one for VHF, UHF and SHF). QSL via F6KHI, direct ot bureau.
Further information an on-line logs can be found at
http://ed28.ref-union.org/
F - Celebrating the 60th anniversary of the Council of Europe, the
local amateur radio club (http://ewwa.free.fr) will operate SSB,
CW, RTTY and PSK as TP60CE on 8-10 May. QSL via F5LGF. [TNX F6FQK]
F - Eight operators from the Charente DX Group (namely F1BLQ, F4EEK,
F5EOT, F5LOW, F5MNK, F5NBQ, F6HKA and ON4ZD) will be active as
TM0M from Molene Island (EU-065, DIFM AT-002) on 23-30 May. They
plan to operate SSB, CW, RTTY and PSK on 80-10 metres, and maybe
on 6m as well. QSL via F6ANA. [TNX F5NBQ]
HL - 6K5AQY, 6K5AYC, 6K5BHZ, DS4NMJ, HL2FDW and HL5BMX will be active
as 6M0W/5 from Jo Island (AS-081) on 1-3 May. They will operate
SSB, CW and RTTY on 80-10 metres. QSL via HL5BMX, direct or
bureau. [TNX www.rsgbiota.org]
GM - 2E0JOX, 2E0TJX, G3VCQ, M0GAV, and M3VCQ will be active from the
Isle of Arran (EU-123) on 23-27 July. They will participate in the
IOTA Contest as MM3M (QSL via G3VCQ), outside the IOTA event they
might be signing GS3RCM/p. [TNX www.rsgbiota.org]
GW - The Barry Amateur Radio Society will be active as GB100BP from
Sully, Wales on 4-31 May. The special callsign celebrates 100
years of British Petroleum. QSL via GW0ANA. [TNX GW0ANA]
I - Celebrating the 100th anniversary of the Nobel Prize in physiscs
awarded to Guglielmo Marconi, Frank, IZ7AUH will be active as
IY7GM through the end of the year. QSL via IZ7AUH, direct or
bureau (see qrz.com under IY7GM for QSLling instructions). The log
will be uploaded to LoTW and eQSL. [TNX IZ7AUH]
I - A special activity by ARI Portici (Naples), IQ8PC, will take pace
until 2 May for the 9th World Ranking Master Bowling Championship.
QSL via IK8JVG. A cancellation for philatelists is available for
contacts made on 1 and 2 May. [TNX IK8VRH]
I - The fifth edition of the Mediterraneo DX Club's Members Trophy will
take place on 16-17 May. The MDXC HQ station IQ8MD plus several
special event stations are expected to participate in the event:
4X0MDC, HG09MDC, II0MDC, II2MDC, II8MDC, II9MDC, IO0MDC, IO1MDC,
IO5MDC, IO9MDC, IQ8MD, IR0MDC, IR2MDC, IR5MDC, IR8MDC, IR9MDC,
IU0MDC, IU1MDC, IU5MDC, IU8MDC, IU9MDC, LQ5D, PD05MDC, SX1MDC,
TM5MDC. All of the QSOs made with these stations will be confirmed
automatically via the bureau. Direct requests should be sent to
the Members Trophy Manager, Giuliano Mondini (IK2VUC). Information
on the event and the relevant award can be found at
http://www.mdxc.org/memberstrophy.asp
JA - Look for JA1YVT/4, JL1OVB/4 and 7L3ATQ/4 to be active from Oki
Island (AS-041), Shimane prefecture until 4 May. QSL via home
calls, direct or bureau. [TNX JI6KVR]

JA - Look for Take, JS6RRR to be active on all bands and modes as
JS6RRR, JS6RRR/JS6 and JI3DST/JS6 from the Miyako Islands (AS-079)
until 11 May. His main QTH will be on Miyako-jima, (JIIA
AS-079-005), but he also plans to go and operate from Ikema-jima
(AS-079-001) and Kurima-jima (AS-079-003). QSL via bureau only.
[TNX JS6RRR]
KH2 - Lee, HL1IWD and Harry, WX8C will operate CW, SSB, RTTY and PSK31
as AH2Y and KH2/WX8C from Guam from 29 May to 2 June. They will
participate in the CQ WW WPX CW Contest as AH2Y (QSL via HL1IWD;
all of the QSOs will be confirmed automatically via the bureau).
KP2 - Look for K3VX/KP2, W3WH/KP2, W3WN/KP2, W9UK/KP2 and K9CS/KP2 to be
active from the US Virgin Islands (NA-106) from 28 May to 2 June,
including an entry in the CQ WW PWX CW Contest as NP2SH. QSL
W3WN/KP2 via W3WN, all others via K9CS. [TNX K9CS]
LZ - Special station LZ2009KM will be active on all bands and modes on
1-31 May to celebrate St. Kiril and Methodius' Day. QSL via LZ1PJ,
bureau preferred. Logs will be uploaded to LoTW. Further
information at http://www.qrz.com/db/LZ2009KM [TNX LZ1BJ]
OH - Special callsign OH5POPOV will be aired on 24 May to commemorate
Russian physicist and radio pioneer Aleksandr S. Popov. QSL via
OH5VX. [TNX OH2KI]
OZ - DF9TM, DL2SWW and DL2VFR will operate CW and SSB as OZ0FR from
Romo Island (EU-125) on 23-26 July, IOTA Contest included. QSL via
DL2VFR, direct or bureau. Further information will be available at
www.iota-expedition.de [TNX DL2VFR]
P2 - The dates and callsigns for the IOTA DXpedition to Papua New
Guinea [425DXN 934] will be as follows:
22-26 October P29VCX Tanga Islands (OC-102) QSL via SM6CVX
27-31 October P29VLR Green Islands (OC-231) QSL via SM6CVX
2-9 November P29NI Woodlark group (OC-205) QSL via G3KHZ
Expect activity on 160-10 metres CW, SSB and RTTY. The operators
will be Luis/CT1AGF, Derek/G3KHZ, Gordon/G3USR, David/M0VTG and
Hans/SM6CVX. Webpage at www.425dxn.org/dxped/p29_2009/index.html
P2 - While the main team will leave for home after operating from
OC-205, Hans (SM6CVX) plans to continue the trip. He would like to
go and operate as P29VCX from the D'Entrecasteaux Islands (OC-116)
on 11-13 November. QSL via home call.
PA - VERON Section 54 (PI4ETL) will operate special callsign PH100EL
from 18 June to 12 July to celebrate the 100th anniversary of the
first flight of aviation pioneer Charles count de Lambert, who on
27 June 1909 at Etten-Leur opened the aviation era in the
Netehrlands. QSL via PD0PVQ. Information on the relevant award can
be found at http://www.qrz.com/db/PH100EL [TNX PA1BR]
PY - Seven operators from the Associacao Paulista de Radioamadores
(namely PY2IAB, PY2OMT, PY2TLB, PY3NZ, PU2OVA, PU2TEA and PU2TJQ)
will be active as PT2T from Ilha da Moela (SA-071) on 11-14 June.
They plan to be QRV on 80, 40, 20, 15, 12 and 10 metres SSB with
two stations, with a third station active on 6 and 2 metres. QSL
via PY2OP, direct or bureau. The web page for the operation
is at http://www.apre.com.br/moela [TNX PU2TJQ]

SV5 - Ralph, DL9MWG will be active holiday style from Rhodes (EU-001) on 3-17 May. He will operate mainly CW on the HF bands. QSl via home call, direct or bureau. [TNX DXNL]
T7 - I4UFH, I4YSS, IK2NCJ, IK4UPB, IW2MJQ, IZ4DPV and IZ4EFN will operate from T70A, the club station of the Republic of San Marino's IARU Society, on 1-3 May. This will include an entry in the ARI International DX Contest. Look for them on 10, 15, 20, 40, 80 and 160 metres SSB, CW and RTTY. QSL via qrz.com
UA - A number of UE80 callsigns will be aired from Omsk until 31 May to celebrate the 80th anniversary of the local airport: UE80MB (UA9MBQ), UE80MC (UA9MC), UE80MD (UA9MD), UE80ME (RW9MC), UE80MK (RA9MKL), UE80MO (UA9MAX), UE80MP (RU9MP), UE80MT (RA9MC) and UE80NS (UA9NS). QSL via home calls. Information on the relevant award can be found at http://www.dxawards.com/inet2009.htm#OMSK [TNX RA9MC]
W - Bill, WD2E and Sofia, AI4KQ will be active as WD2E/4 from the Dry Tortugas Islands (NA-079) on 8-14 May. QSL via WD2E, direct or bureau. [TNX www.rsgbiota.org]
YS - Nigel/G3TXF, Bob/MD0CCE and Michael/G7VJR will be active on all bands, 160m included, as YS1G from El Salvador on 16-23 May. They will be joined by Mario, YS1MAE who will do some SSB, while all other activity will be CW. QSL via G3TXF. The log will be uploaded to LoTW. [TNX G7VJR]
ZD8 - Karol, G0UNU will be active in his spare time as ZD8KR from Ascension Island (AF-003) on 4-11 May. He plans to operate CW and SSB mainly on 20 metres (14010 and 14150 kHz), with possible activities on 30 and 40 metres. QSL via G0UNU, direct or bureau.

==========
*** 4 2 5 D X N E W S ***
**** GOOD TO KNOW ... ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

8P6DR ---> Richard, G3RWL made about 3,000 QSOs during his 2-23 April activity from Barbados. He says he had a computer failure "and the last 800 QSOs were made with hand-keying and a paper log". All but about 10 CW QSOs from the computer are OK on his backup, but all his RTTY QSOs are still on the computer with no backup. QSL requests will not be confirmed until after Richard has investigated (and hopefully fixed) the problem. [TNX G3RWL]

A DIFFERENT KIND OF AMATEUR RADIO COMPETITION ---> Nineteen-year old Mark Dumpleton, 2E0NCG is the winner of the Radio Arcala Essay Contest [425DXN 929]. You can read Mark's piece and his interview at http://www.radioarcala.com (click on the "Young People Terms" button).

ANARTS RTTY CONTEST ---> The last running of the ANARTS WW RTTY Contest will be held on 13-14 June (rules at http://www.anarts.com.au/rules2009.htm) and for this year only the contest will be managed by John Barber, GW4SKA, the BARTG Contest Manager. From 2010 the BARTG HF RTTY Contest will be

moved from March to the second weekend in June. [TNX F5NQL]

ANTARCTICA ---> Bob, K4MZU, Antarctic chaser and QSL manager for several US Antarctic stations, has set up an interesting website (www.k4mzu.net) featuring QSL galleries and an Antarctic Hams & Bases album. The site is in the beginning stages, and an Antarctic DX Chasers page is under construction. Anyone having photos of US amateur radio operators in Antarctica is encouraged to send them to Bob (oldbibles@...). [TNX K4MZU]

DXCC NEWS ---> The following operations are approved for DXCC credit:
S04R Western Sahara 2009 Operation
E51QQQ North Cook Islands 2009 Operations
If you have had any QSLs rejected in a recent DXCC submission, please send an e-mail to dxcc@... to be placed on the list for an update. [TNX NC1L]

L33M ---> This is Dan's, LU3MAM recently issued contest callsign. QSL via LU1MA (Radio Club Cuyo, P.O. Box 232, 5500 Mendoza, Argentina). [TNX LU3MAM]

MM0RAI/P ---> The Belgian IOTA DXpedition to Rockall (EU-189, www.rockall.be) [425DXN 935] has been cancelled. The team departed Stornoway on 27 April with flat seas, but two days later, when they reached the island, the waves were too high for them to attempt a landing. "The weather is worsening by the hour and the weather forecast for the coming days does not give any hope", Theo (ON4ATW) said.

PIRATE ---> Pasquale, IW0HEX is receiving cards for contacts made with 5Z4/IW0HEX (30m CW) in August 2008. Please note that his callsign was pirated, as he never operated from Kenya. [TNX IW0HEX]

TI7KK ---> On-line logs and two photo galleries for the recent TI7KK IOTA activity from Isla San Jose, Murcielago Islands (NA-191) are now available on the expedition's website (http://www.ti7.info/). The team made 7757 QSOs (4990 CW, 2483 SSB, 284 RTTY) between 17 and 21 April. QSL via DK6AO, direct or bureau.

UN2C ---> One of our readers is looking for a reliable QSL route for UN2C: I "have sent two times to Box 121 (all DX lists)", he says, "but both returned as undeliverable". Is there anybody who can help?

TOP LISTS ---> The latest Topband, Topmode and Toplist listings are now available at http://www.425dxn.org/awards/toplist/index.html. Please note that QSOs confirmed through LoTW or included in on-line logs are eligible for listing. Send send your scores, as well as any request for further information, to Erminio Pandocchi, I2EOW (i2eow@...)

V63TO ---> A few images of V63TO from Kapingamarangi Atoll (OC-167) can be found at http://dx-hamspirit.com/. Mike (KM9D) and Jan (KF4TUG) were active from there on 5-15 March, with additional QSOs made on 4 April using a QRP transmitter and a newly constructed antenna for 17 metres. They are currently in Honiara (OC-047), Solomon Islands, where they hold the

callsigns H44MY and H44TO.

WPX-CT AWARD ---> It is available to either licenced amateurs and SWLs for
contacts made with different callsign prefixes allocated to Portugal,
including Madeira and the Azores. Complete information can be found at
http://www.geocities.com/ct1bww [TNX CT1BWW]

Propagation Forecast Bulletin 18 ARLP018
>From Tad Cook, K7RA
Seattle, WA May 1, 2009
To all radio amateurs

SB PROP ARL ARLP018
ARLP018 Propagation de K7RA

The data at the end of last week's Propagation Forecast Bulletin ARLP017 reported daily sunspot numbers from April 16-22 were six zeros, then 11, when in fact they were zero on every day until April 21, when it was 11, then zero again the next day, April 22. Just as many zero sunspot days -- and only one day with a sunspot -- but on Tuesday, April 21, and not April 22.

We had two additional days with a sunspot this week, Wednesday and Thursday, April 29-30. The sunspot number was 15 and 12 on those days. But this was another old Cycle 23 sunspot, and it appeared near the western limb, and may have either faded away completely or rotated out of view today, May 1. The data at the bottom of our bulletin shows seven days, Thursday through Wednesday for the reporting week, so the sunspot number of 12 for Thursday will appear in next week's data.

Now that we have all the data for the month of April, it is time to present our running 3-month average of daily sunspot numbers, centered on March.

The last time we presented this was four weeks back, in Propagation Forecast Bulletin ARLP014 on April 3. We were hoping last Fall that the sunspot minimum was centered around August 2008, when we showed the three month average centered on that month with data from July through September at 1.1. The following two averages for September and October were 2.5 and 4.5, but then it began another decline, to 4.4, 3.7, 2.3 and 2.1 for November 2008 through February 2009.

The average daily sunspot number centered on March was just 1.5, so the decline continues. Why so low? From February 1 through April 30 we had very few days with sunspots, in fact only eleven. There was never more than one sunspot visible on each of those eleven days, and the highest sunspot number (an index which does not equal the number of sunspots) was just 15, and that was this last

Wednesday. That is not a high sunspot number, but we haven't had one that high since November 13, 2008 when the sunspot number was 16.

The only days with visible sunspots over the past three months were February 11-14 and 24-26, March 6-7, and April 21 and 29-30. That's it. And if you add all those sunspot numbers together on those dates, you get a sum of only 133. Divide 133 by the 89 days over those three months, and you get an approximation of 1.49438, or 1.5 to round it up.

Here are the latest 3-month averages of daily sunspot numbers:

Jan 07 22.7
Feb 07 18.5
Mar 07 11.2
Apr 07 12.2
May 07 15.8
Jun 07 18.7
Jul 07 15.4
Aug 07 10.2
Sep 07 5.4
Oct 07 3.0
Nov 07 6.9
Dec 07 8.1
Jan 08 8.5
Feb 08 8.4
Mar 08 8.4
Apr 08 8.9
May 08 5.0
Jun 08 3.7
Jul 08 2.0
Aug 08 1.1
Sep 08 2.5
Oct 08 4.5
Nov 08 4.4
Dec 08 3.7
Jan 09 2.3
Feb 09 2.1
Mar 09 1.5

So if we examine the 3-month averages since January 2007, we see what we thought was a minimum of 3.0 centered on October 2007, then another decline to 1.1 in August 2008, and now after rising slightly it has dropped again, to 1.5. And of course we have no way of knowing if next month the number will be lower or higher.

If you look at the sunspot numbers for the three days with sunspots in April -- April 21, 29 and 30 -- the numbers 11, 15 and 12 only add up to 38. Divide that by April's 30 days, and the average is about 1.267, less than the 3-month average ending yesterday. So if

we saw the same activity (or lack of it, actually) for May, we could see another decline at the beginning of June when we look at the averages centered on April. If by chance we have no sunspots at all through the end of May, that average would decline from approximately 1.494 centered on March to 0.681 centered on April.

Last week's bulletin mentioned the Weak Signal Propagation Reporter Network site at http://wsprnet.org/drupal/wsprnet/map. This week we heard from David Witkowski, W6DTW of San Jose, California, who said that WSPR was developed by Joe Taylor, K1JT, the 1993 Nobel Laureate in Physics who brought us WSJT and JT65. David recommends http://www.physics.princeton.edu/pulsar/K1JT/wspr.html for getting set up. Also note the link selections on the left side of that page for info on WSJT and JT65.

WSJT is a mode for communicating via brief meteor scatter propagation, and JT65 is useful for moonbounce and troposcatter modes.

Last week's mention of the first signs of early 2009 E-skip season brought a response from Jon Jones, N0JK, who says most of the openings have been short, and best for those in Arizona, Texas, Florida and Central America. At the start of the season, conditions are better for the southern tier, but later E-layer openings improve further north. He sent a log of 6-meter contacts on April 22, from 2158-2206z on 50.125 MHz. N0JK (EM17) worked K9NU (EN44), VA2JOT (FN45ER) worked KI4FCQ (EM72NK), and UT1FG/MM worked K1TTT.

Last night (Thursday, April 30) Rob Geursten, N1KEZ of Beaverton, Oregon worked some unexpected DX on 20 meter PSK31 at 0545z. He copied a Bulgarian special event station, LZ2009KM, working many European Russians, and Rob worked Wolfgang, DL2MWB in Memmingen, Germany. He was surprised to find 20 meters open at this time of day. The sunspot number was 12 -- and 15 the day prior -- but a check with the W6ELprop software shows that with or without sunspots, communication over that path on the first of May is not surprising at that time of day, 10:45 PM at Rob's end. Run the numbers a month ago, and the path isn't there, but for this late in the Spring communication becomes more likely.

You can download W6ELprop at http://www.qsl.net/w6elprop/. Don't miss an excellent tutorial for using this software, written by K9LA, Carl Luetzelschwab at, http://www.arrl.org/tis/info/pdf/W6elprop.pdf.

Bob Rumsey, KZ5R of Denton, Texas wrote in comparing current conditions to 45 years ago, during the minimum following Cycle 19.

He writes, "I would like to add a different perspective to the current solar minimum. Licensed originally at age 14 in 1962, I worked the HF bands diligently until I left for college in 1966. Unless I am mistaken, this was also a period of very low sunspot

activity (there was little understanding of it then) and as a General class on 50 watts of AM and using a 40 meter dipole and 2 element triband Yagi, I worked little to no DX. I remember an opening during a contest in 1965 when I worked G3CAZ and thought I had walked on the moon."

He continues, "From 1966 to 2006 I kept my license active but other than a stint with VHF in the 70s did little hamming. Then after retiring early and starting my own business, I once again had some time and felt the tug of the HF bands. I built up my station and was amazed at what the technology can now accomplish. Working either coast of the US is a day to day occurrence and Europe or Asia are quite frequent. So you can imagine my surprise when I began reading how we were once again in a solar activity downturn while I'm thinking, 'Wow this is great.' From November of 2006 when I put up my vertical disguised as flagpole, I have worked 106 countries running from 100-1000 watts. To me this is heaven and of course in 2006 conditions to me where what I remembered as normal. The vertical is my primary antenna since I live in a restrictive CC&R community."

He ends with, "So as you might have guessed, because of the current technology, I am actually quite happy with the current conditions and cannot wait to see what true solar activity will bring. The proverbial 'kid in a candy store' comes to mind. Thanks for letting me provide an alternative viewpoint on today's conditions."

Thanks Bob. Readers can check out Bob's bio on, http://www.qrz.com/kz5r.

I started in ham radio a few years after Bob -- in 1965 -- and one big difference is that back then I had a very poor receiver and most of my attempts at antennas didn't work very well. To look at the sunspot minimum back then, use the tool at, http://spaceweather.com/glossary/sunspotplotter.htm. This shows that the minimum between Cycles 19-20 was probably around the middle of July, 1964.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at, http://www.arrl.org/tis/info/propagation.html. For a detailed explanation of the numbers used in this bulletin, see http://www.arrl.org/tis/info/k9la-prop.html. An archive of past propagation bulletins is at http://www.arrl.org/w1aw/prop/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://www.arrl.org/qst/propcharts/.

Instructions for starting or ending email distribution of this bulletin are at http://www.arrl.org/w1aw.html#email.

Sunspot numbers for April 23 through 29 were 0, 0, 0, 0, 0, 0, and 15 with a mean of 2.1. 10.7 cm flux was 70.6, 69.7, 69.4, 69.2, 67.7, 68.8, and 69.5 with a mean of 69.3. Estimated planetary A indices were 3, 5, 4, 5, 4, 2 and 3 with a mean of 3.7. Estimated mid-latitude A indices were 0, 5, 2, 3, 3, 2 and 3 with a mean of 2.6.

I've had such a system installed in my bathroom [directly under the
shack] for more than five years, and no problems to date. My system is
a single wire wound back and forth under the tile floor, sort of like
the heating coil in a toaster. There is no noticeable interference when
running, or when switching on/off.

Hope this helps.

From: Alan Leith
Topic: 9719 Message: 9719

I'll bet my sweet bippy that the guy signing 3Y0Q on 10119 is phonier than the proverbial three dollar bill. If nothing else, whoever he is, he's caused a bit of panic on 30M this evening. Because he's as strong as he is (or was), I suspect he's somehwere in Europe. I can only imagine why he chose "Q" as his suffix.

Ah well, there's not much else to do.

I remember some years ago a station showed up on 20 SSB signing a 3Y0 call.
He had a Spanish accent. You could hear a baby crying in the background.

I highly suspect a Bouvet operation is not going to just appear unannounced.

Meybe there will be a real one some time soon. I don't think I am the only
one who needs it for an all-time new one!

He was apparently having a lot of fun at the expense of many, including KN5O. I could hear both ends and he must have "worked" KN5O six times. He seemed eager to confirm the contact with KN5O. Then a minute or so would go by and he would call KN5O again. That, coupled with the strength of his signal, more or less indicated it was someone having a good laugh.

It wasn't totally out of the realm of possiblity. A couple of years ago I worked an Italian on ZD9 who was totally unannounced - and turned out to be very real.

9727. ZZ???

Yahoo group: DX-IS (2009)
Date: 2009-05-02 23:57:20 UTC
From: Alan Leith
Topic: 9727 Message: 9727

Have I missed something? I've been hearing a lot of people signing off on CW by sending "ZZ" and I don't know what it means. Am I to assume that it means the same as "GN" which is far more acceptable? I have been observing, in the last few years, the demise of a system of abbreviations for CW that worked very well for more years than I have been hamming with people simply making their own CW abbreviations, probably because they can't spell.

Thoughts?

No, I don't think so, Dale. I think it means "gonna catch some zees" as in "good night." But I can't be sure. "GN" has worked well for me for half a century. I hate the expression "gonna catch some zees" because I don't know what a "zee" is. Only America says "zee" and the rest of the world says "zed." My kids used to hate when I'd refer to ZZ Top as "Zed Zed Top." However, it is European stations who seem to use the "ZZ" signoff.

Just nitpicking because there's nothing else to do.

BTW, managed to pick up a few new IOTAs tonight, considering how awful conditions are.

Times are changing, Al. I wish I could take credit for it, but it was Emerson who said "A foolish consistency is the hobgoblin of little minds." I was reminded of this recently by AA6YQ when a programming issue with the DX Labs software came up. (As an aside, an excellent DX software package!)

I wrote a week or so ago on this list that the standard "HPE C U AGN" seems to be morphing into "HPE C U SN" in the last year or two. I haven't heard the ZZ sign off to which you refer, but I do note that a lot of people sign in various ways. It may be that a few started sending ZZ instead of CUL, QRU, CUL <AR>, etc.

I guess one has to think of Emerson and decide if the consistencies we set as a gold standards really matter. It sure matters that one sends 73 and not 21 or 65. It matters if we don't send our call at the end of the QSO. I find it strange that some send <SK> (which means "I'm done and nothing more will follow") followed by the ubiquitous tearful good bye complete with regards to the family and a promise to QSL for sure by the bureau, etc. However, a lot of OPs so it. Maybe the Ham interpretation of <SK> has changed.

If ZZ is becoming a commonly used "phrase" to replace CUL or equivalent, are we being foolish by insisting that this not happen? I don't know. In the written word, outside of Ham radio, many expressions and phrases have come and gone during the last century as the English language evolved. Some of the changes were good, and those who resisted them for the sake of doing so were indeed foolish. On the other hand, some of the "changes" we see are plain wrong. We should not deem misspellings, punctuation errors and poor grammar as acceptable. We should insist that proper names and

sentences begin with a capital letter and that words are spelled properly. I object to sentences like "al sez i is a lid lol" :-)

How far we push the consistency of CW abbreviations and the use of prosigns is harder to define. Ham CW is a product of amateurs loosely using commercial and military telegraphy standards. I believe Ham CW is close to what commercial and military CW was, but it is more relaxed and the format less rigid. In the 23+ years I have been on the air, I have seen subtle changes away from the "standard." I sure do not have the expertise to define Ham CW.

I guess as close as I can come is: "Did I understand what he just sent?" If I can't because he (or she) are mixing in their own weird abbreviations, then it is not right. Getting back to ZZ, if someone sent that to me prior to this discussion, I would have thought I had miscopied it and asked them to send it again. If I started hearing it a lot, and figured out it meant "I'm going QRT and going to bed", I suppose I would learn to accept it.

Jeez! This was going to be short and I've written a page! I'll go back to my original theme. Is the consistency necessary or just because "that's the way we've always done it?" Who knows?

Some of us Old Goats who learned our way around from an older goat say zed when referring to a call sign, as in ZED EL 5 ABC or, I think I will turn to the Southwest to see if there are any ZED ELs or VKs on 15. My mentor was W5TVE(SK) who spent a lot of time on 15 during the cycle of 1958 working ZL's & VKs. He had a low budget single band 2 Element beam for 15, and he worked a ton of them. I can't remember the name of the company that built those antennas, but they had an ad in QST every month. Maybe some of you other OTs can remember. This is the same fellow who was an old NAVY op and copied CW on a Mill(Typewriter). I have told you-all about this fellow before. He was amazing. He could talk to me, smoke a cigarette, and copy cw all at the same time. While copying CW he didn't know what he had typed on the paper. The CW went in his head and out his fingers. He had to read it before responding to the other op.

Taken in that context, Paul, I guess I could accept "ZZ" as a legitimate prosign for "going to bed." However, if CW is supposed to be short and to the point, "GN" is shorter. "GN," "CUL" and "ZZ" all flow well, so what the hell, eh?

I think, however, that what I'm really saying is that the traditions of our hobby are not being followed. And while I certainly understand that times change and things are done differently, I honestly can't understand why changes that are completely unnecessary and, in the end, subvert the original intention to use CW to communicate quickly and efficiently, are becoming accepted. Misspelling and misuse of internationally understood CW abbreviations tends to slow down the understandability of what was an established concept. For example, the use of cut numbers in the name of efficiency. If the receiving station doesn't understand the abbreviation, how can that be considered efficient?

In fact, I don't often use "CUL" but just "CL" because it is shorter. I use "TKS" or "TNX" rather than "THKS" or "GX" (which I often hear). And when I call "CQ" I send "CQ" and not what I often hear these days: "YQ."

The first thing my Elmer had me do was learn CW. The second thing was to learn the most common CW abbreviations.

Consistency allows for greater efficiency.

Times are changing, Al. I wish I could take credit for it, but it was Emerson who said "A foolish consistency is the hobgoblin of little minds." I was reminded of this recently by AA6YQ when a programming issue with the DX Labs software came up. (As an aside, an excellent DX software package!)

I wrote a week or so ago on this list that the standard "HPE C U AGN" seems to be morphing into "HPE C U SN" in the last year or two. I haven't heard the ZZ sign off to which you refer, but I do note that a lot of people sign in various ways. It may be that a few started sending ZZ instead of CUL, QRU, CUL <AR>, etc.

I guess one has to think of Emerson and decide if the consistencies we set as a gold standards really matter. It sure matters that one sends 73 and not 21 or 65. It matters if we don't send our call at the end of the QSO. I find it strange that some send <SK> (which means "I'm done and nothing more will follow") followed by the ubiquitous tearful good bye complete with regards to the family and a promise to QSL for sure by the bureau, etc. However, a lot of OPs so it. Maybe the Ham interpretation of <SK> has changed.

If ZZ is becoming a commonly used "phrase" to replace CUL or equivalent, are we being foolish by insisting that this not happen? I don't know. In the written word, outside of Ham radio, many expressions and phrases have come and gone during the last century as the English language evolved. Some of the changes were good, and those who resisted them for the sake of doing so were indeed foolish. On the other hand, some of the "changes" we see are plain wrong. We should not deem misspellings, punctuation errors and poor grammar as acceptable. We should insist that proper names and sentences begin with a capital letter and that words are spelled properly. I object to sentences like "al sez i is a lid lol" :-)

How far we push the consistency of CW abbreviations and the use of prosigns is harder to define. Ham CW is a product of amateurs loosely using commercial and military telegraphy standards. I believe Ham CW is close to what commercial and military CW was, but it is more relaxed and the format less rigid. In the 23+ years I have been on the air, I have seen subtle changes away from the "standard." I sure do not have the expertise to define Ham CW.

Reminds me of the late Don Wallace, W6AM who would copy CW while playing cards and never writing anything down. He said it was just another language as English is to us and our QSOs on SSB (or DSB for the aged).
BTW my first call was VK2Zed I Zed as Zed is the name of the last letter in the alphabet.

Yeah, I remember your story and I'm sure there are lots of others with similar stories about their Elmers. My Elmer wasn't a military type, however, but was just an ordinary joe who loved ham radio. In fact, at 11 years of age, I quickly built up my speed and could whip off CW on a bug, something he never mastered. Much to the dismay of the radio inspector who gave me my test, I used my own bug. He wasn't able to use a bug to send back to me. I aced the test :-).

But I do know at least one fellow (never a military type) whose earliest interests were in traffic nets. He also taught himself to use a typewriter and to talk while typing. And then there was my late friend VE3WT who had spent years in the military typing cypher and whose ears had turned to tin. When Howard got home from the war, he never, ever again, listened to CW.

I, on the other hand, spend eight hours daily talking. I somewhat enjoy CW, for that reason.

And you didn't get the accent right, Mike, it isn't ZED EL, it is ZID EL. Just like it is ZID ESSE. And it is VEE KYE instead of VEE KAY.

GN my friend. I'm gonna catch some zees.

I actually haven't gone to zeeland yet.

The antennas were introduced to this conversation because they were (are) used to talk to the ZLs and ZSs. The ZLs and ZSs were introduced to the conversation because of the pronounciation of the letter ZED.

Follow along here, Dale. This thread is expanding and by the end of next week will have taken over the world.

I believe that was a widely held view of the Gotham antennas. But without having never had the opportunity or misfortune to use one (take your pick), I can't comment. In those days, I could only afford to make wire antennas and the odd quad element (notice, element -- not two). Bringing equipment and antennas in from the US was terribly expensive in those olden days -- duties and taxes -- I didn't have a lot of money then (and still don't) :-).

He was apparently having a lot of fun at the expense of many, including KN5O. I could hear both ends and he must have "worked" KN5O six times. He seemed eager to confirm the contact with KN5O. Then a minute or so would go by and he would call KN5O again. That, coupled with the strength of his signal, more or less indicated it was someone having a good laugh.

It wasn't totally out of the realm of possiblity. A couple of years ago I worked an Italian on ZD9 who was totally unannounced - and turned out to be very real.

From: Art Burke
Topic: 9718 Message: 9747

The guy who was there on a work assignment a year or so back was on sporadically, on nuttin' but 20M SSB. Most of the time I couldn't even hear him, much less work him. Then, about three days before his assignment was over, I heard him one day - unbelievably, in the clear and worked him. I was afraid it was a slim, it was so strong. Turned out to be the real McCoy!

I still want it on CW. Guess I'll have to wait till the solar flux screams up into the 70s and someone goes back.

Now your taxing the memory cells. I don't know.

They had the famous Gotham Vertical that you tuned by going out in the
yard and moving the tap on an open coil with an alligator clip.

I remember a quote that was either from W2JZS or W2TJD (SK's) about it.
"Buy a Heath Cantenna instead, it was cheaper and radiated better."

Au contraire, mon ami, Dave. I asked a serious question. I have always wondered where the company that made a beam named Gotham was located. Well, I thought of it for some time. Maybe a little while. Well, I hadn't thought of it again until this thread began. But, since being reminded, I still am curious.

I was lucky enough to work Chuck Brady on SSB and RTTY while he was
there. He did not make very many RTTY contacts.

He was strongest to the NE in CO, so that would tend to make one wonder where he was. Other than some "wasted time" (but if you are retired, you have plenty of that) and a few cents worth of wasted electricity (which might tend to upset the "greenies"), I look at it as a chance to practice your operating skills in making a contact in a pileup.

A definite "WFWL" one!

Zed Zed Top. That's hilarious, Al!

Speaking of HR habits, it drives my wife crazy when I use 2 meter lingo (which I cannot stand either), like referring to myself in the plural: "We're going to listen for some DX today"

And "We're destinated" (meaning I am at my destination which I often hear on 2 meters).

Now the XYL does it to tease me back when we are talking via cell phone. Even w/o a license, she will say: "OK, dear, 73 or 88 or whatever, I am DESTINATED"

And sometimes she will tell me me "I can always tell when you're trying to break through a pileup. You get the adrenaline going and your voice starts BOOMING through the house. The neighbors are wondering again!"

Of course, the neighbors stopped wondering many years ago. They no longer think I work for the CIA (no I am not kidding, around the university here everyone thinks that big brother is around the corner). Now they just assume I am trying to talk with the "mother ship"

Where have all the great Elmers gone? Oh duh, that's supposed to be us, right?

Well, I can't make the horse drink water even if I can lead it to the trough.

Not meant to be negative, but some (not all) of the kids today don't want anything but instant gratification and mommy/daddy to do the work for them (like everything else for them).

Maybe DX chasing requires too much patience, or not having a KW and stacked 6 element yagis to being with is not to their liking? Well, I will keep trying..

When I moved to a new location, just a couple of hundred feet from Lake Ontario back in the early 80s I installed my tower and 4-el 20M monobander and a DB10-15 atop that. One of my new neighbours came to my yard and after looking at those beams said to me, "I bet you can get some pretty distant TV stations with that." Cable was available and while there were a few little towers with TV antennas, this was something he'd never seen before. I asked him how he watched TV and he told me he had an antenna in his attic.

When he came to see me a few weeks later to complain about TVI, I suggested it was time he invested in cable. He did. The next year I bought a car from him (he was a car salesman) and hopefully he thought at that time it was a good thing he didn't tick me off.

As for the Zed Zed Top thing, Mark, I like to, in a serious conversation, completely murder a word and quickly visually scan to see if the error was detected. I wouldn't, of course, do it in a situation where it was inappropriate. One of my favourites is "irregardless."

As for Gotham antennas, I can't remember anyone ever admitting to me that they were using one. On the other hand, in my youth and inexperience, I often drooled over those ads.

As for 2M lingo, there's so little activity on that band around here that I have dismantled my 2M rig. But I also used to gasp every time I heard someone say he/she was "destinated." But I think I may have said it, to be funny, at one time or another. I also probably used "we" in the royal sense but I've grown up. I also don't have a "personal" which I think is an import from CB but I often hear it nowadays on SSB. When I do have a QSO with someone who tells me their "personal" I go back and tell them I never had a "personal" but that I do have a name and it is.....

And a final comment on Elmers. I have always helped those who wanted to get a license. In fact, I taught code to many classes and several of those folks went on to get tickets. And occasionally I am approached by someone who says he/she is interested in getting a ticket. I tell that person to call me. Hardly ever does my phone ring. And, BTW, I am a volunteer examiner in Canada.

Today I can hear lots of stations on 20 CW but there's a couple of contests and QSO parties and nothing that tickles my fancy. As for SSB, I only go there when I'm desperate,

When I moved to a new location, just a couple of hundred feet from Lake Ontario back in the early 80s I installed my tower and 4-el 20M monobander and a DB10-15 atop that. One of my new neighbours came to my yard and after looking at those beams said to me, "I bet you can get some pretty distant TV stations with that." Cable was available and while there were a few little towers with TV antennas, this was something he'd never seen before. I asked him how he watched TV and he told me he had an antenna in his attic.
The other day someone commented on my 10m 5 el mono and I told them that it was for when the analog/digital switchover happens next month
When he came to see me a few weeks later to complain about TVI, I suggested it was time he invested in cable. He did. The next year I bought a car from him (he was a car salesman) and hopefully he thought at that time it was a good thing he didn't tick me off.

As for the Zed Zed Top thing, Mark, I like to, in a serious conversation, completely murder a word and quickly visually scan to see if the error was detected. I wouldn't, of course, do it in a situation where it was inappropriate. One of my favourites is "irregardless." Irregardless is a non standard contraction of irrespective and regardless and if used enough will become standard
As for Gotham antennas, I can't remember anyone ever admitting to me that they were using one. On the other hand, in my youth and inexperience, I often drooled over those ads.
Don't recall anyone using one in L.A.
As for 2M lingo, there's so little activity on that band around here that I have dismantled my 2M rig. But I also used to gasp every time I heard someone say he/she was "destinated." But I think I may have said it, to be funny, at one time or another. I also probably used "we" in the royal sense but I've grown up.
Remembering back to AM 2 meters 'destinated' has always been used
I also don't have a "personal" which I think is an import from CB but I often hear it nowadays on SSB. When I do have a QSO with someone who tells me their "personal" I go back and tell them I never had a "personal" but that I do have a name and it is.....
The 'first personal' comes from CB but we have 'handles' don't we?
And a final comment on Elmers. I have always helped those who wanted to get a license. In fact, I taught code to many classes and several of those folks went on to get tickets. And occasionally I am approached by someone who says he/she is interested in getting a ticket. I tell that person to call me. Hardly ever does my phone ring. And, BTW, I am a volunteer examiner in Canada.
My Elmer got me started, issued my first test for Technician and when I went on to pass the Extra exam at the FCC he couldn't pass - failed the theory so I spent some time with him and his next trip down he passed - what goes around comes around! I gave up Volunteer Examiner when I found some improprieties.
Today I can hear lots of stations on 20 CW but there's a couple of contests and QSO parties and nothing that tickles my fancy. As for SSB, I only go there when I'm desperate,
Desperate? You don't know that meaning until you only have 10 metres. At this point a JA would be welcome .... ..

9760. help

Yahoo group: DX-IS (2009)
Date: 2009-05-03 18:05:05 UTC
From: Alan Leith
Topic: 9760 Message: 9760

I have inadvertently deleted a link to the Alpha-Delta antenna site sent to me by Bob, K2TK, earlier today. Although I found the site and read the information I needed, I need some anecdotal information from users of the Alpha-Delta DX-A twin sloper.

My earlier encounter with Alpha-Delta, with a five-band dipole, was less than starry. But this particular antenna looks like it might be somewhat more manageable for me with no elements that can get tangled in the wind.

What I need to know is how it performs, overall, and how it performs on each band. Does it tune 30M, 17M and 12M as claimed? I have no great expectations for 160 because I have no power there. But I'm interested in what it can do on 80 and 40 as well.

I have a buddy going to Dayton (I can't, sadly) and would get him to pick one up for me if I hear reasonable things about this antenna.

You may have a handle, Rene, but I have two. They're just above my belt.
I don't talk about them.

All other comments duly noted, and I concur, anything would be welcome
today, on any band.

Notes in black

----- Original Message -----
From: Alan <mailto:aleith@...> Leith
When I moved to a new location, just a couple of hundred feet from Lake
Ontario back in the early 80s I installed my tower and 4-el 20M monobander
and a DB10-15 atop that. One of my new neighbours came to my yard and
after looking at those beams said to me, "I bet you can get some pretty
distant TV stations with that." Cable was available and while there were
a few little towers with TV antennas, this was something he'd never seen
before. I asked him how he watched TV and he told me he had an antenna in
his attic.
The other day someone commented on my 10m 5 el mono and I told them that it
was for when the analog/digital switchover happens next month
When he came to see me a few weeks later to complain about TVI, I suggested
it was time he invested in cable. He did. The next year I bought a car
from him (he was a car salesman) and hopefully he thought at that time it
was a good thing he didn't tick me off.

As for the Zed Zed Top thing, Mark, I like to, in a serious conversation,
completely murder a word and quickly visually scan to see if the error was
detected. I wouldn't, of course, do it in a situation where it was
inappropriate. One of my favourites is "irregardless."
Irregardless is a non standard contraction of irrespective and regardless
and if used enough will become standard
As for Gotham antennas, I can't remember anyone ever admitting to me that
they were using one. On the other hand, in my youth and inexperience, I
often drooled over those ads.
Don't recall anyone using one in L.A.

As for 2M lingo, there's so little activity on that band around here that I have dismantled my 2M rig. But I also used to gasp every time I heard someone say he/she was "destinated." But I think I may have said it, to be funny, at one time or another. I also probably used "we" in the royal sense but I've grown up.
Remembering back to AM 2 meters 'destinated' has always been used
I also don't have a "personal" which I think is an import from CB but I often hear it nowadays on SSB. When I do have a QSO with someone who tells me their "personal" I go back and tell them I never had a "personal" but that I do have a name and it is.....
The 'first personal' comes from CB but we have 'handles' don't we?
And a final comment on Elmers. I have always helped those who wanted to get a license. In fact, I taught code to many classes and several of those folks went on to get tickets. And occasionally I am approached by someone who says he/she is interested in getting a ticket. I tell that person to call me. Hardly ever does my phone ring. And, BTW, I am a volunteer examiner in Canada.
My Elmer got me started, issued my first test for Technician and when I went on to pass the Extra exam at the FCC he couldn't pass - failed the theory so I spent some time with him and his next trip down he passed - what goes around comes around! I gave up Volunteer Examiner when I found some improprieties.
Today I can hear lots of stations on 20 CW but there's a couple of contests and QSO parties and nothing that tickles my fancy. As for SSB, I only go there when I'm desperate,
Desperate? You don't know that meaning until you only have 10 metres. At this point a JA would be welcome .... ..

I was just thinking the same thing about Gotham antennas!

Take a look on eham.net, the reviews on Gotham are sad but also hilarious. I laughed so hard that I had a headache and had to take a break.

The Ohio/Penn DX PacketCluster
DX Bulletin No. 907
BID: $OPDX.907
May 4, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q, W2AY, K3ZO, NG3K, K4MZU, N4AA & QRZ DX, N5FG, W5JON, K8YSE, N8OFS, K9CS, A35RK, DL7MAE & The DX News Letter, DX World of Ham Radio Web Site, EA4ATI, F5NQL & UFT, F6FQK, I1HYW, I1JQJ/ IK1ADH & 425 DX News, IW0HEX, LZ1BJ, OH2BN, Pete's-DX-Newsdesk, RSGB IOTA Web Site, VA3RJ & ICPO and VHF-DX-Portal (MMMonVHF) for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 26th-April, through Sunday, 3rd-May there were 216 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 3W, 3X, 4J, 4L, 4O, 4S, 4U1U, 4X, 5B, 5H, 5N, 5R, 5V, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 9A, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HH, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J8, JA, JD/m, JD/o, JT, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P4, PA, PJ2, PJ7, PY, PY0F, PZ, S2, S5, SM, SP, ST, SU, SV, SV5, SV9, T30, T5, T7, T8, TA, TF, TG, TI, TK, TL, TN, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V5, V7, V8, VE, VK, VP2E, VP2V, VP6, VP8, VP9, VR, VU, XE, XU, XW, XX9, YA, YB, YI, YJ, YK, YL, YN, YO, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3D2, FIJI (IOTA Op). Akira, JA1NLX, will once again be active as 3D2YA from Mana Island (OC-121) in Mamanuca Group, between June 29th and July 3rd. Activity will be on 80/40/30/20/17/15/12/10 meters using CW and RTTY. QSL via his home callsign, by the Bureau or direct (w/SASE). Log will be uploaded to LoTW.

A3, TONGA (Update). Paul, A35RK, informs OPDX that Dave, A35KL, has been active on 80-15 meters with a couple of openings to Europe occurring on both 30 and 20 meters between 0600-0830z. Dave has 750+ QSOs in the log so far. On May 1st, Dave and Paul put up a G5RV antenna and worked W1MK on 80m CW at 0943z. Paul states that 40 meters appears to be open to North America at that time, but there have been very few takers on that band. He adds, "20 and 30 meters have been the 'money bands'." Dave will be departing Vava'u (OC-064) on May 5th, at which time Paul, A35RK, will become active using the G5RV. Paul will be there until June 1st, and possibly a bit longer signing A35RK/p. QSL A35RK/p via W7TSQ or via LoTW. Remember to QSL A35KL via W6ZL (w/SASE or IRC, or via LoTW).

A6, UNITED ARAB EMIRATES (Update). Philippe, F5LTB/9Q1TB, did not receive the callsign A65BK as first announced but did receive the callsign A65BI instead. He will be in France most of the month (May 6-20th), but expects/hopes to be active by the end of the month. Activity will be mainly on SSB. His QSL Manager will continue to be SM5DJZ, direct ONLY (eQSL are welcome for eDX100, eWAS and eZ40).

AH2, GUAM. Operators Lee/AH2Y and Harry/WX8C will be active as AH2Y during the CQWW WPX CW Contest (May 30-31st) as a Multi-Op/Single/All-Band entry. QSL via LoTW or direct to HL1IWD.

C2, NAURU (Update/Change). Dani, EA4ATI/9M2TI, in Malaysia, informs OPDX some details have been changed for their DXpedition to activate Nauru in the Pacific (refer to OPDX.894). The callsign C21TI will remain the same as well as operating frequencies. However, Dani states, "Our webmaster (EA4YK) has changed the Web site as we had a lot of hackers..... The DXpedition is postponed to June and exact dates will be announced soon." Looking at the new Web page, dates have now been posted. Operation is expected to take place between June 16-26th. Visit their new Web page at: http://c21ti.madrono.net/index.html

DXCC NEW.............
* Bill Moore, NC1L, ARRL Awards Branch Manager, reports that the following operations are approved for DXCC Credit:
S04R - Western Sahara; 2009 Operation
E51QQQ - North Cook Islands; 2009 Operations
If you have had any QSLs rejected in a recent DXCC submission, please send an E-mail to <dxcc@...> to be placed on the list for an update.

* QSL CHECKING AT DAYTON HAMVENTION (Update). Bill Moore, NC1L, has revised/updated details on the QSL card checking to be done at the ARRL National Convention in Dayton. Checking will be done during all operating hours of the convention Friday, Saturday and Sunday, May 15-17th, 2009. There are some important guidelines that will help make the card checking process run smoothly at the following Web page: http://www.arrl.org/blog/Century%20Club%20Awards

E21, THAILAND. Champ, E21EIC, will be active during the CQWW WPX CW Contest (May 30-31st) as a Single-Op/Low-Power entry. JA stations QSL via JR5XPG and all others via E21EIC. Visit Champ's Web page at:

http://www.e21eic.net

E51SIX 6M DXPEDITION WRAP-UP. Lance, W7GJ, has put together a nice PDF file of his recent (March) 6m EME operation from Rarotonga in the South Cook Islands. All the photos in the PDF file are in high resolution, so you can zoom in on any detail in the photos if you wish. Read his story at: http://www.bigskyspaces.com/w7gj/E51SIX.htm (20 pages, 60 MB)

FG, GUADELOUPE (Ilet Op). The radio club FG5KC Guadeloupe will try to activate three ilets (Kaouane, Caret and Fajou) on a day during the the first week of June. They are looking for some sponsors to help with the QSL cost. Visit their Web site for more news on their DXpedition: http://acra-radioclub.site.voila.fr

GB1, ENGLAND (Mill Op). Members of the Bittern DX Group are participating in the National Mills on the Air weekend by activating GB1WM from Weybourne Mill in Weybourne, North Norfolk, May 8-10th. Activity will be on all HF and VHF bands, including some Digital modes. Visit the Bittern DX Group's Web page at: http://www.bittern-dxers.org.uk

IOTA NEWS.....
EU-090. Slovenian operators Jane/S57L, Goran/S52P, Vinko/S53F, Brane/S56UGB and Silvo/S50X will be active as 9A8ZRS from Vela Palagruza Island (ACIA IC-901, CIA-33, IOCA CI-084, MIA MC-284, ARLHS CRO-012, CLH-100, WHL 9A-046, WLOTA 0057), July 20-31st. Activity will be on 80/40/20/15/10/6/2 meters using CW, SSB, PSK-31 and possibly other digital modes. They will also be an entry in the RSGB IOTA Contest (July 25-26th). QSL via the operator's instructions.

EU-094. French operators from the Eure et Loir area will be active as TM5EL from the Penfret Island (DIFM AT-059, WLOTA 0321, DPLF PB-038, WW Loc. IN87AR) between May 8-10th. Activity will be on open HF bands plus 6m, VHF, UHF and SHF using CW, SSB and the Digital modes. Operators mentioned are: Alain/F1LLS, Thomas/F4BCG, Patrick/F4FCS, Antoine/F5RAB, Christian/F6AXN, Francis/F6DPD and Dominique/F6HEQ. QSL via F6KHI, by the French REF Bureau or direct (with SASE).

EU-097. Ian, G4FSU, will be active as OH/G4FSU from Emasalo Emsalo Island (EU-097) between July 21st and August 16th. Activity will include an entry in the RSGB IOTA Contest (July 25-26th). Operations will be on or near the IOTA & QRP CW frequencies. QSL via his home callsign. More details can be found at: http://ian.greenshields.googlepages.com/emsalo

EU-124. Operators Alan/G0RCI, Pete/M0USY, Harry/G7DEH, Alan/G4VUA and Brian/M0JNC will be active from Holy Island, Wales, between June 24-29th. Activity will be on the HF bands using CW and SSB. QSL direct only to G0RCI.

EU-189. The big disappointment of the week was that the Rockall Island operation did not take place. The rough seas and huge waves were the major factors that did not let the team land on Rockall. With both wind and sea conditions so bad on the way back, most of the team and crew on board the sail yacht Elinca were seasick and did not come out of their bunks, not even to eat. Some of the radio equipment got smashed onto the floor when the Elinca got pounded with a big wave. As this was being typed, no other news has been reported about the MM0RAI team since Friday. Please visit their Web site for latest news and updates at: http://www.rockall.be

NA-079. Operators Bill/WD2E and Sofia/AI4KQ will be active as WD2E/4 from the Dry Tortugas Islands, May 8-14th. QSL via WD2E, direct or by the Bureau.

NA-201. Ed, CO7PH, and possibly other Cuban operators will be active as T47D from Jardines de la Reina, probably from Cayo Anclitas, between July 24-31st. Activity will be on all HF bands and modes, as well as an entry in the RSGB IOTA Contest (July 25-26th). QSL via CO7PH (QRZ.com).

SA-071. Members of the Sao Paulo Association of Radioamadores (APRE) will be active as PT2T from Ilha da Moela (DIB SP-06, DFB SP-07, ARLHS BRA 043, TWLHD WLH PY-031, WLOTA 1335, WW Loc. GG65UW) between June 11-14th. Activity will include operations from blockhouses, islands and lighthouses of the State of Sao Paulo. Operators include Irineu/PY2IA, Marcelo/PY2OMT, Thiago/PY2TLB, Claudio/PY3NZ, Felipe/PU2OVA, Filipe/PU2TEA and Thiago/PU2TJQ. Operations will be on 80-2 meters, SSB only. QSL via PY2OP, direct or by the Bureau. For more info, go to: http://www.apre.com.br/moela

J8, ST. LUCIA. John, W5JON, will once again be operating from the hilltop QTH overlooking the Caribbean Sea and Marigot Bay in St. Lucia, between October 20-30th. His callsign will be J68JA. Reference numbers are: IOTA NA-108 and Grid Square FK93. Activity will be on 160-6 meters (including 60m) on SSB. He will use an ICOM IC-7000, KL-400 Amp (350 watts) into the following antennas: Alpha Delta DX-LB and DX-EE Dipoles, and a 3 element yagi on 6m. Activity will also include the CQWW DX SSB Contest (October 24-25th) as a Single-Op/All-Band entry. QSL via W5JON. John adds, "As in the past, XYL Cathy/W5HAM will be very busy pool side."

JD1, OGASAWARA (A Very Early Notice!). Operators Kirk/JF3MYU, Ted/K8AQM, Brian/KG8CO, Paul/NF8J and possibly others will be operating from the Island of Chichijima (AS-031) in the Ogasawara Island group, March 25th through April 5th, 2010. Activity will be on 160-10 meters using CW, SSB and RTTY. More details are forthcoming as well as the QSL info and callsigns as they are issued.

JW, SVALBARD. Robert/LA9QNA and his XYL Gro will be active as JW9QNA from the JW5E club station in Longyearbyen between July 17-22nd. Activity will include entries in the NA RTTY QSO Party (20m) and the CQ World Wide

VHF Contest. QSL via LA9QNA.

JW, SVALBARD. Ingrid/LA8FOA and Unni/LA6RHA, members of the Scandinavian YL Radio Amateurs (SYLRA), report that they planning an "expedition" to a part of Norway - remote but still very accessible, after the SYLRA meeting in Kolbotn (near Oslo), September 3-6th. Their plans are to get a group of YL operators (and possibly their OM) to activate the Longyearbyen radio station from Svalbard between September 6-13th. They have already received the callsign JW1SYL for the operation. For more details and updates, please visit the following Web pages at:
http://home.online.no/~la6rha/expedition_to_svalbard.htm
http://www.sylra.is/index2.html

K5, UNITED STATES (6m/Grid/LH/USI Op). Members of the "EL58 Grid Activation Group" will be active as K5N between May 29-31st (1700-1700z). Activity will be from the sandy beach facing the Gulf of Mexico in Grid Square EL58hx, ARLHS USA 1101 under the "Visual Site Rule" and a New USI Island (USI LA105S - Burwood Island, LA) (South West Pass). The operation will be 6 meters ONLY, consist of 2 stations with both SSB/CW, and M/S capability, two 6M5 antennas, and 6 operators. Power out will be approximately 200W. Operating frequencies are: 50.100/CW, 50.150/SSB and 50.315 Meteor Scatter. QSL via: Joey Fierro II, 1054 Cajun Ln, Magnolia, MS 39652. Operators mentioned are: Al/WA4EWV, Bill/K5YG, Bob/WN2E, Bruce/N5SIX, Daniel/KE5KDM and Danny/N5OMG. Visit their Web pages at:
http://www.kcvhfgridbandits.com/kc_vhf_grid_bandits_018.htm
http://w4abc.com/K5N.html

KP2/NP2, U.S. VIRGIN ISLANDS. Operators Larry/K3VX, William/W3WH, Ron/W3WN, John/W9UK and Carl/K9CS will active from here between May 28th and June 2nd. Operators will be signing homecall/KP2, but during the CQ WPX CW Contest, they will be signing NP2SH (possibly as a Multi-2 entry). QSL W3WN/KP2 via W3WN. QSL all others via K9CS.

LZ2009, BULGARIA (Special Event). Look for special event station LZ2009KM to be active from the HQ of the Bulgarian Federation of Radio Amateurs between May 1-31st. Activity is to celebrate national "St. Kiril and Methodius Day" (creators of Cyrillic alphabet). Operations will be on all bands and modes. QSL via bureau to LZ1PJ. Logs will be uploaded to LoTW. More information is available at: http://www.qrz.com/db/LZ2009KM

NEW ANTARCTIC WEB SITE. Bob, K4MZU, Antarctic Chaser and QSL Manager for several U.S. Antarctic Stations has set up an interesting Antarctic Web site at: http://www.k4mzu.net
On it you can see a very nice general Antarctic QSL Gallery and a more attractive U.S. Antarctic QSL Gallery, plus a wonderful Antarctic Hams and Bases Album. There are years of Antarctic passion in there! The site is in the beginning stages as there are more pictures coming in. An Antarctic DX Chasers Page is under construction and lets you see what kind of surprise is coming up! Also anyone having photos of U.S. Hams operating in Antarctica is encouraged to send them to K4MZU at:
oldbibles@...

OH0, ALAND ISLAND. Operators Juha/OH1JT, Jouko/OH1RX, Kari/OH2XX, Ari/
OH5DX, Tomi/OH6EI and Timo/OH6GLE will be active as OH0Z during the CQWW
WPX CW Contest (May 30-31st) as a Multi-Single entry. QSL via W0MM.

ON100, BELGIUM (Special Event). Members of the Trudo Radioamateurs Club
(TRC), in Haspengouw, will be active as ON100PES during the entire year
of 2009. Activity is to celebrate Belgium's two scientific event. First
is to celebrate the 100th anniversary since Adrien de Gerlache led the
first Belgian expedition to the Antarctic on board the Belgica between
1897-1899. The second event took place on February 15th, of this year
with the inaugural opening of the Princess Elizabeth research station.
This research station is the first of its kind that follows the concept
of "Zero Emission". The callsign represents three elements. In ON100PES
the ON is the prefix for Belgium, 100 is the centenary for the pole
expeditions and PES is the abbreviation for Princess Elizabeth Station.
The special event QSL card (double format) will only be sent to all
stations who send their QSL card to ON4TRC. There will be an award given
those stations who work ON100PES on five bands. Activity will be on HF,
VHF/UHF and 2m/70cm. PLEASE NOTE: WAP has given ON100PES and ON100PES/p
the new reference number (WAP-175) valid for WAP Awards (WACA,WADA & ASEA).
More details are available at the WAP Web site: http://www.waponline.it

QSL INFO AND NEWS.....
THERE HAS BEEN "ONE" REPORT. Someone reported receiving their K5D
Desecheo Island QSL card this past weekend. OPDX has NOT received an
official announcement yet (and it was too close to print time to verify),
but if true, it will keep the DXCC Card Checkers at the Dayton HamVention
busy. If you want to see a preview of the K5D QSL (as well as the
VK9DWX, ZS8T, and other) go to: http://sq8x.net

DON'T QSL VIA THE 3RD U.S. BUREAU! Fred Laun, K3ZO, Manager NCDXA/ARRL
Third U.S. Call Area QSL Bureau, reports that the following "should not"
be QSLed to the 3rd Bureau:
4L0ABC - K3PD was the QSL Manager, but became a "SK" on June 19th,
2008. NO QSL route known at this time.
4L0HQ - K3PD was the QSL Manager, but became a "SK" on June 19th,
2008. As to 4L0HQ, they understand that the new manager for
this station is UA9LP, so the 3rd U.S. Bureau now forwards
4L0HQ cards to him via the Russian Bureau.
5B/K3UY - The QSL info for this station is to the operator's home
callsign, RA3AUU.
7X5VRK - W3HC is NO LONGER the QSL Manager. As of April 8, 2008,
W3HC had retired from being a QSL manager. 7X5VRK has not
agreed to have anyone be his QSL Manager. The best advice,
QSL 7X5VRK direct, including sufficient means for return
postage.
HI8A - K3WGR is NOT the QSL Manager. For the last several years,
Chikin, the former HI8RV, has held the callsign HI8A. He
does NOT have a QSL manager and handles his QSLing duties
himself. Our understanding is that he does answer bureau
cards.
KO3A - Please note that the licensee of KO3A is YT6A. QSLs for

KO3A and 4O3A (ex-YT6A) go via AI4U (for USA/Canada stations)
or the Serbian Bureau.
KP2/W3AVO - Please be advised that the QSL Manager for this operation
is JA3AVO, the home callsign of the operator. They forward
such cards to the JARL Bureau.
LZ9W - AA3AX is NOT the QSL Manager. According to QRZ.com, the real
QSL Manager for LZ9W is LZ1ZD.
NP3U - QSL Manager is WP4U. PLEASE NOTE: Callsigns with the prefixes
KP3, NP3 and WP3 should go to Puerto Rico which has its own
QSL bureau at: Puerto Rico QSL Bureau, Box 9021061, San Juan,
PR 00902-1061. Puerto Rican stations are not served by the
3rd U.S. Bureau, and they have to forward cards received
for them to the Puerto Rican Bureau. Exceptions are WP3C,
WP3R, and NP4A which CAN be handled by this 3rd Bureau
because W3HNK is their QSL Manager.
SV/W3FN - (or W3FN/SV) Please note that the QSL route for this station
is the home callsign of the licensee, SV2BFN.
VQ9X - W3MR is NOT the QSL Manager. Please note that W3MR handles
VQ9 cards ONLY for his own VQ9 callsign, VQ9MR. QSL direct
ONLY.
WP4U - AA3BG is NOT the QSL Manager. Please note that WP4U handles
his own cards.
ZS4RY - K3IRV is NOT the QSL Manager for ZS4RY. QSL direct.

Fred states that for the QSLs which were received, the only recourse
(for most cards) are to forward such cards to their following perspective
QSL Bureau.

QSL T70A via: A.R.R.S.M. Radio Club, P.O. Box 77, 47890 San Marino,
REPUBLIC OF SAN MARINO. Activity during the ARI International Contest.
Operators were: I4UFH, IZ4DPV, I4YSS, IK4UPB, IK2NCJ, IW2MJQ and IZ4EFN.

NEW QSL ROUTE. Ted, K8AQM, reports that the QSL route for the V63TR
2008 operation is no longer K5ZM, but QSL V63TR only to K8AQM. Look
for V63TR QSOs to soon be up on LoTW.

HAVE PATIENCE! More QSL cards are still being received for the many
UA4WHX operations. Vlad is still sending them out. Bill, W2AY, reports
he received QSLs for UA4WHX's African Tour for 81 QSOs (Request was
sent July 2007).

PIRATE ALERT! Pasquale, IW0HEX, informs OPDX that he has been receiving
QSL cards via the bureau for 5Z4/IW0HEX for activity dated in August
2008, on 30 meters CW. He states that he has never been in Kenya and
this is someone abusing his callsign. DO NOT send for this QSO! All
info about Pasquale's radio activity can be found on:
http://www.iw0hex.it

ZF2BI QSLS. Jim, K4BI/ZF2BI, reports: "I am the QSL Manager for all
QSOs by ZF2MU (My first ZFcall, period 1988-2001) and ZF2BI (2002 to
the present date). My QSL policy has been and remains direct only
w/SAE and postage (green stamps). I do not respond to QSLs received

without them and the same for the many cards received via the Bureau."

QSLS VIA LOTW: D4C, KH7X, VQ9HB and TL0A

QSLS RECEIVED VIA MAIL: 5H1DF, 5N0EVR, 7Z1SJ, CO8LY, E51KAJ, E51QQQ, FK/JA1KAJ, HK0/EA7HEJ, JA1XGI/VK9X, JD1BMH, K5D, OA4O, T32BE, T88WW, V63WW, V73M, VK9DWX, VP8KF, VU2PHD, YI1RZ, ZF2NN and ZM1A

QSLS RECEIVED VIA THE BUREAU: None reported this week!

SOLAR CYCLE 24 (Ed. Or is 23 still?) WEB SITE. Some say we are still in Solar Cycle 23 (which mean the cycle is 13 years old), but anyway, you decide. A Web page is available for those who believe we are in Solar Cycle 24. It is put together by Kevin Gibeau, VE3EN, tracking the new solar cycle. This interesting site has plenty of information and updates every two minutes using a wide range of sources. Give it a look at: http://www.solarcycle24.com

SUITSAT-2 NEWS. Gould, WA4SXM, reports that they will be demonstrating the SuitSat-2 system at the Dayton HamVention. They will have a complete SuitSat system for demonstration at the AMSAT events. YOU DO NOT KNOW WHAT SUITSAT IS? Go to the following Web pages for the info: http://www.suitsat.org/ http://suitsat2.org/ http://suitsat2.com/ http://en.wikipedia.org/wiki/SuitSat http://www.issfanclub.com/node/5506

SV5, DODECANESE (EU-001). Ralph, DL9MWG, and his XYL are on their annual holiday, this time to the Island of Rhodes (EU-001). Look for Ralph to be active until May 17th. He will be using an IC-7400 w/100 watts and a G5RV antenna operating mainly on CW on all HF bands. QSL via DL9MWG, direct or by the Bureau.

TP60, FRANCE (Special Event). To celebrate the 60th anniversary of the Council of Europe, look for TP60CE to be active between May 8-10th. Activity will be on CW, SSB, RTTY and PSK. QSL via F5LGF. An online log search will be available at: http://ewwa.free.fr

VC2, CANADA (Zone 2/Special Event). Operators Lajos/VE3NE, Paul/VE3TA and Bob/VE3CWU will activate VC2A from Zone 2 in at Sept-Iles, QC, during the CQWW WPX CW Contest (May 30-31st) as a Multi-Single entry. QSL via VE3TA. VC2A is a special callsign being used to commemorate the 100th anniversary of Flight in Canada.

YOUNG BRIT CAME OUT AS WINNER OF RADIO ARCALA ESSAY CONTEST. In a press release by Jarmo, OH2BN: "It was in February 2009 when the team at Radio Arcala, OH8X launched an essay contest to get some fresh ideas from today's youth and their elders to boost recruitment to the ranks of Amateur Radio. Great participation was ensured and determining the winners took some effort from a multinational jury representing six nations. A 19-year old Briton, Mark Dumpleton, 2E0NCG came out as winner by a fair margin while two U.S. hams, John Scott Anderson, KC9OQO and Brian Wood, W0DZ , finished in second and third place respectively. Argentinian Diego Salom, LU8DX, was

recognized for his submission of the best Spanish language piece. You can read Mark's piece and his interview at <http://www.radioarcala.com> under the 'Young People Terms' button and get your personal inspiration to do your share for Amateur Radio."

You may have a handle, Rene, but I have two. They're just above my belt. I don't talk about them.

All other comments duly noted, and I concur, anything would be welcome today, on any band.

Notes in black

----- Original Message -----
From: Alan Leith
When I moved to a new location, just a couple of hundred feet from Lake Ontario back in the early 80s I installed my tower and 4-el 20M monobander and a DB10-15 atop that. One of my new neighbours came to my yard and after looking at those beams said to me, "I bet you can get some pretty distant TV stations with that." Cable was available and while there were a few little towers with TV antennas, this was something he'd never seen before. I asked him how he watched TV and he told me he had an antenna in his attic.
The other day someone commented on my 10m 5 el mono and I told them that it was for when the analog/digital switchover happens next month
When he came to see me a few weeks later to complain about TVI, I suggested it was time he invested in cable. He did. The next year I bought a car from him (he was a car salesman) and hopefully he thought at that time it was a good thing he didn't tick me off.

As for the Zed Zed Top thing, Mark, I like to, in a serious conversation, completely murder a word and quickly visually scan to see if the error was detected. I wouldn't, of course, do it in a situation where it was inappropriate. One of my favourites is "irregardless." Irregardless is a non standard contraction of irrespective and regardless and if used enough will become standard

As for Gotham antennas, I can't remember anyone ever admitting to me that they were using one. On the other hand, in my youth and inexperience, I often drooled over those ads. Don't recall anyone using one in L.A.
As for 2M lingo, there's so little activity on that band around here that I have dismantled my 2M rig. But I also used to gasp every time I heard someone say he/she was "destinated." But I think I may have said it, to be funny, at one time or another. I also probably used "we" in the royal sense but I've grown up.
Remembering back to AM 2 meters 'destinated' has always been used
 I also don't have a "personal" which I think is an import from CB but I often hear it nowadays on SSB. When I do have a QSO with someone who tells me their "personal" I go back and tell them I never had a "personal" but that I do have a name and it is.....
The 'first personal' comes from CB but we have 'handles' don't we?
And a final comment on Elmers. I have always helped those who wanted to get a license. In fact, I taught code to many classes and several of those folks went on to get tickets. And occasionally I am approached by someone who says he/she is interested in getting a ticket. I tell that person to call me. Hardly ever does my phone ring. And, BTW, I am a volunteer examiner in Canada.
My Elmer got me started, issued my first test for Technician and when I went on to pass the Extra exam at the FCC he couldn't pass - failed the theory so I spent some time with him and his next trip down he passed - what goes around comes around! I gave up Volunteer Examiner when I found some improprieties.
Today I can hear lots of stations on 20 CW but there's a couple of contests and QSO parties and nothing that tickles my fancy. As for SSB, I only go there when I'm desperate,
Desperate? You don't know that meaning until you only have 10 metres. At this point a JA would be welcome .... ..

From: Paul Dunphy
Topic: 9721 Message: 9765

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 May 03 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 123 Issued at 2200Z on 03 May 2009
IA. Analysis of Solar Active Regions and Activity from 02/2100Z
to 03/2100Z: Solar activity was very low. No flares were detected.
The visible disk was spotless.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 02/2100Z to 03/2100Z:
Geomagnetic field activity was at quiet levels.
IIB. Geophysical Activity Forecast: Geomagnetic field activity is
expected to be at quiet levels durings days 1 - 2 (04 - 05 May).
Field activity is expected to increase to unsettled levels on day 3
(06 May) with a chance for active levels at high latitudes due to a
recurrent coronal hole high-speed stream.
III. Event Probabilities 04 May-06 May
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF Green
IV. Penticton 10.7 cm Flux
Observed 03 May 069
Predicted 04 May-06 May 069/069/069
90 Day Mean 03 May 070
V. Geomagnetic A Indices
Observed Afr/Ap 02 May 003/005
Estimated Afr/Ap 03 May 003/005
Predicted Afr/Ap 04 May-06 May 005/005-005/005-010/012
VI. Geomagnetic Activity Probabilities 04 May-06 May
A. Middle Latitudes
Active 05/05/25
Minor storm 01/01/05
Major-severe storm 01/01/01

Al, please don't tell me that was on 80M. Wind storm tore up my 80 Mtr Delta Loop this morning, so I'm off that band until I can get it fixed. That's at the top of my list for tomorrow.

80M!!! You gotta be kidding, Mike. With my little inverted vee, I'm lucky to work Europe and South America. Well, that's not absolutely true, but I don't want to make you jealous. Seriously, my 80M score is dismal -- 177 worked and 156 confirmed. This small city lot is a killer.

WOW! You are ahead of me. I spend too much time on 30 meters, so my 80 score suffers. I never had any interest in 5BDXCC until recently, but with condx so bad I decided that was something to keep me busy until things improve. Now, I go along cherry picking the ones that are LOTW. I will try to finish 5BDXCC that way. I have 61 confirmed on 80, so have a bit to go, but it goes kinda slow since i'm trying to finish it up on LOTW.

I have to be careful with the "we" talk as well, since my wife is also licensed. I think the ham "we" drives me more crazy than any other word or "jargon" I hear on ham radio.

"We bought a new mic...."
"We have a blah blah blah here..."
"We worked 'em on ...."

When I hear that I'm always tempted to ask if he has a frog in his pocket!

It's interesting that one never seems to hear a YL say that unless she really means the plural form - i.e., she and her hubby are both licensed.

A number of people I meet seem somewhat envious that my wife is licensed (and chasing DX). It isn't all roses! We live on a rather small piece of property. Without making the place look really unusual, there's really only room for the one tower and a couple of pieces of wire. Consequently, although we have our own rigs and operating stations, we have to share the "antenna farm." It creates complications where, like yesterday, I was working the 7QP, INQP, MARAC CW and NEQP and surrender the antenna so Marsha can work TL0 on 12M. Fortunately, for those outside the respective areas, those contests are not the variety that create enormous high-count runs.

Got V8AQM verified via LotW yesterday as well - that made my day!

Amen. If it's heavy-duty DX, the linear gets turned on quickly. Otherwise, I've been running lots of contests lately with only 100W. Less noise and less futzing.

During one of the recent "biggies" I was pleasantly surprised when I was able to work a series of JAs on 40M (CW) running only the 100W. Openings to that side of the world from here are almost as rare as 10M openings. I do hear JM7OLW several times a week on 40M CW early in the morning around sunrise, but you can only work one guy so many times!

You have my sympathy! I've been licensed a little over 30 years and I've never had a decent antenna for 80M. The only time I ever owned any property suitable for a vertical with lots of radials was while my late wife was still alive. Although supportive of my hobby, she, at times, felt overwhelmed. An 80M vertical in the front yard would have been met by the "stare of death!" (One of her favorite expressions when she would tease me about something we were fussing about was - 'Don't stare at me with that tone of voice!')

Consequently, my 80M antenna has always been either an inverted vee, a 1/4 wave sloper, a doublet or a G5RV. Did manage to work 5BDXCC many years ago (#2269 in 1987), but only at 193 confirmed at the moment.

I really don't even lust for a beam on 80. Sufficient real estate for a four-square would be nice!

9774. Re: [DX-IS] KG4 callsign "rules" ?

Yahoo group: DX-IS (2009)
Date: 2009-05-04 12:05:49 UTC
From: Frank T Brady
Topic: 9727 Message: 9774

I just found yet another bug in my home brew logging program.
It had erroneously credited bands for Guantanamo Bay for qsos with
callsigns KG4WEL, KG4BBK, and KG4TUY.
Qsos with KG4RN and KG4SB were legitimately Guantanamo Bay, while the
others were all USA.

I was able to add code that looks up all KG4 callsigns in QRZ to verify
they are actually in Guantanamo Bay.

However, if a KG4 callsign can operate in Guantanamo Bay and USA, there
is no way to automate the identification.

Are there any 'rules'?
e.g., KG4xx is Guantanamo Bay and KG4xxx is USA?

I'll be calling ARRL when they are in - but I was wondering if anyone
else has this problem?

Thanks and 73
Frank w0ecs

A lot of people complain about the use of "we" and I admit it doesn't make a lot of sense. That said, is it really a CB think or a Ham thing? I've heard it used by a lot of old timers who were 40-50 year veterans when I got licensed 23 years ago. I always thought it as part of the amateur culture. All of Hugh Cassidy's DX Bulletin articles were full of it from 1967-1978. Whatever its origin, and however much it irritates some people, it has been around a lot longer than most of us have been on the air.

I believe this falls in the category of the 73 vs 73s argument.

Does anyone know where "we" really came from? I never operated CB and never listened to CB conversations so I have no idea if it was/is used there. Even if it is, I assume it was use before or at the same time by Hams.

We is correct it means Me, Myself, and I.

Although no frogs here I do remember being asked if I had a squirrel in
my pocket
and that was when I was a kid back in antiquity.

The use or misuse of we is not confined to ham radio or CB, I hear it
all the time.

9779. RE: [DX-IS] Use of "we"

Yahoo group: DX-IS (2009)
Date: 2009-05-04 15:54:36 UTC
From: Nelson Moyer
Topic: 9777 Message: 9779

The plural pronoun 'We' was introduced editorially to avoid the omnipotent 'I'. English handbooks refer to the practice as 'the editorial we'. It was intended to generalize the opinion of the author or reflect opinion of the editorial team of a newspaper or other like-minded individuals. While it is not grammatically incorrect to use 'we' in place of 'I' in the context of an individual's statement, it sounds artificial and English handbooks suggest that it be avoided, as it is unclear exactly who 'we' are. 'We' most certainly does not mean 'me, myself, and I'!

When I hear someone say 'we' inappropriately, I generally ask if they have a mouse in their pocket, since it's unclear who 'we' are.

I just found yet another bug in my home brew logging program.
It had erroneously credited bands for Guantanamo Bay for qsos with
callsigns KG4WEL, KG4BBK, and KG4TUY.
Qsos with KG4RN and KG4SB were legitimately Guantanamo Bay, while the
others were all USA.

I was able to add code that looks up all KG4 callsigns in QRZ to verify
they are actually in Guantanamo Bay.

However, if a KG4 callsign can operate in Guantanamo Bay and USA, there
is no way to automate the identification.

Are there any 'rules'?
e.g., KG4xx is Guantanamo Bay and KG4xxx is USA?

I'll be calling ARRL when they are in - but I was wondering if anyone
else has this problem?

Thanks and 73
Frank w0ecs

9785. 4U1UN in 1992 June VHF contest

Yahoo group: DX-IS (2009)
Date: 2009-05-04 16:34:45 UTC
From: John Geiger
Topic: 9785 Message: 9785

Does anyone on the list know who the operator(s) were for 4U1UN in the 1992 June VHF contest, or who might have the logs for that operation? Still hoping for a 4U QSL on 6m for a new DXCC confirmation there.

Just to clarify, I didn't mean this to look unfavourably on CB operators. I just came up the SWL/"listening to the RO on the ship" ladder as opposed to the CB ladder. Many good operators were CBers, and I'm told by a lot of the clubs that the guys who "get things done" are often EX:CB ops.

CB never appealed to me, and my first radio transmission was with my Maritime Compulsory Radio license (I used to relay the weather conditions to the Coast Guard stations because the ship's operators got sick of doing it, and I thought it was the greatest thing in the world!)

Anyhow, a lot of Hams tend to use the term CB as though it a negative thing. I don't see that, but having no personal knowledge of CB, I can't say for sure. I think anything we do that seems elitist is not a good thing for the hobby. I was called elitist by a list member for mentioning my DXCC totals, so you never know when or what you say will offend others.

Seeing as we are on the topic of Ham grammar, why do we call our radios "rigs?" A rig conjures up visions of a home made piece of junk! I don't think, outside the context of Ham radio, a $10,000-$12,000 radio like a IC-7800 or a FT-9000 would be referred to as a "rig."

It is almost certainly part of the tradition that grew out of guys building their own transmitters and receivers from surplus gear. Indeed some of the contraptions they built, while they worked, were indeed rigs!

What I wouldn't give for a few sunspots right now . . . sigh.

I used CB in the 60's & 70's, mainly for desert search and rescue. My mentor told me to talk on CB the same way as on the telephone (sans expletives) so I never used CB jargon like 73rds & 88's, good buddy, first personal, contact, we this and that and a myriad other terms. Likewise on the ham bands. I don't use fine business, working conditions, OM or WB6PSY for ID (what else is a callsign for if not for id?). Don't use 'handle' either as name works just fine. I don't tell the rare DX my name, antenna and height, weather conditions and family names, etc. I may have said 'destinated' on 2m though. The Urban dictionary defines destinated as arrived at ones intended location. One of these years a FJ ;-)
OBTW, I've asked this before with no response. How does one send 73's on CW?

I don't send "73s" (plural) on CW. I just send "73". But come to think of it, I have heard a few stations send "MNI 73".

The "161" which I believe was started by the FOC seems to be more commonplace among people who aren't in FOC these days.

The 73 vs 73s (not 73's) argument has been made many times. Yes, the literal translation of 73 is "Best Regards" and saying BEST 73s logically expands to BEST BEST REGARDSS. However, I have images of QSL cards dating back to 1920 that are signed 73s. This evidence has been used to further the argument of the 73s camp. The position taken is that it was done 80-90 years ago and thus is part of Ham radio history.

I don't use 73s because of the literal expansion it creates as described above, but some do. They claim if it was OK for 1AW to do it, then it is OK for them to so it.

Realise we are amateurs, not professional telegraphers. Ham speak and Ham CW is not the same as the military and commercial ROs used -- close, but not the same.

161 indicates FOC membership. I suppose we all can use it (just as we all can write BEng or PhD after our name), but it doesn't make us an FOC member, an engineer or a doctor!

Well guys, I confess, I was once a CBer and thank God for it, I would probably not be a ham today it wasn't for CB radio.

I used to work the world on 11 metres back in 1979/80 (end of high school years) and just loved it and somewhat miss those days...young, carefree and so excited about hearing even an Italian station!

I always smile when I hear hams disassociating themselves from any other form of radio, whether it be CB, SWLing or commercial operating for that matter. Look, I know we have a great hobby and we are specially privileged to enjoy the airwaves in the way that we do but we are also humans just like everyone else...

Bring on the sunspots and we can start talking about DX again!

Btw. If you will indulge me, I finally worked Alain TR8CA on 20m CW last weekend, after chasing him for many months, I would like to work him on 40m CW at around 2300z but he said that was too late for him. Also worked Garry, ZF2ZB Short path this morning on 20 SSB for a new one on SSB.

I think everyone has agreed that 3Y0Q must have been a pirate. Check the cluster history, but A35KL showed up on 40m CW two days ago, I think around 1000 or 1100z for those interested. 8Q7SV has been very weak here, not sure why, usually the 8Qs pound into VK6. 3A2LF must have a hill on the wrong side of him, I could just barely hear him on 40m this morning. So while you guys in the northern hemisphere are getting DX on 6m and the like, we are sitting in the doldrums down here...twiddling our thumbs...

We are apparently a very small club! I never owned either a CB or an 8-track!

As a population "sub-group" we (hams) are indeed a very small subset of the general population. Still, it's amazing how many people see my antenna (either house or truck) and assume it's "like CB!"

Reminds me of the old days where somewhere new where their favorite radio station was located on the dial - "It's right there by the 'M' in Motorola!"

I never operated in the CB band but I have nothing against its legal use. I'm sure it could be fun.

There is an entire shortwave spectrum of interesting things out there and the ham bands are only a tiny part of it. I have always been interested in what's happening in that whole spectrum, not just the ham bands. I often wonder why hams would not be interested in the commercial shortwave broadcasts, utility transmissions, spy numbers stations, etc.

I got my code speed up to the point of passing the Extra exam back in 1971 by copying the commercial Morse stations that abounded on shortwave back then. KPH, NSS, NAA, WLO, WOO ... all gone to digital now except for the Night of Nights, an annual event where the old CW ops get to use CW from these stations for nostalgic purposes.

I first came across the Cuban spy numbers transmissions that take place on 4028 kHz over 30 years ago. I had no idea what it was but it fascinated me. I eventually found out what it was. They still use that frequency to this day.

There are a lot of "mystery" CW beacons operating in the vicinity of 4080 kHz which I can hear at night. They are all small transmitters (running anywhere from milliwatts to a watt) powered by batteries and charged by solar cells, set up in random locations in the southwest USA desert. I doubt the FCC cares about them because they have never interfered with anything I've heard. One sends "TEMP IN NN TEMP OUT NN" where TEMP IN NN" is the temperature inside the transmitting unit (the NN being a two-digit number) and "TEMP OUT NN" is the temperature outside. There's also a little beacon on 3450 kHz. I believe it sends "OK" in CW. Not sure if it is in Oklahoma or not.

Doesn't anyone else find these interesting?

73, Zack W9SZ

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 May 05 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 125 Issued at 2200Z on 05 May 2009
IA. Analysis of Solar Active Regions and Activity from 04/2100Z
to 05/2100Z: Solar activity was very low. No flares were detected.
The visible disk was spotless.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 04/2100Z to 05/2100Z:
Geomagnetic field activity was at quiet levels.
IIB. Geophysical Activity Forecast: Geomagnetic field activity is
expected to be quiet to unsettled, with a chance for isolated active
levels at high latitudes, on days one and two (06 - 07 May) due to a
recurrent coronal hole high-speed stream. Predominantly quiet levels
are expected on day three (08 May) as the effects of the high speed
stream decrease.
III. Event Probabilities 06 May-08 May
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF green
IV. Penticton 10.7 cm Flux
Observed 05 May 068
Predicted 06 May-08 May 070/070/070
90 Day Mean 05 May 070

Paul

Not sure if we need any sunspots:

Talked to UK7AZ & JT1CO today and XE2YHR on 12Mtrs last evening from MA.

Worked a number of new ones for my club from ME on a wire and 100w before I left last month including V8AQM, VR2XMT. S04R, TL0A, 5N1NH, etc
Almost got Bruce XW1B on SSB but even though I had 57 copy he could only get my W1x. We exchanged emails after he tried so hard to pull me out since I wanted to thank him for trying.

The nice thing about the poor condition is that noone is on looking for DXs. I grabbed Victor UK7AZ right through a weak EU pileup (he turned his antenna to improve the signal)Not one call from NA even with my spot.

Soooooooo if everyone will keep moaning about these statistics and stay off the air I might actual get to increase my numbers.

Bob KB1JZU

9804. Congratulations on the DX!

Congratulations on all of those conquests, Bob! Anything in the Far East is rare from the east coast, and especially places that have low Ham populations like V8 and XW. You will get Bruce as he is a former W4 who does make an effort to work NA, knows propagation and has a great station. If not now then during the fall equinox. You raise a good point that these dire predictions (and dismal conditions) tend to keep the competition away! Maybe, in some weird way, the lack of sunspots is making it easier to work the DX that is on.

I had a lot of trouble working TL0A (on 18 MHz about a month ago, haven't tried any other bands.) That is a nice catch. In the old days they were referred to as the terrible Ts (TN, TT, TL, TR, TU, TY, TZ, etc.) Hard to get there, hard to get permission to put them on from the local authorities, anyone who was on had heavy QRN, etc. A lot were activated by Dick McKercher, W0MLY (SK.) I always work them when I hear them because I know historically many DXers waited years to get some or all of them.

These "Report of Solar-Geophysical Activity" messages that I'm now sending to the list once a day are automated and originate from U.S. Dept. of Commerce, NOAA, the Space Weather Prediction Center and the U.S. Air Force.

I suspect I could send the same one, day after day and month after month and nothing would change! The 90-day mean flux and 3-day prediction seems to vary between 69-71 and there isn't much in the area of geomagnetic activity. Whenever the cycle spins up I'm hoping they will be more useful.

Anyhow, hope you get XW1B sooner rather than later. The QSL manager is Champ, E21EIC, in Bangkok and he is as good as gold. You always get a QSL.

73, Paul VE1DX

9808. DX PILEUPS

Yahoo group: DX-IS (2009)
Date: 2009-05-07 02:44:12 UTC
From: AD5VJ Bob
Topic: 9808 Message: 9808

Here is the scenario:

You are the DX station and your CQing using morse code. You work a couple of stations and then a couple more, then your spotted and
within about 3 mins, it seems that all of Japan (or whoever) is sending their call and a feeding frenzy is on.

The fun has begun :0)

Now -- Do you:

1) Listen carefully and work whatever you hear that is at least three consecutive letters.
2) Listen until you get a stations full call sign.
3) Request all stations standby and work the sections.
4) Announce you are going split to break it up a bit.
5) Narrow down your filters and take only what you can hear.
6) Work only the stations transmitting at your speed or slower.
7) None of the above something different entirely.

Bob AD5VJ

From: Dave AA6YQ
Topic: 9808 Message: 9810

In my experience with CW feeding frenzies, coming back with anything short of a full call risks a painful, drawn-out process that gets everyone frustrated. I stay simplex and work the edges as long as I can maintain a good rhythm. If things start to drag, I gradually listen higher and then start sending "up 1" once the number of callers who followed me dwindles.

The path from Asia to the Caribbean can be difficult, so I do call "CQ AS" when there's an opening.

73,

Dave, FJ/AA6YQ, KP2/AA6YQ, V4/AA6YQ, 8P9RY

There are as many different ways to operate effectively as there are DX stations who cause pile-ups. All of your points are possibilities and there are many others as well.

The DX operator who is in control will offer his way to the waiting hordes. The more experience he has determines how the DX handles the crowd. The DX operator who lets the pile-up get out of hand will soon go QRT or find a better way.

Or, you could be like K4FJ who called UE6HPR on 30M this evening until, having bulldozed his way through and causing me to make a second call to confirm my QSO, until he finally got through. You can imagine what I thought his phonetics should be. The air was blue in my shack when this bozo called the UE6 while he was calling me. This moron was a one-man pile-up and I, thankfully, got confirmation from the UE6 that I was in his log.

Now, there's a guy who was in control. It was clear to me that K4FJ was on steroids or something.....

Hi Bob,

Well, every operator will have their own method on this and you will have to find out what works for you... only experience can teach you this...

I rarely get megapiles but when it does happen I tend to narrow down the filter, then I find, the clever ones start to call above your freq as they realise what's going on, so I will move the RIT up and take the ones I can hear just a bit higher, moving towards 1Kc up, once I hit 1Kc up I will start saying QRZ up 1. I try to grab the complete call before going back to them and try to work the loudest first. But, you, may want to work the rarest first or weakest...just bear in mind that if you become too selective the pile can get angry...

Time is of the essence, the longer you take to get back to a station, the angrier the pile can get. I think you want to try and get a rhythm going, as long as you are getting someone in a reasonable time on a regular basis, most will be comfortable with that...

In all of that, you have to remember you are the one in control, don't let them rule you! But having said that if you become too demanding your pile will diminish...unless you are very rare...then by default you have more control and can be more demanding/controlling...

The JA pileup is usually a good experience, most JA operators will only respond to you if you have their call exactly correct, they are very courteous and well mannered (orderly) bunch of operators....having said this some EU pileups can be very challenging...

Good luck, (oh and by the way, you may not get many experienced ops. respond to your email as some will regard it as a closely kept secret, you may get a better response by emailing them directly on an individual basis if you wish to do so).

I would be interested in more tips myself, if anyone else would like to offer...

> will soon go QRT or find a better way.

Man this comment reminded me sooo much of when I first got on Johnston Island in 1987. I had zilch experience for being a Dx on 'the
other side' and it was not at all what I had expected.

I had worked DX stateside, and I learned very quickly, that was one thing. But being on 'the others side' was verrrry much a
different world. When the pile started I couldn't make out a dit from a dah it was so crowded.

Confession, the first two times I sat down and I called CQ that second day on the Island (after checking in, ect) - I was scared to
death as the stations calling quickly became one big mess to copy and just turned off the rig. A fellow Islander and an experienced
DXer however, would not let me settle for that (thank G_d)

I found myself finally 'getting into the swing of things' and again thanks to the advice of a much more experienced Dx operator who
is from Alaska and still lives there, I was able to understand in short order that I had to take control or there would be none.

It was not like me to do that at first, then as he pointed out:

' I know you want to give everyone a contact and your a nice guy, but if you dont start controlling the pileup, no one is going to
get a contact'

'You have to guide them through the pile up by your clear directions, or they wont get through at all'.

So, I quickly learned, control was good in this case for everyone.

No, I would not call myself a master, I only worked from the Island for two years and still when I left had lots and lots to learn
about working a pile up.

I ended up doing as Al said however, and that was
>
> # 4) as soon as the pileup begins, and only work as per 2)
>

But I always had a nagging feeling in the back of my head "is there a better way today".

Tell you what though if you've never worked CW on 'the other side' and you ever have the opportunity, take it, it is much worth it.

9815. Re: DX PILEUPS

Yahoo group: DX-IS (2009)
Date: 2009-05-07 09:59:43 UTC
From: Art Burke
Topic: 9808 Message: 9815

My personal experience indicates you left out a possibility (although that's what Al picked up on!):

ALL OF THE ABOVE!

I agree with Dave - pick up full calls as much as possible, and encourage full calls when possible. Go split sooner rather than later!

If you're working in an environment when you're on the air on a regular basis, and experiencing pileups virtually every time you're on the air - go split as soon as you get on. When the hordes hear you working split every time you're on the air, there should be less stations trying to call you simplex. It won't take long for the gang to "expect" that you're working split.

That said, I'm simply amazed how many times I hear a pileup and the above does NOT happen! Something like K5D comes on the air and you hear someone calling simplex and the frequency cops go berserk. During a time like that I ask myself:

1. Why doesn't that station realize that if he can't hear *anyone* the K5D is coming back to that they are very likely working split?
2. Why would virtually *any* station assume that a large dxpedition to a rare or semi-rare location would NOT be working split?

Yes, there are exceptions to both the above, but, by and large, they seem to be very much the norm.

There's one other "rule" I use personally as much as possible. My technique has been to "work and move," i.e., work someone and then tune up higher (or lower) to work the next station. I have no problem with someone figuring out my pattern and "lurking" on an empty freq - that's part of the plan. But I despise tail-ending! Most people don't really seem to know how to do it properly. If it becomes clear that I'm not working two in a row on the same freq, it's very unlikely that I'm going to work any tail-enders! In a real jammed pileup, I like to try to spread 'em out 1 to 2 kHz. It's amazing how many CW signals you can hear across a single kHz!

In a contest environment, all bets may be off. This happened to me recently. You may have no room to go split. And if you suddenly discover you're a popular mult, the pileup seems to call almost incessantly (apparently gentlemen check their credentials at the door in a contest!), making it difficult for them to hear who you're coming back to. During the Russian DX contest a few weeks back that happened to me on 40M CW. Despite wading through the pileup at what seemed like a glacial pace, I was pleasantly surprised to discover I had worked almost 60 in an hour. Outside two humongous pileups, the rates were well over 100.

Marsha (K4IRI at the time and now N4BU) did a great job with her SSB pileups (and there were many!). Often she would pick up a partial and then another partial and you would hear something like:

"The Lima Whiskey please stand by. You're next. Who's the Alpha Papa?"

I would find that cumbersome as hell on CW, but it isn't too difficult on SSB. She said she heard someone else do it and it seemed like a good idea!

In the last couple of years, I've heard inexperienced amateurs visit rare or semi-rare places. Their inexperience showed up in their initial operating efforts. Over the period of a few weeks, you could hear them grow and mature as DX operators. Fun stuff!

Good luck with your own pileups.

Subject: [DX-IS] DX PILEUPS

Here is the scenario:

You are the DX station and your CQing using morse code. You work a couple of stations and then a couple more, then your spotted and
within about 3 mins, it seems that all of Japan (or whoever) is sending their call and a feeding frenzy is on.

The fun has begun :0)

Now -- Do you:

1) Listen carefully and work whatever you hear that is at least three consecutive letters.
2) Listen until you get a stations full call sign.
3) Request all stations standby and work the sections.
4) Announce you are going split to break it up a bit.
5) Narrow down your filters and take only what you can hear.
6) Work only the stations transmitting at your speed or slower.
7) None of the above something different entirely.

ARLD018 DX news

ZCZC AE18
QST de W1AW
DX Bulletin 18 ARLD018
>From ARRL Headquarters
Newington CT May 7, 2009
To all radio amateurs

SB DX ARL ARLD018
ARLD018 DX news

This week's bulletin was made possible with information provided by NC1L, QRZ DX, the OPDX Bulletin, DXNL, 425 DX News, The Daily DX, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

AZERBAIJAN, 4J. Members of the Azerbaijan Radio are QRV with special call 4K1V in commemoration of ''Victory-64'' until May 19. Activity is on all bands and modes. QSL via UA3FDX.

UNITED NATIONS HQ, 4U1UN. Henry, KT1J plans to be QRV as 4U1UN on May 8 and 9. He will be active on 6 meters. QSL via HB9BOU.

CROATIA, 9A. A group of IOCA members are QRV as 9A0CI from Palagruza Island, IOTA EU-090, until May 16. They also plan to activate Mala Palagruza and Kamik Od Tramuntane as 9A/home calls. QSL via DE0MST.

PORTUGAL, CT. Members of ARAL will be QRV as CS5FAT from May 11 to 13. QSL via CT6ARL.

BELARUS, EU. In commemoration of ''Victory-64'' stations EV5V, EV6ZK and EV8DP are QRV until June 20. Activity is on all bands and modes. QSL via UA3FDX.

FRANCE, F. In celebration of the 60th anniversary of the Council of Europe, station TP60CE is active until May 10. Activity is on all bands using CW, SSB, RTTY and PSK. QSL via F5LGF.

ENGLAND, G. Members of the Bittern DX Group are participating in the National Mills on the Air and are QRV as GB1WM until May 10 from Weybourne Mill in Weybourne, North Norfolk. Activity is on all HF and VHF bands, including some digital modes. QSL via operators' instructions.

WALES, GW. Members of the Barry Amateur Radio Society are QRV as GB100BP until May 31 in celebration of 100 years of British Petroleum. QSL via GW0ANA.

DOMINICAN REPUBLIC, HI. Ronny, OT4R, will be QRV as HI7/home call during his holidays from Punta Cana, IOTA NA-096, from May 9 to 30. Activity will be on 20, 15 and 10 meters. QSL to home call.

BELGIUM, ON. Members of the ''Trudo Radioamateurs Club'' in Haspengouw are QRV using the special callsign ON100PES until the end of 2009 to celebrate the 100th anniversary of the first Belgian Antarctic expedition led by Adrien de Gerlache. QSL via ON4TRC.

BANGLADESH, S2. Ramon, DU1UGZ is now QRV as S21XR until June 20. QSL to home call.

SWEDEN, SM. A team of eight operators will be QRV as 7S6W from IOTA EU-043 from May 14 to 17. Activity will be on 80 to 2 meters with four stations. QSL via SM6WET. In addition, Bernd, DL8AAV is QRV as SD1B/7 until June 12 from Oeland Island, IOTA EU-037. QSL to home call.

MICRONESIA, V6. Operators JA7HMZ and JH7IOS will be QRV as V63DX and V63CW, respectively, from Pohnpei, IOTA OC-010, from May 11 to 16. Activity will be on 40 to 6 meters. QSL to home calls.

VANUATU, YJ. Mike, YO8CYN is QRV is QRV as YJ0EM until May 25 and is active in his spare time. He is generally active on 20 meters using SSB. QSL to home call.

THIS WEEKEND ON THE RADIO. The CQ-M International DX Contest, NCCC Sprint CW Ladder, VK/Trans-Tasman 80-Meter Phone Contest, EUCW Fraternizing CW QSO Party, VOLTA World Wide RTTY Contest, FISTS Spring CW Sprint, Nevada Mustang Roundup, 50 MHz Spring Sprint, SKCC Weekend CW Sprint and the RSGB 80-Meter Club Data Championship will certainly keep contesters busy this weekend. Please see May QST, page 80, and the ARRL and WA7BNM contest web sites for details.

9819. detecting future sunspots with Stereo

Yahoo group: DX-IS (2009)
Date: 2009-05-08 05:10:29 UTC
From: Dave AA6YQ
Topic: 9819 Message: 9819

Solar flux is the product of sunspots on the sun's earth-facing hemisphere. The sun rotates every ~27 days. When a sunspot rotates out of view, we can assume/hope that it will appear again on sun's opposite limb ~13 days later, but it could shrink or disappear during that interval. New sunspots also form on the solar hemisphere facing away from earth, rotating onto the earth-facing hemisphere as much as 13 days later.

In October 2006, NASA launched two identical spacecraft destined for solar orbit: one ahead of the Earth, and the other trailing behind. Their objective is to trace the flow of energy and matter from the Sun to Earth, and to reveal the 3D structure of coronal mass ejections. This mission, known as STEREO, also provides alerts for Earth-directed solar ejections because the two satellites provide a view of the solar hemisphere not visible from earth. They also detect sunspots.

At present, the spacecraft known as Ahead is 48 degrees ahead of earth in its solar orbit, and the spacecraft known as Behind is 47 degrees behind earth. In this diagram, Ahead is labeled A in red font, and Behind labeled B in blue font:

<http://stereo.gsfc.nasa.gov/where.shtml>

The sun's left-to-right rotation means that Behind gets a preview of what's about to rotate into the sun's earth-facing solar hemisphere. With a 47 degree separation, that preview is (47/360)*27 => 3.5 days. Ahead and Behind will continue to separate; two year from now, Ahead will be 90 degrees ahead of earth in its solar orbit, and Behind will be 90 degrees behind earth. This will provide a complete view of the solar hemisphere facing away from earth, enabling us to monitor the birth, growth, shrinkage, and death of sunspots there without interruption.

This web site shows the latest solar images from Ahead and Behind:

<http://stereo.gsfc.nasa.gov/>

As you can see, Behind's image shows a pair of new spots about to rotate onto the earth-facing solar hemisphere. Let's hope they are cycle 24 spots, and a harbinger of good things to come.

Assuming the above web page is updated frequently, STEREO should provide DXers with an excellent tool for predicting solar flux.

73,

Dave, AA6YQ

09 May 2009 A.R.I. DX Bulletin
No 940
==========
*** 4 2 5 D X N E W S ***
**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

5B - Jan, OZ1IIL will be active as 5B/OZ1IIL from Cyprus (AS-004) on 9-16 May. On 10 May, starting around 10 UTC, he will operate from the lighthouse at Paphos Point (ARLHS CYP-005). Updates on activity from other lighthouses will be posted at www.oz7aei.dk [TNX OZ7AEI]
GD - GB5LB is a special event station on the Isle of Man (EU-116), to promote awareness of the activities of the Royal National Lifeboat Institute. Look for activity on 10 May, 4 June, 4 July, 12 July, 26 July. QSL direct to Port St Mary Lifeboat, The Boat House, Lime Street, Port St Mary, Isle of Man IM9 5EF, UK. [TNX VA3RJ]
GM - Celebrating the 10th anniversary of the Scottish Parliament, the Cockenzie & Port Seton Amateur Radio Club (http://www.cpsarc.com/news.php) will be running special event station GB10SP on 16-17 May. Operations will take place from the Scottish Parliament at Holyrood, Edinburgh, between 9 and 17 each day. QSL via GM4UYZ.
JA - Ten special event stations (8J040M-8J940M) from each callsign district of Japan will be active between 16 May and 20 July to celebrate the expansion of the 7 MHz band in Japan. QSL all stations via the JARL bureau. [TNX VA3RJ]
LZ - Special event station LZ50BNT will be operated until 31 December to celebrate the 50th anniversary of the Bulgarian National Television, the national public television service of the Republic of Bulgaria. QSL via LZ1HA, direct or bureau. [TNX LZ1HA]
OH - Special callsign OF5POPOV will be aired on 14 May to commemorate Russian physicist and radio pioneer Aleksandr S. Popov. QSL via OH5VX. [TNX OH5FFT]
ON - 9 May is Europe Day, and the European Institutions are open to the public to show their activity and celebrate the project of the European integration. Look for OR5EU, the European Union Amateur Radio Club in Brussels, to participate in the celebrations and be active on 40-10 metres SSB and digital modes. QSL via the UBA bureau. [TNX ON8VM]

PY - A number of Brazilian special contest callsigns are expected to be QRV during the Manchester Mineira All America (MMAA) CW Contest, which will be held on 16-17 May [425DXN 935]: PP4W (PY4PW), PQ4F (PY4FQ), PQ8W (PY2WAS, from the rarest Amapa State), PR5W (PY5FB), PT5J (PP5KR group), PT5M (PY5MJ), PW1W (PY1WW), PW2B (PY2HL), PW2P (PY2XAT), PX8XL (PY8MGB), ZW1V (PY1VHF), ZW3F (PY3VK) and ZW4KL (PY4KL group). This year's event is still for stations in South and North America, in 2010 it will be world wide. [TNX PY4WAS]
S2 - Ramon, DU1UGZ did operate as S21UGZ [425DXN 937] on 2 and 3 May, before being issued (on 6 May) another callsign, S21XR. He expects to remain in Bangladesh until 20 June, and to be QRV in his spare time. QSL via home call. [TNX The Daily DX]
SM - A team of eight operators will be active as 7S6W from IOTA group EU-043 on 14-17 May. They plan to operate on 80-2 metres with four stations. QSL for this activity via SM6WET, direct or bureau. [TNX SM6WET]
SP - The amateur radio club of QTC, the Polish Radio Amateurs' journal (SP4KDX), will be active as HF59ED on 8-15 May to celebrate Europe Day and the 59th anniversary of the European Union. QSL via SP2FAP and eQSL.cc [TNX SP2FAP]
SP - Special event station 3Z11EQSLCC will be active on 9-12 May to celebrate the 11th anniversary of the Electronic QSL Card Centre. QSL via SP2FAP (and eQSL.cc, of course). [TNX SP2FAP]
UA - A large number of Russian stations using special prefix RP (where the letter P stands for "pobeda", i.e. "victory") will be QRV until 10 May to celebrate the 64th anniversary of the end of World War II. Expect many of them to be active during the 53rd CQ-M International DX Contest, to be held on 9-10 May (rules at http://www.srr.ru/CONTEST/cq_m_9_eng.php)
ZK2 - Chris, ZL1CT (GM3WOJ) is confirmed to be active as ZK2V from Niue [425DXN 923] next week. If the weather cooperates, he will land on Saturday afternoon (16 May), which is early Sunday UTC. Chris plans to be QRV until 7 UTC on 19 June. His expedition aims to to give as many stations as possibile their first QSO with ZK2. To maximise QSOs, he will concentrate on CW and SSB on 80, 40, 30, 20 and 17 metres. Further information and log search can be found at http://www.zk2v.com. Chris has been told he will have Internet access from his QTH. If so, his plans are to upload logs to LoTW on a daily or every other day basis. QSL via N3SL, direct or bureau. [TNX N3SL]

425 DX NEWS MAGAZINE ---> The latest issue (April 2009) is now available at http://www.425dxn.org/monthly/index.html. Articles and pictures should be sent to Nicola Baldresca, IZ3EBA.

EUROPEAN CASTLES DAY ---> The eighth edition of the European Castles Day will be held on 17 May between 6 and 16 UTC. Several stations are expected to operate from fortresses and castles in France, Belarus, Belgium, Germany, Italy, Russia, Spain, Portugal, United Kingdom and Switzerland. Information on the event can be found on Jean-Pierre's (F6FNA) web site at http://f6fna.club.fr/jecruleanglais.html

QSL GALLERY ---> The large collection of QSL cards on Les Nouvelles DX's web site has been updated. Twelve different galleries include cards for The ten Most Wanted DXCC Entities (302 QSLs), the 58 deleted DXCC entities (950 QSLs), obsolete prefixes (2578 QSLs), stations from Magrebh from 1947 to 1962 (308 QSLs), Antarctic bases (744 QSLs) & TAAF (Terres Australes and Antarctiques Francaises, 246 QSLs), the various French DXCC island Entities in the Pacific Ocean (248 QSLs) & the Indian Ocean (95 QSLs), pre-1945 countries (595 QSLs), French Departments (527 QSLs) and USA (50 QSLs), plus a gallery for cards not accepted by DXCC (106 QSLs). Several cards are still needed and your participation is encouraged - please visit http://LesNouvellesdx.fr and send your comments to lesnouvellesdx@... [TNX F6AJA]

QSL 4X0WFF ---> The QSL route is via 4X4JU for direct requests only. Bureau cards will be sent automatically via Global QSL (http://www.globalqsl.com/). [TNX 4Z5KJ]

QSL 5H3RK ---> Ralph (C93Q, Z21HS, 9J2RK, SM0LRK, VK4VB) will be going QRT from Tanzania in late May. Effective immediately, QSL cards should not be mailed to Ralph's address in the US any longer, but to Australia: Ralph Karhammar, 6 Sevenoaks Street, Taringa 4068, Australia. [TNX The Daily DX]

QSL TA7KI ---> The QSL route for contacts made during the recent ARI International DX Contest (2-3 May) is via TA3YJ, direct or bureau. The operator was TA3J/7, whose log search can be found at http://dx.qsl.net/logs/index.html [TNX TA3YJ]

UN2C ---> Vlad, UN6T says that Nick, UN2C no longer uses P.O. Box 121, which has been closed for some time now. Cards should be sent via the bureau. Those who cannot wait or have no access to the bureau system might want to contact Vlad and see if he can help.

+ SILENT KEYS + CQ DX Hall of Famer Albert "Lee" Bergren, W0AR (ex-W9AIW and W0AIW) passed away on 1 May at 93 years of age. "An electronics engineer, author, designer and advisor with special accomplishments in the field of antenna and radio amplifier design", ARRL says, "Bergren led or participated in many of the first Amateur Radio DXpeditions".
Other recently reported Silent Keys include David L. Vest (KZ4G), Paulo Reboucas Da Silva (PY6PRS), Nikolaj V. Goldinov (RW3QI), Sandy Donahue (W4RU), Glenn Eisley (W6NDR) and Marion J. Henson (W6NKR).

To all radio amateurs

SB PROP ARL ARLP019
ARLP019 Propagation de K7RA

A cycle 23 spot appeared for two days, April 29-30, in an area that soon rotated out of view. Sunspot numbers were 15 and 12, but for the last seven days we've seen no spots. This may end soon, and we get the advance word because of the STEREO mission, which is gradually able to see more and more of the sun not visible from earth. See the current position of the two STEREO satellites at http://stereo.gsfc.nasa.gov/where.shtml.

On May 5-6 the STEREO B satellite was able to see an eruption from an active region around the eastern edge of the sun, outside of our view. If sunspots emerge, they will be cycle 24 spots because of their relatively high latitude.

Tuesday morning, May 5, Red Haines, WO0W (his call is easy to confuse. It is W-Oh-Zero-W) of La Crescent, Minnesota (SE part of the state, across the Mississippi River from La Crosse, Wisconsin), wrote that HF conditions had improved over the past few days. He noted that he was hearing more of the worldwide NCDXF beacons on 14.100 MHz than recently, and that x-ray flux had also increased.

Red mentioned that x-ray flux (an index of energy from the sun in the x-ray portion of the spectrum) is a better real-time indicator of the current state of the ionosphere than daily sunspot numbers or solar flux. ''X-ray energy is a primary cause of ionization, which supports HF propagation'', he wrote.

At http://www.swpc.noaa.gov/ you can see the current and recent x-ray flux. Click on the graph for a better view. He noted significant recent bursts of energy during and after recent sunspot activity on April 30 and May 1. You can go to http://www.swpc.noaa.gov/ftpdir/warehouse/2009/2009_plots/xray/ to see this by clicking on the 20090501_xray.gif link. Other interesting dates are January 9-10 and February 10-13, also accessible from that same page, which includes all of the plots for

2009.

The NOAA SWPC page at http://www.swpc.noaa.gov/rt_plots/index.html has links for a number of useful monitors for x-rays and magnetic indices, including a D-region absorption prediction for when conditions get rough.

Red likes to monitor beacons for a real time indicator of propagation, and he uses a tool called BeaconSee, which creates an ongoing record of propagation on any HF band. Download BeaconSee at http://www.coaa.co.uk/beaconsee.htm.

David Steels, VE3UZ of London, Ontario has a spreadsheet and graph showing monthly averages of solar flux values during solar minimums. He overlaid four solar minimums, lining up start dates for each cycle, and believes that his curves match a start date of September, 2008 for cycle 24.

E-skip reports continue for 6 and 10 meters.

Last Saturday, May 2, Trent Fleming, KG4ZDM of Germantown, Tennessee (EM55) worked UT1FG/MM in EL33 and NP4A in FK68 on 6 meters. He heard many other stations, but shut down early due to an approaching storm.

Dan Van Orden, N7AQX of Emporia, Kansas had fun on 10 meter CW on May 3-4.

Dan wrote, ''On 5-3-09, 1642 UTC, AJ4SF responded from Cameron, NC with a 589 signal strength. A few minutes later, I tried several times to connect with KJ4RV. His signals were down to at least 339 at the time. Seems strange in that both stations are in the same vicinity. Of course antennas and location could have been the difference''.

''On 5-4-09, I heard several Low Power Beacon stations from California. These beacons are hardly ever heard here in Kansas. They remained throughout the day. The band seemed to have gone west, since no beacons were heard from the Eastern USA. That in itself seems kinda strange. Beacons from Colorado and New Mexico were also heard, along with the California, Beacons. Finally worked K7DRA/5 in El Paso, TX on 10 meter CW and got a 569 signal report. Looks like the band is changing after months of winter time silence''.

Bob Voss, N4CD of Plano, Texas sent in many comments about 10 meters last weekend, which he said was when the 10-10 club held their CW and digital contest. The comments were from people he worked and from an email reflector. All reported strong activity on 10.

Vince Varnas, W7FA of Portland, Oregon reported a great 10 meter opening on Tuesday, May 5. He wrote, ''Had a pile up of JAs on me for 1 1/2 hours from 2312-0040 UTC. Worked 32 JAs before I had to

go to dinner. Must have left about 5-6 on freq. still calling. Sigs mostly S-9. Probably multi-hop Es. Could have been F2, though''.

Chip Margelli, K7JA of Garden Grove (DM03), California wrote, ''Six meters has been opening up, marginally, across the Pacific. K6QXY was the first to make it across to Man, JL8GFB on May 5th at 2330 UTC. Three other W6/7 stations made it on that day''.

''Yesterday (May 7 UTC) I had a QSO with Man at 0018 UTC. Signals were 559 at the time, and Man peaked at about 579 later. On the same day (May 6th here on the West Coast), Johnny KE7V worked 20 JA stations, and several other Pacific Northwest stations worked several JAs each. Here in SoCal, N6KK and N6HC also worked JL8GFB on the afternoon of May 6th, this was Arnie N6HC's first JA QSO on 6''.

''Audio clips of these and other QSOs made by JL8GFB are on his website at http://air.ap.teacup.com/jl8gfb/. I run 200 Watts into a 9-element OWA antenna at about 75 feet''.

Thanks, Chip. OWA means Optimized Wideband Array. Read more about it at http://www.naic.edu/~angel/kp4ao/ham/owa.html and http://www.g0ksc.co.uk/.

That's all for this week. Many other emails and subjects left unreported, but we had to stop somewhere, and this is it.

For more information concerning radio propagation, see the ARRL Technical Information Service at http://www.arrl.org/tis/info/propagation.html. For a detailed explanation of the numbers used in this bulletin, see http://www.arrl.org/tis/info/k9la-prop.html. An archive of past propagation bulletins is at http://www.arrl.org/w1aw/prop/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://www.arrl.org/qst/propcharts/.

Instructions for starting or ending email distribution of this bulletin are at http://www.arrl.org/w1aw.html#email.

Sunspot numbers for April 30 through May 6 were 12, 0, 0, 0, 0, 0, and 0 with a mean of 1.7. 10.7 cm flux was 69.4, 68.5, 68.3, 68.6, 68, 68, and 68.7 with a mean of 68.5. Estimated planetary A indices were 3, 5, 5, 5, 4, 2 and 6 with a mean of 4.3. Estimated mid-latitude A indices were 2, 2, 3, 2, 2, 2 and 6 with a mean of 2.7.

9825. S.E.S TRIBUTE TO UNIC HAM RADIO

Yahoo group: DX-IS (2009)
Date: 2009-05-08 23:56:09 UTC
From: ARMIC EA3RKR ONCE
Topic: 9825 Message: 9825

Find one that will be on the air continuously throughout the show so special commemorative station "IN MEMORIAM" by Jaume EA3ENA. (16 & 17 May 2009)

The indicator is in the air for this special occasion will be the E G 3 E N A.
Here you leave two links:
www.qrz.com/callsign?callsign=EG3ENA
www.qrz.com/callsign?callsign=EA3ENA

Invites anyone who wants to operate the station especially since the Merca area of the Ham Radio 2009.

QSL via EA3RKR.

Hope meet everyone in the band, unfortunately we can not ever roll, because there are few who do not know one way or another to Jaime, or without knowing, helped this unique character, sometimes even in the distance.

The station will be active through: Radio Club AMIRED, Radio Club del Vallès EA3RCH, Club Quijotes Internacionales de Barcelona EA3RCQ, Radio Club Henares EA4RCH, Asociación DX Barcelona, CQ Radio Amateur and Catalonia national Blind & handicaped ham radio operators,(ARMIC).

More info at:

http://www.gratisweb.com/ea3rkr/esp/actividades/Homenaje_EA3ENA_Jaume.html

The amateur radio community pays tribute to an amateur radio off.Unic Ham Radio Operator.

Please request the maximum distribution for this information.

Thank you.

Sincerely,
ARMIC, EA3RKR Team

SB DX @ WW < KB8NW $OPDX.908
Ohio/Penn DX Bulletin No. 908

The Ohio/Penn DX PacketCluster
DX Bulletin No. 908
BID: $OPDX.908
May 11, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NC1L, NJ1Q, K3AIR, K3ZO, N3SL, NG3K, N4AA & QRZ DX, WW5L, K8YSE, N8OFS, W0AR, A35RK, CWJF Group, DK8JB, DL1EKC, DL7MAE & The DX News Letter, DX World of Ham Radio Web Site, EA3BHK, F5NQL & UFT, G3PSM, HA0HW, I1JQJ/IK1ADH & 425 DX News, LZ1HA, OH5FFT, ON8VM, Pete's-DX-Newsdesk, PY4WAS, RA3AUU, RSGB IOTA Web Site, VA3RJ & ICPO, VE9NC and VHF-DX-Portal (MMMonVHF) for the following DX information.

** SPECIAL NOTE FROM EDITOR (By KB8NW): There will not be a OPDX Bulletin next week. I will be attending the Dayton HamVention. "IF" I receive a major announcement, I may send something out late Sunday or Monday. However, PLEASE continue to send your DX information. You never know what I might do.... 73 de Tedd KB8NW
P.S. Hope to see you at the HamVention Dayton at the NODXA Hospitality Suite at the Crown Plaza (See below)!

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 3rd-May, through Sunday, 10th-May there were 213 countries active. Countries available: 3A, 3B8, 3D2, 3V, 3W, 4J, 4L, 4O, 4S, 4U1U, 4X, 5B, 5H, 5N, 5R, 5V, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A3, A4, A5, A6, A7, AP, BV, BY, C3, C5, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FR, FS, FW, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J7, JA, JD/m, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OK, OM, ON, OX, OY, OZ, P4, PA, PJ2, PJ7, PY, PY0F, PZ, S2, S5, SM, SP, ST, SU, SV, SV5, SV9, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TN, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V4, V5, V8, VE, VK, VP2E, VP2M, VP2V, VP9, VR, VU, XE, XU, XW, XX9, YA, YB, YI, YJ, YK, YL, YN, YO, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work

First Worry Later" (WFWL).

2009 MMAA CW CONTEST. If you are not attending the Dayton HamVention, you may want to be active in the CWJF's 2009 Manchester Mineira All America CW Contest, May 16-17th. This year's event is mainly for stations in North and South America. However, in 2010 it will be world-wide. For more details and rules on this Brazilian MMAA CW Contest, visit their Web site at: http://www.powerline.com.br/cwjf
ADDED NOTE: Look for Alex, PY2WAS, to activate a rare Brazilian State outside and during the MMAA CW Contest. Activity will be from Macapa, Amapa State, in the Amazonic Region of Brazil. He will be using the special callsign PQ8W. He will be there between May 15-17th. Activity outside of the contest will be on 160-10 meters using CW and SSB. QSL via PY2WAS, direct or by the Bureau.

3A, MONACO (IPA Op). Gab, HA3JB (SU8BHI), will be active as 3A/HG3IPA between September 23-30th. Activity will be good for the Hungarian International Police Association Award (HA-IPARC Award). For details on the award, visit: http://www.ha3jb.com
He also plans be an entry in the 2009 CQ DX RTTY Contest (September 26-27th). Also, a new online log search is available at: http://www.ha3jb.com/onlinelog
Those who send for a QSL, please write your E-mail address on your card, and he will advise you by E-mail when your QSL arrives. QSL via HA3JB: Gabor Kutasi, H-8601 Si=F3fok, P.O.Box 243, HUNGARY, EUROPE.

3Z11, POLAND (Special Event). Members of the Polish Amateur Radio Association (PGA-C PZK) are now active as 3Z11EQSLCC until May 12th. Activity is to celebrate the 11th anniversary (May 11th) of eQSL.cc. Activity over the past weekend was on 40/20 meters CW/SSB. QSL via eQSL.cc or SP2FAP.

5V7, TOGO. Werner, DL9MBI, is now active as 5V7PM from some miles outside the capital city of Lome (approx. 2 miles from the sea) until May 30th. Activity over the past weekend was on 20 meters, SSB, RTTY and PSK. QSL via his home callsign by the bureau. For direct cards, please send QSL cards to: Werner Peter Mueller, Plattenberg 2 1/2, D-84508 Burgkirchen, GERMANY (w/SAE and two green stamps. Otherwise the answer will be via bureau).

7X, ALGERIA (Special Event/Ham Meet). Members of the Algerian Radio Amateur Association (A.R.A) and Djelfa Radio Club (7X2VFK) will activate the special event callsign 7X2DD during the International Algerian Sahara HAM Meeting (June 15-21st). Activity will be on all bands/modes, and a special diploma will be issued instead of a QSL card.

A3, TONGA (Update). Paul, A35RK, informs OPDX that Dave, A35KL, has left Vava'u (OC-064) for Tongatapu (OC-049), but he will not be on the air from there. He adds, "Dave has my broken FT-450, and he sold me his K3, which saved my radio-life here. He returns stateside next Tuesday."
Look for A35RK/p to be active from OC-064, on 80-17 meters, CW and SSB, using an Elecraft K3 and a G5RV antenna. You can take a look at Paul's

holiday QTH at: http://www.bayviewtonga.com
Paul ends his E-mail by informing us, "I seem to have forgotten to bring some critical USB interface cables, so RTTY will not be possible unless I can find a work-around. All is well. Vava'u is beautiful."

CS6, PORTUGAL (New CT Island). The Algarve STAR DX Team is planning to activate another new island in the southern part of Portugal on May 24th. They plan to use the callsign CS6A. It is a private island (Ilhas em Grandes Barragens - Large Dams Islands was mentioned) and this will be the first time the owner has authorized activity! Currently, there is a small problem to get to the island. A small bridge to the island is down and landing via boat is very very difficult. More details are forthcoming. Watch their Web page at: http://algarvedx.com

DAYTON HAMVENTION ACTIVITIES (Reminders).....
* Contest Super Suite - May 13-16th, 7pm-??? at the Crowne Plaza, Dayton (Downtown), OH; 2nd floor - Miami Ballroom.
First Night - Hosted by Contest University (CTU). CTU Check-in from 8:00-10:00 PM. 10:30 PM Pizza Party sponsored by Contest University 2009. Web site at: http://contestsupersuite.com
Second Night - Hosted by The Mad River Radio Club (MRRC), Frankford Radio Club (FRC) and North Coast Contesters (NCC). 50th Anniversary Celebration of CQ WorldWide Multi Multi Category. All are invited for the Special Celebration Party in Miami and Beckel Ballrooms at 10:30 PM with "Wings" from Quaker Steak and Lube! And pizza too!
Third Night - Hosted by The Mad River Radio Club (MRRC), Frankford Radio Club (FRC) and North Coast Contesters (NCC) with a 11:00 PM Pizza Party sponsored by the Potomac Valley Radio Club (PVRC).
Fourth Night - Hosted by The Mad River Radio Club (MRRC), Frankford Radio Club (FRC) and North Coast Contesters (NCC) with a 11:00 PM Pizza Party sponsored by the Yankee Clipper Contest Club (YCCC).

* DX HOSPITALITY SUITE. The Northern Ohio DX Association (along with Janeen Hire, W8ZET) will once again sponsor a Hospitality Suite at this year's Dayton Hamvention. It will be in Suite 1011 on the 10th Club Floor of the Crowne Plaza Hotel on Thursday, Friday and Saturday evenings (Look for signs!). All DXers/Contesters are welcome. Munchies and refreshments will be available. Come and meet the members and friends of NODXA.

* The 24th annual SWODXA DX Dinner will be Friday evening, May 15th, at the Crowne Plaza Hotel, located in Dayton City Center. Their speakers will be John Stanley/K4ERO, and Ruth Stanley/WB4LUA. This husband and wife team travel the globe installing, maintaining and training personnel for religious international shortwave stations. They have been to over 60 DXCC entities and operated from more than 12 of them. John has written many technical articles in the ham

journals (with one in the April 2009 issue of QST), is a recipient
of the 2007 Doug DeMaw Technical Excellence Award and is an ARRL
Technical Advisor, having contributed many pieces to the ARRL Handbook.

* Topband Dinner on Friday evening, May 15th, at the Barnsider
Restaurant, (Near Hamvention Arena), 5202 N. Main Street (Route 48
just north of Needmore Ave), Dayton, Ohio.

* The Contest Dinner will be held on Saturday night, May 16th, at
6:30 PM, at the Crowne Plaza Hotel (Official Contest Hotel), 5th and
Jefferson Streets (Next to the Convention Center), Dayton (Downtown),
Ohio, in the VAN CLEVE BALLROOM. Details at: http://www.contestdinner.com

* ANTENNA, DX AND CONTEST FORUMS AT THE CONVENTION
May 15th - Antenna Forum at HARA Arena 2:30-5:00 p.m. Room 1
Moderator: Tim Duffy, K3LR
Eric Scace, K3NA - "Loop Array Runs Circles Around The Beverage"
Dr. DaveLeeson, W6NL - "Thoughts on Antenna Positions, Sloped
Ground and Foregrounds",
Rob Sherwood, NC0B - "Effective Low Band Antenna for Small Lots"
Don Daso, K4ZA - "K4ZA's Tips, Tricks and Toolbox"
May 16th - Contest Forum at HARA Arena 9:15-11:15 a.m. Room 1
Moderator: Doug Grant, K1DG
Joerg Jaehrig, DJ3HW - "The Deutscher Amateur Radio Club
Contest Program and WAE-60 Celebration"
Rol Anders, K3RA, and Vic Gauvin, K1PY - "A Tale of Two Winning
Field Days - W3AO 23A and W2RDX 3A"
Pete Smith, N4ZR - "Skimmer - One Year Later"
Toni Linden, OH2UA - "Xtreme Contesting at Radio Arcala, OH8X"
May 16th - DX Forum 2:45-5:00 p.m. Room 1
Moderator: Jay Slough, K4ZLE. Assistant Moderators: Pete Meyer,
N0FW and Tom Kissner, W8WGT
Simone Bizzarini, IZ0BTV - E44M PALESTINE DXpedition
Speakers TBD - K5D Desecheo Island DXpedition
Josh Fisher, W4WJF - VK9DWX Willis Island DXpedition
"Frosty" Frost, K5LBU - African DX Safaris
DX Forum sponsored by SW Ohio DX Association and Yaesu
Vertex. There will be a Yaesu FT-2000 with PEP raffled off
at the end of the DX forum. You do not have to be present to
win. Tickets for a chance on the FT-2000 are available at the
forum, or may be ordered at the same time you purchase your DX
dinner tickets. SWODXA Web page at: http://www.swodxa.com

DXCC NEWS. Bill Moore, NC1L, Awards Branch Manager, reports that the
following operations are approved for DXCC credit:
J20SE - Djibouti; 2009 Operation
A52DT - Bhutan; 2009 Operation

EE2, SPAIN. Members of the Ondarroa Group will be active as EE2W during
the CQWW WPX CW Contest (May 30-31st) as a Multi-Single entry. QSL via
EB2BXL.

EG3, SPAIN (Special Event/Tribute). Members of the Amire, DX Association Barcelona, Digital EA Federation, Radio Club Barcelona, Radio Club del Valles, Quixotes Radio Club International and ARMIC will activate EG3EN during the 2009 MERCE HAM RADIO event on May 16-17th. Activity is a special tribute to Jaume, EA3ENA, and to celebrate the 30th anniversary of the radio event. QSL via EA3RKR. For more details, visit: http://www.qrz.com/callsign?callsign=EG3ENA

ET, ETHIOPIA. Peter, DM2BBN, who will stay in Addis Abeba, is active as ET3BN for the "next years". Activity will be on CW/SSB and using a wire pyramid for 80m, Quad antennas for 30/17/12/20/15/10m and a log-periodic for 6m. He is not active on 160 and 40 meters right now. QSL direct to: Dr. Peter Haferkorn, PO Box 150194, Addis Ababa, Ethiopia.

IOTA NEWS.....
EU-039. Operators Jean-Jacques/ON7EQ, Mich/ON8DM, Claude/ON7TK and Carine/ON7LX will be active as F/0T3T from Ile Grande, Chausey Islands (DIFM MA-004, WLOTA 0424) for the RSGB IOTA Contest (July 25-26th). QSL via ON7EQ, direct or by the Bureau.

EU-043. A team of eight Swedish operators will be active as 7S6W from Vinga Island, off the coast of Gothenburg, Sweden, between May 14-17th. Activity will be on 80-2 meters using four stations on the air. QSL via SM6WET, direct or by the Bureau, following QSL instructions at: http://www.qrz.com/callsign/7S6W

NA-029. Gregg, VE3ZZ, will be active as VY2Z from Prince Edward Island (CISA PE-001) during the RSGB IOTA Contest (July 25-26th) as a Single-Op/? entry. QSL via his home callsign, direct or by the Bureau.

OC-268. Fuadi, YB7IM (ex-YFMI), and some friends will be active as YE7M from Payung Payungan Island in the Laut Kecil Islands Group, May 22-24th. The team will depart from Banjarmasin City on May 20th, and head to an empty restricted area in Laut Kecil Islands on Payung Payungan Island between E 115' 48" - E 115'49" and S 4'22" - S 4'23". There is an old Light-house in the middle of the island, which was built in the colonial era in Indonesia. No lighthouse reference number was provided. Activity will be on 40/20/17/15/10 meters using CW and SSB. Suggested frequencies are:
CW - 7023, 14040, 18098, 21040 and 28040
SSB - 7080, 14260, 18150, 21260 and 28360 kHz
The QSL Manager is YB7KNV: PO Box 7, BANJARMASIN 70000, SOUTH KALIMANTAN INDONESIA. Web site: http://ye7m.blogspot.com/

J48/SV8, GREECE (IOTA Op). Laci, HA0HW, will once again be active as J48HW and SV8/HA0HW from Thassos Island (IOTA: EU-174, GIOTA: NAS-037, MIA: MG-124, WLOTA: LH-4186, QRA: KN20HS) between May 28th and June 6th. He will operate mainly CW, with some SSB, RTTY and PSK31 as well, on the HF bands (mainly on 40, 30, 20 and 17 meters) and on 6 meters. His activity will include the CQ WPX CW Contest (May 30-31st) as J48HW. His rigs are a FT-840 with a MOS-FET amplifier and an IC-706 (for 6m only) with monoband

Gps and dipoles on fishing poles. QSL via his home callsign, direct or by the HA Bureau.

KP2/WP3, U.S. VIRGIN ISLANDS (NA-106). Jaime, WP3A, will be active as KP2B from St. Croix during the CQWW WPX CW Contest (May 30-31st) as a Single-Op/All-Band/Low-Power entry. QSL direct to EA7FTR.

LY7, LITHUANIA. Members of the Kaunas University of Technology will be active as LY7A during the CQ WPX CW Contest (May 30-31st) as a Multi/Multi entry. QSL via the LoTW or LY2ZO.

LZ50, BULGARIA (Special Event). Look for special event station LZ50BNT to be active through the end of the year (between May 1st-December 31st). Activity is to celebrate the 50th anniversary of Bulgarian National Television, the national public television service of the Republic of Bulgaria. Operations will be on all bands and modes. A special event QSL card (double format) will be sent to all stations who send their QSL card to QSL Manager LZ1HA, direct or by the Bureau.

MD4, ISLE OF MAN (EU-116). Operators David/G3NKC, Peter/G4MJS, Martin/G4XUM, Lionel/G5LP, Michael/G7VJR and Mark.2E0NCG will be active as MD4K during the RSGB IOTA Contest (July 25-26th) as a Multi entry. QSL via G3NKC.

N8, UNITED STATES (USI and OSPOTA Op). Ed, N8EQJ, will be active as N8EQJ/p from Kelly's Island (USI OH-001L, Erie county, Ohio), for the OSPOTA (Ohio State Parks On The Air) Contest on September 12th (1600-2400z). Activity will be on 80/40/6 meters. QSL via his home callsign, direct or by the bureau.

OF5, FINLAND (Special Event). Members of "The Club of Fives RY" (OH5AA) will be active as OF5POPOV from the library of Kotka on May 14th. Activity is to celebrate 150th anniversary of the birthday of Alexander Popov -- a remarkable person in Finnish radio history. QSL via OH5VX, direct or by the Bureau.

OH0, ALAND ISLAND. Operators Norbert/DJ7JC, Ulrich/DJ9IE, Detlef/DK3QZ, Marcus/DL1EKC and Rein/PA0R will be active as OH0EC in the upcoming CQ WPX CW Contest (May 30-31st). The team members will be individually active between May 24th and June 3rd signing OH0/homecall. The operation will be mainly CW with some 30/17/12m activity. QSL OH0EC via DL1EKC, and for the individual operators via their respective home callsigns. All QSLs are OK via Bureau.

PACIFIC TOUR (IOTA Op). Steve, 9M6DXX (G4JVG), will active as FK/G4JVG from Noumea (OC-032), New Caledonia, between May 22nd and June 3rd, and as G4JVG/VK4 from North Stradbroke Island(OC-137), Australia, between June 7-9th. Activity will be holiday style while celebrating his 25th wedding anniversary with Eva, 9M6EVA. Operations will be SSB only, using 100 watts into "fishing rod" verticals for 40/20/17 meters and possibly 15 meters. QSL both operations via Tim, M0URX, direct, by the Bureau or LoTW.

QSL INFO AND NEWS.....

DON'T QSL VIA THE 3RD U.S. BUREAU (More!). Fred Laun, K3ZO, Manager NCDXA/ARRL Third U.S. Call Area QSL Bureau, reports that the following "should not" be QSLed to the 3rd Bureau:
4L2M - K3PD is a Silent Key. QSLs should be sent: Russian stations (via UA9LP); for Ukraine stations (via UT7QF) and everybody else via EA7FTR.
5U5U - W3HNK is NOT the QSL Manager. QSL direct to 5U5U.
6V6U - K3IPK does not wish to receive bureau cards. QSL only direct.
6W/K3IPK - K3IPK does not wish to receive bureau cards. QSL only direct.
7P8SR - NY3N is a Silent Key, but his XYL Nonie requests that all cards be sent direct with "sufficient return postage". QSL cards should be sent to: Nonie Shankweiler, 16522 Rainbow Lake Road, Houston, TX 77095, United States.
9Y4VU - W3EVW is a Silent Key. QSL via direct to 9Y4VU.
AO3K - NOT an ITU USA assigned callsign (USA ITU block is AA-AL). QSL via EA3GHZ.
CO6XN - N3ZOM is the QSL Manager, but does NOT accept Bureau QSL.
CT9M - W3HNK is NOT the QSL Manager. QSL Manager is CT3EE.
DU9RG - W3HNK is NOT the QSL Manager. DU9RG has detailed QSL instructions on his QRZ.com listing.
EA9EU - W3HNK is NOT the QSL Manager. The QSL Manager is EA5KB.
EX2T - W3HNK is NOT the QSL Manager. EX2T handles his own cards.
EX9A - W3HNK is NOT the QSL Manager. QSL via UA3DPX, direct or via the Russian Bureau. Others have reported success -- with some delay -- from DF8WS.
FM1HN - K3PD is a Silent Key, the new QSL Manager is NI5DX.
FM5WE - K3PD is a Silent Key, the new QSL Manager is K4FJ.
KB3LTB/KH2 - The real home callsign for this license is JH1MPQ.
KH2/N3MU - The real home callsign of the license is JA3CEK.
KH2/KI3DNN - The real home callsign of the licensee is JI3DNN.
KH2/K3UY - The Manager for KH2/K3UY is UA3DX.
KH8/K3UY. The QSL Manager is RA3AUU.
KH8/NS3A - NS3A is the USA callsign of YU3AA (ex-YZ7AA).
KP3/NP3/WP3 - This is a reminder that the 3rd Bureau does not handle cards for these stations unless they happen to have a QSL Manager in the USA third call area. Puerto Rico has its own Bureau.
LT0H - K3IRV is NOT the QSL Manager. QSL via EA7FTR.
LY4L - W3HNK is NOT the QSL Manager. QSL direct to LY4L.
N3YS/KH0 - QSL via the real home callsign for N3YS which is JE1SYN.
NP3CW - QSL Manager is EB7DX.
NP3X - W3HNK is NOT the QSL Manager. QSL via EA7FTR.
P33W - W3HNK is NOT the QSL Manager. The Manager is RA3AUU.
SO8A - W3HNK is NOT the QSL Manager. QSL via SP8YB.
TT8PK - W3HNK is NOT the QSL Manager. QSL Manager is F4EGS.
TU2XZ - N3SL is NOT the QSL Manager. QSL direct.
UT4UO - W3HNK is NOT the QSL Manager. QSL direct to UT4UO.

V26B - WT3Q is NOT the QSL Manager. KA2AEV has been acting as
V26B QSL Manager for a while, but he has now also informed
the W2 Bureau that he does not want V26B bureau cards.
VU2NKS - W3HNK is NOT the QSL Manager for VU2NKS. QSL direct or LoTW.
WH2V - QSL Manager is JF2VFN.
WK3D/AH0 - Cards should go to JF2MBF, the licensee's real home callsign.
WP3F - WP3F has changed his callsign to KP4EE. QSL Manager is
OK1DOT.
XE1V - W3HNK is NOT the QSL Manager. XE1V handles his own cards, but
his QRZ.com page says "no QSLs via Bureau."
XW1B - W3HNK is NOT the QSL Manager. The QSL Manager is E21EIC.
YO2LEA - K3PD is a Silent Key. YO2LEA handles his own cards.
Z31VJ - N3SL and W3HC are not the QSL Managers. QSL Z31VJ via direct
or the Z3 Bureau.
ZB2/AA3SN - The real home call of the license is G4KLF.
ZP5AZL - W3HNK is NOT the QSL Manager. ZP5AZL handles his own cards.
QSL direct or via the Paraguayan RCP Bureau.
ZS6C - K3PD is a Silent Key. ZS6C handles his own cards.

Fred states that for the QSLs which were received, the only recourse
(for most cards) are to forward such cards to their following perspective
QSL Bureau.

PIRATE ALERT! Colin, G3PSM, reports: "An email just received from the
Secretary General of the Nigerian Amateur Radio Society states that
5N/LZ1QK is not licenced in accordance with the Nigerian Telecommunica-
tions Act of 2006 and is therefore a pirate. Incidentally it is mandatory
in Nigeria to join the National Society before you can obtain a licence!"

FS/WW5L & PJ7/WW5L QSL STATUS. Tom, WW5L, reports: "All cards received
so far for FS/WW5L and PJ7/WW5L, part of the 'Buddies in the Caribbean'
DXpedition have been answered (before the postage rate increase). This
includes both stateside and DX Airmail cards. To those who failed to
enclose even an SAE, your postage and an envelope was paid for by
generous 1-5 USDs donations by your fellow hams who enclosed SASEs. I
wish to express my thanks to the many who included more than just an
SASE it was greatly appreciated. Sorry about the delay in getting the
cards out, but my HP laptop (that had gone with me to 7P8 and C91 in
2003 and 2006) power supply finally gave up the ghost, but a nearby
computer repair facility WAS able to at least transfer the HD to a
portable hard drive and save the logs. Also thanks to Ed Longhi, W5VP,
of Datamatrix developer and distributor of Prolog 2K, my logging program
for the time on the phone he gave me in retrieving everything off the
external hard drive. I know I can ask some really dumb questions. Ed,
your assistance with my phone calls for help all in one afternoon
I'm sure were frustrating. But it's nice to see a software developer
take the time to walk klutzes like me through the retrieval and printing
of everyone's QSL label."

QSL OR5EU via the UBA Bureau or direct to: E.C.A.R.C., Avenue Hebron 91,
B-1950 Kraainem, BELGIUM. Activity was by the European Union Amateur

Radio Club in Brussels on May 9th, to celebrate Europe Day (or "Schuman Day"). This date is the remembering of the Schuman Declaration of May 9th, 1950. More details at URL http://europa.eu/abc/symbols/9-may/euday_en.htm

TA7KI QSL INFO: For the 2009 A.R.I. International DX Contest (May 2-3rd, 2009), operator was TA3J/7. QSL Manager is TA3YJ. You can see the TA7KI log on: http://dx.qsl.net/cgi-bin/logform.cgi?ta7ki
QSL direct cards [only SASE and 1 IRC with your QSL card, no green stamps please] or by the bureau. SWL QSL cards are OK. No eQSL. The TA3YJ QSL Service is at: http://www.aydogmus.gen.tr/ta3yj/qslservice.htm

YB0DPO & YB0ECT QSL STATUS. Mike, K3AIR, reports: "This morning (May 9th) I mailed out several hundred QSLs for the two YB0 stations I manage, YB0DPO and YB0ECT. If you've been waiting for a card, you should receive it in the next few days to week, depending on your local mail service. All direct requests received through yesterday (May 8th, 2009) have been answered. Bureau mailings to follow shortly. I apologize for the delays in getting some of these out. Work and family obligations have for the most part kept me off the air for the last two years and left little time for ham radio related activity. Hopefully that is now changing."

QSLS VIA LOTW: 5K0T, LQ7D (2002-2008), LW9DA (1996-2007), V31A (1990/1991), V31DX (1990-1991), VK9GMW, VK0HM (1969-1970), VQ9CQ (10/90-04/91), VQ9HB (12/89-05/90), VQ9SS (1991), VS6DX (1979-1989) and XX9DX (1983-1990)
ADDED NOTE: TL0A was listed last week which was an error.

QSLS RECEIVED VIA MAIL: 4K0CW, 5U7JB, 5V7BR, A7/M0FGA, AH0BT, CE1KR, CE8SFG, CO6XN, ER4DX, FK/JK1FNL, FM/KL7WA, FS/W3FF, HP3TA, J88DR, JA1XGI/VK9X, JT1CO, K5D, OH0R, OM8A, PY0FF, PZ5TT, T88NF, VP8DLQ, VP9KF, YI9KT and YS4M

QSLS RECEIVED VIA THE BUREAU: 9U0A, AN0EB, CU2DX, DL1CC, DR1A, E7/OE1EMS, E77DX, EE1TR, EH6R, ER1BF, ER1DA, ER1OA, ER2ID, ER3KS, ER3R, ER4DX, ER5DX, ER570C, ER7HQ, ER9V, ER0WW, EV1R, GI2BX, HB0/DK9TN, IA5IG, IM0/IK0FMB, IR3P, IV3SKB, JD1BMM, JE1LET, K5RC, LA/OE9ICI, LA1ONA, LA2008TSR, LY3X, LY4Y, LY600W, LY775W, MD0CCE, OH0/PA3BAG, OY/LA9SN, OY9OY, RT6A, RW1ZW/1, RW3SY, S57AL, SM6BGG, SV0JD/SV8, TF/LA9SN, TM0GP, UT7QF, VC3O, VE7WY, VO1MX, VP8YLH, W1UE, XU7ADE and YN2BQ

SILENT KEY. Albert L. "Lee" Bergren, W0AR, became a Silent Key "SK" at the age of 93 on May 1st. Lee was an accomplished electronics engineer, author, designer and advisor with special accomplishments in the field of antenna and radio amplifier design. He was co-founder of Radio Industries of Kansas City. He was inducted into the National DX Hall of Fame in 2002. Lee developed the multi-element cubical quad antenna and published his results in a seminal article in QST Magazine in 1963. Lee was an advisor and mentor to young engineers and radio enthusiasts and was co-founding member of the Kansas City DX Club, the Mid-Continent Chapter 35 of QCWA, and was a Life Member of the American Radio Relay League. OPDX and its readers would like to send out our deepest sympathy to the family and

friends of W0AR.

SOLAR CYCLE 24 TO PEAK IN MAY 2013. An international panel of experts led by NOAA's Space Weather Prediction Center reports Solar Cycle 24 will peak in May 2013 with 90 sunspots per day, averaged over a month. Excerpts from a report NOAA press release states, "If the prediction proves true, Solar Cycle 24 will be the weakest cycle since number 16, which peaked at 78 daily sunspots in 1928, and ninth weakest since the 1750s, when numbered cycles began.....The panel also predicted that the lowest sunspot number between cycles-or solar minimum-occurred in December 2008, marking the end of Cycle 23 and the start of Cycle 24. If the December prediction holds up, at 12 years and seven months Solar Cycle 23 will be the longest since 1823 and the third longest since 1755. Solar cycles span 11 years on average, from minimum to minimum." Read this interesting report at: http://www.spaceweather.com/headlines/y2009/08may_noaaprediction.htm?PHPSESSID=9c1qmjl4b4mfl0v00d2pvm1od5

SU8, EGYPT (LH Op). Said, SU1SK, and several other SU operators will be active as SU8LH from the first Egyptian Lighthouse DXpedition on Ras El-Bar Island in the Dumyat zone in northern Egypt between August 1-9th. Look for SU8LH to participate in the special event ILLW International Lighthouse-Lightship Week. Activity will be on the HF bands, as well as 6 meters, SSB and CW modes. QSL via SU1SK. Look for updates to be posted at: http://www.qsl.net/su1sk/Links.html

TK, CORSICA. YL Eva/HA3FRE and Tomi/HA4DX will be in Corsica between May 16-23rd with a Hungarian tourist group. They will be active during the evening hours and nights. The QTH will be Ersa, near Tollari, Cape Corse (IOTA: EU-014, MIA: MCO-001, QRA: JN43QA). They will signing TK/homecall. Activity will be on 40 and 30 meters, CW mostly. QSL via their home callsigns, direct or by the HA Bureau.

VK7, AUSTRALIA. Chris, G0WFH, will be active as VK7ACG from Tasmania between October 19th and November 17th. Activity will be mainly on SSB and the lower frequencies. Chris states that he will use a 60 ft. vertical for 160/80/40 meters, a beam for 20/15/10 meters and an Inverted V dipole for 17/12 meters. QSL via his home callsign, direct or by the Bureau, and eQSL is also "OK".

VK9N, NORFOLK ISLANDS (OC-005). Members of the Hellenic Amateur Radio Association of Australia (HARAOA Group) will be active as VK9AAA between July 22-29th. The HARAOA Group plans to have 3-4 stations on the air, and plan to be active on 160-6 meters using CW, SSB and RTTY. They plan to take part in the RSGB IOTA Contest (July 25-26th) during their stay. Equipment to be used are ICOM radios into Spiderbeams, verticals and dipoles. Current operators mentioned are: Tommy/VK2IR (Team Leader), Chris/VK3FY (Co-Leader), Peter/VK3FGRC (Team Member/Webmaster) and Keith/VK3FT (Team Member). QSL via W3HNK. More details and updates are available at: http://vk9aaa.blogspot.com

WRTC-2010 ANNOUNCED. Some details of the 2010 World Radiosport Team Championship (the Olympic's of contesting) were released this past week. The WRTC-2010 will take place near the Russian capital of Moscow between July 8-12th, 2010. There will be 50 teams to compete from all over the world. All competitors will be located in the same geographical area within 40 x 30 km where height differences are not bigger than 40 meters. All competitor locations will be separated at least 500 m from each other. The event will be hosted by the "Soyuz Radioljubiteley Rossii" - Russian National Amateur Radio Society. For more details, visit the WRTC-2010 Web page at: http://www.wrtc2010.ru

XL/XM/XN/XO, CANADA (Special Prefixes). The following prefixes are being used by Canadians until the end of May: VE=XM, VA=XL, VO=XN and VY=XO. The special prefixes are for celebrating the 50th anniversary of the opening of the St. Lawrence Seaway. Look for Paul, VE9NC, to operate as XM9NC on digital and SSB modes on 20, 40 and 80 meters. QSL is via VE9NC. XM3NOO is also actively using the special prefix. QSL via VE3NOO. ADDED NOTE: In February and March of 2010, Canadians will use VX=VE, VG=VA, XK=VY and XJ=VO. These special prefixes will be used to promote the 2010 Winter Olympics Games in Canada.

YM3, TURKEY. Yasar, TA3D, will be active as YM3D during the CQWW WPX CW Contest (May 30-31st) as a Single-Op/All-Band entry. QSL via TA3D.

ZK2, NIUE (Update/OC-040). Chris, ZL1CT (GM3WOJ), will be active as ZK2V as early 0700z, May 17th through June 20th. He is already traveling north in ZL in preparation for departure next week. If the weather cooperates, he will land in Niue on Saturday afternoon, May 16th - which is early Sunday UTC. He states that this 5 week DXpedition is not a "Holiday DXpedition" but it aims to give as many stations their first QSO with ZK2 as possible. This is the cyclone season, so operation may be interrupted by electrical storms. Resources are limited, so activity will be mainly on 80/40/20/15 meters using CW and SSB, with some 30/17/12 meter activity and RTTY. Planned operations include entries in the 2009 ARRL CW and Phone Contests. He is told that he will have Internet access from his QTH. If so, his plans are to upload logs to LoTW on a daily or every other day basis. More details and Chris's online logs will be available on his DXpedition's Web page at: http://www.zk2v.com
A photo QSL is planned and obviously will come after the completion of the DXpedition, so please be patient. QSL via N3SL. Donations will be greatly appreciated.

9827. QSL summary from K3ZO

Yahoo group: DX-IS (2009)
Date: 2009-05-11 02:08:43 UTC
From: Paul M Dunphy
Topic: 9827 Message: 9827

The following is extracted from the Ohio/Penn DX Bulletin and originated as in the form of numerous emails from Fred, K3ZO. This is an attempt to correct misleading or outdated QSL info that is floating around the Internet. Although Fred is mostly concerned with the W3 incoming bureau, this information applies to all of us. I felt it was worth re-sending, and I thank K3ZO for his efforts in compiling the info and making it available to DXers.

73, Paul VE1DX

==========

QSL INFO AND NEWS.....

DON'T QSL VIA THE 3RD U.S. BUREAU (More!). Fred Laun, K3ZO, Manager NCDXA/ARRL Third U.S. Call Area QSL Bureau, reports that the following "should not" be QSLed to the 3rd Bureau:
4L2M - K3PD is a Silent Key. QSLs should be sent: Russian stations (via UA9LP); for Ukraine stations (via UT7QF) and everybody else via EA7FTR.
5U5U - W3HNK is NOT the QSL Manager. QSL direct to 5U5U.
6V6U - K3IPK does not wish to receive bureau cards. QSL only direct.
6W/K3IPK - K3IPK does not wish to receive bureau cards. QSL only direct.
7P8SR - NY3N is a Silent Key, but his XYL Nonie requests that all cards be sent direct with "sufficient return postage". QSL cards should be sent to: Nonie Shankweiler, 16522 Rainbow Lake Road, Houston, TX 77095, United States.
9Y4VU - W3EVW is a Silent Key. QSL via direct to 9Y4VU.
AO3K - NOT an ITU USA assigned callsign (USA ITU block is AA-AL). QSL via EA3GHZ.
CO6XN - N3ZOM is the QSL Manager, but does NOT accept Bureau QSL.
CT9M - W3HNK is NOT the QSL Manager. QSL Manager is CT3EE.
DU9RG - W3HNK is NOT the QSL Manager. DU9RG has detailed QSL instructions on his QRZ.com listing.
EA9EU - W3HNK is NOT the QSL Manager. The QSL Manager is EA5KB.
EX2T - W3HNK is NOT the QSL Manager. EX2T handles his own cards.
EX9A - W3HNK is NOT the QSL Manager. QSL via UA3DPX, direct or via the Russian Bureau. Others have reported success -- with some delay -- from DF8WS.
FM1HN - K3PD is a Silent Key, the new QSL Manager is NI5DX.
FM5WE - K3PD is a Silent Key, the new QSL Manager is K4FJ.
KB3LTB/KH2 - The real home callsign for this license is JH1MPQ.
KH2/N3MU - The real home callsign of the license is JA3CEK.
KH2/KI3DNN - The real home callsign of the licensee is JI3DNN.
KH2/K3UY - The Manager for KH2/K3UY is UA3DX.
KH8/K3UY. The QSL Manager is RA3AUU.

KH8/NS3A - NS3A is the USA callsign of YU3AA (ex-YZ7AA).
KP3/NP3/WP3 - This is a reminder that the 3rd Bureau does not handle cards for these stations unless they happen to have a QSL Manager in the USA third call area. Puerto Rico has its own Bureau.
LT0H - K3IRV is NOT the QSL Manager. QSL via EA7FTR.
LY4L - W3HNK is NOT the QSL Manager. QSL direct to LY4L.
N3YS/KH0 - QSL via the real home callsign for N3YS which is JE1SYN.
NP3CW - QSL Manager is EB7DX.
NP3X - W3HNK is NOT the QSL Manager. QSL via EA7FTR.
P33W - W3HNK is NOT the QSL Manager. The Manager is RA3AUU.
SO8A - W3HNK is NOT the QSL Manager. QSL via SP8YB.
TT8PK - W3HNK is NOT the QSL Manager. QSL Manager is F4EGS.
TU2XZ - N3SL is NOT the QSL Manager. QSL direct.
UT4UO - W3HNK is NOT the QSL Manager. QSL direct to UT4UO.
V26B - WT3Q is NOT the QSL Manager. KA2AEV has been acting as V26B QSL Manager for a while, but he has now also informed the W2 Bureau that he does not want V26B bureau cards.
VU2NKS - W3HNK is NOT the QSL Manager for VU2NKS. QSL direct or LoTW.
WH2V - QSL Manager is JF2VFN.
WK3D/AH0 - Cards should go to JF2MBF, the licensee's real home callsign.
WP3F - WP3F has changed his callsign to KP4EE. QSL Manager is OK1DOT.
XE1V - W3HNK is NOT the QSL Manager. XE1V handles his own cards, but his QRZ.com page says "no QSLs via Bureau."
XW1B - W3HNK is NOT the QSL Manager. The QSL Manager is E21EIC.
YO2LEA - K3PD is a Silent Key. YO2LEA handles his own cards.
Z31VJ - N3SL and W3HC are not the QSL Managers. QSL Z31VJ via direct or the Z3 Bureau.
ZB2/AA3SN - The real home call of the license is G4KLF.
ZP5AZL - W3HNK is NOT the QSL Manager. ZP5AZL handles his own cards. QSL direct or via the Paraguayan RCP Bureau.
ZS6C - K3PD is a Silent Key. ZS6C handles his own cards.

Fred states that for the QSLs which were received, the only recourse (for most cards) are to forward such cards to their following perspective QSL Bureau.

9828. Latest Sunspot Predictions

Yahoo group: DX-IS (2009)
Date: 2009-05-11 10:21:12 UTC
From: Art Burke
Topic: 9828 Message: 9828

Saw a blurb this morning on the internet about the latest sunspot predictions. Apparently, this particular forecast predicts the lowest activity cycle since 1928. Accurate or not, it brings a question:

For those of you with access to data (or from memory), what kind of Solar Flux can we expect from a sunspot average of say 45 or 75?

Art - N4PJ

9831. TL0A

Yahoo group: DX-IS (2009)
Date: 2009-05-11 21:54:22 UTC
From: Phil & Anne Irons
Topic: 9831 Message: 9831

Greetings, all...

A few days ago, I had the good fortune to work TL0A on 15 metres. I checked QRZ.com to get some info, and found that although his QTH in the Central African Republic was acknowledged, his home address in France was given, and there was no information regarding his actual location in the Central African Republic.

Does anyone have any info on his exact location in that country?

thanks in advance,

&3,

Phil/VE1BVD
Sydney, NS

John,

I spent a year in Bahrain and know Malcolm.? If I remember right, he was planning to retire and leave the country.

His UK callsign is G6PIB and QRZ.com shows an e-mail address.?

The latest prediction from NASA/NOAA is for the flux to sky
rocket to 73 on 13-14 May. This will likely mean occasional
worldwide 6 and 4 metre openings as well as 10 metres being open 24
hours a day. Make sure you have your 10-10 number ready. Mine is
#42051. No one has asked for it in a long time!

9838. RE: [DX-IS] Weakest Cycle since 1928

Yahoo group: DX-IS (2009)
Date: 2009-05-12 01:01:56 UTC
From: Lance Martin
Topic: 9834 Message: 9838

Well from memory, I think SFI needs to be around 100 for 10 metres to be open 24 hours a day...

SFI of 73 will get 20m open for a fair bit of the day except in winter...which we are approaching in the Southern Hemisphere... L

(and just an observation, no criticism implied or intended)...

I read the article about the correlation between SFI and SSNs, interesting...I always find it fascinating to what lengths we will go to make numbers fit or prove our ideals, we love to put things in boxes and label them, or come up with an answer and say 'ah, that's why'..... I guess it's about our fascination of trying to understand this incredibly complex world we live in...

My log has been a bit vacant over the past week, who has swallowed up all the DX?

73, Lance - VK6DU

The latest prediction from NASA/NOAA is for the flux to sky rocket to 73 on 13-14 May. This will likely mean occasional worldwide 6 and 4 metre openings as well as 10 metres being open 24 hours a day. Make sure you have your 10-10 number ready. Mine is #42051. No one has asked for it in a long time!

9842. 5N/LZ1QK license?

Yahoo group: DX-IS (2009)
Date: 2009-05-12 20:27:09 UTC
From: Paul M Dunphy
Topic: 9842 Message: 9842

Anyone know the reason for the "no license" type comments in the spots for 5N/LZ1QK lately? He's been there for over a year, and I have received QSLs from the manager. I would guess they are being bounced by the DXCC Desk. Anyone know?

73, Paul VE1DX

Paul,
??? I received a note indicating that 5N/LZ1QK did not have
authorization for operation from the Nigerian authorities. He
does not have a valid license.

PIRATE ALERT! Colin, G3PSM, reports: "An email just received from the Secretary General of the Nigerian Amateur Radio Society states that 5N/LZ1QK is not licenced in accordance with the Nigerian Telecommunications Act of 2006 and is therefore a pirate. Incidentally it is mandatory in Nigeria to join the National Society before you can obtain a licence!"

Well that's not nice of him, John! You'd think he would tell a
fellow that when you work him. He's not usually a "5NN see'ya later"
type, and likes to rag-chew a bit. Had he told me he didn't have a
valid license, I still would have worked him, but I wouldn't have
sent to Bulgaria for a QSL card. :-)

9846. High band clicks same as deleted clicks

Yahoo group: DX-IS (2009)
Date: 2009-05-12 21:04:42 UTC
From: Paul M Dunphy
Topic: 9846 Message: 9846

I was thinking lately (bad thing to do because my mother says
that an idle mind is the devil's workshop.) I don't think anyone
would be surprised if we see a really long solar cycle trough; even
the eternal optimists at NASA have pushed their prediction ahead for
it to peak in 2013 and to be a low one at that. Might even stay
where it is now for 10-20 years for all anyone knows.

What I was thinking was, if the flux stays below 80 (and there
seems to be no indication it will take off soon), they we will have
hit a unique time since the inception of the DXCC. It will not be
possible to work DX on 10/12 and probably 15. There is no rocket
science here. Except for brief openings due to Es, these bands are
essentially dead. All the stacks and all the power allowed (and even
double the power allowed) won't get you 100 countries on 10M.

So here's the deal. You can't work DX on the higher bands
now. It is against the laws of physics. Impossible to get DXCC on
10/12, and likely 15. This is exactly like not being able to work
The Canal Zone, Tibet, East Germany and a couple dozen other deleted
ones. The DXCC Desk realised this a long time ago, and that's why
you see totals like 338/380. The only real goal any DXer can achieve
today is 338. That's why the deleted clicks are listed as they are.

What I think the DXCC desk ought to do is put an asterisk beside
all high total calls in their listings for the DX Challenge with a
footnote saying "these totals represent QSOs occurring prior to
2007." Perhaps even expand it to include 15/12/10 listings as well.

That way, DXers starting now will be on an equal playing field,
and be given credit for working things that were possible. Just as
having a lot of deleted clicks in your total indicates old age, so
does a high band country count. I bet this will really go over well
and maybe someone ought to try and drum up support for it at the DX
dinner at Dayton. I would, but I'm not gonna be there! :-)

9849. *E*A7QQ

Yahoo group: DX-IS (2009)
Date: 2009-05-12 23:51:53 UTC
From: Alan Leith
Topic: 9849 Message: 9849

I've noticed the last few evenings that EA7QQ has been causing a little stir on 20M because he's a lousy CW operator or his keyer and transmitter are not set up properly. I've heard quite a few guys in NA calling him as A7QQ because that's what he is sending. The E is being dropped accidentally, or, as I suspect, on purpose to garner interest.

There is no A7QQ and if you logged Satur as that, then go back and fix your log.

Also, FG/I2 something or other has been causing some ferocious pileups because he seldom gives his call (10 minutes tonight). As soon as he does, the pile-up diminishes.

STEREO's Behind satellite shows a new spot that's a day or two away from rotating onto the sun's earth-facing hemisphere -- before any of the currently active spots will have rotated off. So we should see a further increase, perhaps to 76 or 77.

See <http://stereo.gsfc.nasa.gov/>

SB DX ARL ARLD019
ARLD019 DX news

This week's bulletin was made possible with information provided by QRZ DX, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

TOGO, 5V7. Werner, DL9MBI, is now active as 5V7PM until May 30. Activity has been on 20 meters, SSB, RTTY and PSK. QSL to his home call sign via the bureau.

ETHIOPIA, ET. Peter, DM2BBN, is active as ET3BN. Activity will be on CW and SSB on 80, 30, 20, 17, 15, 12, 10 and 6 meters. He is not active on 160 and 40 meters right now. QSL direct to: Dr. Peter Haferkorn, PO Box 150194, Addis Ababa, Ethiopia.

SPAIN, EE2. Members of the Ondarroa Group will be active as EE2W during the CQWW WPX CW Contest as a Multi-Single entry. QSL via EB2BXL.

U.S. VIRGIN ISLANDS, KP2/WP3. Jaime, WP3A, will be active as KP2B from St. Croix during the CQWW WPX CW Contest as a Single-Op/All-Band/Low-Power entry. QSL direct to EA7FTR.

LITHUANIA, LY. Members of the Kaunas University of Technology will be active as LY7A during the CQWW WPX CW Contest as a Multi/Multi entry. QSL via the LoTW or LY2ZO.

ISLE OF MAN, MD4. Operators David, G3NKC, Peter, G4MJS, Martin, G4XUM, Lionel, G5LP, Michael, G7VJR and Mark, 2E0NCG will be active as MD4K during the RSGB IOTA Contest as a Multi entry. QSL via G3NKC.

ALAND ISLAND, OH0. Operators Norbert, DJ7JC, Ulrich, DJ9IE, Detlef, DK3QZ, Marcus, DL1EKC and Rein, PA0R will be active as OH0EC in the upcoming CQWW WPX CW Contest. The team members will be individually

active between May 24 and June 3 signing OH0/home call. The operation will be mainly CW with some 30, 17 and 12 meter activity. QSL OH0EC via DL1EKC, and the individual operators via their respective home call signs. All QSLs are OK via Bureau.

PACIFIC TOUR. Steve, 9M6DXX (G4JVG), will active as FK/G4JVG from Noumea, OC-032, New Caledonia, between May 22 and June 3, and as G4JVG/VK4 from North Stradbroke Island, OC-137, Australia, between June 7 and 9. Activity will be holiday style while celebrating his 25th wedding anniversary with Eva, 9M6EVA. Operations will be SSB only, on 40, 20 and 17 meters, and possibly 15 meters. QSL both operations via Tim, M0URX, direct, by the Bureau or LoTW.

TURKEY, YM3. Yasar, TA3D, will be active as YM3D during the CQWW WPX CW Contest as a Single-Op/All-Band entry. QSL via TA3D.

NIUE, ZK2. Chris, ZL1CT, (GM3WOJ), will be active as ZK2V May 17 through June 20. Activity will be mainly on 80, 40, 20 and 15 meters using CW and SSB, with some 30, 17 and 12 meter activity and RTTY. QSL via N3SL.

CHINA, BY. I0SNY, Nicola Sanna, will be operating BY1DX May 14 through 16. His operating time will be from 0700 to 1100Z each of those three days. He will sign BY1DX/I0SNY on 40 through 10 meters. QSL via I0SNY.

CYPRUS, 5B. 5B/OZ1IIL will be active until May 16. He is activating various lighthouses.

JAPAN, 8J. Ten special calls from 8J04OM to 8J94OM will be on from each of Japan's 10 call districts from May 16 to July 20. They are celebrating the 40 meter band expansion in Japan. QSL all via the JARL bureau.

ALGERIA, 7X. 7X2DD will be a special call sign for the International Algerian Sahara HAM Meeting June 15 to 21. Hosted by members of the Algerian Radio Amateurs Association, ARA and the Djelfa Radio Club (7X2VFK), this one will be all bands and modes and there will be a special diploma instead of a standard QSL card.

OPERATIONS APPROVED FOR DXCC CREDIT. The following operations are approved for DXCC credit: J20SE, Djibouti, 2009 Operation and A52DT, Bhutan, 2009 Operation.

THIS WEEKEND ON THE RADIO. The NCCC Sprint, Feld Hell Sprint, EU PSK DX Contest, His Majesty King of Spain Contest, Baltic Contest, All America Contest, Run for the Bacon QRP Contest and the Worked All Britain - LF Phone Contest are all on tap for this weekend. Please May QST, page 80, and the ARRL and WA7BNM Contest Web sites for details.

From: rmontemerlo
Topic: 9857 Message: 9857

Just compared the countries I still need against top 50 list and no big surprises.

I was surprised, however, to see that 3 I need are not even listed in the 2008 100 Most Wanted List.

CEO Easter Island (heard 1 operation0
D6 Comoros
R1MV Malyi Vysotskij I.

Has there been anything in the last 5 years or have I been asleep at the wheel?

Still waiting to see a good part of a cycle...

Bob KB1JZU

All have been active in the last 5 years, Bob. Possibly more,
but CE0Y/N6NO in Nov 2008, and D69XC in 2007. Maybe R1 is stretching
it as the last QSL I have is R1MVI from Sept 2004, although that is
technically within the 5 years. (I have all the QSLs in hand for the
above operations so they really did occur.)

There used to be a ham who lived on Easter Island (I think his name was Henry?) He was very active. Is he still around? I haven't heard him in a while. I'd have to check my old logs but I want to say his call was XQ0YAF.

I think there was a station operating from D6 just recently.

M-V Island is one of those rarer ones but it does get activated now and then.

Paul/Zack thanks....

I'm seeing part of the problem at least with D69XC....no cw here except for within NA (I'm to slow). Only look for SSB & Digital spots.
Won't log new one one CW until I can keep up without aids.

I came back on the air approximately 5 years ago (spring 2004) and I've heard and worked all those entities you list. There was a particularly large dxpedition to R1MV back about three to four years ago.

Easter Is. has been on, but not in a very big way. There have been several ops there, but none of them were extremely active.

I looked on Google for Henry, XQ0YAF, and see various reports of his being active from the early to mid-90's (when I used to work him a lot) through maybe 2003. Don't see anything after that. So I don't know if he became a silent key or moved off the island, but it doesn't look like he's active, at least not as he used to be. He was on 15 CW practically every afternoon years ago.

Thanks Art

I just found R1MVW in Nov 2005 on DX Summit. I must have been in hibernation. There was some big D6 Dxpedition that set records at the time but I believe that was several years before (2002?)

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 May 14 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 134 Issued at 2200Z on 14 May 2009
IA. Analysis of Solar Active Regions and Activity from 13/2100Z
to 14/2100Z: Solar activity was very low. Region 1017 (N18E17)
remains a Bxo beta spot group. This region was relatively quiet,
however, it has increased slightly in sunspot count.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 13/2100Z to 14/2100Z:
Geomagnetic field activity was at quiet levels.
IIB. Geophysical Activity Forecast: Geomagnetic field activity is
expected to be predominately quiet for the next three days (15 - 17
May).
III. Event Probabilities 15 May-17 May
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF Green
IV. Penticton 10.7 cm Flux
Observed 14 May 074
Predicted 15 May-17 May 075/075/075
90 Day Mean 14 May 070
V. Geomagnetic A Indices
Observed Afr/Ap 13 May 002/003
Estimated Afr/Ap 14 May 005/005
Predicted Afr/Ap 15 May-17 May 005/008-005/005-005/005
VI. Geomagnetic Activity Probabilities 15 May-17 May
A. Middle Latitudes
Active 05/05/05
Minor storm 01/01/01
Major-severe storm 01/01/01

The last few days I've heard what sounds like regular RTTY on
14.0053 MHz. Won't decode at 45 baud regular or reversed. I haven't
done a lot of fooling around with the digital modes lately, but it
does sound like RTTY (not PSK or the like.) Pretty loud, and I don't
know where it's coming from for sure. Seems to be peaking out of EU
, but I haven't done a lot of beam swinging. Maybe it will go away.

I wouldn't limit it to that, Bob. Most "pros" use keyboards, especially in contests. I have a straight key, a set of brass paddles and a keyboard in "parallel" and I'm 50/50 between the paddles and the keyboard. Just because the retired professional RO's can do it at 40 WPM with a straight key doesn't set the standard for the rest of us to do the same. Many logging programs and almost all contest programs have computer sending capability.

Regarding copying, all of the ones you mentioned are not going to rag-chew. You just need to be able to copy 5NN and your call and 25+ WPM, and be able to send back 5NN TU or equivalent. The best way to learn to do this under pressure is to get in there and call (make 100% sure you can copy your call (or part of it with a ?) and go for it. Don't get a MFJ Pocket Code Reader or computer decoding software because all of these reading "aids" are junk and don't work. However with a keying program that will send your call, etc. you should be able to work the kind of DX you described without being able to converse in high speed CW . . . and hold your head high afterwards.

Everyone sets their own standards, and I'm suggesting that you shouldn't shun CW because you feel you need an aid of some sort. If it helps, get one, but you'll learn really fast to haul your call out of a din of 1000 calling. It just jumps out at a guy. Really, it does. More distinct than on phone. I can't explain why, but it's like someone yelled it in your ear.

The D6 mega-DXpedition was D68C in 2001, and they went there in shifts of 10-12 OPs for almost a month. They made 168,722 QSOs. The info on that one is here:

Download a copy of Morserunner or RUFZ and play around with it. Morserunner is fun because it pretty realistically simulates a pileup (YOU'RE the DX working the pileup). It's a fun way to improve your code speed.

Paul

Thank you for the encouragement!

I am not avoiding CW and definitely don't shy away from computer generated or keyed code. I actually did the entire W1SLF TPA with a paddle at 20wpm but as always recieving is the issue. I need 10-15wpm with repeats not what you want in a huge DX pile up.

Yes I can copy 5NN, TU, & 73 at high speed. W1SLF is pretty easy too but KB1JZU is a challenge. I have logged a number of duplicates band/countries using the computer, hearing, and CWget as a back up.

Its interesting, at my level if its loud enough for CWget to copy it easily then I can recognize a response. If it to weak for CWget then although I can hear it I am not capable of decoding it either.

It is just a ethical thing with me. I deserve new ones on Phone & Digital! Might not be the best but I will go up against anyone.

Just don't feel I deserve adding to the mix count based on a CW contacts since I really am not capable of a "QSO" at that speed. What can I say......its a personality flaw.

Having said that I still try to practice so that in my old age I have something new to work on ....HI

Always a pleasure Paul

9871. Am I the LID?

Yahoo group: DX-IS (2009)
Date: 2009-05-15 14:14:50 UTC
From: Mark Lunday, WD4ELG
Topic: 9871 Message: 9871

1200 UTC today (Friday), DU3NXE has a medium pileup going on 20 CW. He's sending about 25 WPM, I copy him 589 (first time I have EVER heard a DU station on any band, so I am in there fast into the pileup).

DU3 is giving stations E and W coast NA an RST of 539 and 529, so I know with my 100 watts it is going to be close.

DU3 is excellent op, he is running the pileup well, fast, but obviously he is not copying anyone 599 because he is occasionally pausing after each SK.

So after one SK from DU3, several of us are calling. He does not respond (slight pause, as usual). We keep calling for another 30 sec. Then no one calling but N7*** and myself. We keep at it, hoping he will hear us.

I think maybe he is waiting for the herd to thin so that he can hear the weak signals better (N7 obviously thinks the same thing). So the N7 and I keep calling for another 30 sec.

Suddenly, someone stateside sends "LID" on the freq. I think to myself "HUH?"

Now, this guy who sent it was not the N7 station (who was S2 here), and the OM who sent it did not send their call. And this OM was no newbie using a machine to copy code. I would presume he is an OT DXer. Would a newbie send LID? I think not.

So the question, from me the DX rookie to all you guru DXers out there: was I being a LID in this case? What is generally accepted procedure in this instance?

Mark Lunday

No, you weren't the lid. I would've done the same myself. The only case where I'd consider myself a lid in this instance is if the DX got into a QSO and was working someone and I kept sending my call.

I always ignore such comments if the other station doesn't send a callsign. Sending "LID" without sending his call immediately puts HIM in the "LID" category. It's also illegal.

From: WA8WV@aol.com
Topic: 9871 Message: 9873

Keep in mind, another possibility since the DU was weak and poor copy. You, WD4ELG may have lost copy and the DU was working someone at that time. Who knows but..... that does happen.

DX,
Dave WA8WV

*** 4 2 5 D X N E W S ***
**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

4J - The Federation of Radio Sports of Azerbaijan is organizing an expedition to Nagorno Karabakh from 28 May to 1 June. The team will operate as 4K3K and 4J0K, including activity during the CQ WW WPX CW Contest. QSL for both calls via RW6HS. [TNX 4J5T]
5B - John/5B4AIS, Paul/DH9VA, Stelios/SV1AAU, John/SV1GE, Chris/SV2DGH, Takis/SV2FWV and Sakis/SV2HNC will be active as C4SV from Cyprus (AS-004) on 23-29 May. They plan to be QRV on all bands SSB, CW, RTTY. QSL via SV2DGH. [TNX SV2DGH]
DL - Thomas, DH1TS will be active as DH1TS/p from Amrum Island (EU-042) on 20-28 May. QSL via home call, bureau preferred. [TNX www.rsgbiota.org]
E7 - The Akademski Radio Klub (E74EBL) will operate special event call E709WRC on 17-24 May for the World Rafting Championship to be held in Banja Luka, Bosnia & Herzegovina. QSL via E77E. [TNX E77E]
EI - Stan, EI6DX (UA1OUT) will be active as EJ6DX from Inis Mor, Aran Islands (EU-006) on 22-24 May and again from 29 May to 1 June (including an entry in the CQ WW WPX CW Contest on 40 metres). QSL via RX3RC, direct or bureau. Updates will be available at www.ei6dx.com [TNX EI6DX]
F - A few special event stations are or will be active from French department 59 to commemorate the 150th anniversary of the birth of radioactivity pioneer and Nobel laureate Pierre Curie: TM6RPC (until 22 May, QSL via F8KOT), TM8RPC (until 24 May, QSL via F6KTN), TM2RPC (23 May-5 June, QSL via F6BDM), TM5RPC (25 May-8 June, QSL via F8KGS). [TNX F8REF]
FO - Les (SP3DOI), Jan (SP3CYY), Wojciech (SP9PT), Jozef (SP9-31029) and Michel/FO5QB will be active from the Austral and Marquesas Islands between late September and late October:
29/09-12/10 TX5SPA (requested call) Tubuai (OC-152), Austral Isls
16/10-22/10 TX5SPM (requested call) Marquesas Isls (OC-027)
They will have three stations and will operate CW, SSB, RTTY and Possibly PSK31 on 160-10 metres, with an emphasis on working Europe on the low bands. QSL for both calls via SP9PT. The web site for

the expedition is at http://fo2009sp.pl [TNX SP9PT]
FR/G - The long-awaited DXpedition to Glorioso (AF-011) is now expected to take place in July. Three or four military radio amateurs, along with two film-makers from the Defence Press Service, will be on the island on 9-28 July. The team (including F5PRU, F5IRO, F5TLN, and maybe F4EGS or F5RQQ) will be active with three stations on 160-6 metres on as many modes as possible. Callsign to be announced, QSL via F5OGL. A log search will be available and updated on a daily basis at http://glorieuses2008.free.fr [TNX F6AJA]
G - John, M0XIG and Tony, 2E0SBS will operate special event station GB2CT on 21-23 May from the site of the optical telegraph at Chalton, Hampshire (England). The Chalton Shutter Telegraph was one of a number that operated as a communication link for the British Admiralty between London and Plymouth. QSL via M0XIG, direct or bureau.
G - Promoting geological heritage to the general public, special station GB6GEO will be on the air on 23-24 May from "Kent's Cavern", England's oldest "home" situated in the English Riviera Torbay). QSL via G3VOF. Details on this event, as well on the relevant certificate, can be found at qrz.com under GB6GEO. [TNX G3VOF]
GJ - Babs, DL7AFS and Lot, DJ7ZG are active as MJ/homecall from Jersey (EU-013) until 27 May. They will operate RTTY, PSK and SSB on 80-6 metres. QSLs via DL7AFS, bureau preferred. Their website is at http://www.qsl.net/dl7afs [TNX DXNL]
HB0 - Tina, DL5YL and Fred, DL5YM will be active as HB0/homecall from Liechtenstein from 20 June to 2 July. They will operate holiday style on the HF bands mainly CW, possibly with some RTTY. QSL via home calls. [TNX DL5YM]
HV - A group of operators from ARI Saronno (namely I2OGV, I2RFJ, I2ZBX, IK2DJV and IZ2LSC) will be active from HV5PUL, the amateur radio station at the Pontifical Lateran University (Vatican City), on 1, 3 and 4 June. They will operate CW, SSB and RTTY on the HF bands and 6 metres. QSL to HV5PUL (see qrz.com). [TNX IW0DJB]
I - IW2MZX, IZ2AJE, IZ2GLU and IZ2GMT will be active as IF9E from Levanzo Island (EU-054, IIA TP-009) on 21-24 May. They plan to operate CW, SSB, RTTY and PSK31 on 10, 15, 20, 40 and 80 metres. QSL via IZ2GLU, direct and bureau. [TNX IZ2GMT]
I - Special callsign II6AN will be aired from 27 May to 10 June to celebrate the 60th anniversary of ARI Ancona. Expect activity on the HF, VHF, UFH and SHF bands SSB, CW and digital modes. QSL via IK6VXO. [TNX I6GFX]
J6 - John, W5JON will be active on 160-6 metres as J68JA from St. Lucia (NA-108) on 20-30 October, including a SOAB entry in the CQ WW DX SSB Contest. QSL via W5JON. [TNX W5JON].
KL - Don, N6IC will be active as N6IC/KL7 from Douglas Island (NA-041) during a family visit on 21-30 May. QSL via home call. [TNX www.rsgbiota.org]
OH0 - DJ7JC, DJ9IE, DK3QZ, DL1EKC and PA0R will be active as OH0/homecall

(QSL via home calls, direct or bureau) from the Aland Islands (EU-002) from 24 May to 3 June, including an entry in the CQ WW WPX CW Contest as OH0EC (QSL via DL1EKC, direct or bureau). Look for them on 30, 17 and 12 metres CW outside the WPX event. [TNX DL1EKC]
ON - Kurt, ON4CB and Francois, ON4LO will be active from Lillo lighthouse (ARLHS BEL-028) on 23-24 May. They plan to operate SSB on 20, 40 and 80 metres. QSL via bureau. [TNX ON4LO]
OZ - Harry/PA1H and Nico/PA7PA will be active as OZ/homecall from Lango Island, off Langeland Island (EU-172) from 25 July to 1 August, IOTA Contest included. They will operate SSB and digital modes on 10-160 metres, with some activity on the VHF bands. QSL via home calls, direct or bureau. [TNX PA1H]
SV - Michael, DF3IS will be active as J48IS from Thassos Island (EU-174) on 19-25 May. QSL via home call, bureau or direct. [TNX DXNL]
SV - The White Tower DX Team (www.whitetowerdxt.com) will be active as SY2WT from Posidhion Lighthouse (ARLHS GRE-111) on 22-31 May, including an entry in the CQ WW WPX CW Contest. QSL via SV2FPU, direct or bureau. [TNX SV2FPU]
SV5 - Darren, G0TSM will be active holiday style as SV5/G0TSM from Kos Island (EU-001) from 20 May to 3 June. He will focus on 6 and 12 metres (SSB and CW), running 100 watts to a 3-element yagi for 6m and a quad loop for 12m. QSL via home call. [TNX G0TSM]
TA - TA0U, TA1FR, TA1HZ, TA2DJ, TA2JN and TA2RX will be active as TC2009UC on 16-20 May. The special callsign celebrates the final match of the 2008-09 UEFA Cup football (soccer) tournament to be played in Instanbul on 20 May. QSL via TA1HZ. [TNX TA1HZ]
TA - Special callsign TC2ATAM will be activated on 17-19 May to commemorate the 90th anniversary of Mustafa Kemal Ataturk's arrival to Samsun, the city where he initiated the War of Independence. Main activity will be on 20-40 metres. QSL via TA1KB. [TNX TA1HZ]
TA - Ondra (OK1CDJ), Frantisek (OK1DF), Zdenek (OK1FIA), Pavel (OK1MU) and Slavek (OK1TN) will be active as TC098A from Kara Ada (AS-098) on 17-22 May. They will operate SSB and CW on 10-40 metres, and possibly via ES on the VHF bands. They plan to be on the air for about 16-18 hours a day with two stations. QSL via OK2GZ, direct or bureau. Further information can be found at http://www.okdxf.eu/expedice/tc098a/en/ [TNX OK1MU]
TK - Eva, HA3FRE and Tomi, HA4DX will be active as TK/homecall from Ersa, Corsica (EU-014) on 16-23 May. They plan to operate mainly on 30 and 40 metres CW during their evenings and nights. QSL via home calls, direct or bureau. [TNX HA0HW]
TK - Enrico, I4GAD will be sailing in the TK waters between 17 and 23 May. He hopes to be able to operate as TK/I4GAD from the main island (EU-014) and either the Cerbicales (EU-100) and the Sanguinaires (EU-104) islands. Activity will be for a few hours only, mainly CW. [TNX I4GAD]
TZ - Ed/W0SD, Arliss/W7XU and possibly others will be active as TZ6EI from Mali from 26 June to 5 July. Their primary focus will be 6

metres on 50103 kHz, with some HF operation planned for late night non-Sporadic E hours. "Please just send us your RST/RS signal report", they say, "we do not need your grid square". Due to the lack of an internet connection no on-line logs are planned. QSL via W7XU. [TNX W0SD]
UR - Crisna, IZ3GWJ says he will be active as UT/IZ3GWJ from Ternopil, Ukraine until 30 May. He plans to concentrate on 20, 10 and 6 metres (locator KN29).
UR - Special event station EM5UCC will be active on all bands and modes on 20-25 May for the 19th Conference of the Ukrainian Contest Club that will be held in Kiev. QSL via UY5ZZ. [TNX UY5ZZ]
V3 - Terry, W6WTG (V31UR) and Sharon, N2OWL (V31WL) have postponed their July trip to Caye Caulker [425DXN 915]. New dates to be decided.
VE - Dick/VE1AI, Frank/VE1FHW, Ella/VE1PEI, Scott/VE1QD, Gary/VE1RGB and Ken/VY2RU will be active from Brier Island (NA-127, CIsA NS-011) on 22-25 May. [TNX VY2RU]
VK9N - A group of operators from the Hellenic Amateur Radio Association of Australia will be active as VK9AAA from Norfolk Island (OC-005) on 22-29 July, IOTA Contest included. They plan to be active with multiple stations on 160-6 metres CW, SSB and RTTY. QSL via W3HNK. Further information can be found at http://vk9aaa.blogspot.com [TNX NG3K]
YB - YB7IM and others will be active as YE7M from Payung Payungan, Laut Kecil Islands (OC-268) on 22-24 May. They plan to operate SSB (7080, 14260, 18150, 21260 and 28360 kHz) and CW (7023, 14040, 18098, 21040 and 28040 kHz). QSL via YB7KNV.

PACIFIC TRIP ---> Steve, 9M6DXX (G4JVG) will operate as FK/G4JVG from Noumea (OC-032) from 22 May until 3 June, and as G4JVG/VK4 from North Stradbroke Island (OC-137) on 7-9 June. Both operations will be holiday style while celebrating his 25th wedding anniversary with Eva, 9M6EVA. Activity will be SSB only, using 100 watts to 'fishing rod' verticals on 40, 20, 17 and perhaps 15 metres. QSL both operations via M0URX, direct or bureau. The logs will be uploaded to LoTW. [TNX 9M6DXX]

Direttore Responsabile I2VGW

CQ HALLS OF FAME ---> The CQ Amateur Radio Hall of Fame was established in January 2001 to recognize individuals - radio amateurs or not - who significantly affected the course of Amateur Radio, as well as radio amateurs who have made significant contributions either to amateur radio, to their professional careers or to some other aspect of life on our planet. This year's inductees are:
Bill Baker, W1BKR Jack Kilby
Loy Barton Alois Krischke, DJ0TR

Frank Bauer, KA3HDO Walt Maxwell,W2DU
William Bridges, W6FA Lt. Gen. Thomas Miller, K4IC (SK)
Fernando Fernandez Martin, EA8AK Wilse Morgan, WX7P
George Floyd, WA4DGA (SK) Ron Parise, WA4SIR (SK)
Eric Haseltine, AB3DI Clay Whitehead, W6WW (SK)
Riley Hollingsworth, K4ZDH
The CQ Contest Hall of Fame was established in 1986 to recognize Amateur Radio operators who have made major contributions to contesting. This year's inductee is the Rev. Paul Bittner, W0AIH.
The CQ DX Hall of Fame was established in 1967 to recognize major contributions by DXers. This year's inductees are Neville Cheadle, G3NUG and Tom Harrell, N4XP.

DXCC NEWS ---> The following operations have been approved for DXCC credit:
J20SE Djibouti 2009 Operation
A52DT Bhutan 2009 Operation

QSL 8P6DR ---> Richard, G3RWL says that all logs have now been recovered [425DXN 939] and all outstanding QSL requests have been answered.

QSL 9V1YC ---> The QSL route is via N5ID, but serious health problems have prevented Joe from responding to QSL requests for several months now. Randy Becnel, W5UE is "temporarily taking over answering Joe's backlog of requests", starting with direct cards for 9V1YC (bureau cards will follow as time allows). Once he has the blank cards, he will also answer N1YC/VK9X and 9V9HQ requests. [TNX Xthe Daily DX]

WRTC ---> Next year's World Radiosport Team Championship, to be held in Russia on 8-12 July, will be for the first time a Field Day style competition. The 50 teams will be scattered on a wide area in the open country to the south of Moscow. The website for the event is at http://www.wrtc2010.ru

---

9876. RE: [DX-IS] Re: Where are they now?

Yahoo group: DX-IS (2009)
Date: 2009-05-15 20:47:59 UTC
From: Alan Leith
Topic: 9857 Message: 9876

One observation, gents: just listen to the CW prowess of the "machine head" when he is asked to repeat something. He generally asks for a repeat of the question, has to stop and think before sending the repeat, and his code sending ability is dismal. Then he gets back on his keyboard and all is well in the contest world.

BTW, the same happens when a guy who can't send code is answered by the DX and he has to insert his name and QTH into the reply. Some guys program their keyers, of course, but many don't. They, to my mind, should not be allowed to operate CW and should be publicly embarrassed at every opportunity.

Admittedly, my CW prowess has diminished considerably due to medical reasons and sometimes I get caught in situations where my CW is unbearable (they call it essential tremors -- something I don't consider essential at all) but all they guys I hear sending poorly can't possibly be suffering the same problem. Can they?

I wouldn't limit it to that, Bob. Most "pros" use keyboards, especially in contests. I have a straight key, a set of brass paddles and a keyboard in "parallel" and I'm 50/50 between the paddles and the keyboard. Just because the retired professional RO's can do it at 40 WPM with a straight key doesn't set the standard for the rest of us to do the same. Many logging programs and almost all contest programs have computer sending capability.

Regarding copying, all of the ones you mentioned are not going to rag-chew. You just need to be able to copy 5NN and your call and 25+ WPM, and be able to send back 5NN TU or equivalent. The best way to learn to do this under pressure is to get in there and call (make 100% sure you can copy your call (or part of it with a ?) and go for it. Don't get a MFJ Pocket Code Reader or computer decoding software because all of these reading "aids" are junk and don't work. However with a keying program that will send your call, etc. you should be able to work the kind of DX you described without being able to converse in high speed CW . . . and hold your head high afterwards.

Everyone sets their own standards, and I'm suggesting that you shouldn't shun CW because you feel you need an aid of some sort. If it helps, get one, but you'll learn really fast to haul your call out of a din of 1000 calling. It just jumps out at a guy. Really, it does. More distinct than on phone. I can't explain why, but it's like someone yelled it in your ear.

The D6 mega-DXpedition was D68C in 2001, and they went there in shifts of 10-12 OPs for almost a month. They made 168,722 QSOs. The info on that one is here:

You ever been driving down the highway minding your own business while you're driving the speed limit and along comes someone who drives right up behind you and tailgates? He's just right on your bumper. He can go around you but he'd rather still sit on your tail. Eventually he passes you and flips you off as he flies by.

Sometimes those guys buy ham radios.

Don't be sweatin' the small stuff, Mark. The LID was probably sending to the LID you couldn't hear. Most importantly, did you work the DU?

73

Al, VE1AL

BTW, I've worked NXE many times, always on 20, and he is a good operator. He'll be back.

From: DX-IS@yahoogroups.com [mailto:DX-IS@yahoogroups.com] On Behalf Of Mark Lunday, WD4ELG
Sent: Friday, May 15, 2009 11:15 AM
To: DX-IS@yahoogroups.com
Subject: [DX-IS] Am I the LID?

1200 UTC today (Friday), DU3NXE has a medium pileup going on 20 CW. He's sending about 25 WPM, I copy him 589 (first time I have EVER heard a DU station on any band, so I am in there fast into the pileup).

DU3 is giving stations E and W coast NA an RST of 539 and 529, so I know with my 100 watts it is going to be close.

DU3 is excellent op, he is running the pileup well, fast, but obviously he is not copying anyone 599 because he is occasionally pausing after each SK.

So after one SK from DU3, several of us are calling. He does not respond (slight pause, as usual). We keep calling for another 30 sec. Then no one calling but N7*** and myself. We keep at it, hoping he will hear us.

I think maybe he is waiting for the herd to thin so that he can hear the weak signals better (N7 obviously thinks the same thing). So the N7 and I keep calling for another 30 sec.

Suddenly, someone stateside sends "LID" on the freq. I think to myself "HUH?"

Now, this guy who sent it was not the N7 station (who was S2 here), and the OM who sent it did not send their call. And this OM was no newbie using a machine to copy code. I would presume he is an OT DXer. Would a newbie send LID? I think not.

So the question, from me the DX rookie to all you guru DXers out there: was I being a LID in this case? What is generally accepted procedure in this instance?

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 May 15 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 135 Issued at 2200Z on 15 May 2009
IA. Analysis of Solar Active Regions and Activity from 14/2100Z
to 15/2100Z: Solar activity was very low. Region 1017 (N18E06)
remained quiet.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 14/2100Z to 15/2100Z:
Geomagnetic field activity was at predominately quiet levels.
IIB. Geophysical Activity Forecast: Geomagnetic field activity is
expected to be predominately quiet for the next three days (16 - 18
May).
III. Event Probabilities 16 May-18 May
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF Green
IV. Penticton 10.7 cm Flux

I may be mistaken on the D6 activation - on the road at the moment and don't have all my data handy. I worked them back in the 80s when Lloyd and Iris were there. The R1MVW was a pretty big thing not too long ago - it was a new one for me.

R1MV is an interesting situation. The "Russian controlled" territory is separated from Russia by Finland, so that gets it in as an entity via the rules. The interesting part is that Russia apparently doesn't actually own the territory, but leases it from Finland!

So the governing body is Russia even though Finland owns it.

Good stuff, Bob. As I said initially, everyone sets their own standards. As long as it is legal and according to the DXCC rules, I'm a happy camper! You will get your speed up by ear sooner than you think, and that's great.

Where I differ from some OPs when they try to judge others by their standards. Some feel there are the legal and DXCC regulations/rules, and on top of that some arbitrary "higher" level of operating they set for themselves, and if you or I or the kid down the road doesn't meet the same level, then they are looked down upon as a lesser DXers.

This is not restricted to CW in any way. It includes just about anything you can think of, from DX lists; to how much mic gain; to

how much power and a dozen other things. The best one I ever heard was a fellow chastising another for running about 700-800 watts when he chose to run 5 watts in the same pileup. He wanted to prove he could work DXCC QRP (a tough thing to do and requiring an excellent antenna system and great timing.) His point; "If you would stop using your linear, I'd have a lot better shot at my QRP DXCC. I don't need power because I have the skill to do it with 5 watts. You guys are ruining the fun."

My response to that sort of elitist attitude can't be printed here! :-)

I say let each DXer do it their way, and stop worrying about how others do it. Will be easier on the blood pressure and reduce ulcers! You are having fun at this game, and so am I. That's why we do it.

That doesn't make sense. If he was so skilled, he could do it in spite of the others running power. I would have a lot better chance of making honor roll if no one else ever called the DX.

That was my point, John. In this case, he apparently decided to try something exceedingly hard (work a major DXpedition during the first few days with 5 watts.) He claimed to be extremely skilled and to have an excellent antenna system. I have no reason to doubt either claim. He was still wasting his time in the face of the hordes calling with full smoke. (Something he had done for decades until he got them all worked, and was looking for a new challenge.) My point was, if any of us choose to set a high bar for ourselves, we ought not get mad at those who do not. It was a personal goal.

I can decide to try and work 100 on 160M with a 10-foot trapped vertical and 10 watts using 75 WPM computer generate CW, but I ought not be upset when the guys with a 4-squares and 1,500 watts sending at 20 WPM beat me out! :-)

Anyhow, my original point stands. We need to not take an elitist attitude and look down on other OPs because they don't do it the same way we do. Legality and meeting the DXCC rules are what is required. Anyone can impose additional personal goals beyond that to their heart's content. The key word is "personal."

Yes, I agree. It's all in the game. There are people running the legal limit, there are those with barefoot rigs and there are those running QRP. There are those with dipoles and there are those with stacked 6/6/6 on each band. They are all operating legally.

No one is forcing anyone to follow any of these paths. Economic conditions and choice of QTH may (I can't afford a legal-limit amp and can't put up several 70 foot towers with stacked monobanders in my yard). But that's not imposed by a particular individual - in part, it's still your choice. If you decide to choose a particular arrangement, you know the advantages and disadvantages and have to be willing to live with them.
When do we get some more sunspots?

Thanks to all who replied.

I never thought of comparing the incident to the car who comes up behind me. That's a good analogy. Of course, I never bother to flip the guy off.I have heard of many incidents where the aggressive driver then pulls out a weapon and pops a cap into the person who flipped the bird.

I did not work NXE this time, but I was so happy to even hear him. First time I have ever heard DU. Things looking up! DX IS.

Propagation Forecast Bulletin 20 ARLP020
>From Tad Cook, K7RA
Seattle, WA May 19, 2009
To all radio amateurs

SB PROP ARL ARLP020
ARLP020 Propagation de K7RA

After weeks of little or no sunspots, it is nice to have something to report. Following multiple false starts, quick-fading spots and knots of magnetic activity which never progressed into actual darkened sunspots, new sunspot group 1017 emerged on Wednesday, May 13. The daily sunspot number was 12, and the next day the size of the group approximately doubled, raising the sunspot number to 18. This is a cycle 24 sunspot group.

A week ago we expected active regions spotted by the STEREO mission would emerge into sunspots over the weekend, but like many others in the recent past, they faded away. The new sunspot this week emerged a few days later.

Last week's bulletin showed average daily solar flux at 68.5, and this week it was 72. The average solar flux for the last three days prior to this bulletin (May 12-14) was 73.9, indicating a further rise. On May 14, the daily predicted 45 day 10.7 cm solar flux from USAF/NOAA was raised to 75 for May 15-21. By the way, we've mentioned in the past that the link to the latest daily forecast at http://www.swpc.noaa.gov/ftpmenu/forecasts/45DF.html is sometimes delayed until after the forecast is put up, and you can hack the URL (web address) to the next date from the latest available forecast. Thursday's must be the longest delay between the forecast time and the time the link goes up on the web. Right now the forecast done at 2059z on May 14 is still not available at 1430z on May 15. But you can click on the latest link, which takes you to http://www.swpc.noaa.gov/ftpdir/forecasts/45DF/051345DF.txt and then change the date at the end of the URL to /051445DF.txt, which takes you to http://www.swpc.noaa.gov/ftpdir/forecasts/45DF/051445DF.txt. Over seventeen hours after it was written, this was still the only way to read Thursday's forecast.

There seems to be more confusion regarding the difference between number of sunspots and sunspot number. Mike Khokhlov, UA9CIR of Ekaterinburg in Asiatic Russia notes that the new Solar Cycle Prediction update for cycle 24 from NOAA (see http://www.swpc.noaa.gov/SolarCycle/index.html) issued a week ago said the cycle may peak four years from now ''with a maximum sunspot number of 90''. But in other reports, such as ARLS003 (http://www.arrl.org/w1aw/2009-arls003.html) this was changed to ''Solar Cycle 24 will peak in May 2013 with 90 sunspots per day on average''. Spaceweather.com got it wrong also, saying ''The panel predicts the upcoming Solar Cycle 24 will peak in May 2013 with 90 sunspots per day, averaged over a month'' (see http://tinyurl.com/qzfsyo). Update: Dr. Tony Phillips of Spaceweather.com said the error was corrected, but the link should have been changed so that it ends in php instead of htm. Edit that URL and page back and forth to see the difference.

Note that Thursday and Friday of this week had one sunspot group, but the sunspot numbers were 12 and 18. As mentioned in past bulletins, a good explanation for the arcane method for computing daily sunspot number is at http://www.ngdc.noaa.gov/stp/SOLAR/SSN/ssn.html, a NOAA page about the work of Johann Wolf.

The two references above to the ''90 sunspots'' error were actually widespread. Just Google the phrase ''90 sunspots per day'' and you will get hundreds of hits. Although NOAA was the source of the original correct information, NOAA News got it wrong at http://www.noaanews.noaa.gov/stories2009/20090508_solarstorm.html.

Dennis Eksten, W9SS tried to write in last week, but couldn't find our email address, which is toward the end of each bulletin. Or it should be. I was alarmed to find that it was missing from ARLP019, and I shuddered to think how long the bulletin had been coming out with no reference for contacting the author. Fortunately, it was only missing last week, and has been reinserted this week.

Dennis saw an Associated Press story last weekend titled ''Warning: Sunspot cycle beginning to intensify''. It was titled differently in different publications (see http://www.msnbc.msn.com/id/30644638/ and note that this also has the ''90 sunspots per day'' error) but Dennis wondered about the geomagnetic storm of 1859 and if it could happen today with the dire results mentioned in the article.

As far as I know, the tales of telegraph wires starting fires and aurora visible around the world were taken from contemporary nineteenth century accounts, and are true. I've heard this story for a long time, and seen references to 1859 newspaper accounts. This would make an interesting subject for historical research. The query was passed from W9SS to Tom Ciciora, KA9QPN, the Illinois SM, who commented, ''We can all pretty much agree that most newspaper accounts of natural phenomena were sensationalized back then in

order to assist the fledgling newspaper industry (kind of like now.), but the question bears asking. Is the scenario described even possible?''

We really have no way to predict whether this will happen again, just as we have no way to predict another cycle 19 or a Maunder Minimum. But the NAS predictions of 4-10 years recovery and trillions in damages certainly gives one pause for reflection. We do have much more complex and concentrated infrastructure currently, and seem more vulnerable.

This reminds one of the old stories about EMP (electromagnetic pulse from a nuclear blast) in warfare, and the vulnerability of solid state vs. old vacuum tube technology. In the Cold War, one side felt that their military hardware, in fighter jets for example, with modern solid state electronics was far superior to the other side, which may have used older designs with vacuum tubes. But it was pointed out that vacuum tubes are much less vulnerable to an EMP blast. The simpler, hardier design may be superior in a real life battlefield environment that has escalated to the unthinkable level. Thank goodness it was never tested with EMP in a real battle.

Much more to write about on some other topics, but we are out of time.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service at http://www.arrl.org/tis/info/propagation.html. For a detailed explanation of the numbers used in this bulletin, see http://www.arrl.org/tis/info/k9la-prop.html. An archive of past propagation bulletins is at http://www.arrl.org/w1aw/prop/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://www.arrl.org/qst/propcharts/.

Instructions for starting or ending email distribution of this bulletin are at http://www.arrl.org/w1aw.html#email.

Sunspot numbers for May 7 through 13 were 0, 0, 0, 0, 0, 0, and 12 with a mean of 1.7. 10.7 cm flux was 69.5, 70.8, 72.3, 71.8, 71.9, 73.9, and 73.8 with a mean of 72. Estimated planetary A indices were 10, 13, 6, 4, 4, 2 and 3 with a mean of 6. Estimated mid-latitude A indices were 7, 12, 6, 3, 2, 0 and 2 with a mean of 4.6.

Subject: FW: Visalia Reservations 2010

I have been informed by the 2010 Visalia Convention Chairman that hotel reservations for the Holiday Inn will begin on June 9, 2009 at 0945 hrs Pacific Daylight Time (1645 Z). For those wishing to stay at the Holiday Inn you must use their local phone number 1-559-651-5000. Do not use the web site or the 800 number.

Because of the large number of last minute room cancellation (more that 30

within 30 hours of the beginning of the convention) many rooms went unused

by convention attendees. Because it is our goal to fill the Hotel with

Convention Guests there is a change in cancellation policy for 2010. Rooms

must be canceled 7 days prior to the start of the Convention or the credit

card on file will be charge one nights room rate plus tax. This will enable

the Hotel to accommodate additional DX wait list guests in the final week

before the convention.

See you in Visalia April 16, 17 & 18, 2010.

check the web site for convention news.

9904. XX9ZB on 20

Yahoo group: DX-IS (2009)
Date: 2009-05-20 05:02:21 UTC
From: AD5VJ Bob
Topic: 9904 Message: 9904

Heads up DX lovers.

He is going to have something on the internet in a couple of days he says.

Thought some of you would get a kick out of my story this afternoon around 0101Z that happened to me, my Butternut and my little
200W popsicle of a station in Texas, it almost knocked me out of my chair. :0)

I was tuning around the band on 20 using my ground mounted Butternut Vertical. Just to see what the band might be yielding with the
new sunspots we have. Nothing overly surprising as I tuned. I came accross a QSO that seemed interesting for some reason. The two
men sounded like they had foreign accents, one a bit older than the other it seemed, except the older one was much weaker than the
other and I couldn't quite make him out all the time exactly due to the flutter on his signal.

They finished and signed. I heard the louder XE1 very clearly and the other station that had a bit of flutter on his signal was
still harder to make out, but I heard the XX9 very clearly, so I went for him.

Well, I thought, ok so it isn't any big deal just another Mexico station with a special call sign or something. (Little did I know.)

I called him and he came back to me on the first call.

Didn't seem to be anyone else on frequency so I had a clear shot. We worked through the QSB and flutter and exchanged 55 signal
reports, names, and when he said his QTH was Macao, I thought, ok that must be a city in Mexico somewhere I haven't heard of yet. In
the meantime the other station had spotted him on the Telnet.

We signed and it seemed like the whole world was coming back to this guy. Wow I thought, some special event this must be or guys are
really bored waiting on some real DX. By that time QRZ and my logging program caught up with each other and the *entity* said Macao.

At that point, I knew it had to be a new country, not a city in Mexico.

When I looked it up on Google MAPS, was I surprised to find out, it was in Asia and a country all its own.

Moral to the story, 'Work 'em first, find 'em later' Hi Hi

What little bit of sunspots we are experiencing seem to be helping, cant wait for the big numbers to start up.

Bob AD5VJ

SB DX ARL ARLD020
ARLD020 DX news

This week's bulletin was made possible with information provided by N4QX, NC1L, QRZ DX, the OPDX Bulletin, DXNL, 425 DX News, The Daily DX, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

ITU HQ, 4U1ITU. Hans, PB2T, Brennan, N4QX and others may be active as 4U1ITU until May 29. QSL direct.

CYPRUS, 5B. A group of operators will be QRV as C4SV from May 23 to 29. Activity will be on all HF bands using CW, SSB and RTTY. QSL via SV2DGH.

TOGO, 5V. Werner, DL9MBI is QRV as 5V7PM and has been active on 20 meters using RTTY after 1400z. QSL to home call.

MALDIVES, 8Q. IW3HVB will be QRV as 8Q7GP from the Bathala Island resort from May 27 to June 4. Activity is holiday style on the HF bands using SSB and PSK31. QSL to home call.

CHINA, BY. Rene, DL2JRM, Mee, BD4TQ, Meng, BD4TT and Dale, BA4TB are QRV as home calls/5 from Dayang Shan Island, IOTA AS-137, until May 24. QSL to home calls.

THE GAMBIA, C5. Andre, ON7YK is QRV as C56YK from Kotu East until June 7. Activity is on 6 meters using CW and SSB on 50110 kHz. QSL to home call.

NEW CALEDONIA, FK. Steve, 9M6DXX will be QRV as FK/G4JVG from May 22 to June 3. Activity will be on 40, 20, 17 and possibly 15 meters using SSB. QSL via M0URX.

ENGLAND, G. A group of operators will be QRV as GB6GEO May 23 and 24 from the English Riviera Global Geopark during the European Geo Parks Communication Event. Stations in other parts of the world will be active during this event as well. Activity is on 80, 40,

20, 15 and 10 meters. QSL via operators' instructions.

FINLAND, OH. Look for special event station OH5POPOV to be QRV on May 24 in commemoration of the Russian physicist and radio pioneer Alexander S. Popov. QSL via OH5VX.

ALAND ISLANDS, OH0. Uwe, DL6NDK, Iris, DL6LI and Ralf, DL9GTI will be QRV as OH0/home calls from May 23 to 29 while on holiday. Activity will be on 80 to 10 meters, including 6 and 2 meters, using mainly CW with some PSK31. QSL to home calls.

GREECE, SV. Laci, HA0HW will be QRV as J48HW and SV8/home call from Thassos Island, IOTA EU-174, from May 28 to June 6. Activity will be on 40, 30, 20, 17 and 6 meters using mainly CW, with some SSB, RTTY and PSK31. He will be active in the upcoming CQ WPX CW contest as J48HW. QSL to home call.

DODECANESE, SV5. Darren, G0TSM is QRV as SV5/home call from Kos, IOTA EU-001, until June 3 while on holiday. Activity is mainly on 12 and 6 meters using CW and SSB. QSL to home call.

TURKEY, TA. Karl, WA2KBZ is QRV as TA0/home call from Buyukada Island until June 17. Activity is on 40, 30, 20 and 17 meters using QRP CW only.

CORSICA, TK. Eva, HA3FRE and Tomi, HA4DX are QRV as TK/home calls from Cape Corse, IOTA WEU-014, until May 23. Activity is on 40 and 30 meters using mostly CW. QSL to home calls.

UKRAINE, UR. Special event station EM5UCC is QRV from Kiev until May 25 during the 19th conference of the Ukrainian Contest Club. QSL via UY5XX.

NIUE, ZK2. Chris, ZL1CT is QRV as ZK2V and is active on various HF bands using CW and SSB. He will also be an entry in the upcoming CQ WPX CW contest. QSL via N3SL.

OPERATIONS APPROVED FOR DXCC CREDIT. The following operations are approved for DXCC credit: Djibouti, J20SE, 2009 operation; Bhutan, A52DT, 2009 operation.

THIS WEEKEND ON THE RADIO. The NCCC Sprint, Bill Windle CW QSO Party, Kazakhstan DX CW Contest, Baltic Contest and the Geoparks Communications Weekend are all on tap for this weekend. The MI QRP Memorial Day CW Sprint is scheduled for May 25 to 26. The SKCC CW Sprint is scheduled for May 27. Please see May QST, page 80, and the ARRL and WA7BNM contest web sites for details.

0500 UTC, 0100 local on the East Coast. 20 meters is WIDE open. I am hearing east and west coast US, Middle East, Europe, Australia. I even worked my first EY station.

Are we REALLY at the bottom of the cycle? I have not heard 20 meters like this in a LONG time.

Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

5H - Win, DK9IP will be active as 5H2WK from Arusha, Tanzania from 28 May to 5 June. He will operate holiday style, with some activity being planned during the CQ WW WPX CW Contest. QSL via home call. [TNX MM0NDX]
8Q - Giulio, IW3HVB will be active holiday style as 8Q7GP from the Maldives (AS-013) from 26 May to 4 June. He will be running 100 watts to a multiband vertical antenna, with planned SSB and PSK31 activity mainly on 40, 30 and 20 metres. QSL via home call, direct or bureau. [TNX IW3HVB]
9A - Neno/9A5AN and Tom/9A2AA will be active from several different IOCA islands in IOTA group EU-170 between 24 May and 13 June. On 24-29 May they will be joined by Livio/9A3KS, while on 5-13 June they will be joined by Tibor/HA3HP. [TNX 9A2AA]
BY - Mee/BD4TQ, Meng/BD4TT (YL operator) and Dale/BA4TB, along with Rene/DL2JRM, will be active from Dayang Shan Island (AS-137) on 22-24 May. They plan to operate homecall/5 on all bands CW, SSB and digital modes. QSL via home calls. [TNX BA4TB]
EI - Robert/GI0NCA, Rudo/OM5FM and Vlado/OM7CA will be active as EI/homecall from Aranmore Island (EU-121) on 25-29 May, They plan to operate CW, RTTY and SSB on 80-10 metres from the local lighthouse (ARLHS IRE-02). QSL via home calls, direct or bureau. [TNX OM7CA]
F - Special callsign TM100C will be activated between 21 May and 4 June to celebrate the 100th anniversary of the first flight of aviation pioneers Gaston and Rene Caudron. QSL via F1RR. [TNX F8REF]
F - Once again (for the 58th year) the Association des Radioamateurs de la Sarthe will activate special event station TM6ACO for the 24 Hours of Le Mans. This year's operations will take place from 31 May to 14 June. QSL via F6KFI. Further information at http://asso.proxiland.fr/aras72/ [TNX F5TJC]
G - Members of the Southport & District Amateur Radio Club (http://www.sadarc.org.uk) will be operating special event station

GB5BOO at the Best of Ormskirk Festival on 30 May. During the
event they will raise money for MapAction
(http://www.mapaction.org/), and they would appreciate as many
contacts as possible to raise public awareness of this charity.
[TNX G7LFC]
H4 - Mike, KM9D (H44MY) and Jan, KF4TUG (H44TO) are now lying to anchor
at Lever Harbour, New Georgia Island (OC-149) and "searching for
an adequate operating location". QSL via OM2SA. [TNX The Daily DX]
HA - Laci, HA0HW will be active as SV8/HA0HW and J48HW from Thassos
Island (EU-174) from 28 May to 6 June, including an entry in the
CQ WW WPX CW Contest. He will operate mainly CW, with some SSB,
RTTY and PSK31 on various bands, with an emphasis on 40, 30, 20,
17 and 6 metres. QSL via HA0HW, direct or bureau. [TNX The Daily
DX]
I - Nuccio, I0YKN reports he will be active as IY0GM until 20 July.
The special callsign celebrates the 100th anniversary of the Nobel
Prize in physiscs awarded to Guglielmo Marconi. QSL via I0YKN.
I - Mauri, IZ5OVP will be active as IA5/IZ5OVP from Elba Island
(EU-028, IIA LI-001) on 24-25 May. QSL via home call. [TNX
Mediterraneo DX Club]
I - Look for IK4GLV/4, IK4JPR/4, IK4RUX/4, IZ4CCO/4 and IZ4ISX/4 to be
active from Scanno di Piallazza (EU-155, IIA FE-001) on 31 May and
1 June. They will operate CW and SSB on 80-6 metres. QSL via home
calls, direct or bureau. [TNX IK4RUX]
OH0 - Uwe/DL6NDK, Iris/DL6LI and Ralf/DL9GTI will be active from the
Aland Islands (EU-002) on 23-29 May. They plan to operate mainly
CW on 80-2 metres, with some PSK31 by DL6LI. QSL via home calls,
direct or bureau. [TNX DXNL]
OZ - Flemming, OZ5FM and Jakob, OZ7AEI will be active as homecall/p from
the lighthouse of Vorupoere Mole Fyr (ARLHS DEN-235) on
Vendsyssel-Thy Island (EU-171, DIA NJ-001) on 29 May. They plan to
operate on 20 and 40 metres SSB starting around 19 UTC. QSL via
home calls, direct or bureau. [TNX OZ7AEI]
PA - Special callsign PA08DWN will be aired on 30 May from Maassluis,
near Rotterdam. Operations will take place from the radio shack of
the "Elbe", a tugboat that is being restorated to serve as a
museumship. Expect CW only operations to take place between 8 and
15 UTC. QSL via PA3ALM. [TNX PA9HR]
SV - Dick, PA3DEU will operate as SV8/PA3DEU from Alonissos Island
(EU-072) from 25 May to 7 June. Look for him around the QRP
frequencies, as he will be running 5 watts only. [TNX PA3DEU]
TA - Karl, WA2KBZ is active as TA0/WA2KBZ from Buyukada, near Istanbul
(not IOTA) until 17 June. QSL via home call. [TNX ARRL DX News]

DX MEETING ---> Celebrating the 100th anniversary of the Nobel Prize in physics awarded to Guglielmo Marconi, the sixth DX Meeting organized by the West Ligurian ARI Radio Clubs will take place in Sanremo on 20 June. The venue will be the historical Villa Nobel, where Alfred Nobel lived and died in 1896. Further information at http://www.arisanremo.it/

GEOPARKS WEEKEND ---> A number of stations will be active for the Geoparks Communication Weekend (23-24 May). Besides GB6GEO [425DXN 941], announced participating stations from Europe include CS8GEO (Portugal), DD0D, DK0GEO and DR9VARUS (Germany), EI2GEO (Ireland), GB1GEO (Scotland), GB2MAC (Northern Ireland), GB5GEO (Wales), YP2GEO (Romania). Geopark stations will operate around 3680, 7080, 14180, 21180 and 28480 kHz. The CS Silver Fox (YO2KAR) offers an award for working "geo-stations" between 23 May and 30 December. Please e-mail cssilverfox@... for further information. [TNX G3VOF and N2YO]

QSL A71BU ---> This is the brand new callsign of Juma Al Kuwari (A71EM and A92GT), whose QSL manager is NI5DX. The cards for A71BU will need to be designed and ordered, so plase allow 6-8 weeks before the first QSLs are sent out. Also please note that EA7FTR is still the QSL manager for either A71EM and A92GT. [TNX K1XN and The Golist]

WPX CONTEST CERTIFICATES ---> CQ WPX Contest Director Randy Thompson, K5ZD, announced on 17 May that all those who took part in the WPX Contest (SSB and CW) for 2007-08 can now download electronic versions of their participation certificates in PDF format. Please visit http://www.cqwpx.com/blog/ for further information.

+ SILENT KEYS + Recently reported Silent Keys include Walfried A. Sommer (DJ2UT/AK4UT), Alain Koch (F6ADQ), John N. Kirkham (KC4B), Stephen N. Wolf (KF3CV), Victor N. Glazunov (RW9CB), Sergey P. Ivanov (UA0OO), Alexander Letov (UT0ET) and Lynn A. Schriner (W5FO).

Propagation Forecast Bulletin 21 ARLP021
>From Tad Cook, K7RA
Seattle, WA May 22, 2009
To all radio amateurs

SB PROP ARL ARLP021
ARLP021 Propagation de K7RA

Do sunspots matter? Many of us are surprised at how good conditions can be with zero sunspots. The weak solar wind and lack of flares and geomagnetic events likely have something to do with it. Many times during more active solar periods the sunspots were welcomed, but then some event associated with the higher solar activity would make conditions difficult, disrupt the ionosphere and increase absorption.

For example, look back to the Fall of 2003 bulletins via the index at http://www.arrl.org/w1aw/prop/2003-index.html and in addition to the text, note the sunspot numbers and A index listings at the end of each bulletin. There were plenty of sunspots, but if you look at Propagation Forecast Bulletin ARLP038 in September, or ARLP044 through ARLP049 around November, there were huge events that drove the planetary A index to 189 during one week and 162 the next. This is hard to imagine today. Also note the comment in ARLP051 in December 2003 about the relief from geomagnetic disturbances and somewhat higher sunspot activity. Actually, the planetary A index went as high as 43 one day that week, hardly a quiet geomagnetic number, but the previous two weeks were quite a bit calmer than the week prior.

Finding those old bulletins was aided by a graph of planetary A index progression from January 2000 to present on page 10 in the Preliminary Report and Forecast of May 12 at, http://www.swpc.noaa.gov/weekly/pdf/prf1758.pdf.

I apologize that last week's bulletin reached many people several days late. The bulletin was dated Friday, May 15, but for some reason did not get distributed via email until the following Monday night, and the date of the bulletin was changed to May 20. The bulletin mentioned that sunspots were just reappearing the day before, but by the time it went out, there were already five days of

sunspots. It turns out it had something to do with a string of minor unfortunate events, and HQ staff trying to administer bulletin distribution remotely from ARRL National Convention and the Hamvention held concurrently in Dayton, Ohio. Your author was safe and snug in Seattle (having visited Newington only once, decades ago), and wants to assure everyone that W1AW staff are really a brilliant and clever bunch, but Murphy struck.

The report linked from the main ARRL web page appeared as normal last Friday.

As often is the case, many interesting emails arrived in the past few days.

Bill Kollenbaum, W4XS/KH7XS of Laupahoehoe on the Island of Hawaii (the Big Island) has built an impressive station since moving there from Florida. Take a look at the station description and click on the antenna photo at the KH7XS QRZ.com page at http://www.qrz.com/kh7xs. Bill wrote about working European stations on 15 meters on May 18:

"Since moving to KH6 a couple of years ago, any openings to EU on 15 have been far and few between and I could count on my hands the total number of days I worked any EU on that band. The total number of EU in the log on that band has been around a hundred and almost all have been 569 and considerably weaker. On 15 this morning (EU sunset) I put 150 EU in the log from 1930Z until 2100Z, many of the stations were a true 589 and 599. The opening ran from the Ukraine and Scandinavia down to LZ and over to EA and G. There seemed to be little geographic advantage to the stations with OH0R calling in with a 589 report, and UK , Italian and Germans all hitting the S9 mark here. Conditions were outstanding. What a difference a small number of sunspots make, coupled with quiet conditions and a big daylight path!"

Bill's path to Europe is a long one. To Spain, the beam heading is not much different from the heading here in Seattle, a polar path at 23 degrees. But the path to Spain at around 8,000 miles is much longer than the 5,300 miles from Seattle or the 4,000 mile path from Ohio, or 3,400 mile path from Boston.

There were several comments about the comments I made about EMP and vacuum tubes in last week's bulletin. Gene Dathe, NA0G of Spring Valley, Minnesota pointed out that vacuum tubes are far more resistant to an EMP blast compared to solid state devices providing they are turned off. While operating, they could suffer from the same sort of risks.

Bob Voss, N4CD decided to research stories about the great geomagnetic storm of 1859. He sent along the http://www.solarstorms.org/SS1859.html link and wondered if the stories of fires could have been inspired by reports of a "blood red

horizon." He sent this
http://www.spaceweather.gc.ca/se-chr1-eng.php link from Spaceweather
Canada, and notes there were no fires reported for the 1859 event.
Bob notes that the NASA account at http://tinyurl.com/cfwab6
actually mentions fires in connection with the 1859 flare. There is
also an old nineteenth-century NY Times article at
http://tinyurl.com/ps6c4d.

Over the near term it looks like more quiet conditions. We had a
nice seven day run of sunspots, but do not know when they will
return. Geophysical Institute Prague says quiet conditions should
prevail May 22-28. NOAA and the US Air Force predict solar flux
settling back to 70, then rising again June 5-17.

If you would like to make a comment or have a tip for our readers,
email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL
Technical Information Service web page at,
http://www.arrl.org/tis/info/propagation.html. For a detailed
explanation of the numbers used in this bulletin, see
http://www.arrl.org/tis/info/k9la-prop.html. An archive of past
propagation bulletins is at, http://www.arrl.org/w1aw/prop/.

Monthly propagation charts between four USA regions and twelve
overseas locations are at http://www.arrl.org/qst/propcharts/.

Instructions for starting or ending email distribution of this
bulletin are at http://www.arrl.org/w1aw.html#email.

Sunspot numbers for May 14 through 20 were 18, 12, 15, 13, 14, 11,
and 0 with a mean of 11.9. 10.7 cm flux was 73.9, 73.7, 74.2, 74,
72.9, 72.3, and 71.5 with a mean of 73.2. Estimated planetary A
indices were 8, 2, 5, 3, 4, 5 and 4 with a mean of 4.4. Estimated
mid-latitude A indices were 8, 2, 3, 2, 2, 2 and 4 with a mean of
3.3.

9916. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-05-22 22:11:01 UTC
From: Paul Dunphy
Topic: 9721 Message: 9916

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 May 22 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 142 Issued at 2200Z on 22 May 2009
IA. Analysis of Solar Active Regions and Activity from 21/2100Z
to 22/2100Z: Solar activity was very low. No flares were observed
during the past 24 hours. The visible disk was spotless.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 21/2100Z to 22/2100Z:
The geomagnetic field was quiet.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be predominantly quiet for the next three days (23-25
May).
III. Event Probabilities 23 May-25 May
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF Green
IV. Penticton 10.7 cm Flux
Observed 22 May 072
Predicted 23 May-25 May 070/070/070
90 Day Mean 22 May 069
V. Geomagnetic A Indices
Observed Afr/Ap 21 May 002/005
Estimated Afr/Ap 22 May 004/005
Predicted Afr/Ap 23 May-25 May 005/005-005/005-005/005
VI. Geomagnetic Activity Probabilities 23 May-25 May
A. Middle Latitudes
Active 05/05/05
Minor storm 01/01/01
Major-severe storm 01/01/01

9917. Ohio/Penn DX Bulletin #909

Yahoo group: DX-IS (2009)
Date: 2009-05-22 19:03:30 UTC
From: Tedd Mirgliotta (KB8NW)
Topic: 9917 Message: 9917

SB DX @ WW < KB8NW $OPDX.909
Ohio/Penn DX Bulletin No. 909

The Ohio/Penn DX PacketCluster
DX Bulletin No. 909
BID: $OPDX.909
May 25, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q, KP2HC, N2YO, W2VU, NG3K, N4AA & QRZ DX, WT4M, W5UE, K8YSE, N8OFS, K0DEQ, W0SD, 4J5T, A35RK, DK8JB, DL7MAE & The DX News Letter, DX World of Ham Radio Web Site, EA5FL, F5NQL & UFT, G3NKC, HA5X, HARDXA, I1JQJ/IK1ADH & 425 DX News, IK4RUX, OE1ZKC, OK1MU, PA1H, Pete's-DX-Newsdesk, RSGB IOTA Web Site, VA3RJ & ICPO, VE1DHD, VE3DZ, VE9NC, VHF-DX-Portal (MMMonVHF) and VK4FW for the following DX information.

** SPECIAL NOTE FROM EDITOR (By KB8NW): The Dayton HamVention was again another enjoyable event for DXers and Contester. There seems to be more activities for DXers/Contesters this year than in past years. The DX and Contest suites, as well as the Contest University (CTU), and both the DX and Contest Dinner Banquets were really busy and well attended. If you have not heard, the SouthWest Ohio DX Association (SWODXA) presented two (not the usual one) "DXpedition of the Year" awards to: K5D Desecheo Island DXpedition (2009) and the VK9DWX Willis Island DXpedition (2008). By the way, both operations presented excellent presentations during the SWODXA DX Forum at the convention. There were other presentations during the SWODXA DX Forum (E44M Palestine DXpedition and K5LBU's African DX Safaris) and all were excellent programs. Just one last thing about Dayton, thanks to all who attended the NODXA Hospitality Suite. It was great meeting everyone and it seems NODXA will be having the suite again next year. Hope to see you there next year.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Friday, 15th-May, through Friday, 22nd-May there were 210 countries active. Countries available: 3A, 3B8, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5V, 5Z, 6W, 6Y, 7X, 8P, 9A, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9V, 9X, 9Y, A3, A4, A6, A7, A9, AP, BV, BY, C3, C5, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J8, JA, JD/m, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P4, PA, PJ2, PJ7, PY, PY0F, PZ, S2, S5, SM, SP, ST, SU, SV, SV5, SV9,

T7, T8, TA, TF, TG, TI, TJ, TK, TL, TN, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V4, V5, V6, V7, V8, VE, VK, VP2E, VP2M, VP2V, VP8, VP9, VR, VU, XE, XU, XX9, YB, YI, YJ, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZK2, ZK3, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3V8, TUNISIA. Alex, GM0DHZ, who was active from the "Radio Club Station of Tunisian Scouts" in Sousse between January 15th-February 6th and November 27th-December 18th in 2007, informs OPDX that he is expected to go back late this year. Operations from 3V8-land is not definite. Stay tuned!

4J/4K, AZERBAIJAN. Members of the Federation of Radio Sports of Azerbaijan plan to undertake a DXpedition into the Nagorno Karabakh area (4J/4K) between May 28th and June 1st. The team will use the callsigns 4K3K and 4J0K. The DXpedition is timed to be an entry in the CQWW WPX CW Contest (May 30-31st). Please be aware that the mentioned callsigns are only legal to operate in the assigned Nagorno Karabakh area. No other callsigns are issued for the named territory by the Ministry of Communication of Azerbaijan. Any other callsigns are considered illegal. The QSL Manager for this DXpedition is RW6HS.

4L, GEORGIA. Vaho, 4L8A, will be active during the CQWW WPX CW Contest (May 30-31st) as a Single-Op/Single-Band (20m)/High-Power entry. QSL via K1BV, by the Bureau or direct.

4U1W/4U30, AUSTRIA (Special Event). The Vienna International Amateur Radio Club station, 4U1VIC, will be active using the following special event callsigns as follows:
4U1WED - During June to celebrate World Environment Day
4U30VIC - Between July and December to celebrate the Vienna International Centre's (UN building in Vienna) 30th anniversary.
QSL via 4U1VIC: Amateur Radio Club, Vienna International Centre, P.O. Box 500, A-1400 Vienna, AUSTRIA.
PLEASE NOTE: For DXCC purpose, all (including 4U1VIC) counts as Austria (OE).

5H2, TANZANIA. Win, DK9IP/KH7CD, will be active as 5H2WK from Arusha between May 28th and June 5th. Activity will be a holiday style, so his operations will be limited. However, Win will try to be active during the CQWW WPX CW Contest (May 30-31st). QSL via DK9IP.

6W, SENEGAL. Al, F5VHJ, will be active as 6W1RY during the CQ WW WPX CW Contest (May 30-31st) as a Single-Op/All-Band/High-Power entry. QSL via F5VHJ.

7X, ALGERIA (Update/Special Event Callsign Change/Ham Meet). Members of the Algerian Radio Amateur Association (A.R.A) and Djelfa Radio Club (7X2VFK) will activate the special event callsign 7U2ISM during the

International Algerian Sahara HAM Meeting (June 15-21st). A number of stations will be on the air on 160-10 meters using CW and SSB with some sporadic RTTY and BPSK. A special diploma will be issued instead of a QSL card. QSL via 7X2DD. To see the diploma and other info, visit: http://www.qrz.com/db/7U2ISM

8Q, MALDIVES. Giulio, IW3HVB, will be active as 8Q7GP from Ari Atoll between May 27th and June 4th. Activity will be mainly 40/30/20 meters using SSB and PSK31. If the propagation is good, he will also try to operate on 17/15/12/10 meters. Suggested frequencies are:
SSB - 7057, 14267, 18137, 21267, 24957 and 28567
PSK31 - 7036.2, 10139.2, 14070.2, 180109.2, 21070.2, 24927.2 and 28120.2 kHz
Giulio will use an Elecraft K3 w/100 watts and multiband vertical antenna by I1UJX. QSL via IW3HVB, by the bureau or direct.

A3, TONGA (Update). Paul, A35RK, informed OPDX early last week that he has been having big S-9+ power line noise problems. He states, "It was bad while Dave, A35KL, was here, and it has gotten worse. The local power company crew came out here yesterday (May 11th) and tightened up alot of loose pole hardware and worked on a nearby transformer, but there was no improvement. They said that they would come back again another day. Let's hope so. It's truly a credit to the excellent noise reduction features of the Elecraft K3 that I am making any contacts at all under these conditions. I have been listening for EU contacts on 20/CW at about 0700z everyday, but I haven't had much luck. I will continue to try. Bad condx have been generally poor. I will probably be extending my visit here until mid-June. I'll let you know of the exact cut-off date after I make return reservations to Ha'apai. April and May logs will go to W7TSQ and LoTW on June 1st. The June to-date log will go out on the day I leave here."

AH0, MARIANA ISLANDS. Hiromitsu, JR2SCJ, will be active as AH0AA from Saipan, Northern Mariana Islands (OC-086) during the CQ WPX CW Contest (May 30-31st) as a Single-Op/Low-Power entry. QSL via JR2SCJ.

AN INTERVIEW WITH UA4WHX. Wolf, OE1WHC, of the "Documentary Archives Radio Communication" in Austria, conducts an interesting 14 minute interview with well-known DXpeditioner Vlad, UA4WHX, at: http://www.dokufunk.org/amateur_radio/personalities/index.php?CID=6065&lang=EN

CQ ANNOUNCES 2009 HALL OF FAME INDUCTEES. The following was received while your editor was attending the Dayton HamVention, and it was also announced during the DX and Contest dinner banquets: "(Dayton, OH - May 15, 2009) CQ magazine today announced its 2009 Hall of Fame inductees, welcoming 15 new members into the CQ Amateur Radio Hall of Fame, two new members of the CQ DX Hall of Fame and one new member of the CQ Contest Hall of Fame. The CQ Amateur Radio Hall of Fame honors those individuals, whether licensed hams or not, who have made significant contributions to amateur radio; and those amateurs who have made significant contributions either to amateur radio, to their professional careers or to some other aspect of life on our planet. The 2008 inductees (listed alphabetically) are:

Baker, Bill, W1BKR - President Emeritus, WNET-TV (Thirteen), New York PBS flagship station.
Barton, Loy - Developed class B plate modulation, primary method of modulating tube transmitters for decades.
Bauer, Frank, KA3HDO - NASA Chief Engineer for Exploration Systems; International Chairman, Amateur Radio on the International Space Station (ARISS), 1996-2009; AMSAT VP Human Space-flight, 1991-2009.
Bridges, William, W6FA - Laser pioneer; developed first "noble gas" lasers (argon, krypton, xenon) and the dominant modulation system for feeding data into fiber-optic cables; Professor Emeritus of Engineering at CalTech.
Fernandez Martin, Fernando, EA8AK - Member of the European Parliament, representing Spain; former President of the Government of the Canary Islands, former President of URE (Spanish IARU organization).
Floyd, George, WA4DGA (SK) - Author of "Scratchi" column in CQ over four decades. An engineer and executive at General Electric, he also wrote the "Lighthouse Larry" column in GE employee newsletters.
Haseltine, Eric, AB3DI - Former Associate Director of National Intelligence for Science and Technology; former Director of Research, National Security Agency; former Executive Vice President of Research and Development, Walt Disney Companies.
Hollingsworth, Riley, K4ZDH - Former Special Counsel for Amateur Radio, Federal Communications Commission. "Cleaned up" the ham bands after 15 years of neglect by the FCC.
Kilby, Jack - Inventor of the integrated circuit, which revolutionized electronics, including amateur radio equipment.
Krischke, Alois, DJ0TR - Prolific German author of antenna books. Rothammels Antennenbuch, a 1000-page reference showing virtually every amateur radio antenna ever designed, is in its 12th edition.
Maxwell, Walt, W2DU - Antenna designer (specializing in spacecraft communications) and author.
Miller, Lt. Gen. Thomas, K4IC (SK) - Deputy Chief of Staff for Aviation, USMC (1975-79) - in charge of all Marine Corps aviation; "father" of short-takeoff & vertical landing (STOVL) aviation in the USMC. Close friend of Sen. John Glenn; quietly watched out for amateur radio interests on Capitol Hill.
Morgan, Wilse, WX7P - Conducted first amateur radio license exam session under the Volunteer Examiner program in 1984; helped get VE program approved; also designed innovative antennas.
Parise, Ron, WA4SIR (SK) - Astronaut and active ham in space. First ham to operate packet radio from space and pioneered "telebridge" concept for making more frequent school-shuttle contacts possible. Also helped develop Radio JOVE, educational program for monitoring natural radio signals from Jupiter.
Whitehead, Clay, W6WW (SK) - First Director of the White House Office of

Telecommunications Policy in the 1970s; reshaped America's
television landscape by bringing competition to the domestic
satellite market and making it feasible for cable companies
to distribute their own programming via satellite.

The CQ Contest and DX Halls of Fame honor those amateurs who not only
excel in personal performance in these major areas of amateur radio
but who also "give back" to the hobby in outstanding ways.

The 2009 inductee to the CQ Contest Hall of Fame is:
The Rev. Paul Bittner, W0AIH - Paul's contest station near Eau Claire,
Wisconsin, is known in Midwestern contesting circles
simply as "The Farm." Spreading across 120 acres, Paul's
farm grows a wide variety of antennas as well as regular
crops of new contesters. Paul constantly seeks out and
trains new contesters at his multi/multi station and
welcomes visiting hams from around the world. He was
nominated by the Minnesota Wireless Association.

The 2009 inductees to the CQ DX Hall of Fame are:
Neville Cheadle, G3NUG - Nominated by both the Chiltern
DX Club and the Southeastern DX Club, Neville this year
is celebrating his 50th anniversary in amateur radio.
During that time he has confirmed 366 DX countries and
nearly 1000 islands. As founder of the Five Star DX
Association, Neville has been instrumental in organizing
four major DXpeditions which have involved more than 90
hams from 14 different countries and have accounted for
over a half million radio contacts! Neville is also the
co-author of DXpeditioning Behind the Scenes, a handbook
for hams on planning, setting up and operating successful
DXpeditions.

Tom Harrell, N4XP - Tom has confirmed 361 DXCC entities, holds 9-band
DXCC, 5-band Worked All Zones and WPX awards for SSB, CW
and mixed-mode. Tom has also operated from 19 different
DXCC entities, including two DXpeditions on which he was
Team Leader and three on which he was co-Team Leader. Most
recently, he served as Director of Off-Island Support for
the BS7H operation from Scarborough Reef, providing regular
news reports for the DX community. Tom was nominated by
the German DX Foundation.

Formal inductions to the CQ Contest and DX Halls of Fame were scheduled
for the contest and DX dinners, respectively, at the Dayton Hamvention.®"

E7, BOSNIA-HERZEGOVINA. Operators Ranko/E70R, Vlado/E70T, Radomir/E74IW,
Zoka/E76C, Braco/E77DX and Rob/E77E will be active as E7DX during the
CQWW WPX CW Contest (May 30-31st) as a Multi-Single entry. QSL via E77E.

GEOPARKS WEEKEND. Plenty of stations are expected to be active in the
Geoparks Communication Weekend May 23-24th. Geopark stations are suggested

to operate around or close to the following frequencies: 3680, 7080, 14180, 21180 and 28480 kHz. Several Geopark certificates and awards are available. Just to mention a couple:
UK Geopark certificate: To qualify, working GB6GEO will be an instant qualifier, or ANY two other Geopark stations (not including GB6GEO).

YO (Romania) Geopark Award - The CS Silver Fox issued an award for all who make 100 points working with GEO stations (each 20 points) + any station from HD county who give GEO after report (ex. YO2ARV 579/GEO). They give 10 points. Award period is between May 23rd and December 30th, 2009. For more info, please E-mail: cssilverfox@...m

HV, VATICAN. Members of Saronno ARI section will be active from HV5PUL, the amateur radio station at the Pontifical Lateran University, on June 1st and 3-4th. Activity will be on the HF bands and 6 meters using CW, SSB and RTTY. Operators mentioned are: Andrea/IZ2LSC, Giovanni/I2OGV, Ivano/I2RFJ, Giuseppe/I2ZBX and Romeo/IK2DJV. QSL direct to:HV5PUL, c/o Pontificia Universita Lateranense, 00120 Vatican City State.

IOTA NEWS.....
AS-098. A group of Turkish radio amateurs activated Karaada Island in the Aegean Sea this past week between May 17-21st, using the special callsign TC098A. Operators were Pavel/OK1MU (TA2ZAF), Slavek/OK1TN, Franta/OK1DF (7X0RY), Zdenek/OK1FIA and Onda/OK1CDJ. Activity took place on 40-10 meters and VHF (locator KM36RX). QSL via OK2GZ, by the Bureau, direct or via their Web page at: http://www.okdxf.eu/expedice/tc098a/en/

AS-137. Operators Rene/DL2JRM, Mee/BD4TQ, Meng/BD4TT (YL) and Dale/BA4TB were expected to be active from Dayang Shan Island, May 22-24th. Activity is to be on all bands using CW, SSB and the Digi-modes. Operators will sign homecall/5. QSL via their home callsigns.

EU-028. Mauri, IZ5OVP, will be active as IA5/IZ5OVP from Elba Island (IIA LI001, MIA MI-022), May 24-25th. QSL via his home callsign, by the Bureau or direct.

EU-042. Thomas, DH1TS, will be active as DH1TS/p from Amrum Island between now and May 28th. QSL via his home callsign, bureau is preferred.

EU-048. Thomas, DL5MO, will be active as F/DL5MO from Groix Island (DIFM AT-012, WLOTA 0050) between June 29th and July 10th. Activity will be holiday style with operations mainly on 40/30/20 meters. QSL via DL5MO, direct or by the Bureau.

EU-054. Operators Salvetti/IW2MZX, Andrea/IZ2AJE, Vincenzo/IZ2GLU and Fabio/IZ2GMT will be active as IF9E from Levanzo Island (IIA TP-009, MIA MI-050, WLOTA 1918), May 21-24th. Activity will

be on 80/40/20/15/10 meters using CW, SSB, RTTY and PSK31.
QSL via IZ2GLU, direct and by the Bureau.

EU-078. Operators George/EC2ADN and Christian/EA3NT will be active as EG3FI from Formigues Island, June 6-7th. This will be the first activation of Formigues Island since this island was added to the EU-078 group. Christian submitted all the necessary documents to be added. QSL via EA3NT, direct or by the bureau.

EU-121. Operators Robert/GI0NCA, Rudo/OM5FM and Vlado/OM7CA will be active as EI/homecall from Arranmore Island between May 25-29th. Activity will be on 80-10 meters using CW, RTTY and SSB. Operations will take place from Arranmore lighthouse (ARLHS IRE-002; WLOTA 1189) . QSL via their home callsign, direct or by the Burea.

EU-122. Members of Kilmarnock and Loudoun ARC (GM3YS/GM0ADX/GM7A) will be active as GI3YS from Rathlin Island (WLOTA 0039), Northern Ireland during the RSGB IOTA Contest (July 25-26th). Operators mentioned are: Allan/GM3OZB, Barry/GM3YEH, Steve/GM4OSS, John/GM0DJG and Gordon/MM0BIM. QSL via MM0DHQ, Bureau is preferred.

EU-155. Members of the Terre D' Argine Radio Team (TDART) will activate Scanno di Piallazza (IIA FE-001, Loc JN64ES) between May 31st and June 1st. Operators will sign homecall/P4. The team includes the following: Sergio/IK4JPR, Vanni/IK4RUX, Franco/IK4GLV, Gianni/IZ4ISX and Giuseppe/IZ4CCO. Activity will be on 40-6 meters using CW and SSB. QSL via their home callsigns, direct or by the ARI Bureau.

EU-172. Look for operators Harry/PA1H and Nico/PA7PA to be active as OZ/homecall from Lango Island (FY-019 and NOT EU-029!!!) between July 25th and August 1st. Lango Island belongs to the Langeland Island group, and there is only one house on the island. So it is a unique location situated in "The Lindelse Nor". Activity will be on 160-10 meters using SSB and the Digi-modes. They also plan to be active during the RSGB IOTA Contest (July 25-26th). There may also be some VHF operations. QSL via their home callsign, by the bureau or direct (QRZ.com addresses).

NA-127. Members of the Halifax Amateur Radio Club will be activating Briar Island (CISA NS 011) as VE1FO/p between Friday evening May 22nd through Sunday evening, May 24th. The team includes six couples: Dick/VE1AI and Sandra, Scott/VE1QD and Sue, Howard/VE1DHD and Jean, Gary/VE1RGB and Bev, Ken/VY2RU and Ella/ VE1PEI, and Frank/VE1FHW and Carol/VE1CBW. Activity will be from the Brier Island Lodge <www.brierislandlodge.com> on 80/40/30/20/17/15 meters using CW and SSB. QSL via VE1DHD, by the Bureau or direct to: Howard Dickson, Halifax Amateur Radio Club, PO Box 663, Halifax, N.S. B3J 3T3, CANADA. PLEASE

NOTE: QSLs outside USA and Canada, send one IRC, or 2 USDs.
QSLs from USA, do NOT send a SASE with a U.S. stamp on it!
You may send SASE with the proper amount of Canadian postage,
or 1 IRC or 1 USD. Cards without proper postage will be answered
via the bureau. EQSL.cc and bureau cards will be fully supported,
but they are not currently registered at eQSL.cc.

JT1/JT4, MONGOLIA (Update). A research team (Scott/KC0KHA, Dave, Gabor,
and Terry) is currently in JT-land on a Mongolian Vertebrate Parasite
Project (MVPP). The team has been assigned two club callsigns for two
different regions in Mongolia. While in Ulaanbaatar (and north of the
Gobi region), they will use the callsign JT1N. In the Gobi region they
will use the callsign JT4N. Their host in Ulaanbaatar is Naran, JT1BV.
It is recommend to watch 20 meters (14190 kHz after 1030z). At the end
of May, they will be doing field work in and around the Gobi Gurvan
Saikhan National Park in southern Mongolia through August. QSL via KC0KHA.
Read about their MVPP at: http://lamarck.unl.edu/mongolia/

KH4, MIDWAY ISLAND. Co-leaders Tom/N4XP and Dave/WB4JTT have posted the
following press release (Number 3 -- dated May 13, 2009)(edited):
"Arrangements and plans are moving along without difficulty for the
scheduled operation date of October 9-19th, 2009. We would like to announce
the addition of three new members, Carlos/EA1IR, Craig/K9CT and Oscar/EA1DR
to the team. Carlos, Craig and Oscar come to us with DXpedition experience,
and we look forward to having them as members of the team.
Numerous equipment suppliers and manufacturers are on line with their
support. When you deal with these companies or individuals please take a
moment and thank them for providing support to not only this DXpedition but
to all DXpeditions. Currently Acom, Heil, Rig Expert, The Battle Creek
Group, WX0B, Cable Experts, ELLI Print, QRZ-DX, The Daily DX, IZ2KTZ,
W8AEF, and W6SZN are providing equipment or support of some type.
The team would like to thank NCDXF, The Colvin Award, Southwest Ohio
DX Association, The German DX Foundation, INDEXA, The Southeastern DX
Club, The Lone Star DX Association, The Danish DX Group and others for
their generous donations. You may also contribute, and we will appreciate
your support. Contributions can be forwarded several ways, via the
<www.midway2009.com> web site using Pay Pal, credit card or U.S. Mail.
All contributions are noted on the web site and depending on the level
of support will be noted on the DXpedition QSL.
Many of the team members will be at Dayton and look forward to seeing
you. Please say hello when you see a member sporting the Blue NCDXF T
shirt with the K4M call walking around.
Two additional official web site features announced last month - The
Midway Memorabilia Store and the DX poll are being well received. Take a
look at the poll and see where your needs stand in regard to the rest of
the DX world.
This month we are highlighting three more team members. You can read
all their history at (Meet the ops part II):
http://www.midway2009.com/meettheops2.html "

KL7, ALASKA (IOTA/LH Op). Don, N6IC, will be heading north to visit his family in Alaska and will be active as N6IC/KL7 from Douglas Island (NA-041, USI AK-018S, WLOTA 3106) between now and May 30th. Look for activity ONLY during the day. QSL via his home callsign.

KP2, U.S. VIRGIN ISLANDS. Ann/KP2YL and Brian/KP2HC will be back on St. Croix, June 1-30th. Listen for them doing CW and SSB on 160-6 meters. June is 6m season in the Caribbean, and Brian will be monitoring that band. St Croix is IOTA NA-016 and grid FK77. QSL direct ONLY (information is available on QRZ.com).

LX, LUXEMBOURG. Operators Lars/DF1LON, Mike/DF3VM, Willfried/DF4PD, Chris/DL7CS, Robin/K4VU and Philippe/LX2A will be active as LX7I during the CQWW WPX CW Contest (May 30-31st) as a Multi-2 entry. QSL via LX2A. Visit the following Web page at: http://www.lx2a.com

MJ, JERSEY (EU-013). Operators Babs/DL7AFS and Lot/DJ7ZG are now active from here as MJ/homecall until May 27th. Activity is on 80-6 meters using SSB, RTTY and PSK. Over the past week QSNs show heavy activity on 30/17/10 meters. QSL via bureau to DL7AFS. Their online logs as well as more info can be found on their Web page at: http://www.qsl.net/dl7afs
ADDED NOTE: Look for them to be active as J79ZG from Dominica in October.

NEW OFFICERS FOR 2009-2010.....
Members of the French CW Society the Union
Francaise des Telegraphistes (UFT)
have elected the new officers for the year 2009-2010 as follows:
President : Vincent Ortega, F5MJV
Vice-President : Francis Fagon, F6ELU
Treasurer : Gerard Toussaint, F6ICG
Assistant Treasurer: Maurice Mathieu, F5IYU
Secretary : Bernard Irigoyen, F5HEW
Trustees : XYL Evelyne Terrail/F5RPB, XYL Claudine Declef/F5JER,
Frederic Bossu/F5INL, Jean-Claude Mercier/F6JOE and
Paolo Paravagna/F8ENY.

Members of the Strange Radio Team (SRT) have announced their new team:
Oreste, IZ8EDJ : President, responsible and organizer of DX Convention
Francesco, IZ7AUH: Vice-President & Webmaster
Francesco, IK8WEJ: Vice-President and responsible for SRT special calls
Marco, IZ7DOK : Vice-President & Event Manager
Christine, I0OCD : Secretary & International Public Relations
Fabio, IZ7CRW : Moderator Forum lists (SRT-FORUM / SRT-DX)
Federico, IW1QN : 50 MHz Memorial Day Contest Manager

QSL INFO AND NEWS.....
OA4O via direct or by the Bureau
TC2009UC via: P.O. Box 73, Karakoy 34421, Istanbul, TURKEY
TC2ATAM via TA1KB
YS1G via G3TXF or LoTW

9V1YC QSL STATUS. Randy, W5UE, reports that "James' (9V1YC), QSL Manager Joe, N5ID, has been suffering from an extended illness and has been in

the hospital or rehabilitation for several months unable to respond to QSL requests. As a result I am temporarily taking over answering Joe's backlog of requests. The priority will be direct requests, and I will get to bureau requests as time allows. I have all of James' logs and received an initial large batch of unopened direct requests from Joe's QTH and have blanks for 9V1YC so processing of those will begin this week. I will also be answering N1YC/VK9X and 9V9HQ requests once I have the blank cards. I will be receiving more from Joe over the next few weeks, so please continue to be patient. Please note that at this time this is a TEMPORARY change. PLEASE DO NOT update any QSL manager databases or routes as a result of this note. In the interim please feel free to direct any email queries about your 9V1YC status directly to me. Also, I will be updating status from time to time on my web page at <http://w5ue.net>. James and Joe both apologize for any inconvenience this has caused and appreciate your understanding. Please continue to keep Joe in your thoughts and prayers. 73"

NEW QSL ROUTE. Buzz, NI5DX, is now the QSL manager for Juma, A71BU. Juma has had his new callsign for only a week. He has already sent Buzz his up-to-date log. QSL cards will need to be designed and ordered. Please allow approximately 6-8 weeks before the first A71BU cards are sent out. A71EM and A92GT card requests still go to EA7FTR.

MJ4K QSL STATUS. Dave, G3NKC, informs that the QSLs have finally been received from printer on May 15th; all requests were printed the same day and were either posted the same day or the next day. He states, "I will turn all new direct requests around as fast as possible; usually within a week (usual rule apply with return postage). Users can apply for MD4K or MD6V QSLs at the same time; I don't mind!"

NOT THE QSL MANAGER. Bill, K0DEQ, reports that some sources report that K5FI is QSL manager for OD5GR, but an E-mail from K5FI asserts in the strongest possible terms that he is "NOT" the QSL Manager for OD5GR or anyone else. K5FI would appreciate help in correcting this misinformation. OD5GR is actually a PIRATE station.

TS7C QSL STATUS. It has been reported that about 2000 cards direct requests received up to May 10th were put in the mail by Sylvain, F4EGD, the QSL Manager. The Bureau cards are scheduled to be handed over to the French REF-Union Bureau in Tours during the second half of May.

Chris, HA5X/HG5XA, reports: "The VK9GMW log has now been uploaded to LoTW. We have also started uploading logs to eQSL.cc. On that system there was a little problem with the ADIF upload and the RST field of some CW QSOs got corrupted, and thus currently read '59' instead of '599', but we hope to get support from the eQSL team to get that fixed."

VK9LA QSL STATUS. Bill, VK4FW, informs on May 22nd: "2 days ago I approved the design and print of the cards, so I expect to possibly have them here in 10 days or so. Meantime anyone looking at the OQRS service will find it is not working properly along with other parts of the Web site. This is due to hackers getting into <www.odxg.org>.

We hope to have the site back up ASAP."

ZL7T QSL STATUS. Lee, ZL2AL, reports: "I am processing the cards at the moment and the first batch will go out June 1st, next batch June 15th and the June 30th for the last batch which will bring us up into 'current' status. Thanks for all your kind comments in the cards."

QSLS VIA LOTW: 3D2NB, 4V4JR, 5X1NH, 7Q7BP, 8P5A, AY7X, BX5AA, C6APR, C91TX, D4C, DV1JM, E74A, FM5KC, G3YYD, IM0/IK0FMB, KH7X, PR8ZX, PY0FF, SP3RBG, T27A, UA0FDX, VP8KF and VK9GMW

QSLS RECEIVED VIA MAIL: 3D2OU, 3W9JR, 4S7NE, 5T5JA, 5U7JB, 6W1SE, 9A6M, 9L0W, A52DT, C31CT, CT3/DJ7RJ, CW5W, EK6TA, ER0WW, ES1QD, ET3JA, FG/K9NW, FS/W3FF, FS/WW5L, FW5ZL, FK/G3TXF, H40MS, H7/K9NW, HC8N, HH4/K4QD, J6/W5JON, JD1BLK, JD1BLY, JT1DN, K5D, KH0PR, KL7J, KL7Y, OD5NJ, ON/N4ZC, OX2A, RW0CN, SV9/DJ7RJ, T27A, T27OU, T30XX, T31DX, T33ZZ, TS7C, V31FB, V63PR, V63TR, V63ZM, VK4/G3TXF, VK9/G3TXF, VK9AA, VP2V/K9NW, VP5T, VP6TD, VP8YLB, VP9KF, VX8X, XU7MDY, XW1B, YB1BA, YJ0TXF, ZC4VJ and ZL7/SP8BQJ

QSLS RECEIVED VIA THE BUREAU: 4O7A, 5L2MS, 5N3CPR, 8S5A, 9H3YM, 9U0A, 9X/ON4WW, C6APR, CU2AF, CU2JT, DL1DTC, E51NOU, E73KW, FJ/SP7VC, HB0/DJ2MX, HP2/CX2AM, J3A, J6/DL7AFS, KP4SQ, OE6HXQ, OK5R, P40W, T33WW, TI5N, TU2/F5PTM, UU6JJ, V31YN, VC3A, VK9DNX, YU2000A and YU4WU

SV9, CRETE. Dimitris, SV9COL, will be active from Heraklio (EU-015, GIOTA KRS-005, MIA MGC-005, WLOTA 1400) during the CQWW WPX CW Contest (May 30-31st) as a Single-Op/All-Band/Lower-Power entry. QSLs are "OK" via LoTW.

TI9, COCOS ISLAND. Henry, TI2HMG, is trying to put together another operation to TI9 which will take place in February of 2010. If you are interested in being part of the DXpedition, send an E-mail to: ti2hmg@...
Look for updates and details on: http://www.qsl.net/ti2hmg/cocos.htm

TO4G, GLORIOSO ISLAND. Didier, F5OGL, has announced dates for an upcoming operation this year. His press release states that a ham radio team of 3-4 military operators along with two reporters/journalists from SIRPA (French Forces Public Relations and Informations Services) will be landing on Glorioso Island by July 9th and will stay there up to July 28th. He states that the video reporting team will be there to make several video footages/ documentaries with the main video being the DXpedition itself. Activity will be on 160-6 meters using numerous modes such as CW, SSB, RTTY, PSK and possibly other digital modes. Three stations are planned to be on the air. All the equipment is going to be loaned by the F6KOP team and CDXC President F4AJQ. The callsign will not be announced until the operation, but it was mentioned there could be more than one callsign. The leader and QSL Manager is Didier, F5OGL. Webmaster is Rafik, F5CQ. Other operators mentioned are: Freddy/F5IRO (TO4E), Yves-Michel/F5PRU, Jean-Claude/F5TLM and if possible Philippe/F4EGS and Jean-Marc/F5RQQ. They are currently looking for sponsors. They hope to have an online log which can be updated daily during the operation. More information is forthcoming. Look for

updates on their Web page at: http://glorieuses2008.free.fr

TX5, AUSTRAL AND MARQUESAS ISLANDS. Les, SP3DOI, reports that a a Polish group of four ham radio amateurs (Jan/SP3CYY, Wojciech/SP9PT, Jozef/SP9-31029 and himself) together with their guest Michel, FO5QB, will activate Tubuai Island (OC-152) in the Austral Island group between September 28th and October 12th, as well as Nuku Hiva Island (OC-027) in the Marquesas Islands group between October 16-22nd. Callsigns applied for are TX5SPA (Austral) and TX5SPM (Marquesas). Their goal is to make as many QSOs as possible, mainly with Europe on the lower frequency bands. Both countries rank 21st and 19th respectively on the most wanted list in that area, but they do not intend to ignore the stations from other continents. If possible (propagation), they will also be working on all the higher bands. They are planning to be active on CW, SSB and RTTY (maybe PSK31). PLEASE NOTE: Operators would like to emphasize that all the costs of the DXpeditions are covered entirely by its participants. They do not accept any sponsors, and are going there for their own pleasure, using their own money. The QSL Manager for their DXpeditions is going to be Wojciech, SP9PT. For more details and update, go to: http://fo2009sp.pl

TZ, MALI. Operators Ed/W0SD and Arliss/W7XU have decided to forsake the Caribbean this summer and instead will be heading here for the 6 meter Sporadic E season. Their DXpedition callsign will be TZ6EI. Arliss has recently returned from Mali with the license in hand. The primary focus will be 6 meters on 50.103 MHz. There are some HF operations planned for late night non-Sporadic E hours. The dates of the operation will be from June 26th through July 5th. Due to the lack of an internet connection, no online logs are planned. The grid square will likely be IK52 or IK62. Ed informs OPDX readers, "Please just send us your RST/RS signal report. We do not need your grid square. We have lost many contacts in the past on six meters as signals have faded out before we get a report, so it is very wise to concentrate on sending 'JUST' our signal report!" QSL via W7XU.

V2, ANTIGUA AND BARBUDA (Update). Jimmy, W6JKV, will be active as V29JKV from Antigua (NA-100, WLOTA 1118) between June 24th and July 3rd. Activity will be on the HF bands, but his focus will be on 6 meters (Grid FK97). He has a very good location and will use a large antenna with power. QSL via his home callsign in Austin, Texas.

V3, BELIZE (Postponed). Operators Terry/W6WTG (V31UR) and his XYL Sharon/ N2OWL (V31WL), who were expected to be active from Caye Caulker (NA-073 and Grid EK57) between July 21-29th and be an entry in the 2009 RSGB IOTA Contest (July 25-26th), have postponed their trip due to the Swine Flu problem. For more info and updates, see Terry's Web page at: http://www.w6wtg.com

VP9, BERMUDA. Yuri, VE3DZ will be active as VE3DZ/VP9 during the CQWW WPX CW Contest (May 30-31st) as a Single-Op/All-Band/Low-Power entry. He is expected to be there between May 23-31st. Activity outside of the contest (before) will be focused on RTTY/SSB/CW, low bands and 30/17/12

meters. QSL via VE3DZ.

VR2009, HONG KONG (Special Event). Members of the Hong Kong Amateur Radio DX Association (HARDXA) will use the special event callsign VR2009EAG between July 1st and December 31st, to promote the Hong Kong 2009 East Asia Games. Operations will be primarily on the HF bands from 40-10 meters and VHF on 6 meters. The modes used will be primarily SSB, RTTY, PSK31 and SSTV. QSL Manager VR2XMT: Charlie Ho, PO Box 900, Fanling Post Office, Hong Kong. There will be no e-QSL or LoTW. To see QSL cards, go to: http://www.qrz.com/vr2009eag

XU7, CAMBODIA. Tom, KC0W/ZD7X, is expected to be active as XU7XXX during the CQWW WPX CW Contest (May 30-31st) as a Single-Op/Low-Power entry. QSL via KC0W, direct only.

YI, IRAQ. John, WT4M (aka YI9TM), informs: "Sorry for the bad news, but YI9TM is QRT until further notice. Nothing wrong, just an operational requirement... Will advise when I will be back on-the-air! Please pass the word.... 73"

YN, NICARAGUA (Update). Eric, K9GY, will be active as YN2GY from Octavio's, YN2N, QTH in Grenada, during the CQWW WPX CW Contest (May 30-31st) as a Single-Op/All-Band/Low-Power entry. He will be there between May 28th and June 1st. Outside of the contest, look for some activity on 6 meters. QSL via his home callsign, direct or by the bureau.

ZF, CAYMAN ISLANDS. Members of the Missouri DX/Contest Club and possibly other operators will be active as ZF2SX during the CQWW RTTY Contest (September 26-27th). Operators mentioned are Jim/W4JO, Ron/K4SX and guest op Rob/W6BO. More details are forthcoming. QSL via K4SX.

ZK2, NIUE (Update/OC-040). Chris, ZL1CT (GM3WOJ), is now active as ZK2V through June 20th. Resources are limited, so activity will be mainly on 80/40/20/15 meters using CW and SSB, with some 30/17/12 meter activity and RTTY. Planned operations include entries in the 2009 ARRL CW and Phone Contests. He is told that he will have Internet access from his QTH. If so, his plans are to upload logs to LoTW on a daily or every other day basis. More details and Chris's online logs will be available on his DXpedition's Web page at: http://www.zk2v.com
A photo QSL is planned and obviously will come after the completion of the DXpedition, so please be patient. QSL via N3SL. Donations will be greatly appreciated.

9918. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-05-23 22:11:01 UTC
From: Paul Dunphy
Topic: 9721 Message: 9918

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 May 23 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 143 Issued at 2200Z on 23 May 2009
IA. Analysis of Solar Active Regions and Activity from 22/2100Z
to 23/2100Z: Solar activity was very low. No flares were observed
during the past 24 hours. New Region 1018 (S33E38) was numbered
during the period. This region formed on the disk and was classified
as a Bxo beta spot group.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 22/2100Z to 23/2100Z:
The geomagnetic field was quiet.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be predominantly quiet for the next three days (24-26
May).
III. Event Probabilities 24 May-26 May
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF Green
IV. Penticton 10.7 cm Flux
Observed 23 May 070
Predicted 24 May-26 May 070/070/070
90 Day Mean 23 May 070
V. Geomagnetic A Indices
Observed Afr/Ap 22 May 004/005
Estimated Afr/Ap 23 May 003/005
Predicted Afr/Ap 24 May-26 May 005/005-005/005-005/005
VI. Geomagnetic Activity Probabilities 24 May-26 May
A. Middle Latitudes
Active 05/05/05
Minor storm 01/01/01
Major-severe storm 01/01/01

9919. FT4WC

Yahoo group: DX-IS (2009)
Date: 2009-05-23 22:31:07 UTC
From: Richard F DiDonna NN3W
Topic: 9919 Message: 9919

My parents sold their house after 35 years of occupancy. They sent to me several boxes of "stuff" which included two logbooks.

In one log book is a QSO with FT4WC - 1991. That should be Crozet.

Any idea who the operator was and if he's still alive. F6GVH is listed as the QSL manager.

This is my ONLY Crozet contact to date, and I'd absolutely love to get a QSL card on this one.

73 Rich NN3W

9920. Re: [DX-IS] FT4WC

Topic: 9919 Message: 9920

I think the op's name may have been Jean Claude. Try the method below for info....GL Jim

----- Original Message ----- In 1995 and 1996, LNDX has published lists of QSL information. These lists kept updated since 1986 by Yves F6CYV have been useful to many to find the necessary addresses and the way forward for the long-sought QSL. La rapidité avec laquelle l'information se trouvait vite dépassée nous a conduit à suspendre ces publications. Yves a continué à maintenir ces listes à jour. The speed with which the information was outdated quickly led us to suspend these publications. Yves continued to keep these lists updated. Depuis septembre 2000 un site fonctionne sur lequel vous trouverez plus de 75.000 QSL information (parues dans LNDX) et adresses ainsi que près de 4.000 adresses e_mail. Since September 2000 a work site on which you find more than 75,000 QSL information (reports LNDX) and addresses as well as nearly 4000 e_mail addresses.
L'usage en est fort simple, il suffit d'envoyer un e_mail à qsl.f6kpoAescaut.net avec, au maximum, 50 indicatifs (un par ligne) dans le corps du message et le robot vous fournira les réponses dans les plus brefs délais (il faudra bien moins de 10 secondes au robot pour trouver 50 indicatifs!). The usage is very simple, just send an e_mail to qsl.f6kpoAescaut.net with a maximum 50 codes (one per line) in the message body and the robot will provide the answers as soon as possible (it will take less than 10 seconds to find the robot 50 indicative).

Subject: [DX-IS] FT4WC

My parents sold their house after 35 years of occupancy. They sent to me several boxes of "stuff" which included two logbooks.

In one log book is a QSO with FT4WC - 1991. That should be Crozet.

Any idea who the operator was and if he's still alive. F6GVH is listed as the QSL manager.

This is my ONLY Crozet contact to date, and I'd absolutely love to get a QSL card on this one.

FT4WC's name is/was Jean Claude and that is/was his manager. I worked him on March 18, 1991 at 1607z on 10 metres report both ways was 4x1 (the days of the honest signal report). Have you tried to look up the QSL manager?

I think the op's name may have been Jean Claude. Try the method below for info....GL Jim

----- Original Message ----- In 1995 and 1996, LNDX has published lists of QSL information. These lists kept updated since 1986 by Yves F6CYV have been useful to many to find the necessary addresses and the way forward for the long-sought QSL. La rapidité avec laquelle l'information se trouvait vite dépassée nous a conduit à suspendre ces publications. Yves a continué à maintenir ces listes à jour. The speed with which the information was outdated quickly led us to suspend these publications. Yves continued to keep these lists updated. Depuis septembre 2000 un site fonctionne sur lequel vous trouverez plus de 75.000 QSL information (parues dans LNDX) et adresses ainsi que près de 4.000 adresses e_mail. Since September 2000 a work site on which you find more than 75,000 QSL information (reports LNDX) and addresses as well as nearly 4000 e_mail addresses.
L'usage en est fort simple, il suffit d'envoyer un e_mail à qsl.f6kpoAescaut.net avec, au maximum, 50 indicatifs (un par ligne) dans le corps du message et le robot vous fournira les réponses dans les plus brefs délais (il faudra bien moins de 10 secondes au robot pour trouver 50 indicatifs!). Yes there you can find a large collection of QSL
for the french antarctic bases....

> SRI I do not read French, good luck.

... and on the left side of the page you have an
automatic translator in english. It work so well!

Have a good visit.

Best wishes

From: Paul Dunphy
Topic: 9721 Message: 9924

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 May 24 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 144 Issued at 2200Z on 24 May 2009
IA. Analysis of Solar Active Regions and Activity from 23/2100Z
to 24/2100Z: Solar activity was very low. No flares were observed
during the past 24 hours. Region 1018 (S33E25) has decayed into
spotless plage.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 23/2100Z to 24/2100Z:
The geomagnetic field was quiet.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be quiet for the next three days (25-27 May).
III. Event Probabilities 25 May-27 May
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF Green
IV. Penticton 10.7 cm Flux
Observed 24 May 069
Predicted 25 May-27 May 070/070/070
90 Day Mean 24 May 069
V. Geomagnetic A Indices
Observed Afr/Ap 23 May 003/004
Estimated Afr/Ap 24 May 003/005
Predicted Afr/Ap 25 May-27 May 005/005-005/005-005/005
VI. Geomagnetic Activity Probabilities 25 May-27 May
A. Middle Latitudes
Active 05/05/05
Minor storm 01/01/01
Major-severe storm 01/01/01
```

9925. Report of Solar-Geophysical Activity

9935. I only count once

Yahoo group: DX-IS (2009)
Date: 2009-05-28 00:47:17 UTC
From: Paul M Dunphy
Topic: 9935 Message: 9935

If you log on to the web based version of Yahoo Groups you will see there is one copy the message ""Report of Solar-Geophysical Activity" for 27 May, specifically message number 9927. Messages 9928-9934 are comments on the numbers of times it was sent by Yahoo to the mailing list. I personally only received one copy of the original message.

This messages has been auto-generated by myself and sent to the DX IS! list at approximately 22:12 UTC daily for the past 2-3 weeks. There have been no reports of multiple copies until tonight. Occasionally I have received duplicate copies of other messages. seemingly at random intervals.

Thus I have a priori reason to believe that Yahoo or individual ISPs has caused this.

73, Paul VE1DX

9936. Something on 7.006

Yahoo group: DX-IS (2009)

From: Mike KE4DP
Topic: 9936 Message: 9936

Hello Group,

The lass few days, I've been hearing something rhythmic and
digital sounding on 7.006, actually 7.002 t0 7.006 in the
morning around local sunrise(1000-1100Z) Anyone know if this is an intruder or some new
digimode? I'm hearing it now.

Good DX

It's some sort of intruder. I've been hearing it for several months at least. I think someone suspected it was an OTHR from southern Asia.

OK, thanks. OTHR makes sense. At least I know it's not me! But it can be distracting when listening to lower edge of 40.

TU and Good DX

SB DX ARL ARLD021
ARLD021 DX news

This week's bulletin was made possible with information provided by KX9X, NC1L, QRZ DX, the OPDX Bulletin, DXNL, 425 DX News, The Daily DX, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

AZERBAIJAN, 4K. A group of operators are QRV as 4K3K and 4J0K from the Nagorno-Karabakh region until June 1. This includes being entries in the CQ WPX CW contest. QSL both calls direct via RW6HS.

GEORGIA, 4L. Andrey, UU0JM is QRV as 4L/UU0JM and will be a Single Op/All Band entry in the CQ WPX CW contest. QSL via EA7FTR.

TANZANIA, 5H. Win, DK9IP is QRV as 5H2WK from Arusha until June 5. He is active holiday style. He may also be an entry in the CQ WPX CW contest. QSL to home call.

SENEGAL, 6W. Al, F5VHJ will be QRV as 6W1RY as a Single Op/All Band/High Power entry in the CQ WPX CW contest. QSL to home call.

MALDIVES, 8Q. Nobby, G0VJG will be QRV as 8Q7CQ from Kuredu Island, IOTA AS-013, from June 1 to 15. He will be active holiday style on all HF bands and 6 meters. QSL via G4DFI.

BAHAMAS, C6. Operators NA6M, N5RNA, W5TSN, K2CK and K9OWQ will be QRV as C6AMS from Nassau, IOTA NA-001, from June 1 to 14. Activity will be on 160 to 10 meters using CW, SSB and various digital modes. QSL direct via NA6M.

AZORES, CU. Look for CU2X to be a Single Op entry in the CQ WPX CW contest. QSL via OH2BH.

JERSEY, GJ. Dez, G0DEZ is QRV as GJ3WW until June 5. This includes being an entry in the CQ WPX CW contest. Outside the contest, he is active mainly on the newer bands, as well as sporadic-E on 6 meters. QSL to home call.

VATICAN, HV. A group of operators from Saronno will be QRV as HV5PUL on June 1, 3 and 4. Activity will be on all HF bands and 6 meters using CW, SSB and RTTY. QSL direct.

MARIANA ISLANDS, KH0. Hiromitsu, JR2SCJ will be QRV as AH0AA from Saipan, IOTA OC-086, as a Single Op/Low Power entry in the CQ WPX CW contest. QSL to home call.

US VIRGIN ISLANDS, KP2. Operators K3VX, W3WH, W3WN, W9UK and K9CS are QRV as homecalls/KP2 until June 2. This includes being QRV as NP2SH as a Multi/2 entry in the CQ WPX CW contest. QSL W3WN/KP2 to home call and all others via K9CS. In addition, Carl, K9CS will also be active on 6 meters on May 28 and 29 and June 1 and 2. QSL to home call.

CZECH REPUBLIC, OK. In commemoration of the 25th anniversary of the OK QRP Club, look for special event station OL25LP to be a Single Op/QRP Power entry in the CQ WPX CW contest. QSL via OK2FB.

SWEDEN, SM. Jan, SM5DJZ will be QRV as SD40JZ in the CQ WPX CW contest. QSL to home call.

TURKEY, TA. Berkin, TA3J is QRV as TA3J/7 and TA7KI from Erzincan City until June 2. Activity is on all bands using CW, SSB and digital modes. QSL via TA3YJ. In addition, look for TC4X to be a Single Op entry in the CQ WPX CW contest. QSL via OH2BH.

ICELAND, TF. Icelandic Radioscouts Club station TF1SS is active until May 31 during the 8th European Radio Scouting and Internet Seminar in Ulfljotsvatn. Activity is on 160 to 2 meters using CW, SSB and various digital modes. QSL direct.

COSTA RICA, TI. A group of operators will be QRV as TI5N as a Multi/2 entry in the CQ WPX CW contest. Outside the contest, they will be active on all HF bands and 6 meters. QSL via W3HNK.

UKRAINE, UR. Members of Rivne DX Club will be QRV as EN50KSR from June 1 to July 5 in celebration of 50 years of the Rivne speedway. QSL via UT1KY.

NICARAGUA, YN. Eric, K9GY is QRV as YN2GY until June 1. Activity is on 160 to 6 meters using CW and SSB. This includes being a Single Op/All Band/Low Power entry in the CQ WPX CW contest. QSL to home call.

NEW ZEALAND, ZL. Operators ZL1AIH, ZL1GO and ZL3CW will be QRV as ZM1A as a Multi/2 entry in the CQ WPX CW contest. QSL via ZL1AMO.

OPERATION APPROVED FOR DXCC CREDIT. The following operation is approved for DXCC credit: Saudi Arabia, 7Z1CQ, current operation.

THIS WEEKEND ON THE RADIO. The CQ World Wide WPX CW Contest, NCCC Sprint, Kids Roundup and the ARCI Hootowl CW Sprint will certainly keep contesters busy this weekend. The RSGB 80-Meter Club Data

Championship is scheduled for June 1. The ARS Spartan CW Sprint is scheduled for June 2. Please see May QST, page 80, and the ARRL and WA7BNM contest web sites for details.

30 May 2009 A.R.I. DX Bulletin
No 943
==========
*** 4 2 5 D X N E W S ***
**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

7X - Special event station 7U2ISM will be active from Djelfa, Algeria between 16 June and 6 July for the International Amateur Radio Meeting that will take place on 15-21 June. The event will be hosted by the Amateurs Radio Algeriens (the Algerian IARU society) and the Radio Club of Djelfa (7X2VFK). A multi-national group of operators will be active on 160-10 metres CW and SSB, with some activity on RTTY, SSTV and BPSK. QSL direct to 7X2DD. [TNX DB1JAW]
8Q - Nobby, G0VJG will be active as 8Q7CQ from the Maldives (AS-013) on 1-15 June. He will spend his honeymoon on Kuredu Island and he plans to operate holiday style on the HF bands SSB. He will also give 6m a try. QSL via G4DFI. [TNX NG3K]
C6 - Mark/NA6M, Renee/N5RNA, Craig/W5TSN, Judy/KC5VVN and Scott/K2CK will be active as C6AMS from Nassau (NA-001) Bahamas on 1-14 June. They plan to operate SSB, CW and digital modes on 160-10 metres with two or three stations. QSL via NA6M. Further information and log search at http://www.c6ams.com/ [TNX The Daily DX]
E5_sc - Nigel, G4KIU has moved to Rarotonga (OC-013), South Cook Islands, where he holds the call E51SC. He plans to be active on 80-10 metres SSB, RTTY, PSK31 and some CW. QSL direct to Nigel Peacock, P.O. Box 880, Rarotonga, Cook Islands via New Zealand, or via G4KIU through the RSGB bureau. He will upload his logs to LoTW on a weekly basis. [TNX The Daily DX]
EA - George, EC2ADN and Christian, EA3NT will be active as EG3FI from the Formigues (Hormigas) Islands (EU-078) on 6-7 June. QSL via EA3NT, direct or bureau.
F - In June-July 1944 the BBC war correspondents used the tower of the castle at Creully as a radio studio, from where the first reports of the Battle of Normandy were broadcast. Look for special callsign TM5BBC to be aired again from Creully on 4-12 June. QSL via F2UW. [TNX F5NQL]
F - Commemorating the 65th anniversary of the World War II "D-Day" landings in Normandy (6 June 1944), the following activities are expected to take place from France. The South Flanders DX Activity

Group will operate as F/ON6JUN/P from Ranville on 3-8 June (QSL via ON5SD, direct or bureau. Henk/PA0HFT and Hans/PA0WYS will be active as F/PA65DDAY from Juno Beach, near Courseulles-sur-Mer on 5-8 June (QSL via PA0HFT, direct or bureau). Michel/F6IPS will operate as TM6SME from Emondeville, close to Sainte-Mere-Eglise on 5-14 June (QSL via F6IPS, direct or bureau). [TNX F5NQL]
F - Pierre, F5AAR and Alain, F5OZC will be active as homecall/p from Yeu Island (EU-064) on 3-5 June. They will operate SSB and CW on 10-80 metres. [TNX F6AJA and Les Nouvelles DX]
F - Robert, F5HTR and Roger, F5LKW will be active as homecall/p from Riou Island (EU-095) on 8 June. They will operate QRP on +/- 7032 kHz. [TNX F6AJA and Les Nouvelles DX]
F - Jean-Marc, F5SGI will be active from Belle-Ile (EU-048, DIFM AT-015) on 19-31 July. He plans to operate CW on 80-6 metres, and to participate in the IOTA Contest. QSL via home call, direct or bureau. [TNX F5SGI]
FS - John, K9EL will be active as FS/K9EL from French St. Martin (NA-105) on 4-12 June. It will be a family vacation and John plans to operate "whenever possible" on 10-80 metres CW, SSB and RTTY. QSL via home call, direct or bureau. [TNX K9EL]
GM - Col, MM0NDX will be active as MM0NDX/p (QSL via M0URX) from Hirta, St. Kilda Islands (EU-059) on 24-27 July. He plans to operate holiday style on 80-10 metres SSB, and to take part in the IOTA Contest as GM5A (QSL via GM4FDM). The website for the operation can be found at http://eu059.wordpress.com/
I - Italian stations participating in the Museum Ships Weekend (6-7 June) include II3JD (QSL via IW3IE) from the submarine "Dandolo" at the Italian Navy Museum in Venice, and IY1SP (QSL via I1SAF) from the Italian Navy Museum in La Spezia. Also look for II2IGTO (submarine "Toti", QSL via IQ2MI) to be active for the IARU Region 1 Field Day over the same weekend. [TNX IT9MRM]
IS0 - Massimo, I0PNM will be active as IM0/I0PNM from San Pietro Island (EU-165) on 8-16 June. He plans to operate mainly PSK31 on 20 and 40 metres. QSL via home call. [TNX I0PNM]
JW - Jan/OK1JK, Jiri/OK1JST, Pavel/OK1IPS and Jiri/OK1IEC will be active as JW/homecall from Longyearbyen (EU-026), Svalbard on 5-15 June. They will operate CW, SSB, RTTY and PSK. QSL via home calls. [TNX OK1JK]
KL - The KL7RRC IOTA expedition to the Delarof Islands (NA-233, new one), originally scheduled in late July [425DXN 935], is now expected to take place around mid-June. The operators (Johnny, KE7V and Yuri, N3QQ) will reach Adak (NA-039) on 7 June and wait for the cargo ship "Coastal Merchant" to call at port (estimated time of arrival is 11 June). While on Adak they plan to concentrate on 6m operations towards North America and Japan, and to look for a charter boat. If they are able to find it, they plan to operate from Ogliuga Island on 14-19 June. Otherwise, if they have to catch a ride on the "Coastal Merchant", they will go and operate for only 24-36 hours from Gareloi Island between 12 and 14 June. QSL via UA9OBA (Russia and Europe) or N7RO (others). The

website for the operation is at http://www.na-233.ucoz.com/
OE - The Vienna International Centre Amateur Radio Club (4U1VIC) will operate two special event callsigns in the coming months. 4U1WED will be QRV in June to celebrate the World Environment Day, while 4U30VIC will be used in July-December to celebrate the International Centre's 30th anniversary. QSL via 4U1VIC. [TNX OE1ZKC/JH4RHF]
OH0 - Marq, CT1BWW will be active as OH0/CT1BWW from the Aland Islands (EU-002) from 26 July to 6 August. He will operate CW, SSB and RTTY on 80-10 metres. A side trip to Market Reef (EU-053) might take place on 1 August. QSL via home call, direct or bureau. The website is at http://www.geocities.com/oh0ct1bww/ [TNX CT1BWW]
OZ - Andy, DL4OK will be active as OZ/NX1S from Romo Island (EU-125) from 30 May to 6 June. He plans to operate holiday style running 100 watts into a vertical and dipoles. QSL via DL4OK, bureau preferred. [TNX DXNL]
PA - Robert, DC2KN will be active as PA/DC2KN from Terschelling (EU-038) on 28-31 May. He plans to operate during his evening hours only. QSL cards will be sent automatically via GlobalQSL, but Robert would appreciate return cards. [TNX DC2KN]
PA - Special event station PA6JEROEN will be active on 4-14 June from Noordwijk to celebrate the reopening to the public of the 800-year-old bell tower of St Jeroenskerk (St. George's Church). QSL via PA7DA, bureau preferred. [TNX K1XN]
S9 - Georg, DK7LX will be active holiday style as S92LX from Sao Tome (AF-023) on 13-25 June. He will operate CW only on 80-10 metres. QSL via home call, direct or bureau (Georg welcomes e-mail requests for bureau cards, see http://www.qrz.com/db/s92lx). A log search will be available at www.logsearch.de [TNX DK7LX]
SM - Bernd, DL8AAV will be active as SD1B/7 from Oland Island (EU-037) from 31 May to 12 June. He will operate SSB only on the HF bands. QSL via DL8AAV. [TNX www.rsgbiota.org]
SV - Special callsign SY2DDAY will be activated on 4-7 June to commemorate the 65th anniversary of the World War II "D-Day" landings in Normandy. QSL direct to SV2KBB.
TA - Berkin, TA3J will be operate CW, SSB and digital modes as either TA3J/7 and TA7KI from the city of Erzincan until 2 June. QSL via TA3YJ. [TNX TA3YJ]
TK - Silvia/EA1AP, Alberto/EA1SA, John/EA3GHZ, Alicia/EA5EWM, Raul/EA5KA and Paco/EA5RU will be active as TK9X from Corsica (EU-014) from 25 July to 1 August. They plan to operate SSB, CW and digital modes on 10-160 metres. QSL via EA4URE, direct or bureau. The website for the operation is at http://www.dxciting.com/tk9/ [TNX CT1BWW]
UA - Nick/UA6MM, Konstantin/UA6LIC, Vlad/RV6LFH and Alex/RX6LG will be active as UE6LHP (QSL via UA6MM) and UE1RLH/6 (QSL via RA1QY) from Beglitskiy Lighthouse between 29 May and 7 June. Information on the awards sponsored by the Taganrog DX Expedition Club can be found at www.ua6mm.narod.ru; details on the Russian Lighthouses Award can be found on the Russian Robinson Club's new website at

http://robinsons.ru [TNX UA6MM and RA1QY]
UA - Serge, RZ3AMW expects to be active as RZ3AMW/1 from Ryashkov Island (EU-162) from 15 June to 2 July. He plans to operate mainly CW on 20 and 40 metres. QSL via home call, direct or bureau. [TNX RZ3AMW]
UR - Special callsign EM15DIG will be activated from 1 June until 31 July to celebrate the 15th anniversary of the Ukrainian branch of the Diplom Interessen Gruppe. QSL via UY5AA. Information on the relevant "UR-15-DIG" award can be found at http://arc.sumy.net/taxonomy_menu/1/32 [TNX UY5AA]
VE - The Westcoast Amateur Radio Association will be active as VE7IYOA from Victoria, British Columbia throughout June. Most activity is likely to concentrate during the weekends, including the ARRL Field Day on 27-28 June. The special callsign commemorates the International Year of Astronomy. QSL via VE7DAO.
VE - Gregg, VE3ZZ and Noel, VE2BR will operate from VY2TT's station on Prince Edward Island (NA-029, CIsA PE-001) on 15-27 July. They will participate in the IOTA Contest as VY2Z (QSL to VE3ZZ), while outside the IOTA event they will be active as VE3ZZ/VY2 and VE2BR/VY2 (QSL via home calls, direct or bureau). [TNX VE3ZZ]
VE - John, VE8EV will be active as VC8B from Sachs Harbour on Banks Island (NA-129) on 24-27 July, IOTA Contest included. He will operate SSB only, mostly on 20 metres. QSL via home call, direct or bureau. Bookmark http://ve8ev.blogspot.com/search/label/IOTA for updates.
W - Al/WA4EWV, Bill/K5YG, Bob/WN2E, Bruce/N5SIX, Daniel/KE5KDM, Danny/N5OMG and Marshall/K5QE will be active as K5N from Burwood Island (USi LA-105S) on 29-31 May. They will be operating from rare grid EL58 with three stations, two on 6 metres and one on 80-10 metres. QSL via W5TFW. The web pages for the operation can be found at http://www.kcvhfgridbandits.com/kc_vhf_grid_bandits_018.htm [TNX QRZ-DX]

**** GOOD TO KNOW ... ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

AUSTRALIAN SHIRES ---> Organized by the Oceania Amateur Radio DX Group, the Australian Shires Contest will be held on 6-7 June, from 6 UTC to 6 UTC, on 80, 40, 20, 15 and 10 metres SSB and CW. The objective is for amateurs around the world to contact as many VK shires as possible. Information on this event, as well as on the Worked All VK Shires Award, can be found at www.vkshires.info [TNX K1XN and The Golist]

DXCC NEWS ---> 7Z1CQ, Saudi Arabia (current operation) has been approved for DXCC credit. If you had this operation rejected in a DXCC application, send an e-mail to dxcc@... to be placed on the list to have your account updated. [TNX NC1L]

EK6LP ---> Should you have any question about EK6LP's logs on LoTW, please refrain from emailing Aram and write to IK2DUW instead. Antonello is the QSL manager for Aram and takes care of the uploads to LoTW. [TNX IK2DUW]

MUSEUM SHIPS WEEKEND ---> Sponsored by the Battleship New Jersey Amateur Radio Station (NJ2BB), this year's Museum Ships Weekend will be held from 00.00 UTC on 6 June until 23.59 UTC on the 7th. Information on the event, including the relevant certificate and the listing of participating ships, can be found at http://www.nj2bb.org/

NOT THE MANAGER ---> Andy, SP6GVU says he is receiving many cards for contacts made with 9V1UV on FSK and BPSK. He is not and has never been the QSL manager 9V1UV, and has no idea where the wrong route may have originated from.

PORTUGAL ---> New regulations will become effective in Portugal on 1 June 2009. While existing licence categories (A, B, and C) are maintained, there

will be three new licence classes (1, 2 and 3) for those who get licensed after 1 June. Current "ordinary" callsigns will be kept as they are, but special events (including contests) will be issued with callsigns from the new series. The new prefix allocations are as follows:
INDIVIDUAL STATIONS
Portugal CT7, CS7, CR7 (depending on licence class)
Azores CT8, CS8, CR8 (depending on licence class)
Madeira CT9, CS9, CR9 (depending on licence class)
NON-PROPRIETARY STATIONS
Portugal CQ0, CS5; CR0 (civil defence)
Azores CQ1, CS4; CR0 (civil defence)
Madeira CQ2, CS3; CR0 (civil defence)
SPECIAL EVENTS
Portugal CQ7, CR5, CR6, CS2
Azores CQ8, CR1, CR2
Madeira CQ3, CQ9, CR3
Foreign amateurs who go and operate under a CEPT licence will have to use CT7/homecall from Portugal, CT8/homecall from the Azores and CT9/homecall from Madeira. CEPT "novice" licencees will have to use CS7/hc, CS8/hc and CS9/hc as appropriate. The new legislation can be found at http://www.icp.pt/render.jsp?contentId=931324

ZK2V ---> Chris, ZL1CT/GM3WOJ says he made 6100 QSOs in nine days "which is a bit disappointing". Conditions are poor - he made only one QSO on 160 metres and two QSOs on 80 metres, so he is concentrating on the higher bands. Openings to Europe are often short with weak signals, which is lowering the QSO rate, but signals from JA and the USA have been strong. Chris has got a special permit to operate on 60 metres, from 11 UTC on 1 June until 11 UTC on the 8th. He can transmit only on 5403.5 kHz (USB for USA, CW for rest of world), but will listen on 5371.5 or another channel. The website (www.zk2v.com) is updated nearly every day - there is an online logsearch and all QSOs are uploaded to LoTW every few days. QSL via N3SL, direct or bureau. [TNX ZK2V]

+ SILENT KEYS + Recently reported Silent Keys include Roberto Tortora (IZ0GKN), Jan Kikkert (PA0IJM), Nikolaj N. Fedorov (UA3WFN) and John Bearsby (VK6JB).

QSLs received direct or through managers: 3D2OU, 3W9JR, 4K9W, 4L6DL, 4S7NE, 4U1UN, 4V4JR, 5N/LZ1QK, 5T5JA, 5U7JB, 6W/DL4JS, 6W1SE, 8Q7DV, 8Q7HN, 8Q7SC, 9A6M, 9L0W, 9L1DX, 9M2AX, 9U0A, A52DT, A61Q, BD7NWF, C31CT, CE9XX, CP6AA, CS2C, CW5W, CY9SS, DU3NXE, EK6LP, EK6TA, ER0WW, ES1QD, ES1WN, ES1WW, ET3AA, ET3JA, EX2A, FG/K9NW, FH/G3SWH, FJ5KH, FK/G3MXJ, FK/G3TXF, FO/N6JA, FS/W3FF, FS/WW5L, FT5YJ/P (AN-006), FW5ZL, H44MS (OC-047), H7/K9NW, HC1MD, HC8N, HH4/K4QD, HI3/LY3UM, HK0/EA7HEJ, HV0A, J28JA, J6/W5JON, J79XBI, J88DR, JD1BIE, JD1BLK, JD1BLY, JD1BMM, JT1DN, JT1R, JW/SM0MDG, JW5HE, K5D, K6PV (NA-066), KH0PR, KH7XS, KL7J, KL7Y, KP3Z, LA9SN/P (EU-056), LX/DL6WT, MD0CCE, MI0SRR, MU0FAL (EU-114), NP2SH, NP4Z, OD5NJ, OH9A (EU-173), OX2A, OZ/DO1BEN (EU-029), OZ1CTK, PJ5NA, RW0CN, S51CK, S79MV, SU1SK, SU9BN,

The Ohio/Penn DX PacketCluster
DX Bulletin No. 910
BID: $OPDX.910
June 1, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, N1RJ, NC1L, NJ1Q, NG3K, W3UR & Daily DX, N4AA & QRZ DX, W4VQ, K8YSE, K9EL, N0TG, DL7MAE & The DX News Letter, DX World of Ham Radio Web Site, F5NQL & UFT, F6AJA & Les Nouvelles DX, F6FQK, I1JQJ/IK1ADH & 425 DX News, OH2BH, Pete's-DX-Newsdesk, PY2SEX, RSGB IOTA Web Site, TA3YJ, VA3RJ & ICPO, VE3VHB, VE3ZZ, VHF-DX-Portal (MMMonVHF), ZL1AAO and ZL1CT for the following DX information.

** EDITOR'S SPECIAL NOTICE: This week's bulletin was sent out earlier than normal to accommodate the late CQWW WPX CW Contest announcements. Also, we wanted to provide the readers with a consolidated listing of the CQWW WPX CW Contest participants.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Friday, 22nd-May, through Friday, 29th-May there were 207 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5V, 5X, 5Z, 6W, 6Y, 7X, 8P, 8Q, 9A, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A3, A4, A6, A7, A9, AP, BV, BY, C3, C5, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J3, J8, JA, JD/m, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P4, PA, PJ2, PJ7, PY, PY0F, PZ, S2, S5, S9, SM, SP, SU, SV, SV5, SV9, T7, T8, TA, TF, TG, TI, TK, TL, TR, TT, TU, UA, UA2, UA9, UK, UN, UR, V2, V4, V5, V7, V8, VE, VK, VP2E, VP2V, VP8, VP9, VR, VU, XE, XU, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3V, TUNISIA. Hrane, YT1AD, will be active as 3V9A during the CQWW WPX CW Contest (May 30-31st) as a Single-Op/All-Band/High-Power entry. QSL via

YT1AD.

4L, GEORGIA. Gia, 4L4WW, will be active as 4L0A during the CQWW WPX CW Contest (May 30-31st) as a Single-Op/All-Band/High-Power entry. QSL via EA7FTR.

7P8, LESOTHO. Ivan, UR9IDX, is expected to be (or is) in Lesotho and has received the callsign 7P8R. His length of stay is unknown, as well as his plans for operations (bands/modes) as this was being written. QSL direct only to: Ivan Borzenko, P.O. Box 85, Mari, Mariupol-31, 87531, UKRAINE.

8P, BARBADOS. Tom, W2SC, will be active as 8P5A during the CQWW WPX CW Contest (May 30=31st) as Single-Op/All-Band/High-Power entry. QSL via NN1N.

8Q, MALDIVES. Just a reminder that Nobby, G0VJG, will be active as 8Q7CQ between June 1-15th. This will be a limited operation because Nobby will be on his honeymoon (and he thanks his wife for putting up with him and the QRM). Activity will be from Kuredu Island (AS-013) mainly HF SSB but some 6 meters. QSL via Owen, G4DFI. Visit his Web page at: http://g0vjg.piczo.com/?cr=5

8Q, MALDIVES. Tom, PF4T, will be active as 8Q7TB from the Island of Embudu between June 8-24th. Activity will be on 40 and 20 meters using SSB with a FT-897 and G5RV antenna. QSL direct to PF4T or by the Bureau via PA0LEY. For more details on QSL info, see QRZ.com. Also, visit his Web page at: http://8q7tb.pf4t.nl

C4, CYPRUS. Look for Andy, LZ2HM, and possibly others to be active as C4I during the CQWW WPX CW Contest (May 30-31st) as a Multi/? entry. QSL via LZ2HM.

C4, CYPRUS. Operators Valentin/5B4AGM, Alex/5B8AD and Oleg/UA9CDV will be active as C4N during the CQWW WPX CW Contest (May 30-31st) as a Multi-Single entry. QSL via W3HNK. Visit the contest station's Web page at: http://www.c-4-n.com

CY0, SABLE ISLAND (Attention Topbanders). Randy, N0TG, informs OPDX that the CY0 Sable Island Dxpedition team will incorporate the famous "Battle Creek Special" antenna for 160 meters as well as 80/40m. This was made possible by the generous loan program coordinated through George, W8UVZ. The team thanks this special group for their support for not only for their CY0 operation, but for the many DXpeditions down through the years. The dates of the DXpedition are October 19-26th. operators are Randy/N0TG, Ron/AA4VK and Murray/WA4DAN. Visit their Web page at: http://www.cy0dxpedition.com

DX BULLETIN READER PROGRAM. An interesting program written by Alex, VE3NEA, called "DX Bulletin Reader 1.0" (for Windows 95/98/ME/NT4/2000/XP) is a tool for viewing, archiving and searching the DX news bulletins. The following publishers/bulletins are currently supported:

Ohio/Penn DX Bulletin DX Newsletter
425 DX News The Daily DX
425 DX Calendar WAP Antarctic Bulletin
ARRL DX Bulletin I.C.P.O. Bulletin
Bulletins not listed above and non-periodical publications can be added as "Other". The software is FREEWARE and is available at: http://www.dxatlas.com/BullRead/

DXCC NEWS. Bill Moore, NC1L, Awards Branch Manager, reports that the following operation is approved for DXCC credit:
7Z1CQ - Saudi Arabia; Current Operation
If anyone had this operation rejected in a DXCC application, send an E-mail to dxcc@... to be placed on the list to have your account updated.

E51, SOUTH COOK ISLANDS. Nigel, G4KIU, is now active as E51SC from the Island of Rarotonga (OC-013). He has moved to the South Cook Islands and is expected to be on 80-10 meters mainly on SSB, RTTY, PSK31 and with some CW. He was heard this past week on 20 meters PSK31 between 0330-0630z. Direct QSLs are to be sent to: Nigel Peacock, P.O. Box 880, Rarotonga, Cook Islands (via New Zealand). Please send a SAE, plus 2 USDs or 2 new style IRCs. Any direct cards received without the above items will be returned via the Bureau. Bureau QSLs go to: E51SC via G4KIU/RSGB. **IMPORTANT** There is no QSL Bureau in the Cook Islands. Cards without G4KIU on them will NOT be received. Please "DO NOT" send direct cards to any G4KIU address in England - they will NOT arrive. All E51SC contacts will be loaded to LoTW about once a week. He does not use e.QSL at all.

EI09, IRELAND (Special Event). Members of the Galway Radio Experimenters Club are now active using the special event callsign EI09VOR until June 6th. Activity is to celebrate the Volvo Ocean Yacht Race which takes place in Galway, Ireland. Look for both CW and SSB operations. Over the past week activity has been on 30/20/17 meters. Operators will be operating from Mutton Island Lighthouse. QSL via EI8DD. For more info, visit their Web page at: http://www.galwayradio.com

EN50, UKRAINE (Special Event). Members of the Rivne DX Club (UT1KWA) will be active as EN50KSR between June 1st and July 5th. Activity is to celebrate the 50th anniversary of the Rivne speedway. QSL via UT1KY: P.O. Box 85, Rivne, 33027, UKRAINE. Visit their Web page at: http://radio-rivne.rv.ua/?lng=en

FS, ST. MARTIN. John, K9EL, will be here on a family vacation between June 4-12th, and will be operating whenever possible. He will be using an IC7000 and verticals for 80-10 meters and will be operating CW, SSB and RTTY. Please QSL to his home callsign; Bureau cards are "OK". ADDED NOTE: John informs OPDX, "I have already received a few E-mails asking me to try 6m, so I will build a vertical or dipole when I get there and try 6m as well. Next time I'll bring a yagi...."

HF70/SN70/SO70, POLAND (Special Event). Look for members of the Polish Radio Amateur Associated (PZK) to activate the following special event

stations during the 70th anniversary of the beginning of World War II.
The "NO MORE WAR" stations will be on the air during various times between
September 1st and October 6th. The following stations are:
HF70NMW (by SP6ZDA) SN70N (by SP2CA) SO70R (by SP4NDU)
SN70NMW (by SP4JCP/SN4L) SN70O (by SP8NFZ) SO70E (by SP4JAE)
SO70NMW (by SP3ZIR/SN3B/SQJPV) SN70M (by SP9KN) SO70W (by SP5PPK/
SN70R (by SP2YRY/SP2UUU) SQ5NAE)
HF70N (by SP5KDK/SQ7HNT) SN70E (by SP1MWF) SO70A (by SP9YGD)
HF70O (by SP2LQP) SN70W (by SP2LNW)
HF70M (by SP8MI) SN70A (by SP2KMH/SQ2MMS)
HF70R (by SP4ICP)
HF70E (by SP5X) SO70N (by SP2AYC)
HF70W (by SP2KDS/SQ2BXI) SO70O (by SP9KAJ/SP9CLU)
HF70A (by SP5PSL/SP5JXK) SO70M (by SQ9JKD)

IOTA NEWS.....
EU-048. Francois, F5JNE, will be active on Belle-Ile-en-Mer (DIFM
AT-15, WLOTA L-078) between June 16-24th. Activity will be
CW only on 40 and 20 meters, mainly in the evenings. QSL
via F5JNE, direct or by the French REF Bureau.

EU-048. Jean-Pierre, F6ITD, will be active as homecall/p from Belle-Ile
between June 20-28th. Activity will be on the HF bands (no
17/12m) on SSB only. QSL via F6ITD.

EU-064. Operators Pierre/F5AAR and Alain/F5OZC will be active as
homecall/p from Yei Island between June 3-5th. Activity will
be on 80-10 meters using CW and SSB. QSL via their home
callsigns.

EU-064. The F6KOP team will defend its World IOTA Champion 1st place
title for the 3rd time in this year's RSGB IOTA Contest (July
25-26th) from Noirmoutier Island as Multi-Single/Mixed/24H/
Low-Power entry. Callsign will be TM7C. Operators mentioned
are: Bernard/F9IE, Serge/F6AML, Jean-Paul/F8BJI, Flo/F6CWU,
Pascal/F5JSD and Maurice/F5NQL. Bruno/F5AGB and John's/F5VHQ
participation is pending. QSL Manager is Flo, F5CWU. QSL
either direct or through the French REF-Union Bureau (Please
only this bureau).

EU-090. Operators Wolfgang/OE3WGC and Gert/OE3ZK will be active as
9A/homecall from Palagruza Island (ACIA IC-901, CIA-33, IOCA
CI-084, MIA MC-284) and lighthouse (CLHA CLH-100, ARLHS CRO-012,
TWLHD WLH 9A-046, WLOTA 0057) between May 30th and June 6th.
Activity will be on CW, SSB and RTTY. QSL via their home
callsigns, the Bureau is preferred.

EU-095. Operators Robert/F5HTR and Roger/F5LKW will be active as
homecall/p from Riou Island on June 8th. They will travelling
in a kayak and will be active as QRP on 40 meters. Listen to
7032 kHz. QSL via their home callsigns.

NA-029. Operators Gregg/VE3ZZ and Noel/VE2BR will once again operate from Prince Edward Island (CISA PE-001) on July 15-27th, using the VY2TT superstation. During the IOTA Contest (July 25-26th), they will operate as VY2Z (QSL to VE3ZZ) and outside the contest as VE3ZZ/VY2 and VE2BR/VY2. QSL via their home callsigns, direct or via the Bureau.

NA-129. John, VE8EV, will use the special callsign VC8B for the Banks Island DXpedition, July 24-27th. Operations will be from Sachs Harbour, NT. Activity will be only SSB, mostly on 20 meters which, aurora permitting, should be open round the clock. He will watch for openings on 15 and 10 meters as well. He does not anticipating any problems unless there is a delay for weather, likely fog, which is common that time of year. QSL via VE8EV, direct (SAE and IRC or 2 greenstamps) or by the Bureau. Online QSL requests and a log search will be available after the operation. Look for updates at: http://ve8ev.blogspot.com/search/label/IOTA

NA-223. (Update/Date Change) Members of the Russian Robinson Club will be active as KL7RRC from Ogliuga Island, Alaska, between June 14-19th. Regular suggested IOTA frequencies (14.040/14260 etc). Operators mentioned are: Yuri/N3QQ and Johnny/KE7V. QSL via: RU/EUROPE - Yuri/UA9OBA and US/JA/SA Dick/N7RO. Watch for updates on: http://www.na-234.com/contact_chuginadak_expedition.html

SA-071. (Update/Change In Callsign) Members of the Sao Paulo Association of Radioamadores (APRE) will be active as PR2R (not PT2T as previously mentioned) from Ilha da Moela (DIB SP-06, DFB SP-07, ARLHS BRA 043, TWLHD WLH PY-031, WLOTA 1335, WW Loc. GG65UW) between June 11-14th. Activity will include operations from blockhouses, islands and lighthouses of the State of Sao Paulo. Operators include Irineu/PY2IAB, Marcelo/PY2OMT, Thiago/PY2TLB, Joao/PY2TI, Claudio/PY3NZ, Felipe/PU2OVA, Filipe/PU2TEA and Thiago/PU2TJQ. Operations will be on 80-2 meters, SSB only. QSL via PY2OP, direct or by the Bureau. For more info, go to: http://www.apre.com.br/moela

K5, UNITED STATES (Update - HF/6m/Grid/LH/USI Op). Just a reminder that the members of the "EL58 Grid Activation Group" will be active as K5N between May 29-31st (1700-1700z). Activity will be from the sandy beach facing the Gulf of Mexico in Grid Square EL58hx, ARLHS USA 1101 under the "Visual Site Rule" and a New USI Island (USI LA105S - Burwood Island, LA) (South West Pass). The operation will be mainly 6 meters and HF. They will have 2 stations on 6m and one on HF using SSB/CW. Operating frequencies on 6m are: 50.100/CW, 50.150/SSB and 50.315 Meteor Scatter. QSL via: Joey Fierro II, 1054 Cajun Ln, Magnolia, MS 39652. Operators mentioned are: Al/WA4EWV, Bill/K5YG, Bob/WN2E, Bruce/N5SIX, Daniel/KE5KDM, Danny/N5OMG and Marshall/K5QE. Visit their Web pages at: http://www.kcvhfgridbandits.com/kc_vhf_grid_bandits_018.htm http://w4abc.com/K5N.html

MUSEUM SHIPS WEEKEND EVENT. The "2009 Museum Ship Weekend Event" is sponsored by the "Battleship New Jersey Amateur Radio Station" and will be held next weekend, between 0000z June 6th, and 2359z June 7th. As this was been typed, some 76 museum ships are participating. For an up-to-date listing of participating museum ships, frequencies and details on a certificate which is available, please visit:
http://www.nj2bb.org/museum/index.html
Activity will be on all HF bands, 80-10 meters, using CW, SSB and PSK31. Some ships will also use Amplitude Modulation (AM) with either their ships original equipment or modern equipment.

NEW AWARD AVAILABLE. Francis, F6FQK, informs OPDX that a new TP2CE Radio Club diploma is now available called: "Council of Europe Radio Amateur Club Award". Complete rules and photos are available on:
http://ewwa.free.fr

OH0, ALAND ISLAND (Possibly OJ0). Manuel, CT1BWW (SWL CT0783), will be active as OH0/CT1BWW between July 26th and August 7th. Activity will be on 80-10 meters using CW, SSB and RTTY. QSL via CT1BWW, direct or by the Bureau. Manuel may be active as OJ0/CT1BWW from Market Reef on August 1st. For more info, visit Manuel's interesting Web page at:
http://www.geocities.com/oh0ct1bww

PA6, NETHERLANDS (Special Event). To celebrate the reopening of a 800 year old church tower (after its renovation) in Noordwijk, look for PA6JEROEN to be active between June 4-14th on HF and VHF. The old church is called "Oude of St Jeroenskerk" (in English: Church of St. George). Actual operations from the church tower will take place on two Fridays, June 5th and 12th. Pictures of this tower can be viewed on:
http://picasaweb.google.nl/jaap.pa7da/OudeOfStJeroenskerkTorenbezoekNoordwijk#
Please QSL only via the Bureau to PA7DA. ADDED NOTE: Jeroen (St. George) was a Monk from Scotland and arrived at the Noordwijk (Nortgho) in 847. In 857, he built a Chapel on the place of this Church and did bring Christianity to the people in the western part of Holland and West Friesland. Later he had been killed by the Normans!

PY2, BRAZIL. Alex, PY2SEX, from Sao Paulo, will be active during the CQWW WPX CW Contest (May 30-31st) as a Single-Op/Single-Band (40m)/ Low-Power entry. He wil use a 2 element yagi and a FT-950 w/100w. QSL via his home callsign, by the Bureau, direct (see QRZ.com) or LoTW.

PZ, SURINAME. Mike, AJ9C, will be active from between October 22-29th. His callsign will be announced when it is assigned. He is expected to be active on 160-6 meters using CW, SSB and RTTY, as well as an entry in the CQWW DX SSB Contest (October 24-25th). QSL to his home callsign with SASE/USD(s) for return postage.

QSL INFO AND NEWS.....
9J2QQV INQUIRY. OPDX has been asked to inquire if anyone knows where Ryuji, JO7QQV, is and if anyone has received their 9J1QQV QSL.

QSL TC098A via OK2GZ (Bureau or direct). Operators OK1MU, OK1DF, OK1FIA and OK1CDJ were active from Karaada Island (AS-098) for 59 hours and

made 11,183 QSOs. More info, photos and an online log are available at:
http://www.okdxf.eu/expedice/tc098a/en/

QSLS VIA LOTW: 9U0A, EY8MM, HL2FDW, KH6ND/KH5, NL7Z, PY0FF, SP4K,
YS1G, ZK2V and ZP6CW

QSLS RECEIVED VIA MAIL: 4U1UN, 4V4JR, 5N/LZ1QK, 8Q7HN, 9L1DX, A61Q,
BD7NWF, CS2C, CY9SS, FK/G3MXJ, J88DR, PY0FF, S51CK, SU1SK, SU9BN,
TA1HZ, TS7C, US0KW, VK9N/G3MXJ, VK0BP, VP8/LZ1UQ, YJ0MXJ and Z29KM

QSLS RECEIVED VIA THE BUREAU: 3V8SS, 4W6AAV, 6L0NJ/4, 8R1K, 9G5A/P,
A5100A, C91CW, CE3BFZ, CE0Y/LA6IKA, CE0Z/DL2AH, E51WWA, ER3ZW, FJ/SP3IPB,
FJ/SP6IXF, FO/AP2SOI, H44MS, HL0LPM/3, J28JA, MJ/F5CWU, MJ0LON,
MM/DH5JBR/P, OX/G3TXF, P29KN, PJ6/K2KW, T32CXX, TS7C, V31XX, V73PX,
VI5PN, VK9ALH, VP8YLB, YI9RKB, YK9SV and ZD7X

TA7, TURKEY. Operator Berkin, TA3J, will be active as TA3J/7 and TA7KI
from Erzincan City (KM99RS) between May 26th and June 2th. Activity will
be on all bands using CW, SSB and the Digital modes. QSL via TA3YJ,
QSL Service at: http://www.aydogmus.gen.tr/ta3yj/qslservice.htm

TC2, TURKEY. Members of the Turkish group called TCSWAT (Special Wireless
Activity Team) is proud to inform upcoming operations from TC4X. The
Finnish-Turkish Friendship Consortium station operating from Alanya,
Turkey, will be once more on the air during the CQWW WPX CW Contest
(May 30-31st). Operator will be Pertti, OH2PM. QSL via Martti, OH2BH,
as usual.

TK9, CORSICA (EU-014). Members of the DXCiting Team will be active as
TK9X between July 25th and August 1st. Activity will be on 160-6 meters
using CW, SSB, RTTY and FM. Operators mentioned are: YL Silvia/EA1AP,
Alberto/EA1SA, John/EA3GHZ, Raul/EA5KA, Paco/EA5RU and Alicia/EA5EWM.
QSL via EA4URE, direct or by the Bureau. Visit their Web page at:
http://www.dxciting.com/tk9

U.K. TRIP. Bruce, ZL1AAO, informs OPDX that he is going on a "DXing and
nostalgia trip to the UK for ex-GM1KNP". He wants to advise DXers and
friends that he will be touring in the UK during July and August. Bruce
will be using the UK country prefixes followed by his New Zealnd callsign
(e.g. MM/ZL1AAO when in Scotland). He expects to be in Scotland, England
and Wales (as he holidays around) and hope to include some activity from
the Orkney Islands. Activity will be limited to mobile/portable operations
using a FT857D, multi-band vertical or a tuner with long-wire. Mode will
be SSB only. He will produce a special QSL celebrating his activity. Check
QRZ.com for some more details and updates when he has more specific plans.
QSL via his home callsign.

VP9, BERMUDA. Alex, W5YDX, will be active as VP9/W5YDX between June
10-24th. Activity will be holiday style (during his spare time) mainly
on 20 and 17 meters (suggested freqs. between 14140-14265 kHz) using
100 watts into a dipole. QSL via W5YDX.

WORK ALL RADIO ARCALA NETWORK STATIONS AT ONCE. Martti, OH2BH, sent out the following press release on May 22nd (edited): "You now have an opportunity to contact all Radio Arcala network stations at once: OH8X, Finland; CU2X, Azores and TC4X, Turkey. During the May 30-31st, 2009 CQ WPX CW Contest, Pasi, OH6UM, will command OH8X while CU2X will be piloted by Toni, OH2UA, and TC4X by Pertti, OH2PM. All as single operators. You may also hear Martti, OH2BH, active as CU2KG from his new residence in Ribeira Grande, Northern Azores, May 25th through June 1st. Also, new Portuguese regulations will become effective on June 1st, and this is the last run for the CU2X callsign. Resident operators can keep their original CU2 callsigns but special events, such as contests, will be issued with callsigns from the new CR1, CR2 and CQ8 series. All new licenses and/or expired residential licenses in the Azores will be issued the CT8 (1), CS8 (2) and CR8 (3), depending their license category. QSL CU2X and TC4X via OH2BH, OH8X via OH2UA."

ZD8, ASCENSION ISLAND. Dean, KJ4GNB, is now active as ZD8DC. His length of stay was not known as this was being typed. Activity so far has been on 20 meters SSB. QSL ZD8DC via KJ4GNB.

ZK2V NIUE OPERATION UPDATE. Chris, ZL1CT/GM3WOJ, provided OPDX with the following operation update: "A quick update from ZK2V - made 6100 QSOs in 9 days, which is a bit disappointing - conditions poor, especially last weekend. Made only 1 QSO on 160m and 2 QSOs on 80m, so concentrating on the higher bands. Openings to Europe are often short with weak signals, which is lowering the QSO rate, but signals from JA and the USA have been strong. Will be on RTTY tomorrow (28th May) for about 30 mins sometime between 0600 and 0800 UTC (14082 approx QSX up 8) - will do more RTTY if things work well. For the first time from Niue, I have a special permit to operate on 60m - from 0000 Niue time (= 1100 UTC) on 1st June 2009 until 0000 Niue time (=1100 UTC) on 8th June. I can transmit *only* on 5403.5 kHz (USB for USA, but CW for rest of world), but will listen on 5371.5 or another channel. The website www.zk2v.com is updated nearly every day - there is an online logsearch and all QSOs are uploaded to LoTW every few days. ZK2V is QRV for 25 more days and hoping for better propagation. QSL direct or via the bureau to N3SL (not ZL1CT)."

The following stations are expected to be active in the
CQWW WPX CW Contest (May 30-31st, 2009)

Thanks to Bill, NG3K, for providing OPDX readers with the following consolidated listing of the participants in the 2009 CQWW WPX CW Contest. For a more detailed listing (and up-to-date changes/corrections) in HTML format, please visit Bill's Web page at:

>From Tad Cook, K7RA
Seattle, WA May 29, 2009
To all radio amateurs

SB PROP ARL ARLP022
ARLP022 Propagation de K7RA

That was a nice string of days showing a sunspot -- May 13-19 -- a whole week. Then it was gone, but a few days later on May 23, another Solar Cycle 24 sunspot emerged, this time in our Sun's southern hemisphere. But it was another of those phantom spots. This one actually emerged, and gave us a sunspot number of 13. For that one day it covered 30 10E-6 hemispheres. (10E-6 or 10 to the minus sixth power is another way of expressing the fraction one-millionth). The next day it was gone.

The area of that spot represented .003 percent of the hemisphere of the Sun that we could see, that which was pointed toward us. Because 10E-6 is one-millionth, then 30 times that would be thirty-millionths (three hundred-thousandths), or .003 percent.

During the seven days with a sunspot, May 13-19, the sunspot numbers were 12, 18, 12, 15, 13, 14 and 11. On those same dates, the sunspot area expressed in millionths of a solar hemisphere was 10, 20, 10, 20, 10, 30 and 10.

See those daily numbers at,
http://www.swpc.noaa.gov/ftpdir/indices/DSD.txt.

When we see more activity, these values can be much larger. Note that the sunspot area doesn't track exactly relative to sunspot number. The largest sunspot area was on May 18 and the largest sunspot number was May 14.

Thanks to Carl Luetzelschwab, K9LA, for the refresher on scientific notation and the function of E.

Conditions have been quiet, with many days showing zeros for planetary K index. The U.S. Air Force and NOAA predict a planetary A index of 5 until June 3-5 when it goes to 12, then 8 for the following two days. Solar flux is predicted at 68 until June 5,

when it goes to 70, then 71 June 6, and 72 for June 7-14. Perhaps we will see sunspots return during this period.

Geophysical Institute Prague has a slightly different view for geomagnetic activity, predicting quiet conditions for May 29 to June 1, quiet to unsettled June 2-3, and active on June 4.

Conditions should be stable for the CQ World Wide WPX CW Contest this weekend. You could be a sought-after multiplier with the right prefix in that contest. Back when I was KT7H I was one of those. K7RA, however, is not.

Days grow longer, and Summer Solstice, the longest day of the year is June 21. The Vernal Equinox was March 19, and it is interesting to compare propagation projections on those dates.

With minimal sunspot activity, from the center of the contiguous 48 states (near the center of Northern Kansas, about a dozen miles south of the Nebraska border between Cora and Lebanon) we can compare propagation predictions for the equinox and solstice. To Japan, in the Spring we might see a 20 meter opening in the late afternoon and evening from 2100-0400z. In Summer, that Japan opening would run much later, beginning around 0500z with signal strength increasing dramatically, and fading out around 1700z.

The 80 meter opening over the same path would be much shorter duration in the Summer, because it needs darkness, and the night is so short on the longest day of the year, more so in northern latitudes. We might see 80 meters open 1030-1130z, but in the spring it runs from 0800-1430z.

>From Los Angeles to Hawaii on those dates, on 20 meters it might be easier to describe when it is least likely to be open. Openings are least likely on March 21 from 0500-1600z, all night. On June 21 the least likely period for a 20 meter opening would be 0600-1530z.

Thanks to Peter Laws, N5UWY of Norman, Oklahoma who points out that the NY Times article referenced in last week's Propagation Forecast Bulletin ARLP021 at http://tinyurl.com/ps6c4d was not from the nineteenth century, but was published May 17, 1921.

Emory Stephens wrote on May 22 that, "A recent article issued by NOAA stated there are signs that the number of sunspots should increase. You indicated in your posting that is an unknown area. Is NOAA's statement science or are they making a calculated guess?"

I believe it is a guess calculated on average past cycles, and the fact that this minimum has continued so long. So the longer it goes on, the more likely it is to increase soon, by their reasoning.

On May 22, George Thorward, N6CAS of Happy Camp, California wrote about 20 meter activity over the previous week. George said he hears low power mobile stations working Europe while signals from

the Pacific are coming in loud and clear at the same time. He notes that "Europe has been wide open this week" and 10 meters has been open from time to time also. Check out photos of the N6CAS installation at, http://n6cas.tripod.com/n6cas_ham_shack/.

Dave Bennett, VE7YJ of Aldergrove, British Columbia wrote, "I noted the item about KH6XS working in to EU on 15M and just thought I'd add that he's been heard here late evenings on that band recently, 'testing propagation.' Unfortunately, I'm not set up for CW operation, so couldn't respond to his CQ, but did note it on the DX Cluster. That band has also been open to SA, with LU stations well heard, though my pipsqueak signal doesn't seem to go the other way, hi."

John Ragle, W1ZI of Hadley, Massachusetts was another who wrote right after last week's bulletin was released. He writes, "When are bands 'dead' and when are bands 'unoccupied?' Here in Western Massachusetts I keep an eye on 15 meters by switching my PSK rig to the band and looking for traces on the waterfall around 21.070. Today, for example (22 May, 2009), around local noon, there was strong north-south activity, in the case of PS7YL and a few others, resulting in 599 signals. These signals persisted for several hours thru the afternoon. The waterfall also showed many weak traces, too weak for copy, but there none-the-less. Since the PSK is pretty automated, I call CQ with 15 watts and a dipole from time to time from local noon and into the afternoon, as curiosity warrants (and usually without results). I think that the MUF is quite high enough for good contacts via trans-equatorial paths, but that people are simply convinced that the band is 'dead,' and are not paying attention. Perhaps it wouldn't hurt for people who can use weak-signal (i.e. CW and other digital) modes to exercise them once in a while on apparently 'dead' bands." Thanks, John!

Red Haines, WO0W (between the two Ws are the letter O followed by the number zero) has been watching data from ionosondes (instruments that beam radio signals straight up to see the range of frequencies that bounce back). Quite a few ionosondes listed at http://www.swpc.noaa.gov/ftpdir/lists/iono_day have been silent of late. The data of interest is in the f0F2 column, the MUF figure. Red writes, "A most interesting observation in the past week is the wild excursions of f0F2 over short periods, less than an hour. I suspect this indicates what McNamara calls 'ionospheric storms,' which create rapidly changing HF propagation, often seen as 'fading.' I refer to:"

"'Radio Amateurs Guide to the Ionosphere,' Leo F. McNamara. Krieger Publishing Company, Malabar, FL, 1994."

"This book bridges the gap between texts and technically inadequate publications. I recommend it highly to amateur operators who wish to know more about propagation."

Thanks for the tip, Red!

Pete Malvasi, W2PM of Ramsey, New Jersey wrote in regard to mention in recent bulletins of large aurora events disrupting the telegraph circuits of yesteryear: "I've read accounts of serious disruption to early telegraph land-lines in several period texts including an extensive chapter in The History, Theory and Practice of the Electric Telegraph by George B Prescott. Reports of office fires and fireball display are all associated with electrical storms however and not the Aurora."

Pete sent a reference to an account of geomagnetic disruption to telegraph cables, which you can find at http://tinyurl.com/mouues.

Pete continued, "Other accounts I've read in early texts describe operating conditions in the mid 19th century to be very similar to working present day CW with fading, static, temporary outages, etc. They used a single wire in those days, with a ground return, and many of the earliest lines did not use good materials for insulators so there was a lot of leakage to ground. Perhaps the single wire circuits also made the lines more susceptible to the Aurora?"

Jon Jones, N0JK is currently using an indoor dipole on 6 meters in Lawrence, Kansas. He writes, "A multi-hop Es opening on 6M to Japan occurred on May 22 from the central USA. I copied JE1BMJ on an indoor dipole. W7CNK EM15 Oklahoma and stations in Colorado and Texas worked a number of stations in Japan via multi-hop Es." Jon sent a list of 16 QSOs copied, mostly between U.S. and foreign stations from 2313-2331z.

And finally, this one was sent by Danny, K7SS concerning an intriguing tale of a possible resurgence of interest in Morse Code, by text-message happy youth in Japan. However, this one gives a moderate to slightly high reading on my baloney-detector, which may be over-sensitized. Read it at http://mhpbooks.com/mobylives/?p=6535 and judge for yourself. Note that users can only send text messages -- not receive -- and must check their email for replies, in addition to learning Morse Code. Can anyone translate that Kanji text? Or is it Katakana?

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at, http://www.arrl.org/tis/info/propagation.html. For a detailed explanation of the numbers used in this bulletin, see http://www.arrl.org/tis/info/k9la-prop.html. An archive of past propagation bulletins is at, http://www.arrl.org/w1aw/prop/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://www.arrl.org/qst/propcharts/.

Instructions for starting or ending email distribution of this bulletin are at http://www.arrl.org/w1aw.html#email.

Sunspot numbers for May 21 through 27 were 0, 0, 13, 0, 0, 0, and 0 with a mean of 1.9. 10.7 cm flux was 71.8, 72.1, 70.4, 69.2, 68.9, 68.1, and 66.7 with a mean of 69.6. Estimated planetary A indices were 5, 5, 4, 4, 3, 4 and 3 with a mean of 4. Estimated mid-latitude A indices were 2, 4, 3, 4, 1, 2 and 2 with a mean of 2.6.

>
> Are we REALLY at the bottom of the cycle? I have not heard 20 meters like
> this in a LONG time.

I had the same experience, except I was mobile in the 18-wheeler. I ended up sitting up and playing radio until maybe 2 AM! Heard the Pacific Seafarer's Net on 14.300 -- a net I don't think I ever heard before -- and after they closed the net, I called the net control in Hawaii and was 5/7 -- and a station in Australia broke in and gave me an incredible report, and the whole time I was using a 3-foot mobile antenna!

Oh well, guess that's over now -- the flux is back down to 68.

9951. Maybe!

Yahoo group: DX-IS (2009)
Date: 2009-06-01 14:35:58 UTC
From: Paul M Dunphy
Topic: 9951 Message: 9951

From:

http://www.solarcycle24.com/

"Update: Sunspot 1019 which continues to show some growth now poses a threat for B-Class solar flares. A small B1.1 mini flare too place at 08:07 UTC Monday.

The new sunspot which formed within the past 24 hours has been numbered 1019 by NOAA. Currently is does not pose a risk for strong solar flares. It is the biggest Cycle 24 sunspot in terms of area since January.

Sunspot 1019 is the third Cycle 24 sunspot to form in the past 20 days."

20M seems muted to EU this AM, and could be the result of that mini-flare.

However, these cycle 24 things are starting to show up more frequently, and there is some buzz in the scientific community of saying "In recent months, however, the sun has begun to show timorous signs of life. Small sunspots and "proto-sunspots" are popping up with increasing frequency. Enormous currents of plasma on the sun's surface ("zonal flows") are gaining strength and slowly drifting toward the sun's equator. Radio astronomers have detected a tiny but significant uptick in solar radio emissions. All these things are precursors of an awakening Solar Cycle 24 and form the basis for the panel's new, almost unanimous forecast."

The entire article about the new optimistic prediction on Cycle 24 is here:

http://science.nasa.gov/headlines/y2009/29may_noaaprediction.htm

We might well see things pick up soon. Those who have patiently played low band DXer, honed their stations, and never given up hope could be rewarded in the next 12-24 months!

73, Paul VE1DX

From: Paul Dunphy
Topic: 9721 Message: 9953

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Jun 01 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 152 Issued at 2200Z on 01 Jun 2009
IA. Analysis of Solar Active Regions and Activity from 31/2100Z
to 01/2100Z: Solar activity was very low. Region 1019 (N28E29)
developed into a Cro beta group with 13 spots and produced a B1
x-ray flare at 01/0807Z.
IB. Solar Activity Forecast: Solar activity is expected to be very
low, with a slight chance for a C-class flare from Region 1019.
IIA. Geophysical Activity Summary 31/2100Z to 01/2100Z:
The geomagnetic field was quiet.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be quiet on 2 June. Quiet to unsettled levels, with
isolated active conditions at high latitudes, are expected on 3-4
June due to a recurrent coronal hole.
III. Event Probabilities 02 Jun-04 Jun
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF Green
IV. Penticton 10.7 cm Flux
Observed 01 Jun 073
Predicted 02 Jun-04 Jun 075/075/075
90 Day Mean 01 Jun 069
V. Geomagnetic A Indices
Observed Afr/Ap 31 May 003/003
Estimated Afr/Ap 01 Jun 003/005
Predicted Afr/Ap 02 Jun-04 Jun 005/005-007/008-007/008
VI. Geomagnetic Activity Probabilities 02 Jun-04 Jun
A. Middle Latitudes
Active 05/15/15
Minor storm 01/01/01
Major-severe storm 01/01/01

Well, Geoff, indeed it is not likely to be a repeat of one of
the massive cycles of 3-4 decades ago, but if you read that automated
forecast I sent out an hour ago, it read it part:

"Observed 01 Jun 073
Predicted 02 Jun-04 Jun 075/075/075"

One data point is just that, one data point. However, we
haven't seen that is a long time. Be a believer. The Great Days of
DXing are at hand. The signs are everywhere! DX IS!

I worked with a group of Solar Physicists back in the 70's.

From what I could glean, they talked a lot but when it came

to predictions, they tossed a coin most of the time.

I was not impressed.

A watched pot never boils!

Geez! It is what it is. Do the best you can with what we have available. Marsha (N4BU) worked 9M6 this morning on 20M SSB.

There is "stuff" to be had - but certainly not 24 hours a day. You are going to worry yourself into an early grave - and miss the next cycle after this one!

9958. Re: Maybe!

Yahoo group: DX-IS (2009)
Date: 2009-06-02 13:43:41 UTC
From: Art Burke
Topic: 9951 Message: 9958

In 1859 there was a solar event now described as a "Carrington event," so named after the astronomer who witnessed it. Telegraphy existed and power transmission, such as it was, was in its infancy. Yet the infrastructure world wide suffered from fires generated from the sun's interference to what little infrastructure existed at that time.

Experts say that (a) these event apparently happen roughly once every 500 years and (b) should one happen now, in the age of satellites and huge power grids that it would make the effect of Hurrican Katrina pale.

Today a Carrington event would most likely melt transformers in the power grids. Melted transformsers cannot be repaired, only replaced. Electricity generation to many areas would stop, possibly for many months.

Gloom and doom? I still want my sunspots!

The statistical models used to generate these forecasts are incredibly complex. In statistical modeling, there is a term known as heteroskedasticity (not sure of the spelling). In laymen's terms, it means the data jumps around like crazy and it's difficult (if possible) to discern a predictable pattern.

The sunspot data is "double smoothed" to "iron out" the variability in the data. But, for the other factors involved in attempting to predict the sun's activity, there are a host of variables and arguments as to why many of them should or should not be included. And that's not to mention the arguments about the value of each of those variables.

Oh yeah. One more thing. This is the same technique used to model global warming. You remember global warming? Those forecasters are the ones who show us how fast the polar caps are melting and now can't explain several increasingly thick ice packs in the Arctic.

If we can't generate more sunspots, maybe we can generate more hams!
A few million more hams blasting the airwaves might produce some more DX!

The way I saw the gurus do it was to take historical data and
put it through their models to predict what happened a year or two
ago. They call that a "hindcast." They tweak the algorithms and
coefficients until the historical data correctly "predicted" what
happened a year or two ago.

This is used to argue present data will accurately forecast
using the same algorithms and coefficients. I don't know if this has
any merit. but it's the main way I observed oceanographic and climate
models being developed. Perhaps NOAA and NASA do it differently when
it comes to solar cycle prediction.

However you slice and dice it, predicting the future (a/k/a
fortune telling) is an inexact science. Be it weather, climate
change, solar activity, the stock market or anything else, people
want forecasts. The trouble is, they take them as gospel.

Worked TR8CA and TY5ZR on 20m last Monday (Sunday USA time) Also TR8CJV was on frequency but couldn't hear him.

All of these stations are residents in their prospective countries.

I guess though they are not as rare as a 9M6 for you guys.

5H2WK also active on 20m CW.

A watched pot never boils!

Geez! It is what it is. Do the best you can with what we have available. Marsha (N4BU) worked 9M6 this morning on 20M SSB.

There is "stuff" to be had - but certainly not 24 hours a day. You are going to worry yourself into an early grave - and miss the next cycle after this one!

Well, I may have to at least put the eraser down on the desk.

While not esoteric by any means, I worked C6AMS on 20m lst night. What
was esoteric, was the time of day, 0300Z!! The band was still open at
midnight here, I haven't seen that since I got back into the fray
about a year ago. Maybe there is something to all the prognostications
after all ;-^).

Rene,

I have it installed and it works fine. It had one intrusive program which popped up when I turned on the computer wanting me to defrag the disk.

Microsoft XP said I didn't need to defrag, so I just deleted this little program and all continues to go well.

Good luck

Hi Rene,

I'm not a big user of IE as I use Firefox as my primary browser. However, Version 8 is installed on 4 machines here and have not had any problems with the install or operations. I do keep it current as some of the MS sites don't play well with other browsers.

Whether it will benefit you is a whole other issue but I don't know of any problems it might cause you.

Rene,

I have "8" installed on three computers (two desktops and one laptop) and I have not had any issues or problems with it at all. Has a couple of new features that may or may not be of interest; but I don't know as I can say that it is much different than the old one.

For some reason I found it slowed my computer down when browsing.
Pages were slow to load and there was a long pause after the page
downloaded and before the browser displayed them. It was especially
slow when opening a blank tab. I wnet back to IE7 and that all went
away.

YMMV as they say :-^)

When I downloaded IE8 all my favorites, filters, settings, etc., from IE7 were automatically rolled into the new version. It asked me if I wanted to change my emailserver ... NOPE!! I'm happy with what I've got!

IE8 does want you to set up some browsing priorities. I have not done so. I have it installed but I'm still in the IE7 mentality. It is transparent to IE7.

From: Paul M Dunphy
Topic: 9980 Message: 9980

About 6 months ago I worked a station in the Pacific. Semi-rare and new for me on 75M. I'm still half-heartily trying to negotiate a QSL, so I don't want to ID the operation. I worked him within 5 minutes of another call I recognised. This was a good as it gets, he was an honest 55 and everything he said was crystal clear. I sent for a card and it came back NIL. I was really surprised, because this was no marginal QSO. I emailed the other guy and asked him if he got his card, because I heard his QSO and it was clean. He told me he got a NIL too so we decided it had to be a pirate.

My buddy (lives 1000 miles away and I never met him, but a buddy nonetheless!) wasn't satisfied and emailed the operator. He got back a scan or photocopy of the lousiest logs I ever saw full of partial calls with ?? after them, some with lines through them, some that couldn't be Ham calls (as in no number VEABC things, etc.) and no time or date on the two pages sent. He had written my friend's call in between a couple of others (it was obvious as it was squished in and with a thinner inked pen.) He included a card and the explanation that he must have missed putting it into the computer when he got home.

I figured if it worked for one it ought to work for another, so I sent an email asking him to double check my QSO. He came back saying he definitely was on the air then and working east coast NA, but I was NIL. Period.

OK, I can accept NIL. But why would someone go on a DXpedition (a small one person one) to a semi-rare place and keep really sloppy logs, so bad he couldn't tell who he worked, and then be strict on bouncing guys? Not in the log means not in the log, and I am about ready to give up emailing. Had I not seen the hen scratches, obvious mistakes and after the fact changes, I wouldn't care.

It seems weird to go to all the trouble of putting an obscure place on the air and to keep such sloppy logs you can't make sense of them yourself a week later. Even weirder to send a photocopy of this to anyone! That is my point. Oh well. Another one will come along.

73, Paul VE1DX

9981. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-06-04 22:11:04 UTC
From: Paul Dunphy
Topic: 9721 Message: 9981

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Jun 04 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 155 Issued at 2200Z on 04 Jun 2009
IA. Analysis of Solar Active Regions and Activity from 03/2100Z
to 04/2100Z: Solar activity was very low. There were three low level
B-class flares during the past 24 hours. Region 1019 (N24W10)
continues to be the only spotted region on the disk and was quiet
and stable.
IB. Solar Activity Forecast: Solar activity is expected to remain
very low.
IIA. Geophysical Activity Summary 03/2100Z to 04/2100Z:
The geomagnetic field was mostly quiet during the past 24 hours.
There was one unsettled period from 0300-0600Z.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be quiet for the next three days (5-7 June).
III. Event Probabilities 05 Jun-07 Jun
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF green
IV. Penticton 10.7 cm Flux
Observed 04 Jun 071
Predicted 05 Jun-07 Jun 071/071/071
90 Day Mean 04 Jun 070
V. Geomagnetic A Indices
Observed Afr/Ap 03 Jun 004/004
Estimated Afr/Ap 04 Jun 005/005
Predicted Afr/Ap 05 Jun-07 Jun 005/005-005/005-005/005
VI. Geomagnetic Activity Probabilities 05 Jun-07 Jun
A. Middle Latitudes
Active 10/10/10
Minor storm 05/05/05
Major-severe storm 01/01/01
```

DX Bulletin 22 ARLD022
>From ARRL Headquarters
Newington CT June 4, 2009
To all radio amateurs

SB DX ARL ARLD022
ARLD022 DX news

This week's bulletin was made possible with information provided by NC1L, PF4T, PY2WAS, QRZ DX, the OPDX Bulletin, DXNL, 425 DX News, The Daily DX, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

LESOTHO, 7P. Alexander, UX4UL and Ivan, UR9IDX are QRV as 7P8A and 7P8R, respectively, until June 10. Activity is on all bands. QSL 7P8A via UY5ZZ and 7P8R via UR9IDX.

MALDIVES, 8Q. Tom, PF4T will be QRV as 8Q7TB Embudu Island, IOTA AS-013, from June 8 to 24. Activity will be on 40 and 20 meters using SSB. QSL direct to home call.

BAHAMAS, C6. A group of operators are QRV as C6AMS from Nassau on New Providence, IOTA NA-001, until June 14. This includes possible activity from Lighthouse WLOTA LH-1115. QSL direct to NA6M.

ANGOLA, D2. Vasiliy is QRV as D2QMN and has been active using RTTY on 20 meters around 2000z. QSL via RZ3EC.

SOUTH COOK ISLANDS, E5. Nigel, G4KIU now lives in Rarotonga, IOTA OC-013, and is QRV as E51SC. He is active on 80 to 10 meters using SSB, RTTY, PSK31 and some CW. QSL to home call.

IRELAND, EI. Members of the Galway Radio Experimenters Club are QRV as EI09VOR until June 6 in celebration of the Volvo Ocean Yacht Race which takes place in Galway. Activity is on 30, 20 and 17 meters using CW and SSB. Activity is from the Mutton Island Lighthouse, ARLHS IRE-107. QSL via EI8DD.

FRANCE, F. In commemoration of the 65th anniversary of the ''D-Day landings'' in Normandy special event station F/ON6JUN/p is QRV from Ranville until June 8. In addition, special event station TM6SME is QRV from Emondeville until June 14. QSL via operators'

instructions.

SAINT MARTIN, FS. John, K9EL is QRV as FS/home call until June 12 while on vacation. Activity is on 80 to 10 meters using CW, SSB and RTTY in his spare time, QSL to home call.

ITALY, I. To commemorate 100 years of the Nobel Prize for Physics of Guglielmo Marconi, Alfredo, IK7JWX is QRV as IY7NGM and IY7NGM/p until the end of 2009. Activity is on all HF bands and 6 meters using all modes. QSL via IK7JWX.

SVALBARD, JW. Jan, OK1JK, Jiri, OK1JST, Pavel, OK1IPS and Jiri, OK1IEC are QRV as JW/homecalls from Longyearbyen, IOTA EU-026, until June 15. Activity is on all bands using CW, SSB, RTTY and PSK. QSL to home calls.

NETHERLANDS, PA. Special event station PA6JEROEN is QRV until June 14 in celebration of the 800-year-old bell tower of St. Jeroenskerk in Noordwijk. QSL via PA7DA.

FERNANDO de NORONHA, PY0F. A group of operators will be QRV as ZY0F from June 10 to 15. Activity will be on 160 to 10 meters, including 60 meters, using CW, SSB and digital modes. QSL via PY2WAS.

DODECANESE ISLANDS, SV5. A group of operators will be QRV as SX5LA from Levitha Island, IOTA EU-001, from June 8 to 14. QSL via SV1GRM.

BERMUDA ISLANDS, VP9. Alex, W5YDX will be QRV as VP9/home call from Hamilton Parish from June 10 to 24. Activity is holiday style generally on 20 and 17 meters. QSL to home call.

ASCENSION ISLAND, ZD8. Dean, KJ4GNB is QRV as ZD8DC and has been active on 20 meter using SSB. His length of stay is unknown. QSL to home call.

THIS WEEKEND ON THE RADIO. The SEANET Contest, NCCC CW Sprint Ladder, Digital Pentathlon, Wake-Up. QRP Sprint, DigiFest, VK Shires Contest, UKSMG Summer 6-Meter Contest, RSGB National CW Field Day, IARU Region 1 CW Field Day, Alabama QSO Party will certainly keep contesters busy this upcoming weekend. The NAQCC Straight Key/Bug Sprint and RSGB 80-Meter Club CW Championship are scheduled for June 10. Please see June QST, page 80 and the ARRL and WA7BNM contest web sites for details.

06 June 2009 A.R.I. DX Bulletin
No 944
==========
*** 4 2 5 D X N E W S ***
**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

7P - Alex, UX4UL (7P8A) and Ivan, UR9IDX (7P8R) are active from Lesotho until around 10-15 June. QSL 7P8A via UY5ZZ, QSL 7P8R via UR9IDX. [TNX
7X - Mike, DB1JAW will be in Algeria on 13-20 June. He will be one of the operators at 7U2ISM [425DXN 943], but he will also operate as 7X/DB1JAW from Algerian Sahara. He plans to concentrate on 30, 17 and 12 metres BPSK31, with activity also on 40 metres (7070.15 for US stations) as well as some SSB on 10, 15, 17 and 20 metres. QSL direct only via home call. [TNX DB1JAW]
8Q - Tom, PF4T will be active as 8Q7TB from Embudu, Maldives (AS-013) on 8-24 June. He will operate SSB on 40 and 20 metres. QSL via home call (direct) or via PA0LEY (bureau). A log search will be available at http://8q7tb.pf4t.nl [TNX W1AW]
CT - Nuno, CT2FPE will be active again as CT2FPE/p from Barreta Island (EU-145) on 13 June for the Portugal Day Contest. QSL via home call, direct or bureau. [TNX www.rsgbiota.org]
DL - Look for Gerd, DK8NT/p and Horst, DL8NBM/p to be active from Helgoland-Duene (EU-127, N-15 for the German Islands Award) on 11-17 June. They plan to operate mainly CW, with some SSB and PSK, running 100 watts into simple wire antennas: a triple leg for 30m and up, a 40/80m double dipole for Europe, and a 40m (and maybe 80m) vertical for DX. QSl via home calls, direct or bureau. [TNX DK8NT]
H4 - Mike, KM9D (H44MY) and Jan, KF4TUG (H44TO) are now active from Stirling Island (OC-162), Solomon Islands. They expect to remain there for about ten days. QSL via OM2SA. [TNX The Daily DX]
HK0_sa - 5J0BV (not 5J0M, as previously announced) will be the callsign to be used by Dennis, K7BV from San Andres (NA-033). The new dates are 18-29 June, and the new QSL route is via K7BV (direct). Dennis will concentrate on 6 metres, but he may also be QRV on the HF bands. Further information at http://www.qth.com/k7bv/caribe2009 [TNX K7BV]
I - Alfredo, IK7JWX reports he will be active on the HF bands and 6

metres as IY7NGM until 31 December. The special callsign
celebrates the 100th anniversary of the Nobel Prize in physiscs
awarded to Guglielmo Marconi. QSL via IK7JWX.
I - Special event station II0IASM will be active on the HF bands CW
and SSB from Civitavecchia (Rome) on 9-10 June to celebrate the
first hoisting of the naval ensign on aircraft carrier "Cavour".
QSL via IK8XVA, direct or bureau. [TNX IT9MRM]
PY - PR2R is the new callsign that will be used on 11-14 June from Ilha
da Moela (SA-071) [425DXN 939]. Announced frequencies are 3505,
7005, 14025, 21025, 24895, 28025, 50115 and 144110 kHz (CW); 3799,
7065, 14195, 21295, 24945, 28495, 50115 and 144210 kHz (SSB). QSL
via PY2OP, direct or bureau. The web page for the operation is at
http://www.apre.com.br/moela
SP - Celebrating the Golden Jubilee of the SP DX Club, special event
station SP50DXC is active on all bands and modes until 30 June.
The operators are SP7ASZ, SP7CVW, SP7IIT, SP7LFT and SP7TF.
SP50DXC will be active again at the end of September during the
annual meeting of the SP DX Club. QSL via SP7DQR. All QSOs will be
uploaded to LoTW. [TNX SP5UAF]
SP - Radio Club SP8YZZ is planning a number of special event operations
from Polish National Parks under the callsign 3Z8WFF. The first
activity will take place from the Bieszczadzki Park Narodowy on
11-14 June, including participation in the WFF Green Days event
(see below). The operators will be Wilhelm, SP8AJC and Henryk,
SP9JPA. QSL via SP8AJC, direct or bureau. [TNX SP9JPA]
SV5 - Teo, SV1GRM will be active as SX5LA from Levitha Island, Dodecanese
(EU-001) on 8-14 June. Look for activity on 40, 30, 20 and 17
metres CW and SSB. QSL via SV1GRM. [TNX SV1GRM]
UR - Special callsign EM0WFF will be used by members of Radio Club
UR4WWE from Roztochchia Nature Reserve on 12-14 June, including
participation in the WFF Green Days event. QSL via UT7WZ, direct
or bureau. Information on the "W-UR-FF" Award can be found at
http://www.islands.org.ua/wurff/index_e.html [TNX UT7WZ]
VP2M - John, KB4CRT will be active as VP2MRT from Montserrat (NA-103) on
11-21 June. He plans to operate CW, SSB and maybe PSK and to
participate in the ARRL VHF Contest (13-14 June). QSL via KB4CRT.
[TNX The Daily DX]
VP9 - Alex, W5YDX will be active holiday style as VP9/W5YDX from Bermuda
(NA-005) on 10-24 June. He expects to operate mainly on 20 and 17
metres SSB. QSL via home call (direct only). [TNX W5YDX]
VP9 - Doug, KF4VTT will be active as VP9/KF4VTT from Bermuda on 11-17
June. He will operate SSB, CW, RTTY and PSK on 160-6 metres. QSL
via home call (direct or bureau) and LoTW. [TNX KF4VTT]
W - Rick, N5EYT will be active from Hatteras Island (NA-067) on 7-15
June. He will be operating only PSK31 on 20 metres. QSL via home
call, direct or bureau, plus LoTW. [TNX N5EYT]

==========
*** 4 2 5 D X N E W S ***
**** GOOD TO KNOW ... ****

==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

425 DX NEWS MAGAZINE ---> The latest issue (May 2009) is now available at http://www.425dxn.org/monthly/index.html. Articles and pictures should be sent to Nicola Baldresca, IZ3EBA.

ANTARCTICA ---> A nice collection of images for a large number of Antarctic bases, including those where F5PFP and ON7ZM operated from in February-March (FT5YJ, VP8DLM and CE9XX), canbe found at http://www.french-polar-team.fr/ (click on "Antarctic Challenge" and then on "Antarctic stations, huts & refuges". [TNX F5PFP]

CORSICA ---> Maurice, F5NQL reminds all foreign amateur radio operators heading to Corsica that (a) the use of 6 metres is strictly forbidden over there and (b) the 7100-7200 extension on 40m has not been granted so far.

DXCC NEWS ---> HZ1EA (Saudi Arabia) has been approved for DXCC credit. If you have had this operation rejected in a recent submission, please send a note to dxcc@... to be placed on the list for an update. Also, once completed, if you have an account in LoTW, the update will be posted to your account. [TNX NC1L]

K5D QSL STATUS ---> Bob Schenck, N2OO and his team have finished OQRS requests received through about 4 May. OQRS QSL processing will be resumed shortly, and the system continues to be available for QSL requests.
The team is now focusing on the direct mail in the same order as the mail was received. Bob continues to do the log processing after which the QSLs will be mailed gradually by members of his QSL processing team. As of 2 June they have confirmed 26,353 QSOs, and "it will surely be a few months before we can become current".
The first large batch on CONFIRMED QSOs ONLY will be uploaded to LoTW within the next week: "by only uploading confirmed QSOs (in batches)", Bob says, "we think that this is a fair compromise that is a win/win for everyone involved". The balance of the full log will be uploaded in early 2010.
For the time being, please do not contact the QSL manager about QSL issues, but visit www.k5d.us for current QSL status. Bob will be happy to address any concerned "when things calm down". [TNX N2OO]

LOGS ---> A log serach for the 23-30 May TM0M activity from Molene Island (EU-065) can be found at http://users.belgacom.net/cdxg/ [TNX ON4ZD]

PHOTO GALLERY ---> The Dayton Hamvention 2009 Photo Gallery (292 pictures collected by Tom, K8CX) can be found at http://hamgallery.com/dayton2009/ [TNX K8CX]

PORTUGAL DAY CONTEST ---> Sponsored by the Rede dos Emissores Portugueses (REP), this 24-hour event will be held on 13 June on 10, 15, 20, 40 and 80 metres SSB and CW. Details can be found on the REP's web site at http://rep.pt/geeklog/article.php?story=20090203150742367 [TNX CT1END]

QSL VIA W5UE ---> Randy Becnel, W5UE [425DXN 941] is the new QSL manager for 9V1YC, 9V9HQ and N1YC/VK9X. After many years of excellent service as James' QSL manager, Joe/N5ID is handing over duties to Randy in order to recuperate after an extended illness in hospital. W5UE has all the logs, blank cards and pending QSL requests for all James' callsigns, so feel free to check his website (http://w5ue.net/qsl-w5ue.html) for periodic updates and status of QSL requests.
Randy will also honour any requests that may be needed in the future for the following old calls held by James: 9V0YC, 9V8YC, KB1CM/VR2, KB1CM/VS6, KB1CM/ZS, KH8/KB1CM, VR2/KB1CM and VS6/KB1CM. However, all of these logs are on paper only and will require extra processing time, and Randy will probably have to manually print cards as well. [TNX W5UE]

TOP LISTS ---> The latest Topband, Topmode and Toplist listings are now available at http://www.425dxn.org/awards/toplist/index.html. Please note that QSOs confirmed through LoTW or included in on-line logs are eligible for listing. Send send your scores, as well as any request for further information, to Erminio Pandocchi, I2EOW (i2eow@...)

VK4FRAJ ---> This is neither a pirate, nor 'a commercial station', but properly licensed Raj DeYoung, the 14-year-old son of Eddie DeYoung, VK4AN. "There is still much reluctance and confusion amongst contesters regarding VK 4-letter suffix calls", Eddie says. "My son is probably the only VK with a 4-letter suffix that operates on CW, and is VERY frustrated when contesters keep asking if his call is 2-letters or 3-letters".
Australian four-letter suffix callsigns have been issued to Foundation Lincence holders since 2005. They can only use commercially manufactured equipment and are allowed to operate SSB, AM, FM or "hand keyed" CW on 80, 40, 15, 10 and 2 metres, plus 430-450 MHz, with power restrictions. All Foundation class suffixes begin with an "F" plus three more letters. [TNX W1AW]

WFF GREEN DAYS ---> More than 50 stations from various countries are expected to take part in "Green Days" event organized by the World Flora Fauna programme, which will be held from 00.00 UTC on 13 June through 23.59 UTC on the 14th. Complete information can be found at http://wff44.com/en/contest/ [TNX RW3GW/3]

Propagation Forecast Bulletin 23 ARLP023
>From Tad Cook, K7RA
Seattle, WA June 5, 2009
To all radio amateurs

SB PROP ARL ARLP023
ARLP023 Propagation de K7RA

It is so great to see some real Cycle 24 sunspot activity this week. Instead of a phantom that pops into view one day and is gone the next, we have sunspot 1019, which has persisted for five days, so far. Emerging on Sunday, May 31, the resulting daily sunspot numbers through June 4 are 15, 23, 19, 17 and 17. This is a Cycle 24 spot, and at high latitude too, which is an indication of a new cycle spot.

Meanwhile, the low solar wind and quiet geomagnetic conditions continue. Currently spot 1019 is about to fade, although it is still a few days away from crossing the eastern limb to the far side. NOAA and the US Air Force expect geomagnetic conditions to continue to be quiet, and a planetary A index around five is predicted until June 29. Predicted solar flux values are 72 for June 5-6, then 74 on June 7-13.

Geophysical Institute Prague predicts quiet geomagnetic conditions June 5-8, quiet to unsettled June 9-10, and quiet again June 11.

Time now to look at our 3-month average daily sunspot numbers to spot trends. It looks like the numbers are up, slightly.

The three-month average of daily sunspot numbers for January through April was 2.4, 2.3, 1.5 and 2. The last number, centered on April, is the sum of all daily sunspot numbers for March through May, divided by the number of days.

Since 2007, the 3 month moving average has been:

Jan 07 22.7
Feb 07 18.5
Mar 07 11.2
Apr 07 12.2
May 07 15.8

Jun 07 18.7
Jul 07 15.4
Aug 07 10.2
Sep 07 5.4
Oct 07 3.0
Nov 07 6.9
Dec 07 8.1
Jan 08 8.5
Feb 08 8.4
Mar 08 8.4
Apr 08 8.9
May 08 5.0
Jun 08 3.7
Jul 08 2.0
Aug 08 1.1
Sep 08 2.5
Oct 08 4.5
Nov 08 4.4
Dec 08 3.7
Jan 09 2.3
Feb 09 2.1
Mar 09 1.5
Apr 09 2.0

The average daily sunspot number for just the month of May was 4, which indicates a nice trend following the March and April 3-month averages.

David Witkowski, W6DTW of San Jose, California was happy to see the reports of night time 20 meter propagation from N6CAS, and notes that on May 20 he worked LY1000A (Lithuania) at 0405z, ES1QD in Estonia at 0612z on May 22, and OH5LF (Finland) at 0635z on May 23. He worked them all using 100 watts and a vertical antenna. He wrote, "I told some friends here in San Jose that I'd worked Europe barefoot at 11:00pm local time and a few of them gave me the 'Oh yeah, sure you did' look. Thanks for vindicating me."

David continued, "Regarding the question of "dead" versus "unoccupied" bands; I wrote a blog article recently on this topic. (See http://sparqi.blogspot.com/.) During Summer Es I used to listen to 28.4 and/or tune from 28.3-28.5 to check for openings. Recently I made the discovery that listening on CB channel 38-LSB (27.385) is a much better way to do a quick check for openings; I have monitored stations from all over the western US burning up "38 lower" well into late evening, while 10 meters sits idle. Many times there is propagation; we're just not using it."

Howard Estes, WB4GUD of Franklin, North Carolina also likes to check Citizens Band activity for a 10-meter propagation indicator. He wrote, "I agree with W1ZI, the bands aren't dead, we're just lazy. How often do you scan a band, don't hear anything, and go somewhere

else? I've started checking the CB channels for activity. If I can hear the Big Frog Gigger in LA (that's lower Alabama), probably 10M is open to somewhere."

Mark Lunday, WD4ELG of Hillsborough, North Carolina wrote about a June 1 E-skip opening on 6 meters that still continued at 0400z on June 2. "I worked 12 stations on CW and SSB across the Midwest on 6. Also, had some multi-hop on 10 meters using WSJT JT65A and heard Oregon. Second night in a row that I was hearing Es late at night on 10 meters using WSJT weak-signal propagation."

Mark said he likes to use DX Sherlock, at http://tinyurl.com/5qwvu2.

Bill Turner, W4WNT of Matthews, North Carolina has good luck lately with PSK on 20 meters, even when there are no sunspots. He is running 25 watts into a G5RV at 25 feet, and on May 21 at 0345z he worked Peter, ZL1PWD who reported working 12 stations that day.

Erik Jacobsen, KB9BNY of McHenry, Illinois sent a message titled, "20-meter PSK31 has been on fire this week." He wrote, "Tuesday, with the sunspot number at 19 and the solar flux at 72, 20 meters nicely opened up for world wide communication. I participate in the PSK reporter network (http://psk.gladstonefamily.net/pskmap.html). Basically, when a reporting station receives the de callsign callsign pattern, the location of the transmitting station is then plotted on a map. When I checked the map on Tuesday morning, I saw a Pakistani station, two New Zealand stations and a Japanese station plotted. It just goes to show you how well 20 meters can perform with a small amount of power (usually under 30 watts), a narrow-band signal, and relatively modest solar conditions."

He continues, "I preserved the map for historical purposes at http://tinyurl.com/June2-map. Tuesday's total monitoring take for a 24 hour period was 30 countries. I occasionally blog my PSK reporter observations at http://20meters.blogspot.com. My current PSK reporter map can be viewed at http://tinyurl.com/kb9bny-map."

Thanks, Erik! Great stuff.

Again this week we have a book recommendation. Bill Scholz, KB1SGY of Greenwich, Connecticut advises checking out "The Sun Kings; The Unexpected Tragedy of Richard Carrington and the Tale of How Modern Astronomy Began."

Bill writes that this is "an engaging book by Stuart Clark that describes, in great detail, how the great astronomers of the 19th century linked sun spots, solar flares, auroras and magnetic storms. An excerpt from the flyleaf: 'In September of 1859, a cloud of seething gas engulfed the Earth and a blood-red aurora erupted across the planet. Around the world, telegraph machines burst into flames, while compasses reeled as if struck by a massive magnetic fist. No one knew what could have released such strange forces upon

the Earth - no one, that is, except the amateur English astronomer Richard Carrington.'"

He continues, "It's a great read and I recommend it highly if you're interested in the connection between these phenomena."

Last week's bulletin mentioned a consumer communications product out of Japan that would require text messengers to learn Morse code. We asked if anyone could decode the Japanese in a graphic on a web page talking about the product, and Brett Graham, VS6BG says it is just a banner ad for a television show. He thought the product might be for real, but checked with JA3USA, who thought it was an April 1 joke. But Brett says, "The idea does have something going for it."

In last week's bulletin we presented some confusing text regarding scientific notation and numbers representing the area covered by sunspots, at least it confused me. I was worried about it, so I checked with K9LA, who got me on the right track. But K1SFA at ARRL HQ was concerned when she got it from me, so she passed it on to a ham who is an astronomer for a fact check. Somehow it got changed back to the way I had it in the first place, before getting input from K9LA. So at this point I can't correct it, although I believe K9LA had it right. More later.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at, http://www.arrl.org/tis/info/propagation.html. For a detailed explanation of the numbers used in this bulletin, see http://www.arrl.org/tis/info/k9la-prop.html. An archive of past propagation bulletins is at, http://www.arrl.org/w1aw/prop/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://www.arrl.org/qst/propcharts/.

Instructions for starting or ending email distribution of this bulletin are at http://www.arrl.org/w1aw.html#email.

Sunspot numbers for May 28 through June 3 were 0, 0, 0, 15, 23, 19, and 17 with a mean of 10.6. 10.7 cm flux was 67.7, 68.2, 68.5, 68.5, 72.5, 71.9, and 72.5 with a mean of 70. Estimated planetary A indices were 7, 5, 3, 3, 3, 2 and 4 with a mean of 3.9. Estimated mid-latitude A indices were 5, 4, 2, 3, 2, 2 and 4 with a mean of 3.1.

9986. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-06-05 22:11:01 UTC
From: Paul Dunphy
Topic: 9721 Message: 9986

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Jun 05 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 156 Issued at 2200Z on 05 Jun 2009
IA. Analysis of Solar Active Regions and Activity from 04/2100Z
to 05/2100Z: Solar activity was very low. No flares occurred during
the past 24 hours. Region 1019 (N24W23) appears to be slowly
decaying and was quiet and stable.
IB. Solar Activity Forecast: Solar activity is expected to remain
very low for the next three days (06-08 June).
IIA. Geophysical Activity Summary 04/2100Z to 05/2100Z:
The geomagnetic field was mostly quiet. There was one unsettled
period from 05/0900-1200Z.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to remain quiet for the next three days (06-08 June).
III. Event Probabilities 06 Jun-08 Jun
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF green
IV. Penticton 10.7 cm Flux
Observed 05 Jun 070
Predicted 06 Jun-08 Jun 070/070/070
90 Day Mean 05 Jun 070
V. Geomagnetic A Indices
Observed Afr/Ap 04 Jun 005/006
Estimated Afr/Ap 05 Jun 005/006
Predicted Afr/Ap 06 Jun-08 Jun 005/005-005/005-005/005

9987. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-06-06 22:11:01 UTC
From: Paul Dunphy
Topic: 9721 Message: 9987

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Jun 06 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 157 Issued at 2200Z on 06 Jun 2009
IA. Analysis of Solar Active Regions and Activity from 05/2100Z
to 06/2100Z: Solar activity was very low. There was one B-class
flare during the past 24 hours. Region 1019 (N24W36) has decayed to
spotless plage. Consequently the solar disk is now void of spots.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 05/2100Z to 06/2100Z:
The geomagnetic field was quiet.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to remain quiet for the next three days (07-09 June).
III. Event Probabilities 07 Jun-09 Jun
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF green
IV. Penticton 10.7 cm Flux
Observed 06 Jun 069
Predicted 07 Jun-09 Jun 069/069/069
90 Day Mean 06 Jun 070
V. Geomagnetic A Indices
Observed Afr/Ap 05 Jun 005/006
Estimated Afr/Ap 06 Jun 005/005
Predicted Afr/Ap 07 Jun-09 Jun 005/005-005/005-005/005
VI. Geomagnetic Activity Probabilities 07 Jun-09 Jun
A. Middle Latitudes
Active 10/10/10
Minor storm 05/05/05
Major-severe storm 01/01/01

Ohio/Penn DX Bulletin No. 911

The Ohio/Penn DX PacketCluster
DX Bulletin No. 911
BID: $OPDX.911
June 8, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NC1L, NJ1Q, N2OO, NG3K, N4AA & QRZ DX, W5UE, KG6D, WA6ITF, WA6TLA, W7TSQ, K8CX, K8YSE, KK0M, A35RK, CT1BOH, CT1GFK, DK8JB, DL7MAE & The DX News Letter, DX World of Ham Radio Web Site, F5NQL & UFT, F5PFP, F5PHW, I1JQJ/IK1ADH & 425 DX News, IK7JWX, ON4ZD, JI6KVR & JA IOTA News, Pete's-DX-Newsdesk, RSGB IOTA Web Site, SM5LWC, SP5UAF, UT7WZ, VA3RJ & ICPO, VHF-DX-Portal (MMMonVHF), VK4AN, YT3W and ZL4HU for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 31st-May, through Sunday, 7th-June there were 215 countries active. Countries available: 3A, 3B8, 3D2, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5X, 5Z, 6W, 6Y, 7P, 7X, 8P, 8Q, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9V, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, H2, H3, H4, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, JA, JD/m, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, S2, S5, SM, SP, ST, SU, SV, SV5, SV9, T32, T5, T7, TA, TF, TG, TI, TJ, TK, TL, TN, TR, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V5, V7, V8, VE, VK, VP2V, VP8, VP9, VR, VU, XE, XU, XW, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

5H, TANZANIA. Frans, PE1ABQ, is expected to be active as 5H1FF from Stone Town city on the Island of Zanzibar (AF-032). His equipment is a FT-950 w/100w into 3.5m vertical at 20m A.S.L. No QSNs have been reported yet. QSL via the address on QRZ.com.

5J0, SAN ANDRES ISLANDS (Update). Dennis, K7BV, will once again return to San Andres (NA-033) and be active as 5J0BV (not 5J0M as first announced) between June 18-29th (not June 19th-July 5th). He will again be concentrating on 6 meter Sporadic Es. HF bands will be activated as well. QSL direct to K7BV (not W1JJ as first announced) via the QRZ.com address. For more details and updates, visit the following Web page at:
http://www.qth.com/k7bv/caribe2009

8R, GUYANA (Update). The 6 Meter Beacon Project, Inc., (HF-50 MHz DX-pedition between June 16th and July 6th) has announced the callsigns for their operation to Guyana. According to their Web page the callsigns are:
8R1DB - Team One: Chris/W3CMP and Dave/N3DB; between June 16-26th
8R1TO - Team Two: Terry/K4RX and Ken/AC4TO; between June 27th-July 6th
QSO information is just "Signal report please, no grid squares!!!!!!"
QSL via N3DB: David Craig, 4931 Mariners Drive, Shady Side, MD 20864 (2.00 USDs & SAE [or equivalent U.S. postage] for outside US; SASE for U.S. Stations). Bureau QSLs are "OK", but slow. For updates, visit the Web page online at: http://6meterbeaconproject.org/8R2009.html
Operating frequencies will to be posted soon.

A35, TONGA. Paul, A35RK, continues to be active as A35RK/p from Vava'u Island (OC-064). He informs OPDX that there is "no definite departure date." He has also mentioned that he submitted the April/May A35RK/p log (OC-064) to Bob, W7TSQ. This log includes activity in the CQ WPX CW Contest this past weekend. As far as LoTW submissions, Bob, W7TSQ, informed OPDX that since LoTW does not show/give credit for IOTA, Paul is combining his /P log with the regular A35RK log as he is still Tonga. He also mentioned that there is a possibility that some QSOs between May 20-24th, have an error in the time. Most are probably CW contacts. Paul also informed us of the problem and states, "There appears to be a problem with the 'QSO time' element in the computer logbook entry. Some contacts appear to be exactly 'one hour off' the actual time of QSO." So, anyone with a LoTW problem or needing an IOTA card, showing OC-064, can contact Bill at: W7TSQ@...
He can supply cards that will show the IOTA information if needed. As usual an SASE/SAE with postage (green stamps) will be answered direct. Bill states, "Bureau cards will be awhile as I probably will not send again before fall. LoTW is preferred as it is less work for me!"

ANTARCTICA WEB PAGE (Sites and Sounds). The French Polar Team's Web site continues to add a great collection of information and pictures (added with music) of the many polar stations and sub-Antarctic regions. Check out the following URLs (recently added FT5YJ--VP8DLM--CE9XX):
* Station Machu Picchu - Ile du Roi George:
http://french-polar-team.fr/OA_Machu_Picchu_Station_King_George_Island.php
* Station B - Ile Deception:
http://www.french-polar-team.fr/VP8_Station_B_Deception_Island.php
* Station O - Ile Danco:
http://french-polar-team.fr/VP8_Danco_Station_O_Danco_Island.php
* Station Gabriel Gonzales Videla - Cote Danco:
http://french-polar-team.fr/CE9_Videla_Station_Antarctica.php

* Station Almirante Brown - Cote Danco:
http://french-polar-team.fr/LU_Almirante_Brown_Station_Antarctica.php
* Station F Wordie Hut - Ile Winter:
http://french-polar-team.fr/VP8_Wordie_Hut_Station_F_Winter_Island.php
* Port-Charcot - Ile Booth (Wandel):
http://french-polar-team.fr/FT5Y-P_Port_Charcot_Booth_Island.php
* Station A Port Lockroy - Ile Goudier:
http://french-polar-team.fr/VP8_Port_Lockroy_Station_A_Goudier_Island.php
* Bahia Dorian Refuge - Ile Wiencke:
http://french-polar-team.fr/LU_Bahia_Dorian_Refuge_Wiencke_Island.php
* Station L Damoy Point Hut - Ile Wiencke:
http://french-polar-team.fr/VP8_Damoy_Point_Hut_Station_L_Wiencke_Island.php
* Le voilier l'Ile d'Elle:
http://french-polar-team.fr/Polar_Ship_L_Ile%20d_Elle.php
* Davis station: http://www.french-polar-team.fr/VK0_Davis_Station_Antarctica

CT, PORTUGAL (Field Day). The ARVM group will be operating their "Field Day" for 24 hours beginning at 1200z on Saturday, June 13th. Operations will be from Montemor Park near the city of Loures. Activity will be on CW, SSB, RTTY and TVA. For more info, go to:
http://www.arvm.org/index_fd2009.html

CT, PORTUGAL. Members of the Algarve STAR DX Team will be active as CT7/CU8AT during "Green Days", June 13-14th. Operations will be from "Parque Natural SW Alentejano e Costa Vicentina" which is valid for: DPRN FF-12 and WFF CTFF-12. Operators mentioned are: Toze/CT1GFK, Al/CT1GPQ and Mike/CT1IUA. One of the operators (to be decided later), will be active during the "Portugal Day Contest" on June 13th, from the same QTH. Look for more details on: http://algarvedx.com

DAYTON HAMVENTION FCC FORUM (Audio Available Online). Bill Pasternak, WA6ITF, Producer of ARNewsline, Inc., reports: "To our valued listeners, In response to a number of requests we have uploaded the entire 71 minute Dayton Hamvention FCC Forum hosted by Bill Cross, W3TN, and Laura Smith as an MP3 audio file to our Amateur Radio Newsline website front page. You can download it by going to http://www.arnewsline.org, then scroll down to "Click HERE to download the entire 70 minute Dayton Hamvention FCC Forum" and follow your normal download and save procedure for your web browser. This recording was made using a Senheisser microphone at the speakers podium connected to an M-Audio Microtrack II professional digital audio recorder. Audio processing and conversion to MP3 was accomplished using Goldwave Editor Ver 5.52. We believe you will find the audio quality superior to various other recordings of this important forum available at various Web sites across cyberspace. We hope that you will find it of value."

DXCC NEWS.....
* Bill Moore, NC1L, Awards Branch Manager reports that the following operation is approved for DXCC credit: HZ1EA - Saudi Arabia
If you have had this operation rejected in a recent submission, please send a note to dxcc@... to be placed on the list for an update.

Also, once completed, if you have an account in LoTW, the update will
be posted to your account.

* 2008 ARRL DXCC YEARBOOK. Bill Moore, NC1L, announced this past week on
June 2nd: "The 2008 DXCC yearbooks have arrived from the printer. The
ARRL mail room will prepare them for shipping and they should start
going out the middle of next week. You will receive the free copy if:
* A submission was received during the 2008 calendar year.
* If you did not make a submission during the calendar year, but you
were "current" on the DXCC Honor Roll for this period. (329 current
DXCC entities).
ARRL Membership is also required for the free edition. Copies are
available for purchase for 7.00 USDs (USA) and 11.00 USDs (Non-USA).
This fee includes postage."

* DXCC CARD CHECKING at the 2009 "Ham Radio" in Friedrichshafen, Germany.
Please read the complete details on how to prepare your cards and forms
at: http://www.arrl.org/blog/Century%20Club%20Awards

EM0, UKRAINE (URFF Special Event). Members of the Lviv Branch of the
Ukrainian Amateur Radio League (UARL), UR4WWE, will activate the special
callsign EM0WFF from Roztochchia Nature Reserve (URFF-020, URDA LV-32)
between June 12-14th. QSL via UT7WZ, by the bureau or direct. Information
on the "W-UR-FF" Award can be found at:
http://www.islands.org.ua/wurff/index_e.html

FO, FRENCH POLYNESIA. Phil, F5PHW, informs OPDX that he will be in Tahiti
for two years starting August 2009. Activity will be on CW/RTTY and SSB
(sometimes) on 80-10 meters. For the moment, his callsign will be FO/F5PHW.
Phil is trying and hoping to get a FO5 callsign, but he has to negotiate
it with local authorities when he is in Tahiti. Phil will be in a small
house very close to the airport. He will operate with 100 watts into a HF6
and dipole, but hopes, if possible put up a 3 elements beam in the garden.
QSL will be OK via LoTW. QSL are also "OK" via F8BPN, by the bureau or
direct. More information is available on: http://f5phw.chez.com

FP, ST. PIERRE AND MIQUELON. Operators Eric/KV1J and Tom/W8TOM will be
active as FP/KV1J from Miquelon (NA-032) during the CQWW DX SSB Contest
(October 24-25th) as a Multi-Single entry. QSL via KV1J, direct, by the
Bureau or LoTW. Operators will be there between October 20-27th. Activity
outside of the contest will be on 160-6 meters using CW, SSB, RTTY and
PSK31, generally on the highest frequency band that is open (no permission
for 60M). Visit Eric's Web page at: http://www.kv1j.com/fp/october09.html

H4, SOLOMON ISLANDS (Rare IOTA). Operators Mike/KM9D (H44MY) and Jan/KF4TUG
(H44TO) are now active as H44MY from Stirling Island (OC-162) for about
a week. Mike was heard this past weekend on 40/20 meters CW. Jan was
heard on 20/17 meters SSB. QSL via OM2SA.

IOTA NEWS.....
AS-017. Operators Mitsu/7N4AGB, Hase/JK1EBA, Shoji/JJ1JGI, JA1XEQ and
Nakayama/JA1KJW will be active as homecall/6 from Tokashiki

Island, Okinawa Prefecture, between July 7-10th. Activity will be on 160-6 meters, but mainly on the lower bands using CW and SSB. QSL via their home callsign, direct or by the bureau.

AS-047. Operators Mitsu/7N4AGB, Hase/JK1EBA, Shoji/JJ1JGI, JA1XEQ and Nakayama/JA1KJW will be active as homecall/6 from Daito Island, Okinawa Prefecture, between June 25th and July 5th. Activity will be on 160-6 meters, but mainly on the lower bands using CW and SSB. QSL via their home callsign, direct or by the bureau.

AS-117. Operators JJ2JQF and JH9UYZ will be active as homecall/0 from Awa Island, Niigata Prefecture, between June 26-30th. Activity will be on 160m through 70cm using CW, SSB, AM, FM, RTTY and Satellite (1200 MHz). QSL via their home callsigns, direct or by the Bureau.

EU-005. Members of the Bittern DX Group will once again be active as G2B from the cliff tops in the village of Trimingham, Norfolk, East of England region (WLOTA 1841) for the RSGB IOTA Contest (July 25-26th). QSL via M0CNP, direct or by the Bureau.

EU-042. Harald, DF6BL, will be active as homecall/p from Langeness Island (N-19 for the German Islands Award, WLOTA 1245) between July 6-13th. Activity will be on all bands and modes. QSL via his home callsign, direct or by the Bureau.

EU-067. Operators Elizabeth/K4KTG, Michael/KC6ZUS and Jonathan/KI4UOU will be active as SV/K4KTG from Thira Island [aka Santorini] (GIOTA SAS-102, MIA MG-125, WLOTA 0658), June 15-30th. QSL via K4KTG.

EU-095. Operators Robert/F5HTR and Roger/F5LKW will be active as homecall/p from Riou Island (DIFM ME-006) on June 8th. They will travelling by kayak and will be active as QRP on 7032 kHz. QSL via their home callsigns, direct or by the Bureau.

EU-120. Members of the Wakefield and District Radio Society will be active as GB1HI from Holy Island [aka Lindisfarne] (WAB NU14, ARLHS ENG-224, TWLHD WLH G-011) off the Northumbrian coast, July 10-13th. QSL via M3ZYZ, direct, by the Bureau or E-mail QSL requests (Bureau). More details are available on QRZ.com.

EU-122. Members of Kilmarnock and Loudoun ARC will be active as GI0ADX from Rathlin Island (WLOTA 0039), Northern Ireland, in the RSGB IOTA Contest (July 25-26th). Operators mentioned are: Allan/GM3OZB, Barry/GM3YEH, Steve/GM4OSS, John/GM0DJG and Gordon/MM0BIM. QSL via MM0DHQ, by the Bureau is preferred.

EU-127. Operators Gerd/DK8NT and Horst/DL8NBM will be active as homecall/p from a smaller neighbor island called "the Dune",

Helgoland Island (German Island Award # N-15), between June 11-17th. They state that their activity will be "something between a vacation-style and a 'serious' DXpedition". Operations will be mainly on CW, but some SSB or PSK. Using only 100 watts, they will experiment with simple wire antennas: A triple leg for 30m and up, a 40/80m double dipole for Europe, and a 40m (and maybe 80m) vertical for DX. QSL via their home callsigns, by the bureau or direct (no e-QSL).

EU-145. Nuno, CT2FPE, will be active as homecall/p from Barreta Island on June 13th between the hours of 1000-1900z. Activity is also valid for: ARLHS POR-141, Fa-14, Ai-003, DPRN FF-07, CTFF-07, DMP-0805, FAR-05, DMA-FARO and Day of Portugal Contest. QSL via his home callsign, direct or by the Bureau.

EU-165. Massimo, I0PNM, will be active as IM0/I0PNM from San Pietro Island (IIA CI-007, MIA MIS-050, WLOTA 2989), June 8-16th. Activity will be mainly PSK31 on 20 and 40 meters. QSL via his home callsign.

NA-027. George, WW4GA, will be active as WW4GA/VO1 from Newfoundland (CISA NF-001) between June 17th and July 9th. Activity will be on all bands and modes. QSL direct only to WW4GA.

NA-067. Rick, N5EYT, is expected to be active from Cape Hatteras (USI NC005S, WLOTA 3913) in Salvo, NC, no earlier than 2000z, June 7th and will finish no later than 1200z, June 15th. His activity will only be 20 meters PSK31 with a dipole (trying out his new Small Wonder Labs PSK-20). Rick mentions that he will be operating at a beach house on the west side of island. This is actually a vacation/wedding trip where his daughter's wedding will take place on June 13th, so most of his operating will be limited to earlier in the week. QSL via N5EYT, by the Bureau, direct or LoTW.

NA-079. Operators Bill/WD2E, Dave/KI4KQU and Paul/AA2C will be active as WD2E/4 from the Dry Tortugas Islands (WLOTA 0274) between June 24th and July 1st. Activity will be on all bands and modes. QSL via WD2E.

NA-112. Brian, KB9BVN, will be active from Bird Island (USI NC-012S, WW Loc. FM03RU, Brunswick County) on Sunset Beach, North Carolina, between now and June 12th. Activity will be QRP on 40 and 20 meters using CW only. His equipment is a Elecraft KX-1 and PAC-12 portable vertical antenna. He will QSL all contacts and states eQSLs are available if that is what you prefer. His son Andy, N9AWM, will be with him as well.

NA-142. Jim, AD5ZA, will be active as homecall/4 from Santa Rosa Island (USI FL-003S), Florida, on August 1st. Activity will be on 20 and 15 meters using PSK31. This activation is for PODXS 070 Club. QSL via his home callsign, direct only.

J2, DJIBOUTI. Once again members of the F6KOP Provins Club and Clipperton DX Club are planning a major operation this time to Djibouti in 2010. The callsign announced is J20C. More details are forthcoming.

IY7, ITALY (Special Event). Alfredo, IK7JWX, is now active as IY7NGM (and possibly as IY7NGM/p) through December 31st. Activity is to celebrate 100th anniversary of Guglielmo Marconi receiving the Nobel Prize in 1909. Activity will be on all HF bands and 6 meters using all modes. Alfredo was heard this past week on 40 meters CW and 20 meters RTTY/PSK31. QSL via IK7JWX.

K8CX's 2009 DAYTON HAMVENTION PHOTO GALLERY. Tom's, K8CX, 2009 Dayton Photo Gallery is now up at: http://hamgallery.com/dayton2009/
This is Tom's 13th consecutive year for the gallery, and it contains 293 photos taken at Crowne Plaza at various events and hospitality suites.

LIGHTHOUSE ACTIVITY AND NEWS.....
Operators Gabriel/LU5FZ and Juan Carlos/LU9DO will be active as CX/LU9DO from Punta del Este Lighthouse (URU-008) in Uruguay during the International Lighthouse/Lightship Weekend (ILLW), August 15-16th.

Look for La Cana Lighthouse (WLOTA 2802, Loc. FK68MK) in Guanica, Puerto Rico, to be on the air as K4G during the WLOTA Contest (July 4-5th). Activity will be on CW, SSB and RTTY. QSL via WP3MW.

MAJOR PACIFIC DXPEDITIONS (Update). After his recent trip from the Pacific, Team leader, Hrane/YT1AD confirms that an international team of 14 individuals are organizing DXpeditions for amateur radio activity from Tokelau (ZK3), Canton Island (T31 - Central Kiribati) and Wallis Island (FW) over 22 days next year (in 2010). The tentative schedule is as follows:
September 25-29th - Traveling by boat from Fiji (3D2) to Samoa (KH8)
September 29th - Loading in Apia; departing Apia to Fakaofo Atoll in the Republic of Tokelau Island group
September 30th - Arriving Fakaofo Atoll
October 1-3rd - Activity on the air from Tokelau
October 3rd - Afternoon departure from Fakaofo Atoll to the Island of Canton (Central Kiribati)
October 4th - Traveling to Canton Island
October 5th - Arriving at Canton Island
October 6-10th - Activity on the air from Canton Island
October 10th - Afternoon activity/departure from Canton Island
October 12th - Arriving at Wallis Island (FW)
October 14th - Departure from Wallis Island
October 16th - Arriving at Fiji Islands
More information will be forthcoming.

PA09, NETHERLANDS (Special Event). Fred, PA0FAW, will activate special event station PA09SHAPE between June 6th and July 3rd. Activity is to celebrate Mode Biennale, fashion month in Arnhem. QSL via PA0FAW, direct or by the Bureau. SWL cards welcome.

PORTUGUESE PREFIX CHANGES. The Portuguese local regulatory agency for
the amateur radio service (Anacom) has published new legislation. There
is a part in the legislation that will impact the callsign structure
of Portuguese (Portugal, Madeira and the Azores) callsigns. As of June
1st, the following will be the prefix blocks allocated to each area:
Each area will have four blocks (old calls under old legislation,
new calls under new legislation, club calls and special calls)

Portugal Madeira
-------- -------
Block 1 - CT1, CT2, CT4, CT5 Block 1 - CT3
Block 2 - CR7, CS7, CT7 Block 2 - CR9, CS9, CT9
Block 3 - CQ0, CS5 Block 3 - CQ2, CS3
Block 4 - CQ7, CR5, CR6, CS2 Block 4 - CQ3, CQ9, CR3

Azores

Block 1 - CU1, CU2, CU3, CU4, CU5, CU6, CU7, CU8, CU9, CU0
Block 2 - CR8, CS8, CT8
Block 3 - CQ1, CS4
Block 4 - CQ8, CR1, CR2

ADDED NOTES:
Callsigns from block 1. (CT1, CT2, CT4, CT5. CT3, CU#) will no longer
be issued. Current hams will keep these calls if they like or submit
to a new exam to have the new prefixes (CR, CS, CT, 7,8,or 9).

New hams will have block 2 and will be issued prefixes according to
category. Category 1 will have CT 7, 8 or 9, category 2 will have
CS 7, 8 or 9, and category 3 will have CR# 7, 8 or 9.

Club stations will have call in block 3 (CQ0, CS5, CQ2, CS3, CQ1, CS4).

Special occasion and contest calls will have block 4 (CQ7, CR5, CR6,
CS2, CQ3, CQ9, CR3, CQ8, CR1, CR2).

SPECIAL NOTE FOR CONTESTERS:
Portugal - No new prefixes. Several lost.
Madeira - One new prefix (CQ2).
Azores - New prefixes (CR8, CS8, CT8, CQ1, CS4, CQ8, CR1, CR2).

For more info, see: http://www.anacom.pt/render.jsp?contentId=944999

PACIFIC TOUR. Karl, DL2FAG, is going on another "holiday-DXpedition",
this time to the Pacific and plans to operate from three locations later
in the year. His tentative schedule and callsigns are as follows:
Island of Niue - He will operate as ZK2DL from Namukulu, between October
19th and November 7th. Activity will be holiday style
on 80-10 meters, mainly on RTTY, PSK and SSB. IOTA is:
OC-040. QSL via DL2FAG.

New Zealand - Karl states he will operate sporadically from the South
Island of New Zealand, as ZL4/DL2FAG between November
8-18th. Activity will be on 40-10 meters, mainly on RTTY,

PSK and SSB. QSL via DL2FAG.

Western Samoa - Karl will end his trip as 5W0KH from Upolu between November 18-30th. Again, activity will be on 80-10 meters, mainly on RTTY, PSK and SSB. QSL via DL2FAG.

Karl states that he will be operating from all locations on the usual DX frequencies. Watch Karl's Web page for possible updates, and he will have a log search on the site (not sure if it will be active during his operations). His Web page is at: http://www.qsl.net/dl2fag

QSL INFO AND NEWS.....
With all the changes going on in the postal systems, it is time to check out Bill's, W9OL, great IRC Chart Web page. It is a great place to see who takes IRCs, green stamps and who does not. Give it a look at: http://www.qsl.net/w9ol/IRC_Chart.htm

K5D QSL STATUS: QSL Manager Bob, N2OO, reported on June 2nd, the following update:
"OQRS - We finished OQRS requests received through about May 4th.. We will resume OQRS QSL processing again shortly, and we will post the dates on the QSL Information link found at the K5D Web site www.k5d.us when we do resume. OQRS continues to be available for QSL requests. Info for OQRS can also be found on the QSL Information link.

DIRECT MAIL: We are now focusing on the direct mail in the same order as the mail was received. We are answering donors first just to be fair to those who added a little something with their QSL. We also TRY to catch notes that tell us that you contributed in advance of the operation, but we don't always catch those notes. If we miss yours, we apologize. The DIRECT MAIL processing trudges forward. So, we appreciate everyone's patience. I continue to do the log processing after which the QSLs will be mailed gradually by members of my QSL processing team. We are not doing larger bulk mailings in order to keep the cards flowing into the mail. It will surely be a few months before we can become current. It's hard to get ahead when you are still receiving some 50 pieces of mail on average every day.

As of June 2nd we have confirmed 26,353 QSOs.

LoTW UPDATE: After careful consideration, and cautious investigation into the LoTW process, I have decided that we will be able to upload CONFIRMED QSOs ONLY to LoTW. This will be done in larger sized batches as time allows while we continue to process QSLs. When the first batch is uploaded, I will post the information on the QSL Information link found at the K5D Web site www.k5d.us. I expect to do it within the next week. QRX

In the past, we just uploaded to LoTW one time about one year after the DXpedition. This was done for obvious reasons. Now that I have become familiar with how to do partial log uploads to LoTW, we should be able to satisfy those who want their QSOs in LoTW. By only uploading confirmed

QSOs (in batches), we think that this is a fair compromise that is a win/win for everyone involved. We are considering other options for the "next one". But for THIS one, this is what we will be doing. We will upload the balance of the full log in early 2010.

I ask you all to be patient! Since cards are going out in the mail frequently and in much smaller batches, you can expect to hear of people getting their cards continuously. Be assured that we are continuing the QSL operation on a daily basis. It is just going to take time.

PLEASE DO NOT CONTACT THE QSL MANAGER ABOUT QSL ISSUES. IF YOU DO, YOU WILL ONLY BE REFERRED TO THE K5D WEB PAGE FOR CURRENT QSL STATUS. WHEN THINGS CALM DOWN, I WILL BE HAPPY TO ADDRESS ANY CONCERNS. QRX. Visit www.k5d.us for all information!"
73 Bob Schenck, N2OO QSL Manager K5D Desecheo 2009

1652 INFO. Over the past weekend (June 5-7th), special callsigns were active on several different bands that were good towards the "Roskilde 1658 Award". For information on the callsigns, and upcoming operations (times and frequencies), please look at the activities calendar on the award Web site at: http://www.sk7bq.com/roskilde

QSL for OZ5FYN will be sent for all QSOs via the EDR bureau. This was a special event station active for the annual Summer Rally at Egeskov Slot (Castle) on June 7th. OZ5FYN grid locator was JO55FE, and the island reference number is EU-172. There is no Danish CASOTA reference number (for the first Castle activation).

NEW QSL MANAGER. Randy, W5UE, is now the new QSL manager for 9V1YC, 9V9HQ and N1YC/VK9X. After many years of excellent service as James' QSL Manager, Joe, N5ID, is handing over duties to Randy in order to recuperate after an extended illness in hospital. W5UE has all the logs, blank cards and pending QSL requests for all of James' callsigns, so feel free to check his Web site for periodic updates and status of QSL requests at: http://w5ue.net/qsl-w5ue.html

ADDED NOTE. Randy, W5UE, states, "It was brought to my attention that many QSL Manager Data Bases still contain entries for some of James' old calls to N5ID. Both Joe and James indicate a request hasn't been received for any of these for years, but we will continue to honor any requests that may be needed in the future... so, please update your QSL Manager Data Bases for any of the following calls from N5ID to W5UE: 9V0YC, 9V8YC, KB1CM/VR2, KB1CM/VS6, KB1CM/ZS, KH8/KB1CM, VR2/KB1CM and VS6/KB1CM. Please bear in mind all of these logs are on paper only and will require extra processing time since I'll probably have to manually print cards as well."

NOT THE QSL MANAGER. Don, N1DG, reports that he is NOT the QSL Manager for A71A. QSL A71A via A71AN ONLY.

R1FJT QSL STATUS. Jack, RW0BB (ex-R1FJT), reports that new QSL cards are being printed and you will have to wait until he receives them.

TM0M LOG ONLINE. Logs for the recent operation TM0M from Molene Island (EU-065), May 23-30th, now available at: http://users.belgacom.net/cdxg

QSLS VIA LOTW: 9M6XRO, A61AD, A61X, A61AO, D44TXI, LY8O, LY9Y, OH0Z, S58MU, T33C, TN5SN, TR8CA, UN6J, UT7UJ, VK9GMW, XE1EE, YL7X, YW4D, ZF1A and ZK2V

QSLS RECEIVED VIA MAIL: 4S7DA, 4U1UN, 5H1X, 5H3RK, 5K0T, 5N/LZ1QK, 7Q7VB, 7X0RY, 8Q7SC, 9J2FM, 9J2VB, 9K2YM, 9U0VB, A71MA, A92GR, BG4TRF, BH4QAK, C91FC, CU3AD, CW6V, D2BB, D20VB, D60VB, DV5PO, E71DX, EA8BMG, EA9CF, EA9PY, EL2AR, FM5BH, GJ0KYZ, GT4BRS, GT6BRS, H40FN, HI9/EA3BT, HI9/EA3WL, HP1AC, HV50VR, JH9FNB, K3J, K5D, KG4AS, KH6BB, KP2/K3TEJ, KP4KE, LX8RTTY, LX9SW, PY0FF, R1ANB, R1ANC, R1ANP, T32YY, T33ZZ, T8CW, T8NF, T88CI, TO5A, TR8CA, UK9AA, UN7BEW, V63PR, VK7ZE, VK0BP, VP5DF, VP8/LZ1UQ, VP8DLJ, VP8YLI, XE2HWB/XF1, YB2ECG, Z36A and Z36W

QSLS RECEIVED VIA THE BUREAU: BY4AEE, BA4ALC, BA4CH, BD4AHW, BD4ALC/4, BA4DJ, BD4DM, BD7BW, BD7YK, BT4ECNU50, BY4BHK, BY4CA, BY4HAM, CE0Y/SM6CUK, CT1DWT, CT1HIX, DL2ARD, E20WXA, EM10U, EM5HQ, FK/JK1FNL, FO5RU, HA800NAR, HB9LH, IB0CW, IK0FMB, IK1JIM, IM0S, LA6KOA, LN3C, LZ130JA, MM/DH5JBR/P, OE8XHQ, OH0/OH2DZ, OH60BH, OY/DL6RAI, R450WA, RA3CM, RA3XEV, RU3FF, SY8DX, TM0C, TM2RWC, UE3FFF/3, UE9WFJ, UN8LW, UT4EK, UT5UGR, VA7AAW, VP2MPL and ZL1BOS

SILENT KEY. Ken Holdom, ZL4HU, informs OPDX that Russell Baird, or Russ as he was commonly known, ZL4DJ, became a Silent Key (SK) on the evening of June 4th. He was a well-known DXer and fellow ham radio enthusiast. OPDX and its readers would like to send out our deepest sympathy to the family and friends of ZL4DJ. Messages can be sent to: The Baird Family, 87 Ventry Street, Alexandra, Central Otago, New Zealand. ADDED NOTE: Ken Holdom, ZL4HU, states: "WE don't have an E-mail address for messages at this time, but I am more than willing to receive messages and personally hand them to the family.

SP50, POLAND (Special Event). Memebers of the SP DX Club (The Long Distance Radio Communication Club of Poland) have activated the special event station SP50DXC through June 30th, to celebrating 50th anniversary of the SP DX Club. The station is expected to be active on all bands/modes. Operators mentioned are: Andrzej/SP7ASZ, Jerzy/SP7CVW, Krzysztof/SP7IIT, Pawel/SP7LFT and Jerzy/SP7TF. QSL via SP7DQR. All QSOs will be uploaded to LoTW. SP50DXC will also be active again later in the year at the end September during their annual meeting of the SP DX Club.

SPECIAL EVENT (13 Colonies "On the Air"). Look for special event stations from all the thirteen 1776 original colonies to be on the air between 1300z, July 1st and 0400z July 5th. A full color certificate printed on heavy card stock or parchment paper (with a map and the state flags of all the 1776 colony states) will be available to each station who works one or more or ALL of the special event stations. The thirteen 1776 original colonies (their special event callsign) are: CT (K2D), DE (K2E), GA (K2G), MA (K2H), MD (K2F), NC (K2J), NJ (K2I), NH (K2K), NY (K2A), RI (K2C), PA (K2M), SC (K2L) and VA (K2C). Activity will be on all bands (except 60m and the 30/17/12m). The Colony stations will be operating on

or near the "13" of each band (Eg. 14213, 14313, 7213, et.). Also, 2 meters and 6 meters simplex frequencies are encouraged. For this event 2 meter repeater contacts WILL be allowed. For more details and picture of the certificate, please visit their Web page at:
http://home.comcast.net/~dzabawa/ThirteenColonies.htm
Each station is to send a contact log stating the Date, UTC, Band, and callsign of each contact, along with your QSL card and 4.00 USDs (check, Money Order or Cash - to help defray printing costs). NO SASE required. They will furnish postage, certificate and 9"x12" envelope. No QSL cards will be issued - just the certificate. All award requests and payment are to be sent and made out to the KU2US-Award Manager. Address and Log Forms are available at the above Web site. Those stations submitting contacts for ALL thirteen colonies will have their certificate marked with a "Clean Sweep" in recognition of their efforts.

T30, WESTERN KIRIBATI. David, N1EMC (ex-ZK2DF), is expected to be active from here as T30DX. Complete details are forthcoming. Stay tuned.

TO4G, GLORIOSO ISLAND (Update). Didier, F5OGL, announced this past week as indicated several weeks ago, no civilian will be included in the crew which is going to Gloriosos, next month. He states, "It had been confirmed that it will be first a military mission. Nothing was possible to do to make changes in this Forces Authorities decision." He also announced the final crew/operators list: Yves Michel/F5PRU, Jean Marc/F5RQQ, Freddy/ F5IRO, Philippe/F4EGS and Sylvain/F5TLN. Didier thanks the F6KOP Provins ARC for the loan of three stations to be active on the air and a fourth that will be set up and could be used on no particular modes or bands. Didier ends his press release by saying, "Mission permitting, the crew will appear in the two major July contests, the IARU HF and the RSGB IOTA. Know that the crew, instead of maintenance jobs, has another assistance mission by the Armies Information and Public Relation group which will go to Glorioso along with us. This group is composed of an Officer, a director and a cameraman. The callsign is not known yet, but it is expected in the next days." More information is forthcoming. Look for updates on their Web page at: http://glorieuses2008.free.fr

VK, AUSTRALIA (4 LETTER SUFFIX). Eddie, VK4AN, (Father of VK4FRAJ) reports: "There is still much reluctance and confusion amongst contesters regarding VK 4-letter suffix calls... especially in CW contests! My son is probably the ONLY VK with a 4-letter suffix that operates on CW, and is VERY frustrated when contesters keep asking if his call is 2-letters or 3-letters... and one even accused him of being 'a commercial station' and refused to work him! 4-letter suffixes are issued to 'Foundation-class' hams (similar to the US novice-class). ALL Foundation class suffixes begin with an 'F' plus 3 more letters. They have a maximum of 10-watts power on 80-40-15-10m CW-SSB only and must use commercially made equipment. My son's call is VK4FRAJ. He really enjoys CW but is ready to stop contesting due to the frustration of others NOT knowing that Australia issues 4-letter suffixes!! PLEASE SPREAD THE WORD THAT VK issues 4-LETTER SUFFIXES... and that the only one that we know of that is on CW is VK4FRAJ (not VK4FJ, not VK4RAJ, not VK4FRA, not VK4FR, not VK4FRJ... etc...). 'Raj' said he

would appreciate it if contesters would listen for his QRP CW signal and
to please realize that he has a 4-letter suffix (VK4FRAJ)."

VP2M, MONTSERRAT. Bill, W5SJ, will be active from here possibly as VP2MSJ
(TBA), July 14-21st. Activity will be on 80m, 60m and 6 meters using CW,
SSB and possibly JST. However, he will concentrate on the CQWW VHF Contest
(July 18-19th) on 6 meters. His equipment is an ICOM 7000, w/250 watts,
into a 5 element yagi (for 6m) and a Carolina Windom (for 80/60m). QSL
via his home callsign direct with current IRC or SASE.

ZY0, FERNANDO DE NORONHA. Just a reminder that operators Anderson/PY2TNT,
Fabio/PY2AAZ/AC2AC, Alex/PY2WAS and Bob/N6OX will be active as ZY0F from
Fernando de Noronha Island (SA-003), from June 10-15th. Activity will be
on 160-10 meters including 60/30/17/12 meters (60m under temporary licensed
granted by the Brazilian Government) using CW and SSB. QSL via PY2WAS, by
the bureau or direct. This DXpedition is sponsored by Spiderbeam Antennas.
Also, see ZY0F on QRZ.com.

9990. ZL7T and ZM2M QSLs

Yahoo group: DX-IS (2009)
Date: 2009-06-08 20:55:06 UTC
From: Lee Jennings
Topic: 9990 Message: 9990

All direct ZL7T QSLs have been answered and the last bunch was mailed today. The status is "current" and will be checked on a FIFO basis within a week as they arrive . I am answering the buro cards as they come in.
Many thanks to all for your kind comments on our operation.

ZM2M (East Coast Contesters) cards are being checked as above and are current.

73, Lee ZL2AL

The physical K5D cards are also coming out big time. Marsha (N4BU) and I received our K5D QSLs yesterday.

I met Bob (N2OO) at Dayton a few weeks ago. Amazing he had time to be there! We had a brief chat about both DXing and county hunting.

In my bureau shipment today I received a card from UZ9CWA for a QSO back in April 1985 when I was still KE5SB. This beats my previous old QSL received record by 3 years. I wonder how many more are slowly creeping in from places unknown?

73,
Mark WC5M

I beat you, in my last shipment I received a QSL from VP8KF for QSO
dated 04-March-1984. He also confirmed it in LOTW.

N4BU? Is that the same N4BU that called me on RTTY yesterday?

My computer crashed, I hope she Marsha got my report?

73, Lance - VK6DU

The physical K5D cards are also coming out big time. Marsha (N4BU) and I received our K5D QSLs yesterday.

I met Bob (N2OO) at Dayton a few weeks ago. Amazing he had time to be there! We had a brief chat about both DXing and county hunting.

Yes it is! I just glanced over at her log page - you're in the log!

She claims she prefers SSB cuz everyone will know she's a YL - and she thinks she'll get preferential treatment (I guess that's because she usually does!). But I introduced her to RTTY a few months ago.

Now she has even more opportunities to hog the antenna! :)

I think Box 88 was used right up until 1989 or 1990.

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Jun 11 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 162 Issued at 2200Z on 11 Jun 2009
IA. Analysis of Solar Active Regions and Activity from 10/2100Z
to 11/2100Z: Solar activity has been very low. The visible solar
disk is spotless. No flares have been observed in the past 24 hours.
IB. Solar Activity Forecast: Solar activity is expected to remain
very low for the next three days (12-14 June).
IIA. Geophysical Activity Summary 10/2100Z to 11/2100Z:
The geomagnetic field was quiet.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be quiet for the next three days (12-14 June).
III. Event Probabilities 12 Jun-14 Jun
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF green
IV. Penticton 10.7 cm Flux
Observed 11 Jun 069
Predicted 12 Jun-14 Jun 069/069/069
90 Day Mean 11 Jun 070
V. Geomagnetic A Indices
Observed Afr/Ap 10 Jun 002/005
Estimated Afr/Ap 11 Jun 002/003
Predicted Afr/Ap 12 Jun-14 Jun 005/005-005/005-005/005
VI. Geomagnetic Activity Probabilities 12 Jun-14 Jun
A. Middle Latitudes
Active 05/05/05
Minor storm 01/01/01
Major-severe storm 01/01/01

QST de W1AW
DX Bulletin 23 ARLD023
>From ARRL Headquarters
Newington CT June 11, 2009
To all radio amateurs

SB DX ARL ARLD023
ARLD023 DX news

This week's bulletin was made possible with information provided by KF4VTT, NC1L, VE1RSM, QRZ DX, the OPDX Bulletin, DXNL, 425 DX News, The Daily DX, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

AZERBAIJAN, 4J. Rashad, 4J9M has been active using RTTY on 17 and 15 meters around 2200z, as well as 10 meters around 1000z. QSL via DL7EDH.

TANZANIA, 5H. Stations for 5H3TSA, 5H3HO and 5H3ARC are QRV until June 19 from the Mbeya Region during the Tanzania National Scouts Jamboree, known as Tanzaree 2009. Activity is on 20 and 15 meters between 0600 and 2100z. QSL via operators' instructions.

ALGERIA, 7X. Members of the Algerian Radio Amateur Association and the Djelfa Radio Club will be QRV as 7U2ISM from June 16 to July 6 during the international Algerian Sahara HAM Meeting. Activity will be on all bands using CW, SSB, RTTY, SSTV and digital modes. QSL via operators' instructions.

NAURU, C2. Dani, EA4ATI and others will be QRV as C21TI from June 16 to 30. Activity will be on 160 to 6 meters, including 60 meters, using CW and SSB, with two radios active. QSL via EA4ATI.

PORTUGAL, CT. Members of the Algarve STAR DX Team will be QRV as CT7/CU8AT during Green Days on June 13 and 14. This includes an entry on the Portugal Day contest. QSL via operators' instructions.

MADEIRA ISLANDS, CT3. Carlos, CT3FQ plans to be QRV as CR3M during the Portugal Day Contest between 0530 and 2100z on 80 to 10 meters. QSL to home call.

SCOTLAND, GM. Stations MM0DFV/p and GM0WRR/p will be QRV from the Loch Lomond and Trossachs National Park on June 13 and 14 during

Green Days. Activity is on the HF bands using CW, SSB and PSK. QSL via operators' instructions.

SOLOMON ISLANDS, H4. Mike, KM9D and Jan, KF4TUG are QRV as H44MY from Stirling Island, IOTA OC-162, and are here for about a week. Activity is on 40, 30 and 20 meters using mostly CW. QSL via OM2SA.

HUNGARY, HA. Sanyi, HA0HV is QRV as HG400HV until the end of 2009. Activity is on all HF bands and 6 and 2 meters using CW, SSB and digital modes. QSL to home call.

SAN ANDRES ISLANDS AND PROVIDENCIA, HK0. Dennis, K7BV will be QRV as 5J0BV from San Andres, IOTA NA-033, from June 18 to 29. He will concentrate his activity on 6 meters sporadic-E but will also be active on the HF bands as well. QSL direct to home call.

NETHERLANDS, PA. Fred, PA0FAW is QRV with special event call sign PA09SHAPE until July 3 to celebrate Mode Biennale, which is the fashion month in Arnhem. QSL to home call.

SAO TOME AND PRINCIPE, S9. Georg, DK7LX will be QRV as S92LX from June 13 to 25. Activity will be on 80 to 10 meters using CW. QSL to home call.

GREECE, SV. Operators Elizabeth, K4KTG, Michael, KC6ZUS and Jonathan, KI4UOU will be QRV as SV/K4KTG from Thira Island, IOTA EU-067, from June 15 to 30. QSL via K4KTG.

UKRAINE, UR. Members of the Lviv Branch of the Ukrainian Amateur Radio League are QRV as EM0WFF from the Roztochchia Nature Reserve until June 14. QSL via UT7WZ.

CANADA, VE. Bob, VE1RSM is QRV as home call/VY0 from Whitehorse, Yukon Territory until August 17. Activity is on all HF bands, particularly 40, 30 and 20 meters, using CW and SSB during his evenings and weekends. QSL to home call.

BERMUDA, VP9. Doug, KF4VTT is QRV as VP9/home call until June 17. Activity is on 160 to 6 meters using CW, SSB, RTTY and PSK. QSL to home call.

NIUE, ZK2. Chris is QRV as ZK2V until June 20. He has been active using RTTY on 30 meters around 0200 and 0800z. He has also been active on 60 meters around 0500z. QSL via N3SL.

OPERATION APPROVED FOR DXCC CREDIT. The following operation is approved for DXCC credit: Saudi Arabia, HZ1EA. If you had this operation rejected in a recent submission, please send a note to dxcc (at) arrl.org to be placed on the list for an update.

THIS WEEKEND ON THE RADIO. The ARRL June VHF QSO Party, NCCC Sprint CW Ladder, Digital Pentathlon, ANARTS World Wide RTTY Contest, Portugal Day Contest, VK/Trans-Tasman 160-Meter Phone Contest,

Asia-Pacific SSB Sprint, GACW WWSA DX CW Contest, REF DDFM 6-Meter Contest, SKCC Weekend CW Sprint are all scheduled for this weekend. The SARL Youth Day SSB Sprint is scheduled for June 16. Please see June QST, page 80 and the ARRL and WA7BNM contest web sites for details.

13 June 2009 A.R.I. DX Bulletin
No 945
==========
*** 4 2 5 D X N E W S ***
**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

5H - 5H3TSA will be active on 20 and 15 metres (+/- 14290 kHz and 21360 kHz) for Tanzaree 2009, the Tanzania National Scouts jamboree that will be held at Mbeya, southern Tanzania on 12-19 June. QSL direct via 5H3HO (Hidan Ricco, P.O. Box 661945, Dar Es Salaam, Tanzania). [TNX K1XN]
7X - Bureaucratic hitches have caused Mike, DB1JAW to cancel his 13-20 June visit to Algeria [425DXN 944]. He was expected to be active as 7X/DB1JAW and to attend the International Sahara Meeting. [TNX DB1JAW]
8R - Dave/N3DB & Chris/W3CMP as 8R1DB (from 16 to 26 June) and Terry/K4RX & Ken/AC4TO as 8R1TO (from 27 June to 6 July) will operate on 6 metres from Guyana. QSL via N3DB, direct or bureau. The website for the expedition is at www.6meterbeaconproject.org/8r2009.html
9H - Giorgio, IV3EPO will be active holiday style as 9H3EP from Malta (EU-023) on 23-29 June. He plans to operate almost exclusively CW on 10, 15, 20, 30 and 40 metres. QSL via home call, direct or bureau. [TNX IV3EPO]
CE0Y - VK9LA (Lord Howe island) veterans Stan/SQ8X and Vicky/SV2KBS are looking for one or two operators to join a DXpedition to Easter Island (SA-001) from 31 October to 15 November. "It's not top most wanted DXCC", they say, "but there is still a strong demand on contacts with that entity - especially in Europe, which will be our main target". They plan to have two stations up and running for almost two weeks and to operate as CE0Y/homecall. Further details are expected in due course. Please visit http://dx-hamspirit.com/ for preliminary information and Stan's e-mail address. [TNX MM0NDX]
DU - Gerard, F2JD is back to the Philippines for at least five months. He hopes to be able to renew his previous licence (DU1/G0SHN) and to visit a few island groups during his stay. QSL via F6AJA. [TNX F6AJA and Les Nouvelles DX]
F - Special event callsign TM6SCH will be in use on 15-28 June to

commemorate the 65th anniversary of the liberation of the city of Cherbourg. Expect activity on 80-10 metres CW and SSB. QSL via F5LHB, direct or bureau. [TNX F8REF]
F - Francois, F5JNE will be active from Belle Ile (EU-048, DIFM AT-015) on 16-24 June. He plans to operate CW only on 40 and 20 metres during his evening hours. On 20 June he expects to go and operate, along with Max/F5IRH, from nearby Ile aux Chevaux (EU-048, DIFM AT-109). QSL via F5JNE, direct or bureau. [TNX F5NQL]
F - F1UGV, F4BJW, F5DBC, F5NLR and F5SRH will operate CW and SSB as TM5DUM from Dumet Island (EU-064) on 20-21 June. QSL via operator's instructions. [TNX F8REF]
F - Jean-Pierre, F6ITD will be active as F6ITD/p from Belle-Ile (EU-048) on 20-28 June. He will operate SSB only on 10, 15, 20, 40 and 80 metres. QSL via home call. [TNX F6AJA and Les Nouvelles DX]
F - Commemorating the 150th anniversary of the birth of radioactivity pioneer and Nobel laureate Pierre Curie, special event station TM7RPC will be active from 21 June to 5 July. [TNX F1SIU]
FO - Phil, F5PHW will be living and working on Tahiti, French Polynesia for two years (August 2009-July 2011). He plans to be active as FO/F5PHW (but he will also try to get a FO5 callsign upon arrival) and to operate CW, RTTY and some SSB on 80-10 metres. QSL via F8BPN, direct or bureau. Phil's logs will be uploaded to LoTW. Further information at http://f5phw.chez.com [TNX F5PHW]
FT5G - The French military amateur radio operators who will be active from Ile de la Grande Glorieuse (AF-011) on 9-28 July are Philippe/F4EGS, Freddy/F5IRO, Yves-Michel/F5PRU, Jean-Marc/F5RQQ and Sylvain/F5TLN. Their trip to Glorioso is first of all a military operation, not a DXpedition. At all events, they will have four complete stations with amplifiers, three Spiderbeams for the higher bands, verticals for 40 and 80 metres, an Inverted L for 160 metres and a K9AY array receiving system, plus a G5RV for 6 metres. They plan to be QRV during both the IARU HF World Championship and the IOTA Contest. Requested callsign is FT5GA (see "Iles Eparses" below). QSL via F5OGL, direct or bureau. Further information, including log-search, can be found at http://glorieuses2008.free.fr/ [TNX F5NQL]
GM - Jurij, MM0DFV and John, GM0WRR will be active portable from the Loch Lomond and the Trossachs National Park during the WFF Green Days (http://wff44.com/en/contest/) on 13-14 June. They plan to operate SSB, CW and PSK. A special colourful QSL card will be printed. [TNX MM0DFV]
GM - Members of the Workington and District Amateur Radio Club will operate as MS0WRC from the Island of Barra (EU-010) from 26 September to 2 October. The team will include Steve/G0MTD, Paul/M1PAF, Mark/M0WCR and Glyn/M3XUH, and they will operate mainly SSB on 80-17 metres. QSL via G0MTD, direct or bureau. [TNX G0MTD]
GW - The Grantham Amateur Radio Club (http://www.garc.org.uk/) will be active as GB0YG from Holy Island (Ynys Gybi, EU-124) on 24-29 June. QSL direct only via G0RCI. [TNX G0RCI]

I - Alex, IK8YFU, and Giovanna, IZ8FEV will be active as IF9/IQ8PP
from Favignana Island (EU-054, IIA TP-011) on 18-25 July. QSL via
IK8YFU. [TNX IK8YFU]
JA - Look for 7N4AGB/6, JA1KJW/6, JA1XEQ/6, JJ1JGI/6 and JK1EBA/6 to be
active from the Daito Islands (AS-047) from 25 June to 5 July, and
from Tokashiki Island (AS-017) on 7-10 July. They plan to operate
CW and SSB on 160-6 metres, with an emphasis on the low bands. QSl
via home call,s direct or bureau. [TNX JI6KVR]
JA - Look for JJ2JQF/0 and JH9UYZ/0 to be active on all bands and modes
from Awa Island (AS-117) on 26-30 June. QSL via home calls, direct
or bureau. [TNX JI6KVR]
JT - Giampiero, I5NOC will be active as JT1NOC from Mongolia on 12-29
June. He will operate CW and SSB on 10-80 metres, and will also
give 6m a try. QSL via home call. [TNX IK5HHA]
KH2 - 7L4CEC, JA1BVY, JA1CJP, JA1HOD, JH1EMT, JJ1CDY, JL1FYW and JR1QCQ
expect to be signing KH2/homecall from Guam (OC-026) until 14
June. Look for them on 160-6 metres CW, SSB and possibly RTTY. QSL
via home calls. [TNX JA1CJP]
KL - The KL7RRC team (KE7V, N3QQ and UA9OBA) has been active as
KL7RRC/p from Ogliuga Island (NA-233) [425DXN 943] since 10 June.
They plan to remain there until 14 June, then, depending on boat
availability, they might go and operate as KL7RRC/a from the Rat
Islands (NA-070). QSL via UA9OBA (Russia and Europe) and N7RO
(others). Updates can be found at http://na-233.ucoz.com/
LA - LA1MNA, LA1LSA, LA5ZN and LA9RY will be active on 6 metres and the
HF bands as LA7H from Utsira Island (EU-055) on 12-14 June. QSL to
LA7H, direct or bureau. ?^TNX www.rgsbiota.org]
PA - Celebrating his Silver Jubilee with amateur radio, Adriaan, PE2KP
(previous callsign PE1KHP, www.pe2kp.nl) will be active again as
PE25KP from 25 July to 16 August. QSL via bureau to PE2KP. [TNX
PE2KP]
SM - Jorgen, SM3CXS will be active as SG3U from Trasko Island (EU-084)
until 16 June and from Grimskar Island (EU-176) on 18-21 June. He
operates SSB and CW on 40-6 metres. QSL via home call, direct or
bureau. [TNX www.rsgbiota.org]
SV - Elizabeth/K4KTG, Michael/KC6ZUS and Jonathan/KI4UOU will be active
as SV/K4KTG from Thira (Santorini) Island (EU-067) between 15 June
and 30 July. QSL via K4KTG. [TNX www.rsgbiota.org]
SV5 - Pandelis (SV5AZP), Stathis (SV5DKL), Dionisis (SV5FRD), Panagiotis
(SV5AZK) and Yiannis (SV5FRI) will be active as SX5SYMI from the
island of Symi, Dodecanese (EU-001) from 31 July to 3 August. They
plan to operate SSB, CW and RTTY on 160-6 metres. QSL direct to
SV5FRI. Further information at http://sx5symi.symiakos.gr; details
on the Greek Islands On The Air (GIOTA) award programme visit
http://www.5-9report.gr/giota/index.htm [TNX SV5FRI]
SV9 - Ron, WB2GAI is celebrating his Golden Jubilee in amateur radio and
will be active again as SV9/WB2GAI/p from Crete from 21 August to
5 October. He will operate CW on 80-17 metres. QSL via bureau.
[TNX WB2GAI]
TZ - Ed/W0SD, Arliss/W7XU and Holly/N0QJM will be active as TZ6EI from

Bamako, Mali from 26 June to 5 July [425DXN 941]. Although their primary focus will be 6 metres on 50103 kHz, there will be RTTY operation concurrent with activity on 6m, plus CW and SSB operation at night after six meter sporadic E is over. The HF bands will likely to be limited to 30, 20 and 17 metres. QSL via W7XU. Further information at http://w0sd.com/mali/mali.htm [TNX W0SD]
UA - Look for RN1AW/p, RV1AQ/p and UA1ATI/p to be active from Peschany Island (EU-133, RR-01-14) on 15-23 June. QSL via home calls, bureau preferred. [TNX RN1AW]
UA - Alik, RX9WN will be active as RX9WN/0 from Kharantsy Island (RR-21-12) and possibly also Olkhon Island (RR-21-01) between 19 and 21 June. Both the islands are located in Lake Baikal and do not count for IOTA. [TNX RX9WN]
UR - Members of the Ternopil Amateur Radio Club will be active as UR4BZB/p from Medobory Nature Reserve on 12-14 June. QSL via UT1BC. [TNX UR5BCP]
UR - Vladimir, UU6JJ plans to be active from the lighthouse at Mys Lukull (ARLHS UKR-135) on 13-14 June. He will operate CW and some SSB on 40-15 metres. Complete information on the Ukrainian Lighthouses Award can be found at http://www.lights.in.ua [TNX US4LGW]
VE - Rene, DL2JRM was active as VE1/DL2JRM from Bells Island (NA-081) a couple of days ago, and will operate again as VE1/DL2JRM from Long Island (NA-127) on 13-15 June. Look for him on 80-10 metres CW. QSL via home call, direct or bureau. [TNX www.rsgbiota.org]
VE - George, WW4GA will be active as WW4GA/VO1 from Newfoundland (NA-027) from 18 June to 9 July. QSL direct to home call. [TNX www.rsgbiota.org]
VE - Mike, K9AJ and Bruce, KD6WW will be active as K9AJ/VY0 and KD6WW/VY0 from Thomson Island (NA-185) from the local evening on 31 July through the local morning of 3 August. They will have two stations and will operate CW and SSB around the usual IOTA frequencies. QSL via home calls. The NA-185 IOTA group is offshore Rankin Inlet, Nunavut, on the western shore of Hudson Bay and was activated only once by NU2L/VE8 back in 1993. [TNX K9AJ]
YU - Special prefixes YU2009, YT2009, YU09, YT09, YT25 and YU25 will be in use from 12 June to 12 July to promote the XXV Summer Universiade (the World University Games organized by the International University Sports Federation) that will be held in Belgrade, Serbia on 1-12 July. [TNX www.yu1srs.org.rs]
YV - The Radio Club Venezolano will be active as YW9A from the rare Amazonas State on 20-24 June. QSL via YV5AJ, direct or bureau. Information on the Diploma Estados Venezolanos (Venezuelan States Award) can be found at http://radioclubvenezolano.org/concurso.htm

PACIFIC TOUR 2009 ---> Karl-Heinz, DL2FAG will be active from Niue and Samoa in October and November as follows:
19/10-07/11 ZK2DL Niue Island (OC-040)
17/11-30/11 5W0KH Upolu Island, Samoa (OC-097)

He plans to operate mainly RTTY, PSK and SSB on 10-80 metres, using a Triple leg multiband and dipoles. After Niue and before Samoa he will will be visiting New Zealand's South Island (OC-134) and be active sporadically as ZL4/DL2FAG. QSLs via home call. Log searches will be available at www.qsl.net/dl2fag.

PACIFIC TOUR 2010 ---> Wallis Island has been added to the itinerary of the 22-day Pacific tour that is being organized to take place next year [425DXN 929]. A multi-national team of 14 operators led by Hrane, YT1AD will be active from Tokelau (ZK3, 30 September-3 October), Central Kiribati (T31, 5-10 October) and Wallis Island (FW, 12-14 October). Details are expected in due course. Updates will be posted to the expedition's website at http://www.yt1ad.info/t31/index.html [TNX YT3W]

CQ SIXTY METRES ---> Sixty metres enthusiasts can find lots of useful information at http://www.60meters.net/, including information on current and upcoming DX activities on 5 MHz gathered by Joe, W8GEX.

ILES EPARSES ---> Previously placed under the administration of the prefect of Reunion, the so-called Iles Eparses (Scattered Islands, including Europa, Juan de Nova, Glorioso and Tromelin) have been administered by the French Southern and Antarctic Lands (TAAF) since 3 January 2005 and have constituted the TAAF 5th district since 21 February 2007. Amateur radio callsigns will be affected by the change as follows: Europa = FT#E, Glorioso = FT#G, Juan de Nova = FT#J, Tromelin = FT#T.

QSL 9J2FR & 9J2AA ---> Claudio, IK2RZQ says he still has logs and blank cards for either Renzo/9J2FR and Rosa Angela/9J2AA. Requests can be sent direct or via the bureau.

QSL HV50VR ---> Please note that the new QSL route is via IV3KKW: the person in charge is still Alessandro Carletti (formerly known as IW0GPN), who received his brand new callsign a few days ago. QSL direct only or LoTW. Alex says that all of the requests received so far have been processed and mailed.

SOUTH AFRICA ---> Effective 10 June, amateur radio operators from South Africa have full access to the 40m band (7000-7200 kHz), and ZR licencees are allowed to operate on 14225-14350 kHz. [TNX ZS4BS]

+ SILENT KEYS + Recently reported Silent Keys include Ted Collins (G4UPS), Pietro Piccolo (I3UAZ), Anthony W. Malesic (K3BHL), Larry Duncan (K4WLS), Manoel Santos (PY2CJW), Jurij A. Golovanov (RA2FW), Vadim V. Kononov (U3HB), George Sanford Ardern (W4DUP), Edwin A. Andress (W6KUT) and Russell A. Baird (ZL4DJ).

QSLs received direct or through managers: 3B8GT, 3D2AD, 3D2VB, 3DA0VB, 3XD2Z, 4K9W, 4O3A, 4S7DA, 4U1UN, 4V4JR, 5H1X, 5H3RK, 5H3VMB, 5K0T (NA-132 and NA-133), 5R8VB, 5Z4/RW1AU, 7Q7VB, 7X0RY, 8Q7SC, 9J2FM, 9J2VB, 9K2YM, 9U0VB, 9X0BV, A35VB, A61Q, A71MA, A92GR, BG4TRF, BH4QAK, C91FC, C91VB, CU3AD, CW6V, CX7CO, D20VB, D2BB, D44TXI, D60VB, DV5PO, E44M, E51MMM, E71DX, EA9CF, EA9PY, EL2AR, ES1CW, EU3AR, EW8KY, FK/G3MXJ, FM5BH, FW5RE, GJ0KYZ, H40FN, HC2AQ, HI9/EA3BT, HI9/EA3WL, HK0/EA7HEJ, HK1X, HL3IUA, HP1AC, HV0A, HV50VR, J75KG, JD1BMH, JT1DN, JW1CCA, JW5LJA, K5D, KG4AS, KH0PR, KH0UA, KH6BB, KH8/N9YU, KP2/K3TEJ, KP4KE, KP4YI, L21D (SA-021), LX1FX, LX8RTTY, LX9SW, OA4TT, OK1TN, OM7M, PS0F, PY0FF, R1ANB, R1ANC, R1ANP, S04R, T30M, T30VB, T32YY, T33ZZ, T48K, T88CI, T8CW, T8NF, TI5N, TO5A, TR8CA, UK9AA, UN1L, UN5J, UN7BEW, US0KW, V63MB, V63PR, VK0BP, VK9N/G3MXJ, VK9XHZ, VP5/K7LAZ, VP5DF, VP8/LZ1UQ, VP8DLJ, VP8YLI, VR2XMT, VU2NKS, XE1KK/XF1 (NA-124), XE2HWB/XF1 (NA-078), XX9BB, YB2ECG, YJ0AQY, YJ0MXJ, YK1BA, YN2WW, Z29KM, Z36A, Z36W, ZL7T.

ARLP024 Propagation de K7RA

ZCZC AP24
QST de W1AW
Propagation Forecast Bulletin 24 ARLP024
>From Tad Cook, K7RA
Seattle, WA June 12, 2009
To all radio amateurs

SB PROP ARL ARLP024
ARLP024 Propagation de K7RA

Sunspot numbers from May 31 through June 5 ranged from 13 to 23, then the Sun was blank for two days, followed by sunspot numbers of 12 for both June 8 and 9. This fleeting sunspot was number 1020, and like last week's spot, 1020 had the magnetic signature of a new Cycle 24 spot. Alas, it was another of the frequent sunspots we've seen lately which appear briefly, then vanish.

The last Cycle 23 spot was number 1016, which appeared April 29-30.

Leonard Halversen, WA2AMW of Princeton, New Jersey asked how Cycle 24 spots are differentiated from Cycle 23 spots, and we last mentioned this in Propagation Forecast Bulletin ARLP044 from 2008, so now is a good time to go over it again.

The sunspots have a magnetic signature. As you watch them move from left to right, they lead with a dark patch in front and a white tail in the rear. That is how Cycle 24 spots appear above the equator, and it is just the opposite south of the Sun's equator. Also, new cycle spots tend to appear at higher northern or southern latitudes away from the equator, while old cycle spots appear nearer the equator.

Go to http://sohowww.nascom.nasa.gov/data/realtime/ to look for images. Click on the "Search and Download Images" link, and select MDI Magnetogram from the image types. Try entering start/end dates of April 28 and April 30 of this year, and click Search. Select one of the links from the middle of the list, and note that the sunspot on the right side is near the equator, indicating a spot from the old cycle, and that it leads with black on the right. Because it is slightly below the equator, this indicates a Cycle 23 spot. If it were above the equator, a Cycle 23 spot would lead with white on the right side.

Now go back and search dates June 1 through June 3. Note that you can up the resolution to 1024 from 512. Select one of these images, and note the large sunspot above the equator has a Cycle 24 signature.

Still more comments arrived this week about how dead bands may be an illusion. Guy Cossette, VA2WT of Saint Roch de Mekinac in Quebec wrote to tell us about his 80 and 40 meter operation. Using 100 watts CW and a 40 meter dipole, he worked Crete, Cyprus and Tunisia at 2200z and he also worked Cyprus on 80 meters at 2300z.

Ken Sturgill, WS4V in Marion, Virginia says he likes to use the intelligent features at http://www.ve7cc.net/. If you wish, you can set it for the countries you are looking for, and you can also set it to only accept spots from tipsters in your country, so you get the spots you can work. He recommends hitting the "Tell Cluster" button often, so the info isn't lost. He also recommends reading the manual.

Jim Sullivan, N7TCF of Phoenix, Arizona likes to use "DX Sherlock," at http://www.vhfdx.net/spots/map.php. He uses it to check out band conditions, mainly on 6 meters. One feature I like is the Es MUF tab, where you can see the MUF in various places. I believe this data comes from ionospheric sounders (ionosondes), which fire a sweeped RF signal straight up and then measure the strength and frequency of the signals bouncing back.

Mark Lunday, WD4ELG of Hillsborough, North Carolina sent a link to a nice map mash-up of 6 meter beacon stations at, http://www.k9mu.com/map/. Mark wrote:

"I have also been experimenting with WSJT weak signal software from Joe Taylor, K1JT. It's pretty neat to tinker with meteor scatter on 6 meters, and very challenging with my modest station. But I have really gotten addicted to JT65A mode on 20 meters. There always seems to be somebody on the air in the vicinity of the calling frequency of 14076 kHz, and I have worked some terrific DX that I normally would struggle with from here with 20 watts. I have also heard DU on JT65A for the first time ever on any band or mode! All of my QSOs have been with 40 watts or less, mostly with 20 watts. In just two months of part-time operation, I have worked 25 countries on JT65A including VK, JA, CX, lots of Europeans. Also, I worked ZS6 on 80 meter WSJT last weekend! There were horrendous thunderstorms all up and down the east coast, but the software decoded just fine. I could barely see the DX on the WSJT spectrum waterfall, and decoded his CQ almost by accident while doing something else in the shack."

For this week, geomagnetic conditions should remain very quiet. Solar flux is estimated to be about 68, rising above 70 June 24 through July 1.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at, http://www.arrl.org/tis/info/propagation.html. For a detailed explanation of the numbers used in this bulletin, see http://www.arrl.org/tis/info/k9la-prop.html. An archive of past propagation bulletins is at, http://www.arrl.org/w1aw/prop/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://www.arrl.org/qst/propcharts/.

Instructions for starting or ending email distribution of this bulletin are at http://www.arrl.org/w1aw.html#email.

Sunspot numbers for June 4 through 10 were 17, 13, 0, 0, 12, 12, and 0 with a mean of 7.7. 10.7 cm flux was 71, 70.1, 69, 68.9, 69, 69.1, and 69.2 with a mean of 69.5. Estimated planetary A indices were 6, 6, 5, 6, 4, 3 and 5 with a mean of 5. Estimated mid-latitude A indices were 5, 5, 2, 3, 2, 2 and 2 with a mean of 3.

10010. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-06-12 22:11:01 UTC
From: Paul Dunphy
Topic: 9721 Message: 10010

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Jun 12 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 163 Issued at 2200Z on 12 Jun 2009
IA. Analysis of Solar Active Regions and Activity from 11/2100Z
to 12/2100Z: Solar activity has been very low. The visible disk is
spotless. No flares have been observed in the past 24 hours.
IB. Solar Activity Forecast: Solar activity is expected to remain
very low for the next three days (13-15 June).
IIA. Geophysical Activity Summary 11/2100Z to 12/2100Z:
The geomagnetic field was quiet.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to remain quiet for the next three days (13-15 June).
III. Event Probabilities 13 Jun-15 Jun
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF green
IV. Penticton 10.7 cm Flux
Observed 12 Jun 069
Predicted 13 Jun-15 Jun 069/069/069
90 Day Mean 12 Jun 070
V. Geomagnetic A Indices
Observed Afr/Ap 11 Jun 002/003
Estimated Afr/Ap 12 Jun 002/004
Predicted Afr/Ap 13 Jun-15 Jun 005/005-005/005-005/005
VI. Geomagnetic Activity Probabilities 13 Jun-15 Jun
A. Middle Latitudes
Active 05/05/05
Minor storm 01/01/01
Major-severe storm 01/01/01

The Ohio/Penn DX PacketCluster
DX Bulletin No. 912
BID: $OPDX.912
June 15, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q, W2VU, WB2GAI, K3SWZ, N3SL, NG3K, N4AA & QRZ DX, K8YSE, N8OFS, W9DX, W0SD, 5H3TSA, A35RK, DL7MAE & The DX News Letter, DX World of Ham Radio Web Site, F5NQL & UFT, F5PFP, I1JQJ/ IK1ADH & 425 DX News, IV3KKW, IZ4AKS, IZ8CCW, OE8KDK, Pete's-DX-Newsdesk, ON4ATW, PG5M, RSGB IOTA Web Site, SV1EJD, UR5BCP, VA3RJ & ICPO, VHF-DX-Portal (MMMonVHF), ZL2AL and ZL2CQ for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 7th-June, through Sunday, 14th-June there were 208 countries active. Countries available: 3A, 3B8, 3D2, 3V, 3W, 3X, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5T, 5V, 5Z, 6W, 6Y, 7P, 7X, 8P, 8Q, 9A, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A4, A6, A7, A9, AP, BV, BY, C3, C6, CE, CE0Z, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J8, JA, JD/m, JD/o, JT, JW, JY, K, KG4, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, S5, S7, S9, SM, SP, SU, SV, SV5, SV9, T2, T7, TA, TF, TG, TI, TJ, TK, TL, TN, TR, TU, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V8, VE, VK, VP2V, VP8, VP9, VR, VU, XE, XU, XW, YA, YB, YI, YJ, YL, YN, YO, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

5H, TANZANIA (2009 Scout Jamboree). The 2009 Tanzania National Scout's Jamboree will be held at Mbeya Region, southern part of Tanzania, between June 12-19th. Look for 5H3TSA to be on air on 20 meters and 15 meters (14290 and 21360 kHz). QSL direct only to 5H3TSA.

5R8, MADAGASCAR (Update). Texas DX Society (TDXS) member, Wayne, W5KDJ, will be active as 5R8KD from Antananarivo between July 4-17th. Activity

will be on 160-6 meters using CW and RTTY. Wayne will also be active in the IARU Contest (July 11-12th) and operate from the shack of 5R8FU using his new TH-11-DX. QSL via his home callsign. Online log search will be available. Logs will be uploaded to LoTW and eQSL.

9H, MALTA. Giorgio, IV3EPO, will be active as 9H3EP between June 23-29th. Activity will be on 40-10 meters, mainly CW. QSL via IV3EPO, by the Bureau or direct.

A35, TONGA (Update). Paul, A35RK, on Wednesday, June 10th, informed OPDX that "I have received many requests for 'skeds', for several bands and modes. Unfortunately, I am not able to accommodate anyone at this time. I'm too busy, and I am unable to 'promise' to keep any sort of radio schedule at the moment." Pauls states, "My internet connection is intermittent, and I often cannot respond to incoming E-mail. Please ask your readers NOT to send any more requests for skeds. I will be here in Vava'u (OC-064) for about 2 more weeks, and then will return to Ha'apai (OC-169). In the meantime, I will be as active on the air as I can be."

ANTARCTICA EXPEDITION PLANNED. Operators Jean Pierre/ON7ZM and Mehdi/F5PFP are planning an expedition to Antarctica that will probably take place during the Arctic summer of 2011-2012. Mehdi states, "It could be a 6-7 weeks expedition in a way to reach some old bases and refuges which are situated below the Antarctic polar circle, (Loubet coast, Fallieres coast, Marguerite Bay, and we hope one accessible island at least belonging to Alexander Island group)." If someone wishes to join them as an operator or tourist, send Mehdi an E-mail at: f5pfp@...
More details are forthcoming.

C2, NAURU (Reminder). Dani, EA4ATI/9M2TI, and possibly other operators are expected to activate Nauru in the Pacific (refer to OPDX.894) as C21TI between June 16-26th. Activity will be on all HF bands including 60m and 6m. The suggested frequencies mentioned (as of now) are:
CW - 1825.5, 3505, 7005, 10110, 14025, 18075, 21025, 24895 and 28025
SSB - 1825.5, 3799, 5371.5, 7065, 14195, 18145, 21295, 24945 and 28495 kHz
6m - 50.115 MHz (CW/SSB)
Visit their new Web page at http://c21ti.madrono.net/index.html

CE0Y, EASTER ISLAND (SA-001). Operators Stan/SQ8X and Vicky/SV2KBS are planning to be active as CE0Y/homecall from here between October 31st and November 15th. They are looking for one or two operators to join them on this operation. Plans are to have two stations on the air. They understand that Easter Island (SA-001) is not on most wanted lists, but there is a demand by some European stations to work CE0Y (this will be their main goal). More details will be forthcoming.

CQ NEWS..... (Press Releases via Richard Moseson, W2VU, Editor of CQ Amateur Radio):
* CQWW Adds New "Xtreme" Category (Hicksville, NY - June 10th) - A new "Xtreme" category is being added to the CQ World Wide DX Contest to encourage the development of new technologies in amateur radio communi-cations in general and contesting in particular. According to CQ WW

Contest Director Bob Cox, K3EST, this new category has been established to allow amateurs to participate in the CQ WW contest while experimenting creatively with Internet-linked stations and other new technologies. "Contesters are often early adopters of new technologies," said Cox, "and we want to encourage this as a continuation of ham radio's pioneering spirit. However, many of these technologies are not currently permitted in any existing CQ WW categories. The Xtreme category will allow these stations to compete, but only with other stations using new technologies."

Scoring for logs submitted in the new category will be a mix of standard CQ WW scoring plus a more subjective score for level of innovation and originality, as determined by a panel of judges on the CQ WW Contest Committee. The highest-scoring entries in the single-operator and multi-operator categories will win the John Kanzius, K3TUP, Memorial plaques, sponsored by Tim Duffy, K3LR. Kanzius, a prominent contester, was also an experimenter who developed a potentially ground-breaking approach to cancer treatment in the course of his own, ultimately unsuccessful, battle with the disease.

The new category will take effect with the 2009 CQ World Wide DX Contest this fall. It was introduced to contesters at the 2009 Dayton Hamvention and received an immediate positive response. Complete details of the Xtreme category are in the June issue of "CQ" and are on the CQWW page of the CQ magazine website, <http://www.cq-amateur-radio.com/>

* "CQ" Propagation Editor Challenges Revised Solar Cycle (Hicksville, NY - June 10th) - "CQ" magazine's Propagation Editor is challenging the accuracy of the newest predictions on Solar Cycle 24. The revised prediction, issued in late May by a panel of solar experts, suggests a weak sunspot cycle with a peak in 2013. But "CQ" Propagation Editor Tomas Hood, NW7US, is asking "How Credible Are These 'Experts'?"

In an online commentary posted on the "CQ" magazine website, Hood notes that this same group of so-called "experts" has issued multiple predictions for this cycle already, all of which they now say are wrong, and asks why we should believe they're right this time.

"How much credibility should we grant to the panel of solar researchers and scientists that again releases a speculative prediction of the new Solar Cycle?" Hood asks, noting that NASA's lead representative on the panel says "it turns out that none of our models were totally correct."

Hood points out that, while the sun itself is millions of years old, scientists have been tracking solar activity for just a few hundred years. "In my view," he says, "it is pretty arrogant to postulate that mankind has any real understanding and handle on what the sun might do next."

"No one can postulate with any credibility just how intense the new cycle will be because there's no direct correlation between this solar minimum and any regular pattern of past minimums," Hood notes, adding, "If none of the models are totally correct, how are they making this current prediction with such dismal expectations? I'm not holding my

breath in favor of supporting any of the predictions at this point."
He also points out that there are already signs of "an awakening
Solar Cycle 24," and encourages hams to "enjoy the unique propagation
opportunities currently presenting themselves during this quiet phase,"
and to "prepare now for whatever the sun will do by honing your radio
skills...."
The complete text of Hood's commentary is on the CQ website at
<http://www.cq-amateur-radio.com> and may be accessed by clicking
the "online commentary" link on the lefthand side of the home page.

DXCC 2008 YEARBOOK. Many have received their yearbook this past weekend.
Keep watching your mailbox for it.

E51, SOUTH COOK ISLANDS (Update). Nigel, G4KIU, now active as E51SC from
the Island of Rarotonga (OC-013), was quite active this past weekend
on RTTY on 20 meters and PSK31. He moved to the South Cook Islands and
is expected to also be active on 80-10 meters mainly on SSB, RTTY, PSK31
and with some CW. Nigel announced this past week he will be an entry in
the RSGB IOTA Contest (July 25-26th) as a Single-Op. Direct QSLs are to
be sent to: Nigel Peacock, P.O. Box 880, Rarotonga, Cook Islands (via
New Zealand). Please send a SAE, plus 2 USDs or 2 new style IRCs. Any
direct cards received without the above items will be returned via the
Bureau. Bureau QSLs go to: E51SC via G4KIU/RSGB. **IMPORTANT** There is
no QSL Bureau in the Cook Islands. Cards without G4KIU on them will NOT
be received. Please "DO NOT" send direct cards to any G4KIU address in
England - they will NOT arrive. All E51SC contacts will be loaded to
LoTW about once a week. He does not use e.QSL at all.

F, FRANCE (LH Op). Operators Michel/HB9DLO, Pascal/HB9DWR and Pierre-Yves/
HB9OMI will be active as F/HB9LH/p from the Lac du Bourget lighthouse
(ARLHS FRA-827, DEP. 73, CP 73100, DDCF 7303) in Phare d'Aix-les-Bains,
between 0800z, June 20th and 1600z, June 21st. Activity will be on 3670,
7070 and 14270 kHz (+/- QRM) SSB, and CW and/or other bands according
to the propagation. QSL via HB9DLO, by the Bureau or direct. Visit their
Web page at: http://www.hb9lh.ch

FT/G, GLORIOSO ISLAND (Update). Didier, F5OGL, Glorioso 2009 team leader,
announced this past week that the Glorioso 2009 team gathered at Frank's,
F4AJQ, QTH last weekend (June 6-7th), with some F6KOP team members. During
these two days the whole time was spent tuning the antennas, teaching
DXpeditioners about their settings, and to coordinating all of the packages.
The final setup was 4 complete stations (each with at least a 800 watts PA)
that will be shipped to Glorioso's main island. They plan to be active
as much as possible during the 24 hour day. Their antenna system will
consist of 2 Spiderbeams for 20/15/10m and another for 30/17/12m. They
will also have an Inverted L for 160m, one V10, one V80 and one HF2V
for 80-40m. Some other vertical elements were packed as well as a K9AY
array receiving system. A 6 meters station will monitor the Magic band
but only into a G5RV antenna. The complete crew (and they hope it will
not change) consists of: Freddy/F5IRO, Yves/F5PRU, Jean-Marc/F5RQQ,
Sylvain/F5TLN, Philippe/F4EGS and three SIRPA agents: Florence (YL)

journalist, Yann (director and cameraman) and Didier (cameraman and sound engineer). They would like to thank Jeff/F6AOJ, Floyd/N5FG, Toshi/JA1ELY, Mike/UA0ME and Lee/ZL2AL for being their pilot stations. It was mentioned that they would also like to thank Floyd/N5FG and Jeff/F6AOJ for their big efforts in the back office. For the first time the callsign to be used for the Glorioso operation will be under the new French Antarctic and Austral Territories (TAAF) regulation and is expected to be FT5GA."
ADDED NOTE: As of 2005, the "Iles Eparses", Gloriosos, Tromelin, Juan da Nova and Europa Islands are now put under the new TAAF authority. All future callsigns, for these areas, will be issued with the following prefixes:
FR/G becomes FT#G Gloriosos FR/T becomes FT#T, Tromelin
FR/E becomes Ft#E, Europa FR/J becomes FT#J, Juan da Nova

No changes for FT#W (Crozet), FT#Y (Terre Adelie), FT#X (Kerguelen) and FT#Z (Amsterdam).

GB2, ENGLAND (LH Op). Members of the "Bittern DX'ers" will activate for the 8th time "Blakeney Mariner's Light" GB2BML for the ILLW 2008, on the weekend of August 15-16th. Reference numbers are: ENG-292 and WLOTA 1841). Activity will be on all HF bands using CW, SSB, RTTY, SSTV, PSK31, and 2m FM/SSB. QSL via M0CNP, direct or by the Bureau. Visit the Bittern DX'ers Web page at: http://www.bittern-dxers.org.uk

HG400, HUNGARY (Special Event). Sanyi, HA0HV, is currently active using the special callsign HG400HV through the end of the year (December 31st). Activity is to celebrate his town's 400th anniversary, which was established by the "hajduk" who called their settlement "Hajduboszormeny". The town Hajduboszormeny is in eastern Hungary with a population of approximately 32,000 people. Sanyi expects to operate on all HF bands plus 6 and 2 meters using CW, SSB and the Digital modes. QSL via HA0HV, by the HA Bureau or direct using the QRZ.com address.

IOTA NEWS.....
AS-117. (Special Event/WLOTA Op) Members of the Tokyo Dental College RC (JA1YUC) will activate the special event callsign 8J120TDC/2 from Mikomoto Island (WLOTA-2126) between July 26-28th. Activity will mostly be on 40/20/17/15 meters using CW and SSB which will include an entry in the RSGB IOTA Contest (July 25-26th). Special event callsign is to celebrate the 120th anniversary of the Tokyo Dental College. Mikomoto Island lighthouse WLOTA number will be activated for the first time. The lighthouse was also selected by the International Association of Lighthouse Authorities (IALA) as one of 100 lighthouses particularly important historically in various countries of the world. QSL via JA1YUC, by the bureau or address on QRZ.com.

EU-008. Michael, DL6MHW, will be active as MM/DL6MHW from the Ilse of Mull, Scotland, during the RSGB IOTA Contest (July 25-26th). QSL via DL6MHW.

EU-010. Members of the Workington and District Amateur Radio Club will once again be active as MS0WRC from Crannag Cottage, NE Coast Isle of Barra (IOSA OH-11, SCOTIA HI-02, WAB NF70, WLOTA 3126), Outer Hebrides, from September 26th to October 3rd. Operators mentioned are: Steve/G0MTD, Paul/M1PAF, Mark/M0WCR and Glyn/ M3XUH. Activity will be on all HF bands but mainly 80/40/20/17 meters SSB and VHF/UHF FM. The group also plans to travel around the island (active as mobile or portable) and possibly activate some rare WAB Squares. QSL direct to G0MTD or by the Bureau to either MS0WRC or G0MTD. More information can be found on Steve's Web page at: http://www.g0mtd.co.uk

EU-049. Theo, SV1EJD, will be active as SV8/SV1EJD while on vacation from Lesvos Island between July 12-22nd. Activity will be on 80-10 meters using SSB and RTTY. More details will be forth-coming on: http://www.sv1ejd.gr/lesvos.htm

EU-064. Operators Jean-Michel/F1UGV, Nicolas/F4BJW, Jean-Marc/F5NLR, Olivier/F5SRH and Henri/F5DBC will be active as TM5DUM from the Dumet Island (DIFM AT 018), June 20-21st. Activity will be on the HF and VHF bands, propagation permitting, using CW and SSB. For details on the island, go to: http://www.france-secret.com/dumet_art.htm QSL per operator's instructions.

EU-105. Theo, ON4ATW, informs OPDX: "The Rockall 2009 group will participate in the IOTA contest from Ile de Batz, Finistere North. To recover from the trip to Rockall and to start preparation for a new attempt, the crew and the support team will join the DXpedition class in a Multi-Operator, Low-Power effort. Team members include ON3DX, ON4AHF, ON4ATW, ON4HIL, ON4IA, ON6CC, ON6LEO, ON6NL, ON6ZU and ON7YT. The call used will be F/OT2A and QSL will go via the home call."

EU-128. Sebastian, DL1AXX, will be active as DL1AXX/P from the small Island of Warder (O-32 for the German Island Award), between July 11-18th. Activity will be on 80/40/30 meters CW only. QSL via DL1AXX.

EU-176. Jorgen, SM3CXS, will once again be active from Grimskar Island (Grid JP81) as SG3U, June 18-21st. Activity will be limited to his spare time, but look for him on 40-6 meters using CW and SSB. QSL via SM3CXS, direct or by the Bureau.

NA-055. Mike, W2IY, will be active as W2IY/1 from Mt. Desert, Maine, during the RSGB IOTA Contest (July 25-26th). QSL via W2IY, by the Bureau or eQSL.

NA-185. Operators Mike/K9AJ and Bruce/KD6WW will team-up and be active as homecall/VY0 from the Thomson Island (CISA New One!), the Canadian offshore Rankin Inlet, Nunavut, starting during their local Friday evening, July 31st through their local Monday morning, August 3rd. Using two stations, look for them on or

near the usual IOTA frequencies using CW and SSB. QSL via their
home callsigns.

OC-130. Maarten "Moj", PA3GZU, will be active as DU9/PA3GZU from
Mindanao Island (WLOTA 2803), July 6th through August 1st.
Activity will be holiday style on the HF bands with low
power. QSL via his home callsign, the Bureau is preferred.

JT, MONGOLIA. Giampiero, "Peter", I5NOC, will be active as JT1NOC between
now and June 29th. Activity will be on 80-10 meters, possibly 6m, using
CW, SSB and PSK. He was heard this past weekend on 20 meters CW and PSK31.
QSL via I5NOC.

NZART MEMORIAL CONTEST. This special contest is on the air to commemorate
those from our ranks who lost their lives in World War II. The contest is
open to all operators and it is held the first Saturday and Sunday evenings
in July. A total of six operating periods; three each evening of one hour
each from 0800-1100z. Complete rules are available at:
http://www.nzart.org.nz/contests/2009/2009-memorial-rules.pdf

OE100, AUSTRIA (Special Event). Members of the ICOM Radio Club Vienna
and the OVSV (Austrian IARU) will celebrate the 100th anniversary of the
Technical Museum Vienna by activating the special callsign OE100TMW
between June 17-21st, for 100 hours continuously on HF and VHF. During
this 100 hours, the Museum will be also open nonstop as they operate
this "radio-marathon". Every licensed amateur is invited to come to the
museum and operate the special station. Visit the following Web pages
for more info: http://www.hamradio.at/index.php?id=73
http://www.tmw.at/default.asp?al=Englisch&am=home

OH0, ALAND ISLAND. Operators Jukka/OH6LI and Kim/OH6KZP will be active
as OH0V from Geta (EU-002) during the RSGB IOTA Contest (July 25-26th)
as a Multi-Single entry. QSL via OH6LI.

PACIFIC DXPEDITION/TOUR. Gerben, PG5M, informs OPDX that he will be
activating three DXCC entities in the Pacific between September 6-27th.
His schedule is as follows:
September 6-7th: Fiji (OC-016); prefix 3D2
September 8-14th: Tuvalu (OC-015); Callsign will be T2G
September 15-16th: Fiji; prefix 3D2
September 17-23rd: Tarawa Island (OC-017), W. Kiribati; Callsign is T30G
September 24-27th: Fiji; prefix 3D2
The callsign is not known for Fiji, but he has requested 3D2G. This will
be an ultra light solo DXpedition and CW only. He will use an Elecraft K3,
and a 2x20m doublet plus vertical antennas. QSL via PG5M, by the Bureau
or direct. For direct requests, please enclose a minimum of 2 USDs for
return postage. More details and updates will be available on:
http://www.dx.to

QSL INFO AND NEWS.....
FT5YJ/VP8DLM/CE9XX QSL STATUS. Mehdi, F5PFP, informs that he has replied
to all the direct QSL cards except for those who are waiting for cards

for: OA0/FT5YJ (Machu Picchu) and FT5YJ/p (Omega Island). He states, "I hope to receive these QSL cards soon from the QSL printer. In case of a problem, send me an E-mail." His E-mail address is: f5pfp@...

IRCS AVAILABLE. QSL Manager Steve, N3SL, reports: "As you might expect with an expedition going on (ZK2V), I have over 100 IRCs thus far, and they need to be moved out while they're still good..... I'll be selling these for 1.35 USDs each, postage paid."

MM0DFV/p and GM0WRR/p were expected to be active this past weekend from the Loch Lomond and the Trossachs National Park (WFF reference number is GFF-009, park web info and map at: http://www.lochlomond-trossachs.org) during the WFF Green Days Contest <http://wff44.com/en/contest/>. The station's location was at the Loch Lomond shore in the Rowardennan Forest (WAB NS39, Stirling Council Area). EU Area is SC30 for the EPC awards. As special colorful QSL card will be printed.

QSL N8O via PO BOX 517, Jefferson, OH 44047. Operator Andy, N8OFS, was active as portable caboose for the AC&J (ACJR) Railroad's 25th anniversary from Jefferson, OH.

HV50VR STATUS/QSL MANAGER'S NEW CALLSIGN. A new callsign for the HV50VR QSL Manager has been announced and it is IV3KKW. The address is still the same since February 2008, but Alex changed his callsign in June 2009. All info on his QSL policy is on: http://www.qrz.com/db/IV3KKW Alex informs us that as of today (June 9th) he has no QSL cards pending for HV50VR; all were answered.

Lee, ZL2AL, reports: "All direct ZL7T QSLs have been answered and the last bunch was mailed today (June 8th). The status is 'current' and will be checked on a FIFO basis within a week as they arrive. I am answering the bureau cards as they come in. Many thanks to all for your kind comments on our operation. ADDED NOTE: ZM2M (East Coast Contesters) cards are being checked as above and are current."

QSLS VIA LOTW: K5D (some), LX5A and ZK2V

QSLS RECEIVED VIA MAIL: 3B8MM, 3D2AD, 3XD2Z, 9J2FM, A71CT, CX7CO, H40FN, JD1BMH, JW5LJA, K5D, KH8/N9YU, KH0UA, PS0F, T30M, T30XX, T33ZZ, TO3R, VK0BP, VU2NKS and ZL7T

QSLS RECEIVED VIA THE BUREAU: None reported this week!

S9, SAO TOME (AF-023). Just a reminder that Georg, DK7LX, will once again be active as S92LX and should be on the air by the time you read this through June 27th. Activity will be on 80-10 meters CW only. QSL via his home callsign, direct or by the Bureau (E-mail Bureau requests after the DXpedition to: dk7lx@...). A log search will be available at: http://www.logsearch.de

SILENT KEY. Glenn, K3SWZ, informs OPDX that Tony Malesic, K3BHL (ex-CP1JV, XH8HJ and HI8XDF), suffered a massive stroke at his home in Harrisburg, PA,

on Friday, June 5th, and became a Silent Key (SK) two days later at the age of 67 in a local hospital. He was retired from the State Dept. and lived in the Washington D.C. area during his last years with D.O.S. before retirement. His health had been failing over the last few years and he was inactive in Ham Radio. Tony provided the first RTTY QSOs ever from CP1 and XW8 during his tours there and was most active during his 3 year tour in HI8. OPDX and its readers would like to send out our deepest sympathy to Tony's family and friends.

SV9, Crete. Ron, WB2GAI, will be active as SV9/WB2GAI/P between August 21st and October 5th. This will be his third Dxpedition to Crete. Ron will be celebrating his 50th year in ham radio. Activity, as always, will be on CW and on 80-17 meters. All QSLs via the Bureau.

T7, SAN MARINO (6m Op). Members of the Amateurs Radio Republic of San Marino (A.R.R.S.M.) will activate their club station T70A on 6 meters June 20-21st, primarily looking to give those who need it for a new country on the band. Operators Filippo/IK4ZHH, Giorgio/IZ4AKS, Max/IZ4DPV, Michele/IZ4GWE, Stefano/IW2MJQ and Vittorio/I4YSS will compose the team that operates from the club station. They will use 3 antennas beamed in different directions. QSL via A.R.R.S.M. RADIO CLUB, P.O. Box 77, 47890 SAN MARINO, REPUBLIC OF SAN MARINO.

TO7, MAYOTTE (AF-027). Willi, DJ7RJ, is expected to announce plans to be active as TO7RJ from Mayotte soon. QSL via DJ7RJ. More details are forthcoming.

TZ, MALI (Update). Ed, W0SD, updates OPDX that the TZ6EI DXpedition by operators Ed/W0SD, Holly/N0QJM and Arliss/W7XU will be primarily on six meters, June 26th through July 5th. The group will be on 50.103 MHz. Ed states, "We have our TZ6EI license and VISAs in hand and our necessary immunizations. We will be bringing backup equipment and have permission to operate from the roof of the Hotel Mande in Bamako. There will be RTTY operation concurrent with the six meter operation. There will be CW and SSB operations at night after six meter sporadic E is over. For HF, we are planning to operate on 30, 20 and 17 meters. The complete details are on the web site." QSL via W7XU. DX QSL cards need 2.00 USDs and a SAE or current IRCs. USA cards should have an SASE. Contributions to defray expenses can be sent with the QSL card. The logs will eventually be uploaded to LoTW. The Web page for the TZ6EI Mali operation is: http://w0sd.com/mali/mali.htm

UR, UKRAINE. Members of Ternopil Amateur Radio Club operated on June 12-14th as UR4BZB/p from Medobory National Preserve (URFF-015=2C URDA TE-013). QSL via UT1BC. Information about new award "W-UR-FF" can be found at: http://www.islands.org.ua/wurff/index_e.html

V3, BELIZE. Per, LA5OPA, will be active as V31NP from Ambergris Cay (NA-073) between July 26th and August 12th. Activity will be mostly on 20 meters SSB and PSK31. He will also operate on the other bands, if propagation is open to Europe. Per will be using 100 watts with a Buddipole antenna system. QSL via LA5OPA, by the Bureau or direct.

WP4, PUERTO RICO (LH Op). Members of the Caribbean Amateur Radio Group
(WP4CRG) will be active as W4L from the Arecibo Lighthouse (ARLHS PUR-001,
TWLHD WLH KP4-001), Puerto Rico (NA-099, USI PR-006S, WLOTA 2802) between
1200z, August 14th and 2359z August 23rd. This activity will include the
International Lighthouse/Lightship Weekend (ILLW, August 15-16th). Look
for them on the following frequncies:
SSB - 7150, 14225, 18122 and 28350 kHz
SSTV - 14230 kHz
QSL direct to: CARG, PO Box 140031, Arecibo, PR 00614-0031.

YU, SERBIA (Special Prefixes). Look for Serbian operators to use the
following special prefixes YT25, YU25, YU2009, YT2009, YU09 and YT09
between June 12th and July 12th. Activity is to help promote the 25th
Summer Universiade Belgrade 2009 sporting event (July 1-12th). This is
an Olympic type sport competition with 9000 students from 140 countries
competing in 15 sports and 208 disciplines. The official Universiade
Belgrade 2009 Web is at:
http://www.universiade-belgrade2009.org/eng/Contents/ContentDefault.aspx?temp=0&sid=50

10013. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-06-14 22:11:01 UTC
From: Paul Dunphy
Topic: 9721 Message: 10013

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Jun 14 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 165 Issued at 2200Z on 14 Jun 2009
IA. Analysis of Solar Active Regions and Activity from 13/2100Z
to 14/2100Z: Solar activity was very low. No flares were observed.
The visible disk remained spotless.
IB. Solar Activity Forecast: Solar activity is expected to be very
low for the next three days (15 - 17 June).
IIA. Geophysical Activity Summary 13/2100Z to 14/2100Z:
The geomagnetic field was mostly quiet.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be mostly quiet for the next three days (15 - 17 June).
III. Event Probabilities 15 Jun-17 Jun
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF green
IV. Penticton 10.7 cm Flux
Observed 14 Jun 068
Predicted 15 Jun-17 Jun 068/068/068
90 Day Mean 14 Jun 070
V. Geomagnetic A Indices
Observed Afr/Ap 13 Jun 003/004
Estimated Afr/Ap 14 Jun 005/005
Predicted Afr/Ap 15 Jun-17 Jun 005/005-005/005-005/005
VI. Geomagnetic Activity Probabilities 15 Jun-17 Jun
A. Middle Latitudes
Active 10/10/10
Minor storm 01/01/01
Major-severe storm 01/01/01

10014. What happened?

Yahoo group: DX-IS (2009)
Date: 2009-06-15 13:05:49 UTC
From: Paul M Dunphy
Topic: 10014 Message: 10014

Bands in really bad shape this AM. 4-5 weak signals on 20 and
that's it. Any reports of flares? I can't seem to find anything
reported on the Internet, and the WWV numbers seem about the same as
they have been for a week.

73, Paul VE1DX

10015. Re: [DX-IS] What happened?

From: CSM(r) Gary Huber
Topic: 10014 Message: 10015

Paul,

I'm observing the same thing here in W9-land on 20M PSK-31! No DX on the waterfall, no DX on the stations heard on the Broad Band Decoder (similar to CW-Skimmer). I've rotated the beam (TH-7 at 50') in all the DX paths and called CQ with no responses. Last week it was Thailand, Hong Kong, China, Taiwan, Guam, Philippines, etc rolling in short path at 1300 UTC....

Maybe it'll get better later today???

73 es DX,

Gary - AB9M

Hi Gary,

Glad to know it isn't just me. Sure "feels" like one of those
days after a significant flare when the bands are dead. If you are
not hearing anything on PSK31, which should be able to pull very weak
signals out, then something is obviously wrong. Guess I can't put
off mowing the lawn any longer!

Hi Paul,

20M in really bad shape here too, no DX and very few european signals.Southern Europe seems to be hearing SE Asia and 8Q7TB but not even a whisper in London!

I check that page daily, Bob, but I haven't yet figured out if the decrease in solar wind is a good or bad thing! Those who are there discussing the physics of what is going on (or more to the point, what is not going on) are above me. Most seem to be PhD types in their areas of expertise.

Historically we wanted a steady solar wind, at least as I understood it. When the solar wind fluctuated (usually because of a CME), it caused Earth's GMF to fluctuate and created abnormal currents in the auroral electrojet. Basically I'm talking about the GM storms that took the bands out for a few days when we got a flare, which happened fairly often up until a couple of years ago.

The absolute value of the solar wind is a parameter I never followed, not understood how it would impact propagation. From what I can tell reading between the lines, the solar wind is just another "thing" that has been observed to decrease in the recent past. Is this correct? And are the conclusions they are drawing that it is another indication that we are in for extended low solar activity?

My original post was an old school query. Last night the bands were good (given a flux of 68.) This morning there was almost zero propagation. I was asking if anyone knew if we had a flare overnight. Whatever attenuated things this AM seems to have subsided as I'm now hearing EU about as good as any other day.

Either way, am I correct in my guess that a low absolute value in the velocity of the solar wind is not a good thing for the long term outlook? Or did you mean that it was quiet and therefore it was unlikely we had a flare? Not that we can do anything about this stuff, but it's interesting to try and understand it.

Solar wind is something that I have never investigated, but I am all ears...

Condx have been down here too, with 20m closing after sunset, though it is winter...

S92LX has been making it in on 40m in the morning but sigs not so great and I haven't heard ZY0F yet on any band.

There must be some Sunspots on their way, must be...

I just got my copy of the 2008 DXCC Yearbook. On page 3 it says:

"2008 saw the return to the air of Bouvet Island, which had been off the air since 2002, with an excellent operation led by DX veteran co-leaders Bob Allphin, K4UEE, and Ralph Fedor, K0IR. Over 86,000 QSOs were made during this operation."

How did I miss this? I need Bouvet! I never even heard Petrus when he was there.

It's a misprint, I would guess! Bob and Ralph were the K5D guys, and indeed Petrus didn't make 86,000 QSOs from Bouvet. Some day someone will got to Bouvet because it is creeping up there on the most wanted list. I believe the last serious DXpedition there was by a group of LA operators in early 1990. Since that there have only been two "part time" operations, with the lone op having other duties and only being on sporadically.

There was obviously some sort of a mix-up there. The only recent operation
from Bouvet that I can find was Petrus from late 2007 to Feb. 2008 as 3Y0E.

K5D was in 2009 though, not 2008.

If someone could put on an operation to Bouvet of the same quality as K5D,
I'd be very happy. Outstanding DXpedition!

:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Jun 16 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 167 Issued at 2200Z on 16 Jun 2009
IA. Analysis of Solar Active Regions and Activity from 15/2100Z
to 16/2100Z: Solar activity was very low. A 10 degree filament
(S15E30) disappeared between 15/2309Z and 16/0104Z. A slow moving
CME was visible in the SOHO/LASCO imagery associated with this
event. The visible solar disk remains spotless.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 15/2100Z to 16/2100Z:
The geomagnetic field was at quiet levels the last 24 hours.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to remain at quiet levels for the next three days (17-19
June).
III. Event Probabilities 17 Jun-19 Jun
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF green
IV. Penticton 10.7 cm Flux
Observed 16 Jun 068
Predicted 17 Jun-19 Jun 068/068/068
90 Day Mean 16 Jun 070
V. Geomagnetic A Indices
Observed Afr/Ap 15 Jun 004/004
Estimated Afr/Ap 16 Jun 003/004
Predicted Afr/Ap 17 Jun-19 Jun 005/005-005/005-005/005
VI. Geomagnetic Activity Probabilities 17 Jun-19 Jun
A. Middle Latitudes
Active 05/05/05
Minor storm 01/01/01
Major-severe storm 01/01/01

Pittsburg?

Nah, I'll let it pass. I'll let the other obvious wisecrack pass as well.

But I'm afraid you'll have to wait until sometime in the fall or next winter to see that hockey game.

Meanwhile, they've had to fish the Stanley Cup out of Mario's swimming pool... again...

But I sure wish I could accompany the Cup on its travels this summer with the players. Especially when it goes oversees. What a Special Event DX station that operation would make!

I spent hours and hours on air waiting for propagation to Petrus on Bouvet (needed for a new one) and it was never forthcoming....

I was one of the fortunate to work him on Marion but that wasn't a new one for me as I had ZS8MI from 1990...oh well them's the breaks...

I am glad to see that people are still able to get cards from old logs of yester year.

Keep at 'em,

73, Lance - VK6DU

10049. Re: Bouvet 86.000 QSOs?

Yahoo group: DX-IS (2009)
Date: 2009-06-18 09:32:01 UTC
From: Art Burke
Topic: 10026 Message: 10049

For weeks I didn't hear a peep out of Petrus. Then, just a couple or three days before he wrapped up operations, I worked him, very much in the clear, on 20 SSB - apparently the only band and mode he worked.

While he was on ZS8 I never heard him at all. Still need that one as well.

Lance,
Did you try the "about" and "contact" buttons at the bottom of the web page?
Maybe the contact email will send you more info.

Many thanks Criag, Frank and Phil.

The site seems to be quite interesting, with stats and charts, but there is no indication anywhere about who is responsible for it, so that always makes one suspicious. It could be a fly by night type of website, here one day gone the next...

If Peter gets this, he may want to consider putting his call and some aim or intention on the web page.

It's a good concept perhaps he is looking to get a sponsor or someone to take up the page...

Btw. Click on the video on the main page (Watch Video), gosh, there are some clever people around....the mobile log idea is a good one...

SB DX ARL ARLD024
ARLD024 DX news

This week's bulletin was made possible with information provided by K1SFA, NC1L, RX9WN, VE1RSM, the OPDX Bulletin, DXNL, 425 DX News, The Daily DX, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

MALTA, 9H. Giorgio, IV3EPO will be QRV as 9H3EP from June 23 to 29. Activity will be on 40, 30, 20, 15 and 10 meters using mostly CW. QSL to home call.

PHILIPPINES, DU. Gerard, F2JD is QRV as DU1/G0SHN and is here for about five months. He plans to be active from various islands while here. QSL via F6AJA.

ST. BARTHELEMY, FJ. Conny is QRV as FJ/DL1DA ands has been active on 20 and 17 meters using CW around 1900 to 2000z. QSL via DL1DA.

LIECHTENSTEIN, HB0. Tina, DL5YL and Fred, DL5YM will be QRV as HB0/home calls from Masescha from June 20 to July 2. Activity will be at various times on all HF bands using CW and possibly RTTY. QSL to home calls.

MONGOLIA, JT. Giampiero, I5NOC is QRV as JT1NOC until June 29. Activity is on 80 to 6 meters using CW and SSB. QSL to home call.

MARIANA ISLANDS, KH0. Tony, JA6CNL is QRV as KH0N from Saipan, IOTA OC-086, until June 23. This includes an entry in the All-Asian DX contest. Outside the contest, he is active mostly on 80, 30, 17 and 12 meters using CW. QSL to home call.

NORWAY, LA. Special event callsign LJ2T is QRV until June 28 in conjunction with the International Museums weekend. Activity is on 160 to 2 meters using CW, SSB, AM, FM and various digital modes. QSL via LA5EAA.

NETHERLANDS, PA. Members of VERON section 54 are QRV as PH100EL until July 12 to celebrate the 100th anniversary of the first flight of the aviation pioneer Charles count de Lambert. QSL via PD0PVQ.

AUSTRIA. OE. Operators from the Technical Museum Vienna are QRV as OE100TMW during its 100th anniversary until June 21. Activity is on all HF bands, including VHF. QSL via operators' instructions.

SWEDEN, SM. Jorgen, SM3CXS is QRV as SG3U from Grimskar Island, IOTA EU-176, until June 21. Activity is on 40 to 6 meters using CW and SSB in his spare time. QSL to home call.

POLAND, SP. Operators from the Long Distance Radio Communications Club of Poland are QRV as SP50DXC until June 30 to mark 50 years of the SP DX Club. QSL via bureau.

GREECE, SV. Dago, DJ5KZ is QRV as SV8/home call from Lesvos Island, IOTA EU-049, until June 30. QSL to home call.

SAN MARINO, T7. Operators Filippo, IK4ZHH, Giorgio, IZ4AKS, Max, IZ4DPV, Michele, IZ4GWE, Stefano, IW2MJQ and Vittorio, I4YSS will be QRV as T70A on June 20 and 21. Activity will be mostly on 6 meters from three different locations. QSL via bureau.

REPUBLIC OF THE CONGO, TN. Nicolas is QRV as TN5SN and has been active on 6 meters and on RTTY on 20 meters around 2100z. QSL via IZ1BZV and LoTW.

ASIATIC RUSSIA, UA9. Alik, RX9WN is QRV as RX9WN/0/m until June 21 from Kharancy Island. This is a new IOTA. QSL via operator's instructions.

SERBIA, YT. Various Serbian stations are using special prefixes YU2009, YT2009, YU09, YT09, YT25 and YU25 until July 12 to promote the University Games 2009 taking place in Serbia. QSL via operators' instructions.

CALLSIGN CORRECTION. As reported in DX news ARLD023, Bob, VE1RSM is QRV as home call/VY1 from Whitehorse, Yukon Territory until August 17. Activity is on all HF bands, particularly 40, 30 and 20 meters, using CW and SSB during his evenings and weekends. QSL to home call.

THIS WEEKEND ON THE RADIO. The All Asian DX CW Contest, NCCC Sprint CW Ladder, 1st ARR BPSK63 Contest, Digital Pentathlon, SMIRK CW Contest, Feld Hell Sprint, AGCW VHF/UHF CW Contest, West Virginia QSO Party, Kid's Day Contest and the DIE Contest will certainly keep contesters busy this weekend. The Run for the Bacon QRP CW Contest is scheduled for June 22. The SKCC CW Sprint is scheduled for June 24. Please see June QST, page 80 and the ARRL and WA7BNM contest web sites for details.

10056. Re: DX anywhere web site

Yahoo group: DX-IS (2009)
Date: 2009-06-19 10:47:17 UTC
From: Art Burke
Topic: 10048 Message: 10056

A few weeks ago, someone convinced me I should sign up for Twitter. I did. On the negative side, they won't let me remove my profile - the site always says it's too busy. On the plus side, I never post anything, so there's nothing to follow.

A couple of days ago, I received an e-mail that so-and-so was "following" me on Twitter. That guy needs to get a life! How can you "follow" someone's activities if they're never posting what they're doing!

Ona real DX note - looks like ZK2V is packing it in today. He did a pretty darn good job for a one-man dxpedition. I managed to snare him on two new bands, plus RTTY.

Marsha slept in the shack last night, hoping to snare him on SSB at some point. He did finally go to SSB - early this morning on 17M! The wrong band at the wrong time for this part of the world. She did get him on CW on one band and RTTY on a couple of others, so it wasn't a total bust.

Amidst the poor condx (SFI at 68), some strange stuff has been happening off and on. EY was booming in here the other night (EY7AD) on 20 SSB, specifically calling NA.

Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

4O - Boris, 9A2JY will be active as 4O/9A2JY from Montenegro on 20-28 June. Expect him to operate holiday style on 20 and 40 metres SSB. QSL via home call. [TNX 9A6AA]
8Q - Vlad, RA9LR will be active as 8Q7LR from the Maldives (AS-013) from 21 June to 2 July. He plans to operate almost exclusively digital, with some SSB on 10-40 metres. QSL via UA9LP, direct or bureau. [TNX UA9LP]
9A - Jernej, S59KM will be active as 9A/S59KM from Ugljan Island (EU-170) from 25 June to 2 July. He plans to operate CW and SSB on 40, 20, 15, 10, 6 and 2 metres. QSL via home call, direct or bureau. [TNX S59KM]
A3 - Bob, A35RK will remain on Vava'u (OC-064) until 27 June and will move permanently on the island on 1 December. His licence address has been officially changed and effective from 18 June all QSOs with A35RK will be from Vava'u (no longer from Ha'apai, OC-169). QSL via W7TSQ. [TNX The Daily DX]
G - Special event station GB2RI will be active on 21-24 June from the National Exhibition Centre in Birmingham, England for the 100th Rotary International Convention. The station will operate on 80-10 metres from 7 to 17 UTC daily. QSL via G3LUW, direct or bureau. [TNX IZ0FKE+
I - Matteo, IV3YNB will be active holiday style as IV3YNB/p from Grado Island (EU-130, IIA GO-001) from 27 June to 11 July. He will operate CW and BPSK31 QRP. QSL via home call, direct or bureau. [TNX IV3YNB]
IS0 - A group of operators from the Sardinia QRP Club will be active as IQ0QP/p from the lighthouse at Capo Bellavista on mainland Sardinia (EU-024) from about 18 UTC on 27 June until about 16 UTC on the 28th. They will operate SSB and CW on +/- 7021, 7031, 7091, 10105.5, 10115.5, 14031, 14061 and 14321 kHz. QSL direct (see qrz.com). [TNX IS0VSU]
OE - Celebrating the 100th anniversary of the Vienna Technological Museum (http://www.tmw.at/), special event station OE100TMW will

be activated on 17-21 June for 100 hours continuously. QSL via
OE1XIC, bureau preferred. [TNX OE8KDK]
PY - PT2TJ and PT2OP plan to operate from Sao Joao lighthouse on Maiau
Island (SA-041) on 3-8 July (requested callsign PX8M) and from
Aracagi lighthouse on Sao Luis Island (SA-016) on 8-11 July
(requested callsign ZX8A). [TNX PT7WA]
SV - Antonios, SV2FLQ will be active as SY2O on 27-29 June. This
special Greek callsign is for the Olympus Marathon
(http://www.olympus-marathon.com), the trail running event held
annually on Mount Olympus. QSL via SV2FLQ (direct only).
T7 - Vittorio/I4YSS, Filippo/IK4ZHH, Stefano/IW2MJQ, Giorgio/IZ4AKS and
Max/IZ4DPV will participate in the IARU Region-1 50Mhz Contest
(20-21 June) as T70A from the radio club of San Marino's IARU
Society (http://www.arrsm.org/). They will use three antennas
beaming different directions. QSL to T70A. [TNX IZ4AKS]
V2 - Jimmy, W6JKV will be active as V29JKV from Antigua (NA-100) from
24 June to 3 July. He will concentrate on 6 metres, but he will
also operate on the HF bands. QSL via home call. [TNX OPDX
Bulletin]
W - Bill/WD2E, Sofia/AI4KQ and Paul/AA2C will be active as WD2E/4 from
the Dry Tortugas Islands (NA-079) from 24 June to 1 July. QSL via
WD2E, direct or bureau. [TNX www.rsgbiota.org]
W - Mark, KO1U will be active as KO1U/p from Cousins Island (NA-137)
on 25 June. He will have verticals for 80-10 metres, and a
3-element for 6 metres. QSL via home call, direct or bureau. [TNX
www.rsgbiota.org]
YV - The 20-24 June YW9A activity from Amazonas State [425DXN 945] has
been postponed to 23-27 July. QSL via YV5AJ. [TNX The Daily DX]

10059. Re: [DX-IS] What happened?

Yahoo group: DX-IS (2009)
Date: 2009-06-19 17:55:01 UTC
From: Deacon Dave
Topic: 10014 Message: 10059

Pittsburgh took the cup ... congratulations!

The B's took the Vizenza [goal tending]
The B's took the Norris [best defenseman]
The B's took the ??? [best coach]

What they didn't take speaks volumes ... the Cup and any offensive awards.

Well, maybe I can invoke the Red Sox Motto ... Next Year ??

Now, about Bouvet ... I have 3Y0C both base station and mobile Jan 2001. Easy ... if you believe that ....

Subject: Re: [DX-IS] What happened?

I'll turn OFF HAM RADIO for a good Boston Bruins [Hockey] game against Pittsburg anytime!!

Would that count towards anything??

DD, W1MCE
[Bruins fan for 50+ years] [Ham for 55 + years]

Subject: RE: [DX-IS] What happened?

The lords of propagation were in downtown Pittsburgh observing the Stanley Cup parade/celebration, naturally.

If only they were baseball fans, in addition to hockey and football fans...
sigh

What happened?
Posted by: "Paul M Dunphy" list_dx@... ve1dx
Date: Mon Jun 15, 2009 6:07 am ((PDT))

Bands in really bad shape this AM. 4-5 weak signals on 20 and
that's it. Any reports of flares? I can't seem to find anything
reported on the Internet, and the WWV numbers seem about the same as
they have been for a week.

73, Paul VE1DX

10060. ARLP025 Propagation de K7RA

ZCZC AP25
QST de W1AW
Propagation Forecast Bulletin 25 ARLP025
>From Tad Cook, K7RA
Seattle, WA June 19, 2009
To all radio amateurs

SB PROP ARL ARLP025
ARLP025 Propagation de K7RA

This week's bulletin was written by Carl Luetzelschwab, K9LA. Carl is filling in for your regular reporter Tad Cook, K7RA.

Silent Key - I was saddened to read that Jim Tabor KU5S passed away on May 27. Jim was the driving force behind Kangaroo Tabor Software, which offered propagation prediction programs such as CapMAN and WinCAP Wizard, programs to help monitor the NCDXF/IARU beacons, and several other propagation-related packages. Jim also contributed propagation software to the CD-ROM bundled with the ARRL Antenna Book. I personally enjoyed many e-mail exchanges and several QSOs with Jim, talking about various propagation and ionospheric issues.

Summary for the Week - I bet you have this memorized: ''Solar activity was very low throughout the reporting period, and geomagnetic field activity was at quiet levels during most of the reporting period.'' Enough said?

This Solar Minimum - The first sunspot region of Cycle 24 occurred on January 4, 2008. Since then, though, Cycle 24 spots have been few and far between. A good summary of this solar minimum can be made in two statements. The first statement is that the duration of this solar minimum is unusual compared to the other solar minimums in our lifetime. That's because from the minimum between Cycle 17 and 18 onward, solar minimums have been roughly two years. Thus we've only been exposed to ''short'' solar minimum periods. A look at all history, though, shows a different story, and brings us to the second statement. This solar minimum, which is going on three years, is pretty much average in duration compared to all history. What this all says is the Sun has been highly variable throughout recorded history.

Noctilucent Clouds Return - As reported at spaceweather.com on June 1, the first noctilucent clouds (NLC) of the 2009 season were

sighted over Russia on May 27. NLCs typically appear about 20 days prior to the summer solstice, increase quickly to a high summer level, and then disappear about 50 days after the summer solstice. These clouds are mostly a high latitude phenomenon, and are believed to be composed of ice crystals. VHF radars see very strong echoes from these clouds, and since they are at mesospheric heights (80 to 90 km), they are also known as polar mesosphere summer echoes (PMSE). These clouds are hypothesized by JE1BMJ and others to be responsible for 6m propagation across high latitudes (for example, from the East Coast of North America to Japan) during the northern hemisphere summer. This mode of propagation has been dubbed Summer Solstice Short-path Propagation (SSSP). Check out page 34 of the February 2009 issue of WorldRadio Online (available free at www.cq-amateur-radio.com/wr_back_issues.html)
for a general discussion of PMSE and SSSP and for references in the technical literature. To reiterate, SSSP is still just a theory, but the occurrences of QSOs appear to match the occurrence pattern of PMSE.

Getting Ready for Glorioso - Beginning on July 9 and continuing through July 28, a French team expects to activate this extremely rare DXCC entity (it's in the Top 5 in the Most Wanted Survey as listed in the January/February 2009 issue of The DX Magazine). Glorioso is located in the Indian Ocean near the northern tip of Madagascar, and enjoys higher-than-usual MUFs (maximum usable frequencies) even at solar minimum due to the robust equatorial ionosphere. Unfortunately the North American end of the path will suffer from low MUFs due to a combination of solar minimum and a summer month. The result of this is that 15, 12, and 10 meters will likely not produce many QSOs between Glorioso and North America. My recommendation is to concentrate your efforts on 40, 30, 20, and 17 meters. And if you need Glorioso for an all-time new one for DXCC, be sure to work this DXpedition - it will probably be quite a while until it is again activated.

Cycle 24 Predictions - If you dig through the technical literature, you'll discover that there are more than 50 predictions for Cycle 24. They range from a low smoothed sunspot number of 40 to a high of 185. Why are there so many predictions? That's a simple question to answer - solar scientists do not fully understand the process that generates sunspots, and thus many different methods have been used to make a prediction. Does this mean they're guessing and should be admonished for not being correct? I personally don't think so. What we're seeing is the scientific process being used. A prediction is made using a certain method, and Cycle 24's progress (or lack of progress) allows scientists a means to test their theory. That's how science works when we don't understand something. Will we ever figure this out? I can't answer that question, but I recently read an interesting NASA Headline News story (science.nasa.gov/headlines/y2009/17jun_jetstream.htm?list45339) saying scientists announced that ''a jet stream deep inside the Sun

is migrating slower than usual through the star's interior, giving rise to the lack of sunspots.'' Perhaps this will be an important clue to help our understanding of the sunspot process.

For more information concerning radio propagation, see the ARRL Technical Information Service at http://www.arrl.org/tis/info/propagation.html. For a detailed explanation of the numbers used in this bulletin, see http://www.arrl.org/tis/info/k9la-prop.html. An archive of past propagation bulletins is at http://www.arrl.org/w1aw/prop/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://www.arrl.org/qst/propcharts/.

Instructions for starting or ending email distribution of this bulletin are at http://www.arrl.org/w1aw.html#email.

Sunspot numbers for June 11 through 17 were 0, 12, 0, 0, 0, 0, and 11 with a mean of 3.3. 10.7 cm flux was 69.3, 69, 68.2, 68.1, 67.4, 68.3, and 67.8 with a mean of 68.3. Estimated planetary A indices were 3, 2, 4, 6, 4, 3 and 3 with a mean of 3.6. Estimated mid-latitude A indices were 2, 1, 3, 4, 4, 4 and 1 with a mean of 2.7.

10064. off subject (kinda)

Yahoo group: DX-IS (2009)
Date: 2009-06-21 03:22:09 UTC
From: Dale Cole K8TS
Topic: 10064 Message: 10064

After some real issues with IE I am considering switching to firefox. Currently running xp home. What can I expect if I change-- Scott--will all your programs work with it? Will it effect LOTW? Scary to do, but every one says it is better program. Does not mention email Do not want to be holding a bag of crashed disks when FR/G comes on the air in July.

You may reply off the board to keep it "clean"

(Thanks to xp I now have an empty mail box :(

TIA

10065. All Asia Contest

Yahoo group: DX-IS (2009)
Date: 2009-06-21 11:44:03 UTC
From: Art Burke
Topic: 10065 Message: 10065

Nothing like a good contest to help clear out the air!

It's now Sunday morning (11:30 UTC) and JA stations are booming in again on 20 (same as Saturday morning). Ae from the JAs, the band seems rather quiet. It's a real treat to hear that part of the world screaming into the SE US.

10066. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-06-21 22:11:01 UTC
From: Paul Dunphy
Topic: 9721 Message: 10066

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Jun 21 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 172 Issued at 2200Z on 21 Jun 2009
IA. Analysis of Solar Active Regions and Activity from 20/2100Z
to 21/2100Z: Solar activity was very low. No flares were observed.
New Region 1022 (S27E15) was numbered during the period. The region
emerged on the disk as a 2-spot, bi-polar Bxo beta spot group. The
region has been quiet and stable.
IB. Solar Activity Forecast: Solar activity is expected to remain
at very low levels for the next three days (22 - 24 June).
IIA. Geophysical Activity Summary 20/2100Z to 21/2100Z:
The geomagetic field was at quiet to unsettled levels. A brief
period of sustained negative Bz, from about 20/2100Z to 21/0200Z,
resulted in unsettled geomagnetic conditions observed at all
latitudes.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be mostly quiet for the next three days (22 - 24 June).
III. Event Probabilities 22 Jun-24 Jun
Class M 01/01/01

The Ohio/Penn DX PacketCluster
DX Bulletin No. 913
BID: $OPDX.913
June 22, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NC1L, NJ1Q, N3CR, NG3K, WP3GW, N4AA & QRZ DX, K8YSE, A35RK, DK8JB, DL7MAE & The DX News Letter, DX World of Ham Radio Web Site, F5NQL & UFT, I1JQJ/IK1ADH & 425 DX News, I2MOV, IZ0FKE, OK2BOB, Pete's-DX-Newsdesk, PT7WA, RSGB IOTA Web Site, VA3RJ & ICPO and VHF-DX-Portal (MMMonVHF) for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 14th-June, through Sunday, 21st-June there were 215 countries active. Countries available: 3A, 3B8, 3D2, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5N, 5T, 5V, 5Z, 6W, 6Y, 7P, 7X, 8P, 8Q, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9U, 9V, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FR, FS, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HH, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J8, JA, JD/m, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, S2, S5, S7, S9, SM, SP, SU, SV, SV/a, SV5, SV9, T32, T7, TA, TF, TG, TI, TK, TL, TN, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V8, VE, VK, VP2M, VP2V, VP8, VP9, VR, VU, XE, XU, XW, YA, YB, YI, YL, YN, YO, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3B8, MAURITIUS (AF-049). Luc, I3LDP, will be active from here between June 29th and July 11th. The callsign was not provided. Activity will be on the HF bands and 6 meters using CW and SSB. His equipment will be an Icom IC-7000, a vertical for 40-10m and a vertical dipole for 6m. Grid Loc. is LG89vt. QSL via his home callsign. ADDED NOTE: Luc plans to look for a good location for an EME operation next year (2010).

6M REPORT (Hearing 6m DX): [edited] "Greetings -- After I predicted the 6m summer Sporatic E's season to begin on 7th June 2009, it appears the season has started in FN20 as of 10th June 2009, for the low power operators. At 8pm I was working EM 26-40-46-70 in La, Al, and Fl, with 100 watts and a thrown up 2 element Quad. On June 11th, I was hearing Costa Rica and Fla. On June 12th, at 6pm I was working YV4, HI3, PJ2, and Fla with many strong signals on the band. On June 15th, I was working into W1 land FN30, FN31 and FN41 at the end of the VHF contest. On June 16th, at 4pm I began working Fla and Ala along with J39BS Grenada, ON4IQ, HI3TEJ, VP2M and WP4 stations, all with S9 signals into FN20. On Thursday, 18th June, at 3pm I began working into EM 32-63-64-74-82-94-95....AL, GA, NC and SC. The band started out short to SC, NC and TN. It opened up with many stations and strong signals into Fla. I even worked a couple mobiles with loops on the roof and a few stations using Halos. For the early risers on Saturday 20th June 2009, as this is being written, I worked into Europe after 7am with stations CN8LI, CT3FQ Madeira Island and CT3KU/p. EA's, CU1EZ, CN8SG, and CT3DZ were also heard or worked up until about 1230z. All this with 2 elements hanging on my 2 element tribander boom!! And the season has just begun!! I have a 4 element 6m Quad being built so I can be heard a little better. 6m openings have been very thin in FN20 and this has brought out all the operators finding 6m on their new radios. I had worked several halos, dipoles, and ground plane stations with the band open. The real jewel during Sporatic E season is Bermuda....that little dot in the middle of the Atlantic. I can't wait to work Ed in Bermuda, VP9GE. It is a great thing to hear so many new DX stations on six meters. With relaxed regulations on power and antennas, I expect we will hear many more stations working into the U.S. at the bottom of the sunspot cycle with one small spot showing and no C class or better solar flares to report. For size and performance, I don't think you can beat the Quad loop or beam. I also use a 6 element yagi pointed towards Florida and get similar reports with just 2 elements. Four elements will just make things easier for me. Thanks for producing the propagation and DX reports. They are well read at this location...."
Yours truly,
Larry Lilly Sr. N3CR
Lehighton, Pa FN20dv

8Q, MALDIVES. By the time you read this, Vlad, RA9LR, should will be active as 8Q7LR from Hudhuranfushi Island, North Male Atoll (AS-013), until July 2nd. Activity will be on 40-10 meters, mainly Digital but with some SSB. He will be use 100 watts into a DX-88 eight band vertical. QSL via RA9LR, direct or by the Bureau.

A35, TONGA (Update). Paul, A35RK, on Wednesday, June 17th, informed OPDX that lots is happening in Tonga for him. He told us that "A35RK is moving to a new QTH. On December 1st, the whole family is moving to Vava'u (OC-064)." He will be departing Vava'u on June 27th, and between then and December 1st, Paul will be moving back and forth between the island groups. Paul adds, "I will get my yagi antennas up in Vava'u ASAP, but no firm date commitment is possible. In the meantime, it will be 100w to a G5RV, whenever I am actually in Vava'u. I will drop the A35RK/p callsign and revert to the straight A35RK,

as soon as I make an official change-of-address notification to the radio licensing authority. What all that means is that A35RK (OC-169) is essentially QRT because the first shipment to Vava'u will include all of my radio gear and all of my tools. It is highly unlikely that I will do any more operating from Ha'apai." Paul states that he has made 80,000+ QSOs from there over the past 13 years, and this should be enough to satisfy the IOTA crowd." Bob, W7TSQ, will remain his manager, and he will modify Paul's QSL cards to indicate IOTA OC-064. Future LoTW logs will likewise be modified, as will QRZ.com info as soon as the move is official. On a personal level, Paul states, "This is a big move 'up' for us. The whole family is looking forward to the improved living conditions in Vava'u (ie, better schools for the kids, better telecom and shipping connections, better 'shopping', reliable mains power, etc.). Please wish us luck in this new endeavor." OPDX wishes Paul the best of luck in his new QTH.
ANOTHER UPDATE FROM PAUL: "It's official: my A35RK license address has been changed by the Radio Licensing Officer. I will stop signing A35RK/p immediately. All contacts with A35RK, beginning 0001z, June 18th, 2009, will be from Vava'u Island, IOTA OC-064, grid square AH31ai. A35RK from Ha'apai, IOTA OC-169 is QRT."

CT8, AZORES. Operators Jan/DL7JAN and Egon/DL2IX will be active as CT8/homecall from Faial Island (EU-175) between August 21-31st. Activity will be on 80-6 meters using CW, SSB and RTTY. QSL via their homecall, by the bureau or direct.

CY0, SABLE ISLAND (Update). The following was received by John, K1XN, author of the GoList, from Randy, N0TG (edited): "A challenge for us is to keep the weight allowance under control. The charter aircraft limits us to 1400 pounds total weight. That includes body weight for the team (3), personal items, equipment, antennas, computers, food, EVERYTHING. The weight creeps upward pretty fast and must be watched carefully. It looks like the low bands will still be very productive ones as Cycle 24 lingers. I personally am pleased and excited to have the Battle Creek Special going with us. There seems to be lots of interest on 160 by the EU's and others as well. One thing that we are 'not' is experienced RTTY operators. However, the recent few weeks we have equipped our stations with the necessary computer interface, software, etc. and are becoming a bit more enlightend on RTTY operation. We've made a number of contacts and are pleased to have this set up and ready. NCDXF in particular encouraged us to include RTTY. Web traffic continues to increase from world-wide QTH's. Certainly, we know CY0 not one of the most rare spots..but it does look like many are looking for it to fill in a mode/band combo, and hopefully it'll be an interesting event and promote activity for our wonderful hobby. Thanks..we appreciate the support; we can't express that enough!! We look forward to working you. http://www.CY0dxpedition.com
73, Randy - N0TG/CY0 and team (Murray-WA4DAN, Ron-AA4VK)"

D44, CAPE VERDE. Michel, HB9BOI, is now active as D44TOI from Sal Island (AF-086) until June 30th. Activity over the past weekend as been mainly 20 meters SSB (around 14260 kHz), and some 17 meter SSB. QSL via his home

callsign.

DU, PHILIPPINES. Gerard, F2JD, will stay in the Philippines for the next five months and hopes to get his DU1/G0SHN licence extended. While there he plans to activate some IOTA islands during his stay. QSLs direct or via the REF Bureau to F6AJA.

DXCC NEWS (DXCC Annual List Questions). Bill Moore, NC1L, ARRL Awards Manager, explains this week on the "ARRL's Century Club Awards Weblog" <http://www.arrl.org/blog/Century%20Club%20Awards> questions that the DXCC has been receiving pertaining to the DXCC Annual listings. If you were wondering why your award totals were not listed, please read the info on the above Web page before contacting the DXCC.

FT/G, GLORIOSO ISLAND. As this bulletin was being prepared, there were no new developments announced this past week. The 2009 Glorioso FT5GA operation still seems to be on track and scheduled for July 9-28th.

GB2, ENGLAND (Special Event). Look for special event callsign GB2RI to be used from the "National Exhibition Centre" in Birmingham, England, during the 100th Rotary International Convention, between June 21-24th (0700-1700z daily). Kenwood Radio of the UK, has supplied a 200 watt transceiver, and the local Withall ARC are providing a 100 ft. tower topped with a 3 element yagi. Activity will be on 80-10 meters. USA stations are suggested to watch 14293 kHz. QSL direct or by the RSGB to G3LUW.

HB0, LIECHTENSTEIN. Fred/DL5YM and his XYL Tina/DL5YL will once again be in Masescha and will be hiking here during the daytime hours between now and July 2nd. During the nighttime hours they will be active on CW signing HB0/homecall on all bands. They may also be active on RTTY, if they add an interface to their IC-725 and a 40m wire to their equipment.

IOTA NEWS.....
AS-047. Operators Mitsu/7N4AGB, Hase/JK1EBA, Shoji/JJ1JGI, JA1XEQ and Nakayama/JA1KJW will be active as homecall/6 from Kita-Daito Island (JIIA AS-047-001, WLOTA 0928), JA6 Okinawa Prefecture, between June 25th and July 5th. Activity will be on 160-6 meters, but mainly on the lower bands using CW and SSB. QSL via their home calls, direct or Bureau.

AS-159. Ozer, TA2RC, will be active as YM0T from Kefken Island during the RSGB IOTA Contest (July 25-26th) as a Single-Op/All-Band/ Mixed/24H/Low-Power entry. QSL via TA2RC.

EU-034. Operators Harald/ES1LS, Arvo/ES1QV, Juri/ES2EZ, Toivo/ES2DJ and Mati/ES2QN will be active as ES0U from Saaremaa Island, Estonia, during the RSGB IOTA Contest (July 25-26th). QSL via the Bureau.

EU-048. Members of the French Sevran F5KKD ARC will be active as F5KKD/p from Belle Ile Island (DIFM AT-015, WLOTA 0078, DPF 06) between

September 11-14th. Activity will be on the HF, VHF and UHF bands.
Operators mentioned are: David/F4FDA, Mickael/F4FFZ and Bastien/
F4EYQ. QSL via the Bureau. Visit their Web page at:
http://iota2009.crxcluster.com

EU-049. Operators Cuagn/OK2BOB and Vilem/OK2BC will be active as
SV8/homecall/p from Lesvos Island (Lesbos, Mytilini) between
0700z, June 22nd and 0400z, July 2nd. From Grid Loc. KM39,
activity will be on all bands using CW and SSB (Primary bands
are 40/30/20/17 meters). Suggested frequencies are:
CW - 1833, 3511, 7011, 7018, 10108, 10114, 10118, 14018,
14040, 18078, 18088, 21018, 24908, 24912, 28018, 28033,
and 50090-50097 kHz (+/- QRM)
SSB - 3773, 3795, 7055, 7088, 14255-14270, 18155, 21255,
24955, 28485 and 50125-50135 kHz (+/- QRM)
QSL via their home callsigns.

EU-064. Jan, ON7JA, will be active as F/ON7JA from Ile de Noirmoutier
(DIFM AT-020, WLOTA 1224), July 25-27th. Activity will include
an entry in the RSGB IOTA Contest (July 25-26th). QSL via his
home callsign, direct or by the Bureau. PLEASE NO eQSL!

EU-068. Members of the French Sevran F5KKD ARC will be active as F5KKD/p
from Sein Island (DIFM AT007, WLOTA 2721, DPF 06) between July
24-27th. Activity will be on the HF, VHF and UHF bands, as
well as an entry in the RSGB IOTA Contest (July 25-26th).
Operators mentioned are: David/F4FDA, Mickael/F4FFZ and Bastien/
F4EYQ. QSL via the Bureau. Visit their Web page at:
http://iota2009.crxcluster.com

EU-123. Iain, MM0TFU, will be active as MM0TFU/P from Blackwaterfoot,
Isle of Arran (IOSA CL01, SCOTIA CS14), Scotland, between
July 24-27th. Activity will include the RSGB IOTA Contest
(July 25-26th). Outside the contest he will be active on
all HF bands plus 6 meters (Grid IO75IM). QSL via his home
callsign, direct or by the Bureau.

EU-130. Matteo, IV3YNB, will once again be active as IV3YNB/p from
Grado Island (IIA GO-001, MIA MI-039) between June 27th and
July 11th. His activity will be QRP on CW and BPSK31 on as
many bands as possible, randomly during the daytime. QSL via
his home callsign, by the Bureau or direct ("free, don't send
money"). Look for more info on his Web site at:
http://iv3ynb.splinder.com/

NA-137. Mark, KO1U, will be active from Cousins Island (USI ME041S,
Cumberland county), Maine, between 1000z, July 25th and
2300z, July 26th. He also plans to activate Little John
Island (Also NA-137 and Cumberland county, but USI ME065S)
during the same day. Mark will use verticals for 80-10m,
and a 3 element yagi on 6 meters with 100 watts. Look for
activity on or near the IOTA frequencies with his focus

mainly on the RSGB IOTA Contest either on CW or SSB. QSL
via his home callsign.

EU-149. Operators Alan/G0RCI, Pete/M0USY, Harry/G7DEH, Alan/G4VUA
and Brian/M0JNC will be active as GB0YG from Holy Island
(Ynys Gybi), Wales, between June 24-29th. Activity will be on
the HF bands using CW and SSB. QSL direct only to G0RCI.

EU-170. Jernej, S59KM, will be active as 9A/S59KM from Ugljan Island
(ACIA IC-339, CIA-53, IOCA CI-134, MIA MC-441) between June
25th and July 2nd. Activity will be on 60/40/20/15/10/6/2
meters using CW and SSB. QSL via his home callsign, direct
or by the Bureau.

NA-081. Operators Ken/W8ND, Butch/N8CHS and Kelly/K8MCN will be active
as W8ND/VE1 from Big Tancook Island (CISA NS012, WW Loc.
FN74WL), Nova Scotia, between July 23-26th. Activity will
include the RSGB IOTA Contest (July 25-26th). QSL via K8MCN,
direct or by the Bureau.

NA-099. Members of the Fajardo Amateur DX Club, KP4DXC, will be active
from Culebra Island (USI PR002, WLOTA 0549), between 1500z,
June 26th and 2300z, June 28th. The group will use basic radio
equipment for this operation such as basic antennas like
dipoles and home brewed Buddistick antennas for 40-6 meters
and also a vertical for 80m. Jose, KP4VP, will be one of the
operators and expects to operate mostly CW and Digital modes.
QSL via KP4VP or KP4DXC, direct or by the Bureau. Look for
more information and their operating frequencies at:
http://kp4dxc.tripod.com

SA-048. Members of the 4M5DX Group will be active as YW5P from Patos
Island sometime in July (no official dates were given).
Activity will be on all bands and modes. Look for updates on:
http://www.yw5p.4m5dx.info

IS0, SARDINIA (EU-024). Flaviano, I2MOV, informs OPDX that he will depart
for Sardinia on July 20th, and will be active for about two months as
IS0/I2MOV. His QTH will be Dolianova 20km north from Cagliari. His Grid
Locator is JM49OJ. He will mainly be active on CW using an IC706MKIIG
and a vertical antenna for 7 bands (40/30/20/17/15/12/10m). He will also
be active on 6 meters, mainly in CW, using a home-made dipole. QSL via
his home callsign, by the Bureau or direct. Visit his Web pages at:
http://i2mov.too.it --or-- http://www.webalice.it/flav_i2mov

KH4, MIDWAY ISLAND (Update). Co-leaders Tom/N4XP and Dave/WB4JTT have
posted the following press release (Number 4 -- dated June 16th)(edited):
"Planning and arrangements have now become happenings. Equipment and
loaner gear is being shipped or staged for shipment later. We have added
three new operators to the team, James/9V1YC, Arnie/N6HC and Tom/ND2T.
With these three additions come years of experience and only add to the
overall team experience now in place. The makeup of the team is as follows:

KH7U, W8GEX, W8CAA, W6OSP, N4XP, N1DG, AA4NN, W6KK, N7CQQ, DJ9ZB, N4PN, WA7NB, EA1IR, K9CT, WB4JTT, ND2T, N6HC, and 9V1YC. This month we are highlighting three more team members. You can read all their history under 'Meet the ops part III' at: http://www.midway2009.com/meettheops3.html Many of the team members were at Dayton and took advantage of being together by conducting their first meeting as a group. They also enjoyed meeting the DXers that are always in attendance. We are still accepting contributions and all donations received are greatly appreciated. Remember, contributing is easy and fast and can be forwarded several ways. You can visit the <www.midway2009.com> Web site and use Pay Pal or a credit card or by the U.S. Mail. All contributions are noted on the Web site and depending on the level of support will be noted on the DXpedition QSL. And the Midway Store is always open and available for your purchase of Midway souvenirs. Our Web site also now shows take-offs to numerous areas around the world. Take a look at these and see your direction." Remember, this DXpedition is scheduled for October 9-19th.

OY, FAROE ISLANDS. Polish operators Mek/SP7VC and Janusz/SP6IXF will be active as OY/homecall between August 10-16th. Activity will be on 160-6 meters SSB and 2m (Random 144355.0 MHz) meteorscatter FSK441 during the Perseid meteor shower. Operations will be from the IP61 grid square. They plan to have amps for every band and will be using the following antenna system: HF - Spiderbeam, R-7 and INV-L for 160-80m + beverages
2m - A 2M5WL yagi
6m - 6 element yagi
QSL via their home callsigns.

PA123, NETHERLANDS (Special Event). Members from the Dutch R31 M/N Limburg will be active as PA123OLS from St. Sebastianus, Neer, between June 29th and July 12th. Activity is taking place during a (123) Dutch/Belgium historical event. The suffix "OLS" stands for "Oud Limburgs Schuttersfeest", an annual shooting match between 160 shooting clubs (citizen force) from the Dutch and Belgium provinces of Limburg. The team of Neer won last year, so the event will takes place in Neer. Look for operations on CW, SSB, RTTY and PSK with activity on all bands. QSL via PE1NCP, direct or by the Bureau.

PH100, NETHERLANDS (Special Event). Members of the Vereniging voor Experimenteel Radio Onderzoek (VERON - Section 54 - PI4ETL) will be active as PH100EL between now and July 12th. Activity is to celebrate the 100th anniversary of aviation in the Netherlands by pioneer Count Charles de Lambert. QSL via PD0PVQ. A special award is available (100 Years of Aviation in Etten-Leur) with mode endorsements. See details on QRZ.com.

PX8/ZX8, BRAZIL (IOTA and LH Ops). Operators Orlando/PT2OP and Jurandir/ PT2TJ plan to activate the following islands and lighthouses during the first part of July:
July 3-8th: Requested callsign PX8M; Lighthouse of Sao Joao (WLOTA LH-213, ARLHS BRA-093) on the Island of Maiau (DFB MA-01, IOTA SA-041), in the State of Maranhao; Grid Locator: GI78nr

July 8-11th: Requested callsign ZX8A; Lighthouse of Aracagi (ARLHS
BRA-005) on the Island of Sao Luis (DFB MA-07, IOTA SA-016,
DIB MA-01), in the State of Maranhao; Grid Locator: GI77wn
QSL information was not provided.

QSL INFO AND NEWS.....
QSLS VIA LOTW: H44MY and OD5/OK1MU

QSLS RECEIVED VIA MAIL: 5T5DC, 7Z1UG, C91TX, CE0Y/9A4X, CE0Y/LA6IKA,
FO/N6JA, FW5RE, HC8/UX0HX, HH7/N3BNA, HI9/EA3WL, J75KG, K5D, N3DXX/6Y5,
OX3MC, OZ8ABE, PS0F, S04R, ST2EB, T31DX, T32YY, TA2RC, TO2T, TO3R,
TO5FJ, VP2V/NY6X, VP2V/SP3IPB, VX1RNS/p and YJ0KS

QSLS RECEIVED VIA THE BUREAU: 4O60BH, 4X1IM, CT1ETX, CU3EJ, DA0HQ, DF0HQ,
DL0DG, DU67RG, EA9/EA7RU, ES1QD/5, FS/K1XM, HB9HQ, HH2FYD, IQ5FI, IR6D,
IR9K, IR9MDC, IZ1MHV, K0TV, K4ZW, KG9N, KP4ED, LZ5Z, LZ9W, NU1AW, OH1JO,
OH3OJ, P49Y, PJ2/DL8OBQ, PY5EG, RA6GW, RI1GK, RK3SWB, RK6CM, RU3VD,
RU9AC, RZ1OA/1, RZ9HWA, SP2PHA/2, SV2/YO3JW/P, SV2BS, T93J, TU5JM, UA9BA,
UE1OTA, UE1OTA/1, UE3EDA/1, UE6LHT, VC3J, VE3SY, W4RM, WU3A and XT2SE

SV5, DODECANESE. George, K4IIO/GM0IIO, will be active as SV5/GM0IIO from
the Island of Rhodes (EU-001) between July 1-8th. Activity will be on 20
meters CW/SSB using a FT-857D w/100 watts into a 20m Par Electronics
End-Fedz. Watch 14025 and 14305 kHz. QSL via GM0IIO.

TY, BENIN (Update). In close cooperation between the DAGOE Foundation,
Mercy Ships and 5 Dutch radio amateurs, a new DXpedition to Benin is on
its way. The special event callsign of the "Benin 2009 Radio Expedition"
will be TY1MS which will take place between October 10-27th. Operators
mentioned are Ad/PA8AD, Arie/PA3AN, Henk/PA3AWW and Bas/PD0CAV. As
mentioned earlier, the team will also participate in the 2009 CQWW DX
SSB Contest (October 24-25th). QSL Manager is PA3AWW (direct or by the
Bureau). An online QSL REQUEST service will be available. PLEASE NOTE:
QSL cards that are requested via direct mail or InterNet, will be shipped
around Christmas 2009. The main purpose of this DXpedition is to raise
funds for a Mercy Ships project in Benin, provide help to the charity
project and activate Benin on HF. Look for more details about the TY1MS
DXpedition, the project and Mercy Ships at: http://www.benin2009.com

TO8, ST. BARTHELEMY. Operators Ruediger/DK8YY and Ingolf/DL4JS will be
active as TO8YY between June 29th and July 7th. Activity will be on
160-10 meters with an emphasis on the lower bands (160/80m). QSL via
DH7WW. Once active, check for updates on the ON4KST chat page at:
http://www.on4kst.com/chat/start.php

VP2V, BRITISH VIRGIN ISLANDS. Operators Art/N3DXX and Steve/KN5H will
be active as VP2V/KN5H from Tortola during the CQWW DX SSB Contest
(October 24-25th) as a Multi-Single entry. QSL via KN5H. Look for CW
and RTTY activity before the contest.

YW0, AVES ISLAND. On the YW0A Web page, it was announced that this
DXpedition has been rescheduled due to the hurricane season over the

Caribbean Sea. No dates were announced. For updates, watch:
http://yw0a.4m5dx.info/home.html

Dale,

You can have both Firefox and IE installed at the same time.

If you go to a website that doesn't work in Firefox, then open it in IE.

I always only have one of them open at any given time....more out of habit than anything...

Just tried LOTW in firefox and initial indication are positive.

Haven't uploaded anything via it yet but search and view seem fine though I have just noticed firefox handles some of the window views a little differently....

To: N3FJP_Software_Users; DX-IS
Subject: [DX-IS] off subject (kinda)

After some real issues with IE I am considering switching to firefox. Currently running xp home. What can I expect if I change-- Scott--will all your programs work with it? Will it effect LOTW? Scary to do, but every one says it is better program. Does not mention email Do not want to be holding a bag of crashed disks when FR/G comes on the air in July.

You may reply off the board to keep it "clean"

(Thanks to xp I now have an empty mail box :(

TIA

Heck, I have IE7, Firefox and Netscape 7.2 all installed at the same time. I can run them all at the same time, too. My preference is Forefox, Netscape and IE7, in that order. Netscape 7 has the advantage of an e-mail program, which I really like.

I answered Dale off the reflector, but for others considering Firefox, I have been using it for several months with no problems. LOTW & N3FJP software all work fine. Additionally I don't have the hang-ups that I was having with IE. It is also noticeably faster than IE. I also changed to Mozilla Thunderbird for my e-mail program. I like it much better than either Outlook or Outlook Express.

I use it all the time, Dale, and it is faster and better than
IE. You need to have IE on your system so Microsoft can do its
security updates to XP, and there is 1 in 5000 web sites that are set
up so they work better with IE. Let FireFox install and when it asks
you if you want it to be your default browser, let it. It will want
to import bookmarks (IE calls them favorites), cookies, etc. from
IE. Let it do that too. It will take a day or so to get used to it,
but once you do, you'll like it better.

I use it with LoTW and have done so for over a year. No problems at all.

Now . . . as to mail, I'm not sure. I use an email program
called Eudora and have used it for 15+ years. I can't see why
Outlook Express would not live happily with FireFox. You might want
to wait for more opinions on the email aspect as I never use Outlook
Express (Microsoft's default mail program.) Surely others do, and
use it with FireFox installed, but best to verify this.

Dale,

Like others have reported, you can have multiple web browsers installed and running on your computer. There should be no conflicts among them. I have been running FireFox and IE together for years.

The only issue you need to be aware of is the Microsoft Automatic Updates. This system is based on IE and will launch that browser to complete its tasks. You don't want to remove IE if you are using this feature (I do).

Regarding FireFox, there are many nifty add-ons available. One of them is Adblock Plus. This free product blocks 99% of the distracting advertising found on many websites. I consider this a requisite on my computer.

Another handy add-on is NØHR's Propfire. This keeps the current propagation numbers (SF, A, K) numbers on the lower status bar in the right corner.

There's hundreds of other add-ons available to do other specific tasks as well. For example, I use the FireFTP Client to manage my website via FTP and I installed a PDF downloader that allows me to choose what to do when I click on a PDF file (download, open, save, etc).

When you install FireFox it will ask whether to import your bookmarks and/or email address book. This is an opportunity to "start fresh" or import your existing settings if you have it setup "just like you want it."

It looks like Paul concurs with my experience with these browsers.

Yes, I have found NO problem running Outlook Express and FireFox. That is how my computer is set. They are two separate programs and can be start/stopped independent of each other.

Date: 2009-06-22 22:11:01 UTC
From: Paul Dunphy
Topic: 9721 Message: 10077

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Jun 22 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 173 Issued at 2200Z on 22 Jun 2009
IA. Analysis of Solar Active Regions and Activity from 21/2100Z
to 22/2100Z: Solar activity was very low. Region 1023 (S22E29) was
numbered this period. The region emerged rapidly on the disk, and
was classified as a 3-spot, Bxo beta sunspot group. Only A-class
x-ray activity was observed from this region. Region 1022 (S26E01)
decayed to an Axx sunspot group. The region was quiet and stable
during the period.
IB. Solar Activity Forecast: Solar activity is expected to be very
low for the next three days (23 - 25 June).
IIA. Geophysical Activity Summary 21/2100Z to 22/2100Z:
The geomagnetic field was quiet.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be mostly quiet for the next three days (23 - 25 June).
III. Event Probabilities 23 Jun-25 Jun
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF green
IV. Penticton 10.7 cm Flux
Observed 22 Jun 068
Predicted 23 Jun-25 Jun 070/070/070
90 Day Mean 22 Jun 070
V. Geomagnetic A Indices
Observed Afr/Ap 21 Jun 006/007
Estimated Afr/Ap 22 Jun 003/005

10078. QSL help needed

Yahoo group: DX-IS (2009)
Date: 2009-06-23 01:02:18 UTC
From: Alan Leith
Topic: 10078 Message: 10078

I may have asked this before but if I did, I didn't get the answer I was looking for.

I worked 8Q7AZ back in '82 on 80M and have never worked another 8Q7 on that band. I never got a QSL from Romesh and see that KZ8Y was listed as his manager in 2001. Does anyone have an e-mail address for KZ8Y or know of another QSL route?

Also, in 1998 I worked 8Q7IO on 30M and have never been able to get a card for that one either. Can anyone point me in a direction for this one?

Thanks, in advance for any help.

10082. 6 meter DXing

Yahoo group: DX-IS (2009)
Date: 2009-06-23 17:09:44 UTC
From: John Geiger
Topic: 10082 Message: 10082

The past 24 hours have been great for close in DXing on 6m. The best opening we have had since January 31 of this year. Here is the stuff outside of NA I have worked yesterday and today:

UTC CALL GRID Notes
2041 8R1DB GJ06 Guyana-new country and grid on 6m
2130 NP3CW FK68 Puerto Rico
2224 J39BS FK92 Grenada
2227 NP4A FK68
2242 HI3/LY3UM Dominican Rep. Got his QSL yesterday for 2008 QSO
2302 WP2B FK77 Virgin Islands New Grid
1613 XE2WWW EL06 Loud as usual
1614 XE1GRR DL80
1615 5J0BV EK92 San Andreas Is-New country and grid on 6m
1622 TI2KD EK70 Costa Rica
1624 XE2FGC DL92 Very loud here
1633 XE1JP EK09

Rig: Yaesu FT450 at 100 watts
Ant: MFJ 3 element Yagi at 30 feet

And today isn't over yet!

73s John AA5JG

10083. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-06-23 22:11:02 UTC
From: Paul Dunphy
Topic: 9721 Message: 10083

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Jun 23 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 174 Issued at 2200Z on 23 Jun 2009
IA. Analysis of Solar Active Regions and Activity from 22/2100Z
to 23/2100Z: Solar activity was very low. No flares occurred during
the past 24 hours. Region 1023 (S25E15) was the only spotted group
on the disk and was stable and quiet.
IB. Solar Activity Forecast: Solar activity is expected to be very
low for the next three days (24-26 June).
IIA. Geophysical Activity Summary 22/2100Z to 23/2100Z:
The geomagnetic field was quiet during the past 24 hours.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be mostly quiet with a chance for unsettled levels for
the first day (24 June) due to possible coronal hole effects.
Activity levels are expected to be quiet for the second and third
days (25-26 June).
III. Event Probabilities 24 Jun-26 Jun
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF green
IV. Penticton 10.7 cm Flux
Observed 23 Jun 068
Predicted 24 Jun-26 Jun 068/068/068
90 Day Mean 23 Jun 070
V. Geomagnetic A Indices
Observed Afr/Ap 22 Jun 002/003
Estimated Afr/Ap 23 Jun 002/004
Predicted Afr/Ap 24 Jun-26 Jun 007/008-005/005-005/005
VI. Geomagnetic Activity Probabilities 24 Jun-26 Jun
A. Middle Latitudes
Active 15/10/10
Minor storm 05/05/05
Major-severe storm 01/01/01

10085. RE: [DX-IS] QSL help needed

Yahoo group: DX-IS (2009)
Date: 2009-06-24 03:30:45 UTC
From: John Klim, N3KHK
Topic: 10078 Message: 10085

Checkout http://www.425dxn.org/425/425-n599.html

From the site

QSL VIA KZ8Y ---> Dave, KZ8Y is the QSL manager for 4S7AR, 4S7AVR,
4S7NMR,
N8DCJ/8P6, 8Q7AZ & TG9NX and apparently does not accept bureau cards. The
QSL
bureau is going to return the cards back to the original bureaux
marked
either "unclaimed" or "QSL Direct Only". [TNX OPDX Bulletin]

I hope this helps,

From: John Peters
Topic: 10078 Message: 10086

KZ8Y is listed at QSL Mgr in the Winter 2001 Callbook.

The oper was
Romesh Lokuge
H Four Winds
Majeedi Road
Male
Maldives

I'm sure all the old callbooks must be on the internet. I have quite a few in the CD/DVD piles.

10091. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-06-24 22:11:01 UTC
From: Paul Dunphy
Topic: 9721 Message: 10091

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Jun 24 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 175 Issued at 2200Z on 24 Jun 2009
IA. Analysis of Solar Active Regions and Activity from 23/2100Z
to 24/2100Z: Solar activity was very low. No flares occurred during
the past 24 hours. Region 1023 (S23E01) continues to be the only
spotted region on the disk and was stable and quiet.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 23/2100Z to 24/2100Z:
The geomagnetic field ranged from quiet to active levels during the
past 24 hours. In particular, active periods were observed between
0300-0900Z and 1800-2100Z. Solar wind signatures showed a change to
slightly disturbed conditions beginning around 0300Z and lasting
through the period: the magnetic field intensity increased, the Bz
component of the solar wind showed occasional moderate fluctuations
with peak negative values around -10 nT early in the day, and around
-20 nT later in the day. In addition the spiral angle phi indicated
two possible sector boundary changes. During the last 12 hours of
the period solar wind velocity was gradually increasing. The
signatures late in the day were consistent with the onset of a
coronal hole high speed stream.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be generally unsettled with a chance for active periods
for the first day (25 June) as the current disturbance continues.
Activity levels are expected to decline to generally quiet levels
for the second and third days (26-27 June).
III. Event Probabilities 25 Jun-27 Jun
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF green
IV. Penticton 10.7 cm Flux
Observed 24 Jun 067
Predicted 25 Jun-27 Jun 068/068/068
90 Day Mean 24 Jun 070
V. Geomagnetic A Indices
Observed Afr/Ap 23 Jun 005/004
Estimated Afr/Ap 24 Jun 012/011
Predicted Afr/Ap 25 Jun-27 Jun 008/008-005/005-005/005
VI. Geomagnetic Activity Probabilities 25 Jun-27 Jun
```

10095. Re: [DX-IS] QSL help needed

Yahoo group: DX-IS (2009)
Date: 2009-06-25 16:52:18 UTC
From: Ted Melinosky
Topic: 10078 Message: 10095

Hi Lance:

I handle the cards of the active DX contesters EY8MM and 4L8A. Over 36,000 so far.
Every 2-3 months, I get a package from the W1 QSL Bureau and 80% of the cards are for these two stations, 20% for me.
These contesters want me to send them ALL cards received, so about 2-3 times a year, I put together 2 to 4 pound packages of Bureau and regular cards for them.
We don't have a surface mail option for overseas here in the USA, so they go by "First Class International Mail" (Air Mail). That costs me about $25-35 per package.

EY8MM provides me with nice picture cards. I use my Canon printer to produce a simple card for 4L8A.

Another one of the costs is sending all the Bureau cards out via the ARRL outgoing system. $10 per pound. Keeps going up too.

It was my choice to reply to ALL incoming cards, Bureau or not. I can do this, because of the generosity of so many stations, who include an extra buck or two.
Only rarely does a direct card without SASE. In the end, it costs me just a few extra dollars out of pocket as all the costs are not recovered. But it's my choice. However, I can understand why some managers will NOT handle Bureau cards. _I hope they remain in the minority_, but I can understand their feelings.

Best wishes,

Ted Melinosky K1BV

10096. World Radio

Yahoo group: DX-IS (2009)
Date: 2009-06-25 17:18:45 UTC
From: WB6PSY/N6AXK
Topic: 10096 Message: 10096

Some time back World Radio was sold to CQ magazine, as stated:
"Armond Noble, N6WR, Publisher of WorldRadio, said that at the age of 74 the time had come for him to retire."
....but, in yesterdays mail came a publication free sample called "Military" much in the same format as World Radio and to my surprize, the publisher is Armond Noble. So much for retirement.....

10097. Re: [DX-IS] QSL help needed

Yahoo group: DX-IS (2009)
Date: 2009-06-25 17:41:14 UTC
From: John P.
Topic: 10078 Message: 10097

Ted,

I am fortuate to have graciously receive a card from 4L8A back in Feb '08. Always when sending a QSL overseas I include $2.00 to cover costs. In USA with a QSL manager I always include $1.00.

Of course, if instructed otherwise, I follow those directions.

I always include a self-addressed envelope, stamped if USA reply address. I do not put either callsign on the outside of the envelope. BUT, on the inside flap, I write the callsign info, date & time, and note amount enclosed. Thus if my card becomes separated from the return envelope the information is readily available.

10098. Re: [DX-IS] World Radio

Yahoo group: DX-IS (2009)
Date: 2009-06-25 18:28:18 UTC
From: Tom Anderson
Topic: 10096 Message: 10098

The CQ folks at Dayton told me that WorldRadio is now available free to anyone through the CQ web site.

As an aside, CQ magazine ended up extending my CQ subsription until like 2020 to replace the issues of World Radio I lost.

From: Alan Leith
Topic: 10078 Message: 10099

For years, Lance, I have not accepted QSLs for VA1S via the bureau. First, I had to pay to have them shipped to me and second, I had to pay to ship them to the bureau. When I no longer was a member of the bureau, I simply informed all the DX bulletins of my decision and stated why. I was willing to respond to direct requests with return postage, however.

Now I am a bureau user again but the VA1S logs have gone missing and I still have thousands of cards and no logs. Pity!

A QSL manager that does not accept cards via the bureau? How can this be?

Subject: RE: [DX-IS] QSL help needed

Checkout http://www.425dxn.org/425/425-n599.html

From the site

QSL VIA KZ8Y ---> Dave, KZ8Y is the QSL manager for 4S7AR, 4S7AVR, 4S7NMR,
N8DCJ/8P6, 8Q7AZ & TG9NX and apparently does not accept bureau cards. The QSL
bureau is going to return the cards back to the original bureaux marked
either "unclaimed" or "QSL Direct Only". [TNX OPDX Bulletin]

I hope this helps,

You're one of the "good guys" John.

Most of those who contribute a little extra are DL's and JA's.

I just wonder what the reaction will be when the US airmail rate goes over $1. Right now, it's 98c and the Post Office is hurting.

10101. TU2FQ

Yahoo group: DX-IS (2009)
Date: 2009-06-25 21:36:54 UTC
From: Alan Leith
Topic: 10101 Message: 10101

Have just worked TU2FQ on 20M CW under awful conditions -- 339 to him and 449 from him. With QSB and all, I did not get much of his transmissions, in terms of his name or QTH. So I went to QRZ and then to Buckmaster and got no results. So I put the call into the cluster lookup and found he was reported last week on several occasions. What I didn't expect to see was the drivel from Europeans about the status of his legality.

What if the guy just arrived in the Ivory Coast and has just gotten on the air? Perhaps he isn't as interested in making it known he is on the air as he is in enjoying ham radio. Perhaps, on the other hand, he is indeed a pirate. But I have not read anything from the government of the Ivory Coast branding him as such. I am annoyed and dismayed by the reaction from Europe, although I am quite certain there will be others in other parts of the world who will be so loose-lipped.

On another point, after I signed (nay, even before I signed) there were several Europeans who called me on the TU2s frequency, where I had answered his CQ. Of course, I did not respond. I do not respond to callers who do such things. In fact, I seldom call CQ and I pick and choose who I want to QSO. On the odd (and I do mean odd) occasion when I am lonely and do call CQ, I usually do a directed call, mostly to Asia. I do not respond to anyone outside Asia. And if I am depressed and need to call CQ, then I'll answer anyone who calls.

Similarly, if in a pile-up and the object of the calling has identified part of a call that not resemble mine, I don't call. What the devil ever happened to manners?

Rant over.

Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 176 Issued at 2200Z on 25 Jun 2009
IA. Analysis of Solar Active Regions and Activity from 24/2100Z
to 25/2100Z: Solar activity has been very low. No flares occurred
during the past 24 hours. Region 1023 (S23W14) has decayed to
spotless plage. Consequently the entire solar disk is now void of
spots.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 24/2100Z to 25/2100Z:
The geomagnetic field was quiet to unsettled. Solar wind
observations indicated the presence of a high speed stream from a
coronal hole. Solar wind velocities were slowly declining towards
the end of the period.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be quiet for the next two days (26-27 June). An
increase to predominately unsettled levels with a chance for
isolated active periods is expected on the third day (28 June) in
response to a favorably positioned coronal hole.
III. Event Probabilities 26 Jun-28 Jun
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF green
IV. Penticton 10.7 cm Flux
Observed 25 Jun 068
Predicted 26 Jun-28 Jun 068/068/068
90 Day Mean 25 Jun 070
V. Geomagnetic A Indices
Observed Afr/Ap 24 Jun 016/019
Estimated Afr/Ap 25 Jun 006/008
Predicted Afr/Ap 26 Jun-28 Jun 005/005-005/005-008/010
VI. Geomagnetic Activity Probabilities 26 Jun-28 Jun
A. Middle Latitudes
Active 05/05/25
Minor storm 01/01/05
Major-severe storm 01/01/01

From: Alan Leith
Topic: 10101 Message: 10103

All right! Google is wonderful. Perhaps it is no longer available in Europe.

Now that I've had a chance to calm down, check out

http://www.qsl.net/f6blq/ivorycoast.htm

TU2FQ's name is Joel and he's located in Abidjan. He ain't no pirate.

Subject: [DX-IS] TU2FQ

Have just worked TU2FQ on 20M CW under awful conditions -- 339 to him and 449 from him. With QSB and all, I did not get much of his transmissions, in terms of his name or QTH. So I went to QRZ and then to Buckmaster and got no results. So I put the call into the cluster lookup and found he was reported last week on several occasions. What I didn't expect to see was the drivel from Europeans about the status of his legality.

What if the guy just arrived in the Ivory Coast and has just gotten on the air? Perhaps he isn't as interested in making it known he is on the air as he is in enjoying ham radio. Perhaps, on the other hand, he is indeed a pirate. But I have not read anything from the government of the Ivory Coast branding him as such. I am annoyed and dismayed by the reaction from Europe, although I am quite certain there will be others in other parts of the world who will be so loose-lipped.

On another point, after I signed (nay, even before I signed) there were several Europeans who called me on the TU2s frequency, where I had answered his CQ. Of course, I did not respond. I do not respond to callers who do such things. In fact, I seldom call CQ and I pick and choose who I want to QSO. On the odd (and I do mean odd) occasion when I am lonely and do call CQ, I usually do a directed call, mostly to Asia. I do not respond to anyone outside Asia. And if I am depressed and need to call CQ, then I'll answer anyone who calls.

Similarly, if in a pile-up and the object of the calling has identified part of a call that not resemble mine, I don't call. What the devil ever happened to manners?

Rant over.

From: John Peters
Topic: 10078 Message: 10104

I guess every QSL Mgr has different rules.

I treat every QSL like I would hope mine will be treated. Some are from DX in poor countries. Some are from kids. Some are from countries like Japan where the QSL Bureau is FREE BOTH WAYS to members of JARL. The QSL might be one he "really needs".

I pay a lot to both the incoming "1" bureau and the ARRL outgoing bureau. I manage for many DX stations (Kure, Baker/Howland, etc) and I answer every QSL. I think the only motivation for a QSL manager is satisfaction in helping someone get a new one. Or helping lighten the load for the DX so he can spend more time on the air.

Every QSL gets an answer. Those with no envelope via the outgoing buro.

Subject: RE: [DX-IS] QSL help needed

For years, Lance, I have not accepted QSLs for VA1S via the bureau. First, I had to pay to have them shipped to me and second, I had to pay to ship them to the bureau. When I no longer was a member of the bureau, I simply informed all the DX bulletins of my decision and stated why. I was willing to respond to direct requests with return postage, however.

Now I am a bureau user again but the VA1S logs have gone missing and I still have thousands of cards and no logs. Pity!

From: John P.
Topic: 10078 Message: 10106

Well,
   I budget my DX QSL's so that maybe 5 or 6 each month. This way at the end of the year I have sent out 60 or 70. I focus on new country, special DX events, USA special events, and on request. Mostly in that order of priority.

10107. RE: [DX-IS] QSL help needed

Yahoo group: DX-IS (2009)
Date: 2009-06-26 00:53:33 UTC
From: Alan Leith
Topic: 10078 Message: 10107

Aside from that 180-degree change in topic, John, I do exactly the same thing. I go after hard-to-have-gotten band countries that never did answer my QSL request. However, the topic had been how QSL managers handle bureau requests.

And for that matter, many thousands of VA1S cards were distributed by the bureau up to five years after the last operation of that call. I unilaterally decided, then, to request QSLs direct with return postage.

For my own part, all VE1AL cards are responded to the same way they are received. Cards that come via the bureau get cards back through the bureau. Direct cards with return postage go back direct. However, I would gestimate that I receive replies from less than 40% of the stations I QSL via the bureau. Certainly not like the good ole days.

73

Al, VE1AL

Subject: RE: [DX-IS] QSL help needed

Well,
I budget my DX QSL's so that maybe 5 or 6 each month. This way at the end of the year I have sent out 60 or 70. I focus on new country, special DX events, USA special events, and on request. Mostly in that order of priority.

John

SB DX ARL ARLD025
ARLD025 DX news

This week's bulletin was made possible with information provided by G3KMA, NC1L, QRZ DX, the OPDX Bulletin, DXNL, 425 DX News, The Daily DX, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

MAURITIUS, 3B8. Luc, I3LDP will be QRV as 3B8/home call from June 29 to July 11. Activity will be on all HF bands, including 6 meters, using CW and SSB. QSL to home call.

FIJI, 3D2. JA1NLX will be QRV as 3D2YA from Mana Island, IOTA OC-121, from June 29 to July 3. Activity will be on 80 to 10 meters using CW and RTTY. QSL to home call.

SENEGAL, 6W. Devon, PD9DX is QRV as 6W/home call until July 5. Activity is on the HF bands using SSB. QSL to home call.

MALDIVES, 8Q. Vlad, RA9LR is QRV as 8Q7LR from Hudhuranfushi Island, IOTA AS-013, until July 2. Activity is on 40 to 10 meters using mainly digital modes with some SSB. QSL to home call.

CROATIA, 9A. Jernej, S59KM is QRV as 9A/S59KM from Ugljan Island, IOTA EU-170, until July 2. Activity is on 40 to 2 meters, including 60 meters, using CW and SSB. QSL to home call.

CAPE VERDE, D4. Michel, HB9BOI is QRV as D44TOI from Sal Island, IOTA AF-086, until June 30. Activity is mainly on 20 meters using SSB, with some activity on 17 meters SSB. QSL to home call.

ST BARTHELEMY, FJ. Operators Ruediger, DK8YY and Ingolf, DL4JS will be QRV as TO8YY from June 29 to July 7. Activity will be on 160 to 10 meters with an emphasis placed on 160 and 80 meters. QSL via DH7WW.

WALES, GW. Operators Alan, G0RCI, Pete, M0USY, Harry, G7DEH, Alan, G4VUA and Brian, M0JNC are QRV as GB0YG from Holy Island, IOTA

EU-149, until June 29. Activity is on all HF bands using CW and SSB. QSL direct to G0RCI.

BULGARIA, LZ. Operators LZ4ZD and LZ1ZF are QRV as LZ01WFF from the Shumensko Plateau Natural Park until June 28. Activity is on 80 to 10 meters, and possibly 6 and 2 meters. QSL via LZ1ZF.

NETHERLANDS, PA. Several operators from Limburg will be QRV using special event call PA123OLS from June 29 to July 12 from the ''Oud Limburgs Schuttersfeest, an annual marksmen's festival. Activity will be on all HF bands using CW, SSB, RTTY and PSK. QSL via bureau.

BRAZIL, PY. Orlando, PT2TJ will be QRV as PX8M from Maiau Island, IOTA SA-041, from July 3 to 8. This includes being active from the Sao Joao Lighthouse, ARLHS BRA-093. QSL via PT2OP.

GREECE, SV. Special event call SY2O will be QRV from June 27 to 29 during the Olympus Marathon, an annual run on Mount Olympus. QSL direct via SV2FLQ.

DODECANESE, SV5. George, GM0IIO will be QRV as SV5/GM0IIO from Rhodes, IOTA EU-001, from July 1 to 8. Activity will be on 20 meters using CW and SSB. QSL to home call.

MALI, TZ. Ed, W0SD and Arliss, W7XU and possibly other operators are QRV as TZ6EI until July 5. Emphasis is on 6 meters, looking for sporadic-E openings. They are monitoring 50103 kHz. QSL via W7XU.

ANTIGUA AND BARBUDA, V2. Jimmy, W6JKV is QRV as V29JKV from Antigua, IOTA NA-100, until July 3. Activity is mainly on 6 meters with some HF activity as well. QSL to home call.

MICRONESIA, V6. Yuki, JH1NBN is QRV from here while on a business trip. He is traveling and operating from three islands. He is currently active as V6P from Pohnpei until July 4, V6C from Chuuk Island from July 4 to 12, V6T from Kosrae and back to Pohnpei as V6P from July 21 to 25. He may also be active as V63AQ. Activity is on 80 to 6 meters in his spare time. QSL to home call.

IOTA CORRECTION. As reported in DX news ARLD024, Kharancy Island is not a new IOTA.

THIS WEEKEND ON THE RADIO. ARRL Field Day, His Majesty King of Spain SSB Contest, Ukrainian DX DIGI Contest, Marconi Memorial HF CW Contest, ARCI Milliwatt Field Day and the SARL Digital PSK Contest will certainly keep contesters busy this weekend. The RAC Canada Day Contest is scheduled for July 1. Please see June QST, page 80 and the ARRL and WA7BNM contest web sites for details.

Ohio/Penn DX Special Bulletin No. 913.1

The Ohio/Penn DX PacketCluster
DX Special Bulletin No. 913.1
BID: $OPDX.913.1
June 26, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network and Glenn Johnson/W0GJ for the following DX information.

FOR IMMEDIATE RELEASE
26 June 2009

From: NCDXF

Subject: W0YK, Ed Muns, appointed to NCDXF Advisory Board

The Northern California DX Foundation Board of Directors is pleased to announce the appointment of Ed Muns, W0YK, as an Advisor to the NCDXF Board of Directors. Ed's primary duty, along with Doug Bender, WW6D, will be working with the NCDXF website: http://www.ncdxf.org

Ed became interested in ham radio in high school, working 40 meter CW into Asia in the early morning hours before school. During college, his license expired and he rejoined DXing ten years later in the early part of his 32-year career at Hewlett-Packard. Ed's interest in DXing quickly morphed into contesting where a lot of DX participates. All of his ham radio time today is spent contesting, chasing DX and joining DXpeditions occasionally. Favoring CW, Ed can sometimes be found on SSB as well.

Thanks to his contest club's (NCCC) campaign to win the club competition gavel in the 2004 ARRL RTTY Round-Up, Ed got started in that mode. He holds the SOHP world record in the contest, operating with his P49X callsign, having broken the world record in 2006, 2007 and 2009. In CQ WPX RTTY, Ed also holds the SOHP world record, having broken it in 2007, 2008 and 2009. In 2008, he operated the CQWW RTTY contest, winning SOHP.

Ed was on the YK0A team in 1994 and has operated as 6Y0A and 6Y4A as well as holding the 7J1ACJ call sign. From Aruba, where he holds a permanent visitor license as P49X, he has operated nearly a dozen times, primarily CW and RTTY contests. He has operated from the HC8N mega-station in a M2 operation in the CQWW RTTY, winning the world. He recently joined the

Radio Expeditions team, of VP6DX fame, on the management team with specific focus on funding.

Ed has taught the RTTY curriculum at Contest University at Dayton in 2008 and 2009 as well as at Contest Academy at Visalia in 2009. He is the contest manager and log checker for the NCJ NA RTTY Sprint and both CQ RTTY contests: CQWW and CQ WPX. He serves on the CQ Contest Advisory Board. For the NCCC, Ed manages the NCCC, CQP and NCCC Sprint web sites as well as the club's various email reflectors. He has published several articles in the NCJ.

We think Ed will have a lot of insight for what will be needed to keep the NCDXF website a dynamic and useful website for DXers.

The NCDXF Board of Directors wants to thank the many individuals who have contributed support to NCDXF. We realize that these financial times have put a strain on many of us, but think about the thrill of working a "new one" or band counter and its impact on your country totals - priceless, right? If you are currently not a member, please consider contributing to support future DXpeditions.

Since May 2008, NCDXF has provided financial help to the following DXpeditions:

4W6R Timor Lorosa'e
VK9XWW Christmas Island
VK9CJW Cocos-Keeling
OJ0B Market Reef
VK9DWX Willis Island
A5100A Bhutan
E44M Palestine (Bethlehem)
FW5RE Wallis & Fortuna
K5D Desecheo Island
VK9LA Lord Howe Island
S04R Western Sahara

Hopefully you worked one or more of these DXpeditions!

Contributions can now easily be made on-line using our SSL secured web server: https://www.ncdxf.org/donate

Glenn Johnson, W0GJ
Vice President, NCDXF

Propagation Forecast Bulletin 26 ARLP026
>From Tad Cook, K7RA
Seattle, WA June 26, 2009
To all radio amateurs

SB PROP ARL ARLP026
ARLP026 Propagation de K7RA

Thanks to Carl Luetzelschwab, K9LA for writing last week's
Propagation Forecast bulletin.

Two new sunspots appeared last week, numbered 1022 and 1023, and
both were Cycle 24 spots. 1022 lasted through June 23 and 1023
until June 24. On June 24 geomagnetic indices were unsettled.

This weekend is ARRL Field Day, and conditions should be stable.
Planetary A index is predicted to be around five, which is quiet.

Chip Margelli, K7JA wrote about some surprising openings last week.
He writes, "Sunspots or no, there are DX opportunities even with a
solar flux of 67. Both Friday and Saturday nights (U.S. time June
19-20), the 21 MHz and 28 MHz bands were open to Japan from my
location in southern California, and along much of the West Coast,
around 0500-0800 UTC (that's 10 PM to at least 1 AM!). Both nights,
the 15-meter CW band was crawling with loud JA signals from stations
working the All Asian DX Contest, and there were many loud signals
on 10 meters, as well. I fear many did not think to check ten at
this hour, but it very much was open."

He continues, "And Saturday night I worked 54 JA stations in a nice
run on 50 MHz, so perhaps those noctilucent clouds were being kind
to me."

Steve Brandt, N7VS of Portland, Oregon had a similar observation.
On 10 meters CW last Friday night (at 0336z Saturday) Steve worked
JK1YMM in the All Asia CW Contest with S7 reports in both
directions. Steve also observed sporadic-E openings this week out
to about 1,000 miles, and said other stations have reported working
Japan on 10 meters this week.

In last week's bulletin, Carl mentioned the upcoming DXpedition to
Glorioso in July. Now he has written a set of predictions for

propagation to Glorioso from various areas, and you can see it at http://mysite.verizon.net/k9la/id11.html. Just click on the "Glorioso in July 2009" link.

I received some interesting mail from Red Haines, WO0W of La Crescent, Minnesota. I did a search for past emails from him, and came across an unread mail from December, 2007. Just to review and clarify, an ionosonde is a tool for measuring the critical frequency (f0F2) for the area just above. It sweeps an RF signal, beaming straight up, and looks for reflections.

Some quotes from Red occupy the next few paragraphs.

"Though we use the sunspot number and the solar flux index to assess propagation expectations, there is only an indirect connection between these indices and propagation. Neither sunspots nor the radiation measured by the solar flux index directly increase or decrease the levels of ionization in the ionosphere. All three are determined, somewhat independently, by physical processes on or in the Sun.

"Sunspots and the solar flux are caused by solar conditions that are often associated to a limited degree with high energy radiation that reaches Earth and ionizes molecules in the atmosphere. Only the energetic radiation (UV, X-ray, and Gamma rays) from the Sun or other sources ionize those molecules. The solar flux radiation is not energetic enough. The sunspots are only a visual phenomena associated with solar events, including radiation. It often happens that no solar radiation associated with a sunspot reaches Earth.

"In past years, we didn't have any better predictors of propagation than the sunspot number and the solar flux index. They remain useful, but we must recognize their limitations. In fact, propagation correlates very poorly with them. Smoothed sunspot numbers are useful to study the solar activity cycle. Smoothed sunspot number doesn't predict the next day's propagation or even the next cycle's timing or magnitude. In fact, the smoothed SSN cannot be calculated until 6 moths have passed. The daily SSN is just about meaningless to propagation.

"Today, we have better indicators of propagation potential. Hams may view near real time measures of X-ray radiation from the GOES satellites. See http://www.swpc.noaa.gov/today.html.

"The various propagation beacons are very useful to assess current propagation.

"A source of near real time ionospheric conditions, including the various critical frequencies, may be accessed at http://www.swpc.noaa.gov/ftpdir/lists/iono_day/. This index links to the worldwide system of ionosondes to report measured values on short time intervals, typically near 15 minutes. The shortcoming is

the relatively small number of ionosondes, which requires interpolation to estimate the MUF for a propagation path, as well as educated guesses regarding details of the path.

"The Australian IPS Radio and Space Services offer several maps that attempt to depict interpolated propagation conditions, based on ionosonde measurements. For an example and links to additional products, see http://www.ips.gov.au/HF_Systems/4/3."

In a message from June 15, Red wrote:

"Perhaps you already noted the large increase in f0F2 reported by the ionosonde at Boulder. Rapid fluctuations beginning after 1200Z June 14 reached high values as high as 14 MHz. The fluctuations were prominent.

"By the time I noticed and turned to the DX beacons, values were back to usual and the RTTY signals interfered too much to discern much on 14.1 MHz. By that time, about 2300z, I didn't hear any beacons on 21.150 MHz. I sure wish the RTTY operators were more aware of the value of those beacons, to themselves as much as to others.

"Signals on 80 meters at 2330z, from net stations that I work every day at that time, were about 20 dB lower than has been typical during recent weeks. These were stations within MN. Perhaps D-layer absorption was increased.

"On a region net at 0045z, also 80 meters, signals were a bit lower, but were back to normal at 0230z, as were the MN net signals at 0250z.

"I haven't found the cause of the ionospheric fluctuations. I examined the graph of X-ray flux and it was 'flatlined.' I found no evidence of any major particulate density reaching Earth from the Sun. Of more general interest, the Millstone station resumed posting ionosonde readings for a couple weeks, though not continuous, but has discontinued the postings.

"I suspect that the IPS maps are relatively inaccurate for lack of ionosonde data. I not considerable disparity between those maps in the US and the Boulder data. I began recording the Boulder data to study that in greater detail."

And finally on June 23, this from Red:

"You probably noted the appearance in the southern hemisphere of two sunspot groups with a SSN of 24 on June 22. Did you also notice a burst of low energy X-ray on June 22 and the large excursions of f0F2 at about 1400z, 2300z (June 22z), and 0800z (June 23z)? The f0F2 reported by Boulder reached 11 MHz at 0800z June 23 and displays a series of high and low excursions.

"The other ionosondes in the USA continue to report no data. IPS maps are not tracking these excursions, probably because data needed for the map model is lacking."

We also had several reports on grayline propagation recently. Here are two of them.

On June 12, Roland Spoon, AH6RR of Kailua Kona, on the Big Island of Hawaii wrote, "The past 2 weeks has just been hopping on 20 meters here in Hawaii I have been making contacts almost world wide with the exception of South America (???) Evening Grayline is open to Africa, Asia, Middle East, Europe and Oceania. With openings to Europe until 10+ pm local time, signals are between S5 and 20 over 9. Morning grayline Favors the Middle East and Africa with some light but workable Europe. Stu KH7DX reports that between midnight local and 4am good openings to the Indian Ocean Africa. We have been having a blast working the pile-ups."

Another grayline report came from Brian Webb, KD6NRP of Ventura County, California. On Monday at 0350z (Sunday night local time) Brian was on PSK31, and writes, "I called CQ on 14070 kHz with no takers. Just as I was reaching up to close my software, someone answered. The other station had a funny call and I suspected my system hadn't decoded the signal correctly.

"But the other station repeated his call and I was receiving it correctly. I then proceeded to have a brief, but exciting QSO with Nigel, E51SC, in Rarotonga in the South Cook Islands.

"Despite the low solar flux and my compromise antenna, the contact apparently was made possible due to grayline propagation. A check of my propagation software confirmed that at 0400Z the terminator (day/night line) ran through southern California to the South Cook Islands."

To end, note that the solar flux numbers at the bottom are not resolved to one tenth of a point. For some reason I could not connect to the FTP server at Penticton that hosts the data.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at, http://www.arrl.org/tis/info/propagation.html. For a detailed explanation of the numbers used in this bulletin, see http://www.arrl.org/tis/info/k9la-prop.html. An archive of past propagation bulletins is at, http://www.arrl.org/w1aw/prop/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://www.arrl.org/qst/propcharts/.

Instructions for starting or ending email distribution of this bulletin are at http://www.arrl.org/w1aw.html#email.

Sunspot numbers for June 18 through 24 were 0, 0, 0, 12, 24, 12, and 14 with a mean of 8.9. 10.7 cm flux was 68, 67, 67, 67, 68, 68, and 67 with a mean of 67.4. Estimated planetary A indices were 4, 4, 6, 7, 3, 4 and 19 with a mean of 6.7. Estimated mid-latitude A indices were 2, 1, 5, 6, 2, 5 and 16 with a mean of 5.3.

10112. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-06-26 22:11:01 UTC
From: Paul Dunphy
Topic: 9721 Message: 10112

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Jun 26 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 177 Issued at 2200Z on 26 Jun 2009
IA. Analysis of Solar Active Regions and Activity from 25/2100Z
to 26/2100Z: Solar activity was very low. No flares occurred during
the past 24 hours. The solar disk was void of spots.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 25/2100Z to 26/2100Z:
The geomagnetic field was mostly quiet.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be quiet for the first day (27 June). An increase to
unsettled levels with a chance for active periods is expected on the
second day (28 June) due to a favorably positioned coronal hole.
Conditions are expected to be quiet on the third day (29 June).
III. Event Probabilities 27 Jun-29 Jun
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF green
IV. Penticton 10.7 cm Flux
Observed 26 Jun 067
Predicted 27 Jun-29 Jun 067/067/067
90 Day Mean 26 Jun 070
V. Geomagnetic A Indices
Observed Afr/Ap 25 Jun 006/007
Estimated Afr/Ap 26 Jun 003/004
Predicted Afr/Ap 27 Jun-29 Jun 005/005-008/010-005/005
VI. Geomagnetic Activity Probabilities 27 Jun-29 Jun
A. Middle Latitudes
Active 05/25/05
Minor storm 01/05/01
Major-severe storm 01/01/01

27 June 2009 A.R.I. DX Bulletin
No 947
==========
*** 4 2 5 D X N E W S ***
**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

3A - Gab, HA3JB will be active as 3A/HG3IPA from Monaco on 23-30 September, including an entry in the CQ WW RTTY DX Contest. This activity will be good for the Hungarian International Police Association Award (on-line log and information on the award can be found at http://www.ha3jb.com). QSL via HA3JB. [TNX HA3JB]
3B8 - I3LDP will be active as 3B8/I3LDP from Mauritius Island (AF-049) from 29 June to 11 July. He will operate SSB and CW on the HF bands with a vertical for 40-10 metres, and on 6 metres with a vertical dipole. QSL via I3LDP. [TNX MMMonVHF and DL8EBW]
5R - Wayne, W5KDJ will be active as 5R8KD from the shack of 5R8FU in Antananarivo, Madagascar (AF-013) on 4-17 July. He will operate CW and RTTY on 6-160 metres and will also be active during the IARU HF World Championship. QSL via W5KDJ. Logs will be uploaded to LoTW and eQSL. Log search at http://www.tdxs.net/5r8kd.html [TNX W9DX]
6W - Dervin, PD9DX will be active as 6W/PD9DX from Senegal from 26 June to 5 July. He plans to operate holiday style on 160-10 metres. QSL via home call. [TNX PD9DX]
9A - Once again Zik, VE3ZIK (DO7ZZ) will be active as 9A/VE3ZIK from Bilice, Croatia between 2 July and 3 August. He plans to operate CW, SSB and digital modes on the HF bands, and to participate in the IOTA Contest from IOTA group EU-170. QSL via DO7ZZ, direct or bureau (e-mail requests for bureau cards can be sent to zibert@...). Logs will be uploaded to eQSL and LotW. [TNX VE3ZIK]
CO - Edor, CO7PH and a group of operators from the Ceballos Radio Club plan to participate in the IOTA Contest from Cayo Coco (NA-086) as either T47C (requested callsign) or CO7PH/p. A late December expedition to Cayo Anclitas, Jardines de la Reina Archipelago (NA-201) is also being planned. [TNX CO7PH]
CT - The Portuguese Navy Amateur Radio Group (Nucleo de Radioamadores da Armada) will be active from four lighthouses (two on mainland Portugal and two on Terceira Island, Azores) as follows:
4 July CR5NRA Cabo Sardao (Portugal) ARLHS POR-014

11 July CR1NRA Praia da Vitoria South Mole (Azores) ARLHS AZO-027
18 July CR6NRA Cabo da Roca (Portugal) ARLHS POR-007
1 August CR2NRA Lajes (Azores) ARLHS AZO-010
QSL direct only to Nucleo de Radioamadores da Armada, ETNA - Base Naval de Lisboa, 2801-001 Alfeite, Almada, Portugal. [TNX CT1END]
CT7 - Celebrating the 57th anniversary of the Portuguese Air Force, special event station CR57FAP will be active on 27-28 June, 1 July and 4-5 July. Expect activity on 10-80 metres SSB and digital modes. QSL via CT1REP. [TNX CT1END]
EA9 - Six operators from Ceuta will be active as ED9NA as a Multi-Multi Entry in this weekend's His Majesty the King of Spain Contest (complete information at www.ure.es/contest/431-sm-el-rey-contest-english-version.html). QSL via EA9GW, direct or bureau. [TNX NG3K]
F - Thomas, DL5MO will be active as F/DL5MO from Groix Island (EU-048) from 29 June to 10 July. He will operate holiday style mainly on 40, 30 and 20 metres. QSL via home call, direct or bureau. [TNX www.rsgbiota.org]
F - A group of operators from the Sevran Radio Club will be active as F5KKD/p from Sein Island (EU-068) on 24-27 July, IOTA Contest included. A second activity is planned to take place from Belle Ile (EU-048) on 11-14 September. QSL for both the activities via bureau to F5KKD. The web pages for the activities are at http://iota2009.crxcluster.com [TNX F5NQL]
F - To recover from the trip to Rockall and to start preparation for a new attempt, the Rockall 2009 crew and support team (ON3DX, ON4AHF, ON4ATW, ON4HIL, ON4IA, ON6CC, ON6LEO, ON6NL, ON6ZU and ON7YT) will participate in the IOTA Contest (25-26 July) as F/OT2A from Ile de Batz (EU-105). QSL via ON4HIL. [TNX ON4ATW]
FJ - Rich, DK8YY and Ingolf, DL4JS will be active as TO8YY from St. Barthelemy (NA-146) from 29 June to 8 July. They will operate CW, SSB and digital modes on 160-6 metres, with an emphasis on the low bands, 10 and 12 metres. QSL via DH7WW. [TNX DK8YY]
G - In 1939 the radio equipment of all British radio amateurs was ordered to be confiscated for the duration of the war, but many amateurs volunteered to become Voluntary Interceptors in their own homes. They would assist the Allies in their task of intercepting encrypted Enigma messages transmitted in Morse code, which were passed to the code breakers in Bletchley Park. Commemorating the 70th anniversary of the commencement of that operation, the Scarborough Special Events Group will be active as GB70VI from 27 June until 24 July. QSL via the RSGB bureau or direct via G0OOO.
GM - Iain, MM0TFU will be active as MM0TFU/p from the Isle of Arran (EU-123) on 24-27 July, including an entry in the IOTA Contest. QSL via home call, direct or bureau. [TNX www.rsgbiota.org]
GW - The Strumblehead DX and Contest Group will be active as MC0SHL from Ramsey Island (EU-124) from 18 UTC on 24 July through 14 UTC on the 27th, including an entry in the IOTA Contest as MW9W. They will operate on 80-10 metres SSB, with some 30m RTTY planned by G1VDP. QSL via M0URX. Further information can be found at http://www.mc0shl.com [TNX G1VDP]

KP4 - Special callsign K4G will be used from La Cana Lighthouse at Guanica, Puerto Rico (NA-099) during the World Lighthouse On The Air Contest on 4-5 July (information at www.wlota.com). QSL via WP3MW. [TNX F5NQL]
LX - PA0JED, PA0TEN, PA1H, PA2AWU, PA2PKZ, PA4VHF, PA5CA, PA5R, PE2HG and PD9DX will be active as LX/PA6Z from Luxembourg on 4-10 October. They will operate CW, SSB and PSK31 on 160-10 metres, and they also plan to have a 6m station for meteor scatter om WSJT. QSL via PA9M, direct or bureau. More information and updates at http://www.pa6z.nl [TNX PA5R]
ON - The Belgian Air Force Amateur Radio Association (www.bafara.be) will operate special event station ON16FF from 29 June to 12 July. QSL via ON6KN, direct or bureau. [TNX ON6KN]
OY - Look for Janusz, OY/SP6IXF and Mek, OY/SP7VC to operate from the Faroe Islands (EU-018, Grid locator IP61) on 10-16 August. They plan to be active on 160-6 metres, and on 2 metres meteor scatter on FSK441. Power amplifiers will be used on all bands. Mek, SP7VC will also operate on 6 and 2 metres as SP7VC/mm during the voyage, to activate marine squares JO37, 27, 17, 18, 19, 09 and IP80,81 and 71. QSL via home calls, direct or bureau. [TNX SP5UAF]
OZ - OZ2TF, OZ7KDJ and OZ9V will be active as OZ8MW/p from Anholt Island (EU-088) on 22-27 July. They will operate CW and SSB on 80, 40, 20, 15, 10 and 6 metres, and will participate in the IOTA Contest. QSL via OZ8MW, direct or bureau. [TNX www.rsgbiota.org]
PA - A team of operators from VERON A31 (Midden/Noord-Limburg) will operate CW, SSB, RTTY and PSK on all bands as PA123OLS from 29 June to 12 July for the 123rd "Oud Limburgs Schuttersfeest". QSL via PE1NCP, direct or bureau. [TNX PE1NCP]
SP - Sixteen special event stations will be active on 1-7 July to celebrate the Tall Ships Races 2009 regatta calling at the Polish harbour of Gdynia. Participating stations include SN2009TSR, SN09T, SN09A, SN09L, SP09L, SN09S, SN09H, SN09I, SN09P, SP09S, SN09R, SP09A, SN09C, SN09E, SQ09S and SN50ZAGLE. Information on the event and the relevant award can be found at http://sp2zie.gd.pl/tsr_about.php [TNX VA3RJ]
SV - Look for SV8/OK2BOB/p and SV8/OK2BC/p to be active from Lesvos Island (EU-049) until 2 July. They operate SSB and CW on 160-10 metres, with 40, 30, 20 and 17 metres as primary bands. QSL via home calls. [TNX OPDX Bulletin]
SV - Nick, SV1CEI will be active as SV1CEI/8 from Kea Island (EU-067) until 25 August. He will operate holiday style on 40-10 metres SSB and CW, with activity form a couple of lighthouses being planned. [TNX SV1CEI]
SV - Theo, SV1EJD (http://www.sv1ejd.gr/) will be active as SV8/SV1EJD from Lesvos Island (EU-049) on 12-22 July. He plans to operate holiday style on 80-10 metres SSB and RTTY. QSL via home call, direct or bureau. [TNZ SV1EJD]
SV - Laci, HA0NAR will be active as SX8R from Thassos Island (EU-174) on 22-31 July. He will operate CW and SSB on 80-10 metres and will take part in the IOTA Contest. QSL via home call, direct or

bureau. [TNX HA0NAR]
TY - PA8AD, PA3AN, PA3AWW and PD0CAV will be active as TY1MS from Grand Popo, Benin on 10-27 October, including an entry in the CQ WW DX SSB Contest. Their goals are to activate this DXCC Entity on 160-10 metres, to provide onsite help and raise funds for the Mercy Ships Charity Project. QSL via PA3AWW, direct or bureau. Further information (including OQRS for direct QSLling) can be found at http://www.benin2009.com
UR - Vladimir, UU6JJ plans to be active from the lighthouse at Mys Chernyy (ARLHS UKR-135) on 4-5 July. Complete information on the Ukrainian Lighthouses Award can be found at http://www.lights.in.ua [TNX US4LGW]
V6 - Yuki, JH1NBN (V63AQ) is in Micronesia on a business trip until 21 July, and operates on 80-6 metres in his spare time. His itinerary is as follows:
22 June-4 July V6P Pohnpei (OC-010)
4-12 July V6C Chuuk (OC-011)
13-21 July V6T Kosrae (OC-059)
21-25 July V6P Pohnpei (OC-010)
He might also operate as KH2/K3ZB from Guam (OC-026) on his way back home. All QSLs via JH1NBN. [TNX The Daily DX]
VK9N - VK9NI is the new callsign to be used during the 22-29 July Hellenic Amateur Radio Association of Australia's expedition to Norfolk Island (OC-005) [425DXN 941]. Nine operators (namely VK2FPGR, VK2GR, VK2IR, VK2RF, VK3FGRC, VK3FT, VK3FY, VK3TZ and VK5MAV) will be active on 160-6 metres CW, SSB and RTTY, including activity during the IOTA Contest. QSL via W3HNK. The new website for the operation is at http://www.vk9ni.com/
VR - The Hong Kong Amateur Radio DX Association will be active as VR2009EAG between 1 July and 31 December to promote the 5th edition of the East Asia Games, that will be hosted by Hong Kong on 5-13 December. Expect activity on 40-10 metres SSB, RTTY, PSK31 and SSTV, and on 6 metres. QSL via VR2XMT.
W - The following special event stations are expected to be active during the "Original 13 Colonies Special Event", to be held from 13.00 UTC on 1 July until 04.00 UTC on the 5th: K2A (New York), K2B (Virginia), K2C (Rhode Island), K2D (Connecticut), K2E (Delaware), K2G (Georgia), K2F (Maryland), K2H (Massachusetts), K2I (New Jersey), K2J (North Carolina), K2K (New Hampshire), K2L (South Carolina), K2M (Pennsylvania). A certificate will be available, but no QSL cards will be issued. Details can be found at http://home.comcast.net/~dzabawa/ThirteenColonies.htm [TNX K1XN]

IOTA TOUR ---> Gabriele, IK3GES will be touring Greece, Turkey and Bulgaria starting on 28 June. His plans include activities from the Greek islands of Elafonisos (EU-113), Salamina (EU-075), Skyros (EU-060) and Amoliani (EU-174), as well as from the Bulgarian island of Sveta Anastasiya (EU-181) along with Boyan, LZ1BJ. QSL via IK3GES, direct or bureau. [TNX VA3RJ]

PACIFIC TOUR ---> Gerben, PG5M will be active (CW only) from the Fiji Islands (OC-016), Tuvalu (OC-015) and Tarawa, Western Kiribati (OC-017) as

follows:
06-07 September Fiji requested call 3D2G
08-14 September Tuvalu issued call T2G
15-16 September Fiji requested call 3D2G
17-23 September Western Kiribati requested call T30G
24-27 September Fiji requested call 3D2G
It will be "an ultra light solo DXpedition". QSL via PG5M, direct or bureau. Updates will be posted at http://www.dx.to/ [TNX PG5M]

CQWW DX CONTEST: A NEW CATEGORY ---> The new "Xtreme" category has been added to the CQ WW DX Contest "to encourage the development of new technologies in amateur radio communications in general and contesting in particular". The new category "has been established to allow amateurs to participate in the CQ WW Contest while experimenting creatively with Internet-linked stations and other new technologies that currently are not permitted in any of the contest categories". Complete details can be found at http://www.cq-amateur-radio.com/XtremeCQ_WW_Experimenter_June.pdf

G3SWH ---> Over the past few days Phil, G3SWH has had some problems with the "QSL Request" and "Contact Me" functions of his web site (http://www.g3swh.org.uk), as a result of his ISP changing servers. These problems have all been resolved and the web site is now fully functional. [TNX G3SWH]

HF DX CHALLENGE ---> Every March, the Chiltern DX Club runs its "LF Challenge" to encourage operation on 40, 80 and 160 metres. Gary, ZL2IFB has "stolen CDXC's good idea and set up an HF DX Challenge to take place annually in September on the high HF bands. The CDXC Committee is not only aware of this, they support it". This activity period ("a friendly competition for DXers and not a contest as such") will be held from 00.00 UTC on 1 September through 23.59 UTC on the 30th, on 15, 12, 10, 6 and 4 metres only (where permitted) and on any mode permitted by your license. The scoring will be one single point per DXCC Entity contacted, regardless of band or mode. Further information can be found at http://www.g4ifb.com/html/hf_dx_challenge.html [TNX ZL2IFB]

+ SILENT KEYS + John B. Trampler (N0JT) passed away on 22 June at 85 years of age. He was a noted DXer and QSL manager for several stations (see 425DXN 645), and the co-founder of a popular "DX Net". Other recently reported Silent Keys include Angie Sitton (G0HGA), Steve Gibbs (GU3MBS), Joe Phillips (K8QOE), Jim Tabor (KU5S) and Victor A. Gorokhov (UA4RC). Victor was the QSL manager for R1FJT, whose activity from Franz Josef Land ended last year (all of the QSOs have been uploaded to LoTW).

10114. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-06-27 22:11:01 UTC
From: Paul Dunphy
Topic: 9721 Message: 10114

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Jun 27 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 178 Issued at 2200Z on 27 Jun 2009
IA. Analysis of Solar Active Regions and Activity from 26/2100Z
to 27/2100Z: Solar activity was very low. No flares were detected.
The visible disk remained spotless.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 26/2100Z to 27/2100Z:
Geomagnetic field activity was at mostly quiet levels.
IIB. Geophysical Activity Forecast: Geomagnetic field activity is
expected to be at quiet to unsettled levels with a chance for active
levels on day 1 (28 June) due to a favorably positioned coronal
hole. Mostly quiet conditions are expected during days 2 - 3 (29 -
30 June).
III. Event Probabilities 28 Jun-30 Jun
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF green
IV. Penticton 10.7 cm Flux
Observed 27 Jun 067
Predicted 28 Jun-30 Jun 067/067/067
90 Day Mean 27 Jun 070
V. Geomagnetic A Indices
Observed Afr/Ap 26 Jun 002/003
Estimated Afr/Ap 27 Jun 002/005
Predicted Afr/Ap 28 Jun-30 Jun 008/010-005/005-005/005
VI. Geomagnetic Activity Probabilities 28 Jun-30 Jun
A. Middle Latitudes
Active 20/15/15
Minor storm 05/01/01
Major-severe storm 01/01/01
```

10115. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-06-28 22:11:01 UTC
From: Paul Dunphy
Topic: 9721 Message: 10115

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Jun 28 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 179 Issued at 2200Z on 28 Jun 2009
IA. Analysis of Solar Active Regions and Activity from 27/2100Z
to 28/2100Z: Solar activity was very low. No flares were detected.
The visible disk was spotless.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 27/2100Z to 28/2100Z:
Geomagnetic field activity ranged from quiet to active levels. Active
levels occurred after 28/1700Z. ACE solar wind data indicated the
active levels were associated with periods of increased velocities
(peak 426 km/sec at 28/2042Z), sustained southward IMF Bz (minimum
-12 nT at 28/1917Z), and enhanced IMF Bt (peak 12 nT at 28/1918Z);
all of which were associated with a favorably positioned coronal
hole.
IIB. Geophysical Activity Forecast: Geomagnetic field activity is
expected to be at predominantly quiet levels with a chance for
unsettled levels through the period (29 June - 01 July).
III. Event Probabilities 29 Jun-01 Jul

Ohio/Penn DX Bulletin No. 914

The Ohio/Penn DX PacketCluster
DX Bulletin No. 914
BID: $OPDX.914
June 29, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q, KF2TI, N3SL, NG3K, N4AA & QRZ DX, K5WW, K8YSE, N8OFS, DK8JB, DL7MAE & The DX News Letter, DX World of Ham Radio Web Site, EA4ATI/9M2TI, F5NQL & UFT, G1VDP, G3SWH, G3VOF, HB9PL, I1JQJ/IK1ADH & 425 DX News, JI5RPT, JR3TVH, LX2A, LZ1ZF, National Institute of Amateur Radio, PG5M, Pete's-DX-Newsdesk, RSGB IOTA Web Site, SP5UAF, VA3RJ & ICPO, VHF-DX-Portal (MMMonVHF), VK3FGRC, VK4FW and ZL1CT for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 21st-June, through Sunday, 28th-June there were 203 countries active. Countries available: 3A, 3B8, 3D2, 3V, 3W, 4J, 4L, 4O, 4S, 4X, 5B, 5N, 5R, 5V, 5Z, 6W, 6Y, 7X, 8P, 8Q, 9A, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A4, A6, A7, A9, AP, BV, BY, C3, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, F, FG, FH, FJ, FK, FM, FO, FR, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, JA, JD/o, JT, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P4, PA, PJ2, PJ7, PY, PZ, S2, S5, S7, S9, SM, SP, ST, SU, SV, SV5, SV9, T32, T7, T8, TA, TF, TG, TI, TK, TL, TN, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V4, V5, V6, V7, V8, VE, VK, VP2V, VP8, VP9, VQ9, VR, VU, XE, XU, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3D2, FIJI (IOTA Op). Remember to look for Akira, JA1NLX, to once again be active as 3D2YA from Mana Island (OC-121) in Mamanuca Group, between June 29th and July 3rd. Activity will be on 80/40/30/20/17/15/12/10 meters using CW and RTTY. QSL via his home callsign, by the Bureau or direct (w/SASE). Log will be uploaded to LoTW.

3D2/C, CONWAY REEF. Hans, DK9KX (ex-3D2CR), reports that it has been 20 years since the first activation of Conway Reef (3D2CR), but he is happy to announce another DXpedition to that remote and lonely island will take place between October 3-11th. There will be 7 operators, and they will be on 160-6 meters using CW, SSB and RTTY. Sorry, "NO" EME or digital modes on 6m. No callsign was announced, but more info is forthcoming on a Web site.

6W, SENEGAL. Dervin, PD9DX, will be active as 6W/PD9DX between now and July 5th. Activity will be on the HF bands using only SSB. QSL via PD9DX direct only (Europe SAE with 1 USD; Outside Europe SAE with 2 USDs).

8Q, MALDIVES. Pierre, HB9QQ, is now active as 8Q7QQ from Velighoo (North Atoll) between June 30th and July 11th. Carrying a small 50 MHz Linear along, he will be active on 50.183 MHz in JT65A mode (first period) around moonrise and moonset in search of Sporadic E and EME contacts. Other activities include the WARC bands. QSL via his home callsign.

C2, NAURU. It would seem that the C21TI DXpedition by Dani, EA4ATI/9M2TI, and other operators which was to take place between June 16-26th, was postponed. A report indicates that Dani, EA4ATI, had to postpone his C21TI DXpedition due to job reasons. "He is in Pakistan supporting in the humanitarian response to the internally displaced persons." Dani informed your OPDX editor that he hia already booked/rescheduled his flight for Nauru. The dates for the DXpedition are for August 16-24th, and they should be on the air from August 17-23rd. Look for possible updates on the Web page at: http://c21ti.madrono.net/index.html

EI, IRELAND. Olivier, ON4EI, will once again be active as EI/ON4EI from Ireland (EU-EU-115, WLOTA 2484) near Clonmel (IO62EK) between July 8-30th. His activity will include the IARU HF World Championship as Single-Operator/SSB/Low-Power/All Band (July 11-12th) entry and also the RSGB IOTA Contest (July 26-27th). Watch around 7130 kHz +/- QRM. He also plans to be active on 6 meters; watch around 50.200 MHz. His equipment for this activity will include a vertical 18m monopole inverted V and beverages for 160/80/40m, and a Spiderbeam for 20/15/10m. Transceiver is a Elecraft K3 w/100W. QSL via his home callsign.

FS, ST. MARTIN. Sam, WA2EPI, will be active as WA2EPI/FS between Sunday, June 28th and July 5th. No bands or modes of activity were provided, but he will be using a dipole and 100 watts and is expected to be on mostly during the evenings. QSL via K2LAB, by the Bureau or direct. Friends of Sam can request skeds by E-mailing him directly.

IOTA NEWS.....
AF-018. Andrea, IZ2LSC, will be active as IH9/IZ2LSC from Pantelleria Island between July 20-31st. His activity will be holiday style using a Yaesu FT-857 (w/100W) and wire antennas. He will be on the HF bands (except 160 and 80) using SSB and the Digital modes. Andrea will also take part in the RSGB IOTA Contest (July 25-26th) as a Single-Op entry. QSL only via the LoTW or his home callsign by the Bureau. For more info, log search and updates, visit:

http://timpyblog.blogspot.com/2009/06/pantelleria-island.html

AS-037. Ken, JS3OMH, will be active as JS3OMH/6 from Kagoshima on Kamikoshiki Island (Koshikijima-Islands) between June 27-28th. Activity will be on 80-6 meters using CW and SSB. QSL via the Bureau or see QRZ.com.

EU-094. Eight French operators will be activating Saint Nicolas Island in the Glenan Islands group, France, between September 11-18th. No callsign was provided but possibly homecall/p. Activity will be on the HF bands, and 2 meters and up (10 GHz) using CW, SSB, Digiatal modes and ATV. Look for 6 meter activity on SSB and possibly CW over 50.200 MHz. Operators mentioned are: Benoit/F8PDR, Jean-Jacques/F5NKX, Rene/F6CMC, Alain/F6ENO, Denis/F5RJM, Alain/F5HVI and Rolf/F9ZG. Other reference numbers are: French Metropolitan Islands Award DIFM: AT-010, Department Finistere/29, Province Britanny and Grid Square IN77XR. QSL via F5RJM, direct by CBA (w/SAE and 1 IRC or 1 USD for Europe; 1 IRC or 2 USDs elsewhere) or by the French Ref-Union Bureau.

EU-124. Members of the Strumblehead DX and Contest Group have now sealed the final permission to activate Ramsey Island, off the West Wales coast, from the "Royal Society for the Protection of Birds" who own the island. They will be active from 1800z, July 24th through 1400z, July 27th. Activity will include an entry in the RSGB IOTA Contest (July 25-26th). They will be active using the club callsign MC0SHL for the whole duration of the operation and using MW9W in the contest. Their activity will be on all bands from 80-10 meters using SSB. There is also be some 30m RTTY planned by G1VDP if the other guys allow him, with participation in the last 80M Club Championships DATA section. The group will be operational using generators as power and radios which will consist of 2 K3's and a Yaesu FT1000MPMkV and amplifiers. Antennas will consist of a Hexbeam, a windom and dipoles. Most of the activation is for the WAB award scheme as the square is semi rare and has not been activated for some time. Also, look for the team to be on from a farm for a few days before and after their EU-124 operation using the callsign GB0WFF for the World Flora and Fauna Award (see http://www.wff44.com for award details), and using the MC0SHL club callsign while erecting a tower for Rob, MW0RLJ. The island will not only count for the WAB award but will also count for the WFF award. A special QSL card printed for both club callsigns, as well as full details about the groups, are on the Web site at: http://www.mc0shl.com
QSL via the group's QSL Manager M0URX.

J79, DOMINICA (Update). Operators Babs/DL7AFS and Lot/DJ7ZG are expected to be active as J79ZG between September 27th and October 15th. Activity will be on 80-6 meters on the usual DX frequencies, mainly on CW, SSB, RTTY and PSK, as well as 6 meters. They will look especially for JA

stations. QSL via DL7AFS. Their Web page for this operation is:
http://www.qsl.net/dl7afs/Index_J7.html

JD/O, OGASAWARA. Operators Makoto/JI5RPT (JD1BLY) and Yoshihi/JO1LVZ
(JD1BNF) will be active from Chichijima Island (IOTA AS-031) between
August 9-14th. Activity will be on 160-6 meters using the satellites,
CW, SSB, Digi modes and 2m WSJT EME. QSL via their home callsigns. Log
searches will be available on the following Web sites:
JD1BLY: http://www.ji5rpt.com/jd1/
JD1BNF: http://www.hattsan.com/

LX0, LUXEMBOURG. Look for LX0HQ to be active again from the Headquaters
of the Luxembourg Amateur Radio Society (RL) during the IARU Contest
(July 14-15th). They will have nine stations (w/20 operators) active
from 2 different locations in Luxembourg: Eschdorf (QTH of LX7I) and
Esebuer(QTH of LX0RL). Photos of the LX0HQ stations will be available
after the contest on their Web sites: http://www.rlx.lu
http://www.lx2a.com
A live webcam will be available during the contest from the LX7I QTH
(on www.lx2a.com). Please try to work LX0HQ on as many bands and modes
as possible during the 2009 IARU World HF Championship 2009. The log
will be uploaded to LoTW, and you can request a bureau QSL via lx0hqgrlx.lu
(no need to send a card via bureau!) QSL via LX2A (New QSL Manager!).

LX, LUXEMBOURG. Operators Jan/PA0JED, Herman/PA0TEN, Harry/PA1H, Arend/
PA2AWU, Peter/PA2PKZ, Dick/PA4VHF, Frans/PA5CA, PA5R/Jelmar, Hans/PE2HG
and Dervin/PD9DX will be active as LX/PA6Z from Wiltz between October
4-10th. Activity will be on 160-10 meters including 30/17/12 meters,
possibly 6m, using CW, SSB and PSK31. QSL via PA9M, by the bureau or
direct. For more info, visit the Web site at: http://www.pa6z.nl/lx_2009

LZ01, BULGARIA (WFF Op). Operators Zlatan/LZ4ZD and Gosho/LZ1ZF are
expected to organize a WFF expedition to the Natural Park "Shumensko
Plateau" <http://www.shumenskoplato.com/indexen.html> during the late
evening of June 26th, through the afternoon of June 28th, using the
callsign LZ01WFF. Activity was planned for all the HF bands, 80-10 meters
including the 30/17/12m bands, probably on 6 and 2 meters depending on
conditions. Equipment: FT897D, ACOM1000, GP and wire antennas. Grid Loc:
KN33LG.

NIAR PRESS RELEASE (YL Enters the Limca Book Of Records-2009). The NIAR
reports (edited): "Ms. Sadineni Yamini, VU2YAM, aged 22 years member of
National Institute of Amateur Radio (NIAR), Hyderabad, became the 'first
Indian' to participate in an International Dxpedition conducted in an
uninhabited Cocos Island of Costa Rica, Central America, during February
9-13th, 2008.
'Limca Book of Records' is the Indian equivalent to the Guinness Book
of World Records with emphasis on unique achievements of Indians within
the country and abroad. It's a salute to all those Indians who want to
do something different and be remembered for their distinctive deeds.
Yamini, excelled in her achievements for using voice as well as digital

modes of amateur radio communication technology that enables sending e-mail without internet from a remote location. Sponsored by NIAR and Austrian Amateur Radio Society, she was also among the youngest and the only woman of the 12 member team consisting of hams from USA, Europe and Asia.
Several national and international organizations have recognized and acknowledged specific achievements made by Sadineni Yamini earlier. This exceptional achievement now finds place in National Record 2009 of the prestigious Limca Book of Records as per the communication received from the Editor, Limca Book of Records.
Yamini took special interest in the field of amateur radio joining as student member at NIAR and continued to pursue this activity with outmost dedication. She continues to motivate youth to become partners in technology development by exhibiting her skills and undertaking challenging expeditions under extremely difficult circumstances in the field of amateur radio, which will remain as an inspiration to younger generation.
Many national and international print and electronic media already covered her achievement.
Recently, in the first week of June, she participated and excelled her performance in the 'Aila' cyclone relief operations from a remote place in West Bengal state in India."

OY, FAROE ISLANDS (Update). Polish operators Mek/SP7VC and Janusz/SP6IXF will be active as OY/homecall between August 10-16th. Activity will be on 160-6 meters SSB and 2m meteor scatter (Random 144355.0 MHz) FSK441 during the Perseid meteor shower. Operations will be from the IP61 grid square. They plan to have amps for every band and will be using the following antenna system: HF - Spiderbeam, R-7 and INV-L for 160-80m + beverages
2m - A 2M5WL yagi
6m - 6 element yagi
Mek, SP7VC, is also going to operate as SP7VC/MM during their trip on a ferry from Denmark via the Shetlands to Faroe Islands. Mek will be using an IC-706 into a 4 element 20m yagi and a vertical for 6m. He plans to activate Marine Squares JO37, 27, 17, 18, 19, 09, and IP 80, 81, 71. QSL via their home callsigns, by the bureau or direct.

PACIFIC DXPEDITION/TOUR (Update/Change In Plans). Gerben, PG5M, informs OPDX that he will be activating three DXCC entities in the Pacific between September 6-27th. His schedule is as follows:
September 6-7th: Fiji (OC-016); prefix 3D2 (callsign not known yet)
September 8-14th: Tarawa Island (OC-017), W. Kiribati; Callsign is T30G
September 15-16th: Fiji; prefix 3D2 (callsign not known yet)
September 17-23rd: Tuvalu (OC-015); Callsign will be T2G
September 24-27th: Fiji; prefix 3D2 (callsign not known yet)
The callsign is not known for Fiji, but he has requested 3D2G. This will be an ultra light solo DXpedition and CW only. He will use an Elecraft K3, and a 2x20m doublet plus vertical antennas. QSL via PG5M, by the Bureau or direct. For direct requests, please enclose a minimum of 2 USDs for return postage. More details and updates will be available on: http://www.dx.to

PACIFIC TOUR. Don/G3BJ and Hilary/G4JKS will be on vacation in the South Pacific during September 2009. Their activity schedule is as follows:
September 4-16th - Austral Islands (from Rurutu [OC-050] and Tubuai [OC-152]); callsign will be FO/G3BJ
September 18-25th - Niue (OC-040); callsign ZK2BJ
Operations will be mostly CW on 80-10 meters (no 17/12m). They will use a K3 transceiver and a Butternut HF6.

QSL INFO AND NEWS.....
G3SWH QSL MANAGEMENT WEB SITE. Phil Whitchurch, G3SWH, reports: "Over the past few days, I have had some problems with the 'QSL request' and 'contact me' functions of my web site as a result of my ISP changing servers. However, I'm pleased to announce that these problems have all been resolved and the web site is now fully functional." Web page is: http://www.g3swh.org.uk

QSL HQ9R via K5WW. Erik, K5WW, reports: "It seems that quite a few people are still sending QSL for HQ9R to N6FF. Unfortunately, Dick, N6FF, became a Silent Key in August of 2007. I have been taking care of HQ9R's QSL since then. Please send your QSL requests to me, K5WW."

HAVE PATIENCE! More QSL cards were received this past week for the many UA4WHX operations. Vlad is still sending them out.

VK9LA QSL UPDATE. Bill Horner, VK4FW, QSL Manager for VK9LA, informs: "After much haggling with the Australian Customs Department and negotiating with a customs clearance broker, we have finally received the QSL cards from Czech Republic. Originally I envisaged having all direct QSLing done by the end of June, however this is not possible now. On July 2nd I will be away from home for 2 months on a family caravaning holiday. Prior to going I am doing as many as is possible and doing daily postings. As such, many of you will receive your cards within a few days, but there will be also many that will not. Please be patient and do not flood me with email questions. Every time I have to answer an email means less QSLing done before departure. If you are one of the lucky ones that receive your QSL card in the next few days and find missing QSOs, be advised it is because they were not in the log."

VY1JA QRT! Steve, N3SL, reports that he received an E-mail from "J", VY1JA (N8JA), on June 25th, and it states that J's work stint in VY0-land has concluded, and he is back home in the Yukon. The bad news, however, is that he is retiring from ham radio. His note says his station has been dismantled, and he is giving/selling everything to "younger Yukon hams." J's last QSO in the log was 10/19/08. It's sad to see him retire. He gave many a ham many a "clean sweep." Steve states, "I will continue to keep his logs and answer QSLs. Akio, JA3JM, handles QSLing for JA."

QSLS VIA LOTW: 6W/DL7CM, C31CT, E51SC, EA1AKS, H44MY, HA9PP, K5D, LX7I, OA4SS, OH2LU, UA4RZ, V26F, VP2V/SP7VC, YO8FZ and ZK2V

QSLS RECEIVED VIA MAIL: 4K8M, AP2NK, E44M, ER4DX, ER4ER, ER0WW, S04R, TO2T, TO3R, TO4T, TO6T, VP8YLI, WP4U and ZL7T

QSLS RECEIVED VIA THE BUREAU: 4O6T, 4O/K1ZZ, 5U1A, 5U9C, 5Z4DZ, 6W/RW3TN, 7Q7RS, 9X0R, EK3GMM, EM75W, ES1QD, HR2/LUQDY, IS0GQX, J20VB, J5UCW, MJ0LON, OD/UA4WHX, OE50A, SQ9UM/9, ST2VBH, SV3EXU, SX3A, UA3LAR, UT7UV, VU2TS and YT2ED

R3, EUROPEAN RUSSIAN. In preparation for the WRTC-2010, look for the following stations (4 teams) to be active during IARU HF World Championship (July 11-12th) using the special callsign R31WRTC, R32WRTC, R38WRTC and R39WRTC. Activity will be from the WRTC-2010 locations. QSL via the Bureau.

SILENT KEYS.....
K8QOE - Ohio amateurs lost a great friend and dedicated ARRL Ohio Section Manager on Saturday, June 20th. Joe Phillips, K8QOE, suddenly became "SK" at the age of 68. He was a man of many hats (Please read ARRL Special Bulletin ARLX008 and ARRL Letter Vol. No. 25). He was also a DXer and a big "Cleveland Indians" fan (two topics that your editor will miss talking with him about). Ohio amateurs will surely miss Joe.

N0JT - John Trampler, N0JT, became a SK at age 85 on Monday, June 22nd. John was well known in the DX community and was a co-founder of the "247 DX Group" along with Alan/WA4JTK (SK). He also was a DXCC Honor Roll member and a ham for over 60 years.

SPECIAL AWARD AVAILABLE (GB6GEO). Following the very successful event of the Geoparks weekend, the Global network would like to offer a diploma endorsed by HRH The Duke of Edinburgh (the Queen of England's husband) to anybody working either GB6GEO the HQ station as an instant qualifier for the award, or two other Geoparks stations. Radio amateurs who are first to claim the award in their particular country will also get one point towards the two points required for the basic Geoparks diploma. The cost of the award in the UK is 2.20 GBP, in Europe 3 Euros, and 5 USDs anywhere else in the world. Certificate manager for this award is Martin G3VOF; QSL info QRZ.com. For any questions, PLEASE contact Martin at: mgfsystems@...

SPECIAL EVENT (6m Op). Andy, N8OFS, will once again be active as N8O "portable caboose" from Jefferson, Ohio, between July 18-19th, during 1800-2100z. Activity is to celebrate the 25th anniversary for the Ashtabula Carson & Jefferson Railway (AC&J). If you missed him the first time here, this will be your last time to work him. Look for him to be on 50.300 and 52.525 MHz FM, 50.400 MHz AM and 50.200 MHz USB. QSL via N8OFS: Andy Sargent, PO Box 517, Jefferson, OH 44047. For more details about the railroad, visit the Web page at: http://www.acjrscenic.net/history.htm

SV, GREECE (Greek IOTA Tour). Gab, IK3GES, will be starting a Greek island tour beginning on June 28th. He plans to visit the following islands, but details of the dates were not provided. The IOTA Islands are:
EU-060 - Skyros Island (GIOTA NAS-098, MIA MG-115, also count for WLOTA LH-2002)

EU-075 - Salamina Island (GIOTA SAS-040, MIA MG-098, also count for WLOTA LH-4159)
EU-113 - Elafonisos Island (GIOTA INS-007, MIA MG-033, also count for WLOTA LH-0011)
EU-174 - Amoliani Island (GIOTA NAS-046, MIA MG-009)
After activating the above, Gab will then travel to Turkey but is not sure if he will activate any islands there. After Turkey, Gab will team up with Boyan, LZ1BJ, and activate Sveta Anastasiya Island (EU-181, will also count for WLOTA LH-0035). He is expected to start a second island tour from Croatia in September. Details will be forthcoming. QSL via IK3GES, direct or by the Bureau or E-mail Bureau requests.

T32, EASTERN KIRIBATI. Tovia, T32TV, reportedly is a new ham on Christmas Island (OC-024). PLEASE be patient with him. Activity has been on 20 meters SSB after 0600z. QSL route has not been reported.

V6, MICRONESIA (IOTA Op). Yuki, JH1NBN, will be active from three different state island groups of Micronesia. Look for him to activate the following between now and July 21st:
Pohnpei Island (OC-010) - Currently active as V6P through July 4th and will return between July 21-25th.
Chuuk Island (OC-011) - Callsign V6C; between July 4-12th.
Kosrae Island (OC-059) - Callsign V6T; between July 13-21st.
QSL via his home callsign. ADDED NOTE: There has been a report that Yuki may also operate from Guam (OC-026) as KH2/K3ZB on his return back home.

VK9N, NORFOLK ISLANDS (Update/Change). Members of the Hellenic Amateur Radio Association of Australia (HARAOA Group) will be active as VK9NI (not VK9AAA as first announced) between July 22-29th. The HARAOA Group plans to have 4-5 stations on the air and plans to be active on 160-6 meters using CW, SSB and RTTY. They plan to take part in the RSGB IOTA Contest (July 25-26th) during their stay. Equipment to be used are ICOM radios w/Amps using Spiderbeams, verticals, beams and dipoles. Current operators mentioned are: Tommy/VK2IR (Team Leader), Chris/VK3FY (Co-Leader), Peter/VK3FGRC (Team Member/Webmaster), Keith/VK3FT (Team Member), Peter/VK2FPGR (Team Member), Tony/VK3TZ (Team Member), Raffy/VK2RF (Team Member), Andrey/VK5MAV (Team Member) and Alan/VK2GR (Team Member). QSL via W3HNK. More details and updates are available at: http://www.vk9ni.com
Also on Twitter at: http://twitter.com/VK9NI

VP2, MONTSERRAT (NA-103). Bill, W5SJ, will be active as VP2MSJ from VP2MDD's QTH between July 14-21st. His activity will include the CQWW VHF Contest (hoping/praying for some E-skip), but he will be active on other bands that are open, particularly 30 and 60 meters. QSL via W5JAY.

ZK2V OPERATION WRAP-UP. Chris, ZL1CT, reports that his recent ZK2V DXpedition made 15817 QSOs (including 1279 QSOs on RTTY) despite 'flat' band conditions. Many stations enjoyed chasing Chris around the bands and modes to improve their position on the 'ZK2V leaderboard' - Jeff, N8CC, was the overall leader with 16 band-slots out of a possible 20.

Chris has organized a different QTH for his next visit to Niue - if you missed ZK2V, there are 2 DXpeditions to Niue in September and October 2009. Please QSL via N3SL (via the Bureau to N3SL is also OK) - all ZK2V QSOs have been uploaded to LoTW resulting in more than 2000 QSO matches.

Hi Ted,

Thanks for your info and also thank you very much for the EY8MM card that I got via the bureau last week!!

It was a new one for me on RTTY! #120.

I use our WIA QSL bureau a lot, even though the card turnaround is slow, it does work. The recent batch of cards that came in were up to 4 years old. ....interestingly I had a card in that batch which was one of my cards returned to me from TZ6CW Nov 2005, I had put the wrong band on the card, there was a note attached from the manager saying 'this QSO was on X band', he is correct, my error. So I correct my error and send another card, I hope I will get a QSL back by 2013, fingers crossed. Patience is a virtue.

QSL managers predominantly do a fantastic job. I appreciate every card I get and I am grateful that they do use the bureau!

Subject: Re: [DX-IS] QSL help needed

Hi Lance:

I handle the cards of the active DX contesters EY8MM and 4L8A. Over 36,000 so far.
Every 2-3 months, I get a package from the W1 QSL Bureau and 80% of the cards are for these two stations, 20% for me.
These contesters want me to send them ALL cards received, so about 2-3 times a year, I put together 2 to 4 pound packages of Bureau and regular cards for them.
We don't have a surface mail option for overseas here in the USA, so they go by "First Class International Mail" (Air Mail). That costs me about $25-35 per package.

EY8MM provides me with nice picture cards. I use my Canon printer to produce a simple card for 4L8A.

Another one of the costs is sending all the Bureau cards out via the ARRL outgoing system. $10 per pound. Keeps going up too.

It was my choice to reply to ALL incoming cards, Bureau or not. I can do this, because of the generosity of so many stations, who include an extra buck or two.
Only rarely does a direct card without SASE. In the end, it costs me just a few extra dollars out of pocket as all the costs are not recovered. But it's my choice. However, I can understand why some managers will NOT handle Bureau cards. I hope they remain in the minority, but I can understand their feelings.

Best wishes,

Ted Melinosky K1BV

Every 2-3 months, I get a package from the W1 QSL Bureau and 80% of the cards are for these two stations, 20% for me.
These contesters want me to send them ALL cards received, so about 2-3 times a year, I put together 2 to 4 pound packages of Bureau and regular cards for them.
We don't have a surface mail option for overseas here in the USA, so they go by "First Class International Mail" (Air Mail). That costs me about $25-35 per package.

EY8MM provides me with nice picture cards. I use my Canon printer to produce a simple card for 4L8A.

Another one of the costs is sending all the Bureau cards out via the ARRL outgoing system. $10 per pound. Keeps going up too.

It was my choice to reply to ALL incoming cards, Bureau or not. I can do this, because of the generosity of so many stations, who include an extra buck or two.
Only rarely does a direct card without SASE. In the end, it costs me just a few extra dollars out of pocket as all the costs are not recovered. But it's my choice. However, I can understand why some managers will NOT handle Bureau cards. I hope they remain in the minority, but I can understand their feelings.

Best wishes,

Ted Melinosky K1BV

Indeed the QSL Mgr SHOULD ONLY send you the correct band mode card! If your Date/Time were correct enough so he could find you in the log, the LOG GOVERNS the DX QSL.

Hi Ted,

Thanks for your info and also thank you very much for the EY8MM card that I got via the bureau last week!!

It was a new one for me on RTTY! #120.

I use our WIA QSL bureau a lot, even though the card turnaround is slow, it does work. The recent batch of cards that came in were up to 4 years old. ....interestingly I had a card in that batch which was one of my cards returned to me from TZ6CW Nov 2005, I had put the wrong band on the card, there was a note attached from the manager saying 'this QSO was on X band', he is correct, my error. So I correct my error and send another card, I hope I will get a QSL back by 2013, fingers crossed. Patience is a virtue.

QSL managers predominantly do a fantastic job. I appreciate every card I get and I am grateful that they do use the bureau!

10121. Please explain?

Yahoo group: DX-IS (2009)
Date: 2009-06-29 05:50:50 UTC
From: Lance Martin
Topic: 10121 Message: 10121

I have just read this from K7RA, would anyone like to explain what he means here?

Fascinating stuff!

"Though we use the sunspot number and the solar flux index to assess propagation expectations, there is only an indirect connection between these indices and propagation. Neither sunspots nor the radiation measured by the solar flux index directly increase or decrease the levels of ionization in the ionosphere. All three are determined, somewhat independently, by physical processes on or in the Sun.

73, Lance - VK6DU

10122. Re: Please explain?

Yahoo group: DX-IS (2009)
Date: 2009-06-29 10:13:00 UTC
From: Art Burke
Topic: 10121 Message: 10122

His explanation is essentially layman terms for explaining the vagaries of statistics.

When sunspot activity increases, the ionization of the proper area of the ionosphere becomes affected and communication on the higher frequency bands is enhanced. Statistically speaking, one set of data can be measured against another set of data and a "coorelation" established. If the coorelation between the two events is exactly 1, then the relationship is "as good as it can get." However, it doesn't mean that one causes the other! It only means there's a huge relationship between the two. Certainly there is empirical evidence to support the causality between the two. However, he points out in a somewhat roundabout manner, it isn't the *only* thing that creates good propagation. He also more or less points out that we cannot prove that one causes the other (or is a result of the other).

Counting sunspots and measuring solar flux are indeed independent events, but it's hard to deny that when sunspot counts go up (at least in terms of smoothed sunspot numbers as opposed to a day when there are suddenly a lot of spots), there is typically a much better measure of solar flux as well - and communication becomes enhanced as a result.

When I look at any one of a given number of propagation programs, I can see that the probability of an opening between central Florida and Tajikistan on 20M at 0200Z is damned slim, but the propagation progam cannot tell me it is impossible - because about a week or so ago there was EY8AD working east coast U.S. stations - for about 30 to 45 minutes - a couple of hours after local sunset and *many* hours after sunset at his (EY8AD) location.

Lance,

Art is right on.
The measurement of flux (flux 10.7 cm) you refer to is not a measurement of the flux from the Sun which directly affects ionospheric HF communication. However, as Art points out, there is a close relationship. Other flux levels recorded each day appear at:
http://www.swpc.noaa.gov/alerts/solar_indices.html

Sunspots do not have a direct affect on ionospheric HF communication. But, emmissions associated with them do. The strength of the associated emmissions from areas of a group, also, vary from sunspot to sunspot. Sunspots are easy to observe and provide a long history. As with the Solar Flux, there is a close relationship between ionospheric HF communication conditions and the sunspot count.

10125. Re: [DX-IS] QSL help needed

Yahoo group: DX-IS (2009)
Date: 2009-06-29 16:21:44 UTC
From: Bob
Topic: 10078 Message: 10125

Another way to also look at it would be, It doesn't matter who initiates the QSL request. So the QSL manager could have sent a return card with a "PSE QSL" request for a corrected card.

Interesting to note that a "PSE QSL" request is not truly a confirmation, it is a request for a confirmation. I guess it could be looked at as the "PSE QSL" request is a signed statement that the originator has made the QSO.

The wrong band card would surely have been accepted as a band credit towards the DXCC Challenge award. Even though I'm not a LOTW use it does look like a system that does generate real confirmations.

10126. Re: [DX-IS] Re: Please explain?

Yahoo group: DX-IS (2009)
Date: 2009-06-29 16:27:07 UTC
From: CSM(r) Gary Huber
Topic: 10121 Message: 10126

And I have seen a number of Asian stations (Hong Kong, Thailand, China, Taiwan, etc.) on 20 M PSK-31 well past their Sunset and well after my Sunrise in recent weeks during a 67-68 SFI.

73 & DX,

Gary - AB9M

From: Art Burke
Sent: Monday, June 29, 2009 5:13 AM
To: DX-IS@yahoogroups.com
Subject: [DX-IS] Re: Please explain?

His explanation is essentially layman terms for explaining the vagaries of statistics.

When sunspot activity increases, the ionization of the proper area of the ionosphere becomes affected and communication on the higher frequency bands is enhanced. Statistically speaking, one set of data can be measured against another set of data and a "coorelation" established. If the coorelation between the two events is exactly 1, then the relationship is "as good as it can get." However, it doesn't mean that one causes the other! It only means there's a huge relationship between the two. Certainly there is empirical evidence to support the causality between the two. However, he points out in a somewhat roundabout manner, it isn't the *only* thing that creates good propagation. He also more or less points out that we cannot prove that one causes the other (or is a result of the other).

Counting sunspots and measuring solar flux are indeed independent events, but it's hard to deny that when sunspot counts go up (at least in terms of smoothed sunspot numbers as opposed to a day when there are suddenly a lot of spots), there is typically a much better measure of solar flux as well - and communication becomes enhanced as a result.

When I look at any one of a given number of propagation programs, I can see that the probability of an opening between central Florida and Tajikistan on 20M at 0200Z is damned slim, but the propagation progam cannot tell me it is impossible - because about a week or so ago there was EY8AD working east coast U.S. stations - for about 30 to 45 minutes - a couple of hours after local sunset and *many* hours after sunset at his (EY8AD) location.

10130. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-06-29 22:11:01 UTC
From: Paul Dunphy
Topic: 9721 Message: 10130

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Jun 29 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 180 Issued at 2200Z on 29 Jun 2009
IA. Analysis of Solar Active Regions and Activity from 28/2100Z
to 29/2100Z: Solar activity was very low. No flares were detected.
The visible disk was spotless.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 28/2100Z to 29/2100Z:
Geomagnetic field activity ranged from quiet to active levels.
Unsettled to active levels occurred until 29/0600Z, followed by
mostly quiet conditions. ACE solar wind observations indicated Earth
remained under the influence of a coronal hole high-speed stream.
Solar wind velocities gradually increased until around 29/1500Z
(peak 575 km/sec at 29/1501Z), then remained elevated for the rest
of the period. A period of sustained southward IMF Bz occurred until
around 29/0200Z (minimum -9 nT at 29/2102Z).
IIB. Geophysical Activity Forecast: Geomagnetic field activity is
expected to be at quiet to unsettled levels on day 1 (30 June).
Field activity is expected to decrease to mostly quiet levels during
days 2 - 3 (01 - 02 July) as the high-speed stream subsides.
III. Event Probabilities 30 Jun-02 Jul
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF Green
IV. Penticton 10.7 cm Flux
Observed 29 Jun 069
Predicted 30 Jun-02 Jul 070/070/070
90 Day Mean 29 Jun 069
V. Geomagnetic A Indices
Observed Afr/Ap 28 Jun 008/011
Estimated Afr/Ap 29 Jun 010/010
Predicted Afr/Ap 30 Jun-02 Jul 007/008-005/005-005/005
VI. Geomagnetic Activity Probabilities 30 Jun-02 Jul
A. Middle Latitudes
Active 10/10/05
Minor storm 01/01/01
Major-severe storm 01/01/01
```

I worked 3D2CI/3D2CY Conway Reef in October 2001.

This was a 10 man team(American, Yugoslavian, Russian and South African representation). They had a nice website with weblogs and a nice QSL.

The release says it has been 20 years since the *first* activation, not that there has been no activity from Conway Reef in 20 years. What's the problem?

OK, great news Lance.

The Bureau volunteers are my real heroes. My regional contest club (Yankee Clipper CC) does this duty for the W1 call area. It is the most cost efficient method to receive cards, however, the time delays can be irksome.

If I were the manager for TZ6CW, I would have sent you a card for the proper contact. Good grief, you shouldn't have to wait YEARS to correct a simple error. Oh well, something to itch about in the current BAD conditions.

Good dxing.

10134. DX-PEDITION IN AUGUST

Yahoo group: DX-IS (2009)
Date: 2009-06-30 13:14:29 UTC
From: ARMIC EA3RKR ONCE
Topic: 10134 Message: 10134

Dear Friends, it´s great pleasure for us anounce you new DX-Pedition to NAURU, C21TI Pacific Adventure 2009.

Finally DATES CONFIRMED !!! WILL BE ON 17th to 23th August 2009

According to the Team Leader of the group EA4ATI Dani, are now permanently if, after several postponements due to force majeure, confirmed the dates for the DX.pedition C21TI.

Dani plans to travel back to Spain, to finalize preparations and different shipments of equipment for the DX-pedition.

With the sponsorship and assistance from:

Danish DX Group, Radio Club Valdemoro, European DX Foundation, German DX Foundation, ACR El Madroño, Southeastern DX Club, Swiss DX Foundation, Southwest Ohio DX Association, Section Local URE Valdemoro, Union Radio EA7URS of Seville, and ARMIC EA3RKR also of contributions to date: EA5AVW, EA3KN, EC3AJW, IK8CNT, ON4IQ, SM7FJE, EA3RKR and EA4YK.

The dates for now and if everything is ready: 17 to August 23 inclusive.

The activity will be in the air as C21TI and be present in all HF bands from 10 to 160 meters + 6 Mts. Where there was a power station and yagui of 7 elements.

According to the Team Leader of the group EA4ATI Dani, are now permanently if, after several postponements due to force majeure, confirmed the dates for the DX.pedition C21TI.

Thank all the waiting and apologize for the delay completely alien to the will of the organization of the expedition, we all listen to the following August.

Those who want to collaborate, please make your contribution inter alia by Paypal.

All the information of the activity plan of bands and QSL information is available at QRZ.COM since:

http://www.qrz.com/callsign?callsign=C21TI

The activity has prevsto use these frequencies.

BAND SSB CW
160 m 1.825.5 1825.5
80 m 3.799 3.505
40 m 7.065 7.005
30 m ------ 10.110
20 m 14.195 14.025
17 m 18.145 18.075
15 m 21.295 21.025
12 m 24.945 24.895
10 m 28.495 28.025

6 m 50.115 50.115

Collaborate in the dissemination of the event among Others.

Complet new on:

http://www.gratisweb.com/ea3rkr/esp/noticias/C21TI_NAURU.html

We call for maximum dissemination of information, thanks.

Best regards from ARMI EA3RKR Team

10135. Re: Please explain?

Yahoo group: DX-IS (2009)
Date: 2009-06-30 17:46:39 UTC
From: Art Burke
Topic: 10121 Message: 10135

Mark Twain once wrote that there are three kinds of lies:
1 - Lies
2 - Damned Lies
3 - Statistics

I got hung on the "let's prove I'm an expert" and your description was much more concise than mine! Of course all economists (and many statisticians) are two-handed - "On the one hand..."

Art - (no longer working in statistics and economics!,
and happily retired) N4PJ

>
> Lance,
>
> Art is right on.
> The measurement of flux (flux 10.7 cm) you refer to is not a measurement of the flux from the Sun which directly affects ionospheric HF communication. However, as Art points out, there is a close relationship. Other flux levels recorded each day appear at:
> http://www.swpc.noaa.gov/alerts/solar_indices.html
>
> Sunspots do not have a direct affect on ionospheric HF communication. But, emmissions associated with them do. The strength of the associated emmissions from areas of a group, also, vary from sunspot to sunspot. Sunspots are easy to observe and provide a long history. As with the Solar Flux, there is a close relationship between ionospheric HF communication conditions and the sunspot count.

10136. Ohio/Penn DX Special Bulletin #914.1

Yahoo group: DX-IS (2009)
Date: 2009-06-30 19:45:15 UTC
From: Tedd Mirgliotta (KB8NW)
Topic: 10136 Message: 10136

SB DX @ WW < KB8NW $OPDX.914.1
Ohio/Penn DX Special Bulletin No. 914.1

The Ohio/Penn DX PacketCluster
DX Special Bulletin No. 914.1
BID: $OPDX.914.1
June 30, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, Armic/EA3RKR, Ron/K5XK, and Maurice/F5NQL for the following DX information.

*** EDITOR'S NOTE. Three major developments/announcements have been announced which we felt should be sent out before the usual bulletin that comes out on Sunday.

3B7, ST. BRANDON. QSL Manager Ron, K5XK, reports to OPDX that Rachid, 3B8FQ, has received approval and will activate St. Brandon Island as 3B7FQ again in August. Rachid believes this may be the last trip to St. Brandon for the next five years. As in his previous travels to 3B6FQ and 3B7FQ, this will be a working trip with time shared for maintenance on the island's meteorological equipment. Travel to 3B7 will be by boat, departing Mauritius on August 10th, and returning from St. Brandon on August 30th. Operation will be CW/SSB on 40-10 meters. Another trip to Agalega Island as 3B6FQ is possible in November of this year. QSL 3B7FQ and Rachid's other callsigns via K5XK, per info on QRZ.com.

C2, NAURU (Update). Armic, EA3RKR, provides an update for the upcoming C21TI DXpedition to Nauru. As mentioned in Sunday's bulletin the operation will take place between August 17-23rd. In the new press release the Team Leader of the group Dani/EA4ATI, states dates are now permanent after several postponements. Dani plans to travel back to Spain to finalize preparations and different shipments of equipment for the DXpedition. All was possible thanks to the sponsorship and assistance from: Danish DX Group, Radio Club Valdemoro, European DX Foundation, German DX Foundation, ACR El Madrono, Southeastern DX Club, Swiss DX Foundation, Southwest Ohio DX Association, Section Local URE Valdemoro, Union Radio EA7URS of Seville, and Armic/EA3RKR. There was also individual contributions by (as of to date): EA5AVW, EA3KN, EC3AJW, IK8CNT, ON4IQ, SM7FJE, EA3RKR and EA4YK. Look for activity by C21TI to be on all HF bands from 160-10 meters + 6 meters. Station will have power and a 7 element yagi. The suggested frequencies are:
CW - 1825.2, 3505, 7005, 10110, 14025, 18075, 21025, 24895 and 28025

SSB - 1825.2, 3799, 7065, 14195, 18145, 21295, 24945 and 28495 kHz
6m - 50.115 MHz

Armic, EA3RKR, states in the press relase that they apologize for the delay and thank all for waiting. They hope to work you in August. The team is still looking for donations/funds and your contribution can made via Paypal. QSL via EA4ATI. All the details and QSL information is available at QRZ.com at: http://www.qrz.com/callsign?callsign=C21TI
Also: http://www.gratisweb.com/ea3rkr/esp/noticias/C21TI_NAURU.html

FR/G, GLORIOSOS. In a press release, the Gloriosos 2009 DXpedition has once again been postponed "because of flight problems". They "think", however, that the DXpedition could begin at the end of August. The release states, "The runway on Grande Glorieuse suffers heavy problems of stability which have to be solved very quickly, in next July, to allow again the jumbo planes landing with full security. This postponing will allow us to include new operators, David, F8CRS, and Bernard, F5LPY."
The press release states that there will be seven operators that will now go to FT5G. They will have three stations which will be active 24 hours a day and the 3rd dedicated to monitor the 6 meter. This last station will be used back on HF if propagation opens the lower bands. The length of the stay is always scheduled for three weeks if no other change will happen. They also added, "We must once again remind all of you that the landing on these islands is very difficult and the Go signal is given only when all the security measures are in place, known and applied. We have to thank many for their help: the French Australes and Antarctic Territories Administration, The South Indian Ocean Zone Forces Headquarter, and the Commandment of the French Foreign Legion detachment in Mayotte. More news is to be published in due time... Gloriosos 2009 crew"
There was one last official comment by Didier, F5OGL, team leader (edited): "A part we can say, even if the first event which made the July 2009 Gloriosos postponed hadn't happen; today's aircrash of the Yemenia A310 at sea after 2 hours of flight is a new event which might have made the DXpedition postponed in any case. The plane which would have been used to go from La Reunion to Glorieuses is now on the zone and will participate in the search of survivors for an unknown length of time... These events and to reinforce the runway have been considered by the French Authorities. For the most security, please wait again with us for a few weeks."

:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Jun 30 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 181 Issued at 2200Z on 30 Jun 2009
IA. Analysis of Solar Active Regions and Activity from 29/2100Z
to 30/2100Z: Solar activity was very low. No flares were detected.
The visible disk was spotless.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 29/2100Z to 30/2100Z:
Geomagnetic field activity was at mostly quiet levels. ACE solar wind
observations indicated velocities gradually decreased from 551
km/sec to 449 km/sec during the period. IMF Bz varied from +4 to -4
nT during the period.
IIB. Geophysical Activity Forecast: Geomagnetic field activity is
expected to be at quiet to unsettled levels during days 1 - 2 (01 -
02 July). Field activity is expected to decrease to quiet levels on
day 3 (03 July).
III. Event Probabilities 01 Jul-03 Jul
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF green
IV. Penticton 10.7 cm Flux
Observed 30 Jun 068
Predicted 01 Jul-03 Jul 068/068/068
90 Day Mean 30 Jun 070

10139. RE: [DX-IS] Re: Please explain?

Yahoo group: DX-IS (2009)
Date: 2009-07-01 05:21:09 UTC
From: Lance Martin
Topic: 10121 Message: 10139

Thanks for that Art,

I guess we spend a lot of time looking at the SSN and Solar Flux figures waiting for them to go up. When someone implies that those figures don't directly affect propagation then it makes one wonder why one is relying on the figures...

Your explanation makes sense to me, very well put.

I reckon there is still a lot of research to be done in this area as there still seems to be some mystery about how it all happens.

FB on the EY8. We've been getting a bit of Central and West Africa over here on 20m around 0600 - 0700z LP in the afternoon on the weekends.

Even worked D2QMN the other day for a new one on RTTY 20m (though that was SP, around 0600z).

73, Lance - VK6DU

To: DX-IS@yahoogroups.com
Subject: [DX-IS] Re: Please explain?

His explanation is essentially layman terms for explaining the vagaries of statistics.

When sunspot activity increases, the ionization of the proper area of the ionosphere becomes affected and communication on the higher frequency bands is enhanced. Statistically speaking, one set of data can be measured against another set of data and a "coorelation" established. If the coorelation between the two events is exactly 1, then the relationship is "as good as it can get." However, it doesn't mean that one causes the other! It only means there's a huge relationship between the two. Certainly there is empirical evidence to support the causality between the two. However, he points out in a somewhat roundabout manner, it isn't the *only* thing that creates good propagation. He also more or less points out that we cannot prove that one causes the other (or is a result of the other).

Counting sunspots and measuring solar flux are indeed independent events, but it's hard to deny that when sunspot counts go up (at least in terms of smoothed sunspot numbers as opposed to a day when there are suddenly a lot of spots), there is typically a much better measure of solar flux as well - and communication becomes enhanced as a result.

When I look at any one of a given number of propagation programs, I can see that the probability of an opening between central Florida and Tajikistan on 20M at 0200Z is damned slim, but the propagation progam cannot tell me it is impossible - because about a week or so ago there was EY8AD working east coast U.S. stations - for about 30 to 45 minutes - a couple of hours after local sunset and *many* hours after sunset at his (EY8AD) location.

From: Art Burke
Topic: 10121 Message: 10140

This morning, a note on a local reflector highlights the "problem." Some one has taken note on a series of sunspots now appearing on the "edge" of the sun, making its way across the visible portion. Operators are "implored" to take advantage of the increased activity. What increased activity? How long will it take (if it does in a measureable time!) to see the solar flux spike to 80 or 90 and give us condx far superior to what we've seen with the SFI hanging around 70 for so long?

In 1859 there was a huge burst of energy from the sun that destroyed portions of the existing infrastructure (mostly telegraph wires at the time - electricity as we know it was in its infancy, if at all) and started fires in numerous parts of the world. It has been estimated that such an event (the Carrington event was named for the astronomer who witnessed it) today could conceivably destroy the infrastructure so heavily that electricity would virtually disappear in many areas.

However, it was also pointed out that such "events" only occur something like once every 400 years or so. Not to mention that the event can occur in a direction having absolutely no impact on earth.

As it pertains to what the sun can do and will do, we're still just babes in the woods as far as trying to learn it and forecast it.

Sometimes it seems almost diabolical that there are doomsayers out there predicting the end of the world when great amounts of sunspots come along and we're begging our a$$e$ off for it!

Good Morning All:

Has LoTW just slowed to a creeping crawl? last evening I uploaded contacts, and they are yet to show up in my upload total.

Hi Mike,

I uploaded 52 QSOs last night and they were completed 2009-07-01
at 00:36:02, at least according to the "Your Activity" logs. I
didn't check until I saw your email, so the time I am seeing might be
the upload time, and not the actual time they were processed.

Either way, it's still working.

....but, in yesterdays mail came a publication free sample called "Military"
much in the same format as World Radio and to my surprize, the publisher is
Armond Noble. So much for retirement.....

I used to get that as a young Marine many moons ago!
And if I recall correctly, he did a travel one too that was
pretty much in the same format as WR and the Military mag.

Good Morning Paul & all:

Thanks for the reply. I finally got it straightened out. I had received a new certificate which was/is on this computer, but had not moved it to the shack machine. The shack machine uploaded the file with the old certificate, and the data went into a black hole. The dates on both certificates were still valid, but as as soon as the new one was issued, the old one was deleted from the database at League HQ. I moved the new certificate to the shack machine, and POOF, my Q's showed up in LOTW.

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Jul 01 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 182 Issued at 2200Z on 01 Jul 2009
IA. Analysis of Solar Active Regions and Activity from 30/2100Z
to 01/2100Z: Solar activity was very low. No flares occurred during
the past 24 hours. A small plage region was noticed near S27E45 but
has not yet been able to produce persistent spots. The remainder of
the solar disk was quiet and void of sunspots.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 30/2100Z to 01/2100Z:
The geomagnetic field was quiet during the past 24 hours.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be mostly quiet with a chance for unsettled periods for
the first day (2 July). Activity levels are expected to be quiet for
the second and third days (3-4 July).
III. Event Probabilities 02 Jul-04 Jul
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF green
IV. Penticton 10.7 cm Flux

ARLP027 Propagation de K7RA

ZCZC AP27
QST de W1AW
Propagation Forecast Bulletin 27 ARLP027
>From Tad Cook, K7RA
Seattle, WA July 2, 2009
To all radio amateurs

SB PROP ARL ARLP027
ARLP027 Propagation de K7RA

It was a perfect Field Day weekend from where I stood. The weather was warm, skies clear, the space weather was calm, and there was enough propagation to make a domestic contest interesting. I had no plans, so on Saturday I went to the web site http://www.arrl.org/contests/announcements/fd/locator.php and used the Field Day Station Locator. The one I landed at (W7AUX) listed a contact number, a cell phone at the site. I inquired if they needed a CW op, was told "We could use any operators," and drove up to the site north of Seattle. I had a lot of fun on 20 meter CW. Sporadic E even helped out, and the 6 meter station made a number of contacts with other Field Day stations in the western U.S.

You can get a taste of what happened at Field Day stations around the country via the Contest Soapbox at, http://www.arrl.org/contests/soapbox/. I noticed quite a few posts from Puerto Rico this year. For a remarkable story from Michigan about what happened when a 13-year-old non-ham showed up and wowed everyone by operating the GOTA station on 40 meter CW, see the narrative from KB6NU at, http://kb6nu.com/field-day-2009-stuart-makes-his-first-contact/. A shorter version with a photo is on page one of the 2009 Field Day Soapbox. Just search for KB6NU.

Last week's Propagation Forecast Bulletin mentioned a problem reaching the FTP site for the Penticton observatory, where we get our solar flux numbers. Flux values in our bulletin were expressed in whole numbers last week, not resolved to one tenth as they usually are. If you use the WA4TTK Solar Data Plotting Utility (see http://www.craigcentral.com/sol.asp) to grab the numbers from our bulletin, or if you keep records in some other way, correct June 18 flux to 67.7, June 20 to 66.7, June 23 to 67.9 and June 24 to 66.8. Of course, this only matters if you care about resolving the data to one tenth. The NOAA site at,

http://www.swpc.noaa.gov/ftpdir/indices/DSD.txt just rounds them off to whole numbers.

The problem turned out to be at this end, due to a quirk in Internet Explorer 8. In the new browser, unless you have the Enable FTP Folder View option checked in the Browsing section under the Advanced tab in Internet Options, an address such as ftp://lynx.drao.nrc.ca/pub/solar/FLUX_DATA/fluxtablerolling.text could be blocked. Another option is to delete the ftp:// characters in the web address field, then hit Enter, and it will resolve to an http:// URL.

With June over, we can now add to our 3-month moving average, using the April, May and June sunspot numbers to calculate a new average centered on May. The April number (average of daily sunspot numbers for March, April and May) was 2, and the May number is 4.

Here are the three month averages of daily sunspot numbers since January 2007:

Jan 07 22.7
Feb 07 18.5
Mar 07 11.2
Apr 07 12.2
May 07 15.8
Jun 07 18.7
Jul 07 15.4
Aug 07 10.2
Sep 07 5.4
Oct 07 3.0
Nov 07 6.9
Dec 07 8.1
Jan 08 8.5
Feb 08 8.4
Mar 08 8.4
Apr 08 8.9
May 08 5.0
Jun 08 3.7
Jul 08 2.0
Aug 08 1.1
Sep 08 2.5
Oct 08 4.5
Nov 08 4.4
Dec 08 3.6
Jan 09 2.2
Feb 09 2.0
Mar 09 1.5
Apr 09 2.0
May 09 4.0

If you look at Propagation Forecast Bulletin ARLP023 (http://www.arrl.org/w1aw/prop/2009-arlp023.html) which was the last time these numbers were presented, you may notice that the averages centered on December 2008 and January and February 2009 have been revised slightly. This is due to a very small revision in my records of sunspots. But these numbers agree with the data presented at the end of each bulletin.

The one month average for June was 6.6, a good sign because it is higher than the latest 3-month average of 4.

Steve Taylor, K5MR of Gunter, Texas (north of Dallas) was at home last Saturday night during Field Day, and checked 10 meters for sporadic-E skip. He pointed his 7 element beam straight north, and found stations in MN, WI, IL, WY, ND, SD, NE, CA and AZ. He was surprised at 0430z when OH2MCN called him with a solid S7 signal and no flutter or auroral distortion.

Mike Treister, W9NY of Dune Acres, Indiana has more 10 meter sporadic-E news. On June 26 he wrote, "Well it is no secret but for the past 8-10 days, 10 meter propagation has been remarkable. Very widespread sporadic-E seemingly in every conceivable direction (Friday night tonight till 11:30 PM when I stopped) working stations east coast, Canada, south, mid-west, many with 5/9 plus reports, many stations using small antennas and low power, like the good old days. I have also worked a number of Europeans, South Americans, and Caribbean stations at various times on 10. Some Europeans have been coming in well over 5/9. So ionospheric skip has certainly been present. Oh, and worked quite a few stations on 12 meters too. I have heard that 6 meters was open too, but didn't get up there. After calling CQ on 10 meters I have generated huge pile-ups from Dune Acres, Indiana- just like being at my occasional QTH in Nevis as V47NS!"

Back during the All Asia CW Contest, June 20-21, Neal Sulmeyer of Canton, Georgia has an E-skip report for 10 and 15 meters. He writes, "I too had great propagation into JA Friday night during the AA CW. About 30 JAs plus BY, BV, HL, 3 UA0s and VR2 on 15 and about 10 JAs and UA0 on 10M. I also heard 9M6XRO on 10 but as he is not in Asia I did not work him. On Saturday worked A45WG, A65BD, 4L6QC on a dead band!"

Larry Godek, W0OGH in Gilbert, Arizona reports good times on 6 meters with two watts and a 5 element Yagi. He uses DX Sherlock to check for openings (http://www.vhfdx.net/spots/map.php) and notes that on Saturday, June 27 during Field Day the eastern portion of the U.S. was covered with a blob of red lines.

He wrote, "By 1601Z signals started coming up out of the noise and things got hot. First off was AA4V in FM02 followed by EM44, FM06, DN25, EM37 and a ton more."

"Man was it a hoot, Only had 90 QSOs to log but I worked Maine, Vermont, New Hampshire, Virginia, Connecticut, Maryland, Ohio, New York, Pennsylvania, South Carolina and at least 20 more states. Grid squares I never thought I'd hear, much less work. High spot was hearing JA7WSZ and JH0RNN on CW even though I couldn't get back to them. I tried but kind of got over ridden by some of the higher power guys. Didn't hear a single Florida, Iowa, Minnesota, New Mexico, Alabama, West Virginia, North Dakota or Michigan station."

"Today, June 30 didn't start out very good. Looked fair on the east coast but nothing out west here. Picked up a couple of stations to the SE but around 1816 the Pacific NW started showing up. Looking at DX Sherlock web page there were lots of lines from the SW here going to Alaska. Well why not. So I slid down to 50.095 and heard KL2AX calling CQ. Jumped on that one right away and made a contact out of it. WHOOPEE! Alaska with 2 watts. When I finished that one the frequency filled up with stations calling them. While there was a VE8 operating also I didn't hear anything out of him. 2W of RF is fun but 16 more dB of power will really help. Probably next step then will be to get a pair of 7 el Yagis and stack them. That should really help the 100W output."

Larry also suggests that everyone check out the Logbook of the World at, http://www.arrl.org/lotw/.

In other 6 meter news, Brian Smith, W9IND reports that the W9VW beacon on 50.069 MHz from grid square EM69wt in Indianapolis was heard by F6FHP in France at 2010z on June 26. The grid square at the other end was IN94, and the signal report was 529. The beacon runs 8 watts.

Mike Schwieterman, K7MS of Lake Tahoe (Incline Village, Nevada) reports a 160 meter opening recently, using a dipole at 100 feet. He writes, "At 03:20z June 25 made contact with PY2BW (Brazil) on 1.821 CW - RST was 549, PY2BW was also 549. Heard CP4BT in QSO with PY2BW after our contact. I called CP4BT after the QSO ended but no response. Both stations were very copyable for about 60 minutes."

Mike notes that he heard W1AW around 1.8025 MHz with S5-S9 signals around the same time.

Earlier in the month, Bob Karpinski, WB8B of Clinton Township, Michigan had some QRP fun on June 11 and 17. With one watt CW on June 11 he worked N1BAA in Massachusetts at 2355z on 10 meters. Also with one watt on 10 meters he worked W1QS in Maine on June 17 at 2354z. Also on June 17 with 5 watts CW on 12 meters he worked VA2WDQ (Quebec) at 2336z, AA4AK in Maine at 2342z, and at 2347z he worked CT1AOZ in Portugal.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at, http://www.arrl.org/tis/info/propagation.html. For a detailed explanation of the numbers used in this bulletin, see http://www.arrl.org/tis/info/k9la-prop.html. An archive of past propagation bulletins is at, http://www.arrl.org/w1aw/prop/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://www.arrl.org/qst/propcharts/.

Instructions for starting or ending email distribution of this bulletin are at http://www.arrl.org/w1aw.html#email.

Sunspot numbers for June 25 through July 1 were 0, 0, 0, 0, 0, 0, and 0 with a mean of 0. 10.7 cm flux was 68, 66.8, 67, 67, 68.5, 68.2, and 67.5 with a mean of 67.6. Estimated planetary A indices were 7, 3, 3, 11, 10, 5 and 4 with a mean of 6.1. Estimated mid-latitude A indices were 6, 2, 4, 8, 7, 5 and 3 with a mean of 5.

SB DX ARL ARLD026
ARLD026 DX news

This week's bulletin was made possible with information provided by NC1L, the OPDX Bulletin, DXNL, 425 DX News, The Daily DX, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

TIMOR-LESTE, 4W. Chris is QRV as 4W6FR and has been active on 20 and 17 meters using either PSK and SSB after 0900z. QSL via VK4FW.

MADAGASCAR, 5R. Wayne, W5KDJ will be QRV as 5R8KD from July 5 to 17. Activity will be on 160 to 6 meters using CW and RTTY. This includes an entry in the upcoming IARU contest. QSL to home call.

MALDIVES, 8Q. Pierre, HB9QQ is QRV as 8Q7QQ until July 11. He is active on the newer bands, 6 meters and EME. QSL to home call.

PORTUGAL, CT. A group of operators will be QRV as CR5NRA on July 4 during the WLOTA contest. QSL via operators' instructions. In addition, members of the Algarve STAR DX Team will be QRV as CR6A on July 5 from Fuzeta Est Mole Lighthouse. QSL via CT1GFK.

TAJIKISTAN, EY. Rahim, EY7AD has been QRV on 20 meters SSB around 0130z. QSL to home call.

JAPAN, JA. Operators 7N4AGB/6, JK1EBA/6, JJ1JGI/6, JA1XEQ/6 and JA1KJW/6 will be QRV from Tokashiki Island, IOTA AS-017, from July 7 to 10. QSL to home calls.

PUERTO RICO, KP4. Look for station K4G to be QRV during the WLOTA Contest from WLOTA 2802 using CW, SSB and RTTY. QSL via WP3MW.

POLAND, SP. In celebration of the Tall Ships' 2009 Race in Gdynia, special event stations SN2009TSR, SN50ZAGLE, SN09A, SN09C, SN09E, SN09H, SN09I, SN09L, SN09P, SN09R, SN09S, SN09T, SP09A, SP09L, SP09S and SQ09S are QRV until July 7. QSL via operators' instructions.

EAST KIRIBATI, T32. Tovia, T32TV has been QRV from Christmas Island, IOTA OC-024, using SSB on 20 meters around 0600z. QSL via operator's instructions.

ARUBA, P4. Joe, W2OZO is QRV as P40OZ until July 4. Activity is mostly on 20 meters using SSB. QSL to home call.

BRAZIL, PY. Look for ZX8A to be QRV from Sao Luiz Island, IOTA SA-016, from July 8 to 11. Activity will be on 40 to 10 meters using CW and SSB. This includes possible activity from the Aracagi Lighthouse ARLHS BRA-005. QSL via PT2OP.

DODECANESE, SV5. George, GM0IIO is QRV as SV5/homecall from Rhodes, IOTA EU-011, until July 8. Activity is on 20 meters using CW and SSB. QSL to home call.

CHAGOS ISLAND, VQ9. Larry, VQ9LA has been QRV on 20 meters around 0240z. QSL to home call.

THIS WEEKEND ON THE RADIO. The WLOTA Contest, Digital Pentathlon, Venezuelan Independence Day Contest, DL-DX RTTY Contest, Original QRP CW Contest, PODXS 070 Club 40-Meter Firecracker Sprint, MI QRP July 4th CW Sprint and the DARC 10-Meter Digital Contest will certainly keep contesters busy this weekend. The RSGB 80-Meter Club CW Championship is scheduled for July 6. The ARS Spartan CW Sprint is scheduled for July 7. Please see July QST, page 76, and the ARRL and WA7BNM contest web sites for details.

>
> Well here we go. The following group will be operating from Lesotho
> starting on July 29th through the 13th of Aug. We will be operating with
> the equipment
> supplied by African DX Safari in Johannesburg. The following hams will be
> on the air. Pista(Dr. Gasper Istvan HA5AO) 7P8AO;
> Ben Pyfer(DJ0YI) 7P8YI; Laurent Thomin(W0MM) 7P8MM; John
> Plenderleith(9M6XRO) 7P8OK; Frosty(Charles Frost K5LBU) 7P8CF.
>
> We will have 2 stations on all the time and might have a 3rd for PSK &
> RITTY. Will work all bands but will put in lots of effort on 160/80 meters
> as we have a 70 foot vertical which works great on those bands. For 40
> will have a 4sq. dipole setup on one of the towers. The 2 trailers with
> towers that will be up and have Tennadayne T8 LogP antennas at about 55
> feet. For 30 meters a sloper off one tower. I will try to get Daniel ZS6JR
> to also put up our M2 6 meter beam so can give that band a try.
>
> Qsl to each persons home call please except for 9M6XRO John has his own
> QSL manager in the UK.
>
> The guys from 4M5DX will not be able to join up with us due to things
> beyond their control. We do wish that they could but things did not work
> out for them.

**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

3B7 - Rachid, 3B8FQ has received approval and will be active as 3B7FQ from St. Brandon Island (AF-015) in August. This may be his last visit to 3B7 for the next five years. It will be a working trip, with time shared for maintenance on the island's meteorological equipment. He will depart Mauritius on 10 August and return from St. Brandon on the 30th. Operation will be SSB and CW on 40-10 metres. QSL via K5XK. [TNX K5XK]
3D2_cr - Conway Reef (OC-112) was activated for the first time in April 1989 by 3D2CR. Twenty years after that event, Hawa, DK9KX (ex 3D2CR) will return to Ceva-I-Ra along with six other operators (namely Norbert/DJ7JC, Jan/DJ8NK, Dieter/DJ9ON, Heye/DJ9RR, Hans/DL6JGN and Ron/PA3EWP). They plan to be active between 1 and 10 October, depending on weather conditions, and to operate SSB, CW, RTTY and PSK on 160-6 metres. The callsign will be announced when the operation starts. QSL via DJ8NK, direct or bureau. A web page is under construction. [TNX DJ8NK]
3W - In March 2008 XV3M (F6BUM) activated IOTA group AS-185, but was able to make only 577 QSOs under difficult circumstances [425DXN 886]. Those who did not work Jack will be given a new chance on 10-18 April 2010, when Hans-Peter, HB9BXE and a large group of operators from Switzerland, Germany and Vietnam will be active as 3W6C from Con Co Island. Further information is expected in due course. For the time being, please visit http://www.3w6c.qrv.ch/ and consider supporting the project with a donation. [TNX HB9BXE]
4W - Chris, VK4FR works for the Australian Armed Forces and is currently stationed in Dili, East Timor (OC-148) through October. He operates SSB and digital modes as 4W6FR in his spare time. QSL via VK4FW. [TNX VK4FW]
8Q - Pierre, HB9QQ is now active as 8Q7QQ from the Maldives until 11 July. He operates on 50183 kHz in JT65A mode (first period) around moonrise and moonset in search of Sporadic E and EME contacts. Other activities include 30, 17 and 12 metres. QSL via mome call. [TNX HB9PL]

9Y - The Trinidad and Tobago Amateur Radio Society (TTARS) will be QRV during the IARU HF World Championship (11-12 July), probably as 9Y4HQ (callsign to be confirmed). IOTA Chasers please note that activity will take place from two different locations, one on Trinidad (SA-011) and the other on Tobago (SA-009). The station on Tobago is most likely to operate on 40 and 80 metres. [TNX The Daily DX]
CT9 - Look for CT9/DB2TR, CT9/DK7TM, CT9/DL1CW, CT9/DL1SBF and CT9/DL3ZH to operate SSB, CW and RTTY from Madeira (AF-014) on 10-15 July, IARU HF World Championship included. QSL via home calls, bureau preferred. [TNX DL1SBF]
DL - Harald, DF6BL will be active as DF6BL/p from Langeness Island (EU-042) on 6-13 July. QSL via home call, bureau preferred. [TNX www.rsgbiota.org]
DL - Sebastian, DL1AXX will be active as DL1AXX/p from Warder Island (EU-128, O-32 for the German Island Award) on 11-18 July. He will operate CW only on 30, 40 and 80 metres. QSl via home call, bureau preferred. [TNX www.rsgbiota.org]
DU - Moj, PA3GZU will be active holiday style as DU9/PA3GZU from Mindanao Island (OC-130) from 6 July to 1 August. QSL via home call, bureau preferred. [TNX www.rsgbiota.org]
EI - Members of the Dalkey Island Contest Group (namely EI2CA, EI5DI, EI6EW, EI7CC, EI7CD, EI8BP and EI8CE) will participate in the IOTA Contest (25-26 July) as EJ1DD from Clare Island (EU-121). QSL via EI7CC. Before and after the contest, on 23-27 July, look for the individual operators using EJ prefixes. [TNX EI7CC]
FT5G - The much anticipated DXpedition to Glorioso (FT5GA) has been postponed again, hopefully at the end of August. The main cause for this unexpected postponement is a stability problem of the runway on Grande Glorieuse, which must be fixed in early July in order to allow safe landings. However, the silver lining is that two more operators (David, F8CRS and Bernard, F5LPY) will be able to join F4EGS, F5IRO, F5PRU, F5RQQ and F5TLN. They still expect to remain on the island for about three weeks, and to have four stations active 24/7 (three on the HF bands and one on 6 metres). [TNX F5NQL]
G - The Wakefield & District Radio Society will be active as GB1HI from Holy (Lindisfarne) Island (EU-120) on 10-13 July. QSL via M3ZYZ.
HB0 - Alain, F5LMJ will be active as HB0/F5LMJ/p from Liechtenstein on 11-24 July. He plans to operate CW and digital modes during his evening and early morning hours. QSL via F5LMJ, bureau preferred. Alain will upload his log to LoTW. [TNX F5LMJ]
HK0_sa - The Daily DX reports that Dennis, 5J0BV [425DXN 944] has extended his stay and is now expected to remain active from San Andres until 16 UTC on 6 July. QSL via K7BV.
I - Andrea, IZ2LSC will be active holiday style as IH9/IZ2LSC from Pantelleria Island (AF-018, IIA TP-001) on 20-31 July, including an entry in the IOTA Contest. He will operate SSB and digital modes on 40-10 metres. QSL via IZ2LSC (bureau only). He will

upload the log to LoTW. Andrea's blog is at
http://timpyblog.blogspot.com/2009/06/pantelleria-island.html [TNX
IZ2LSC]
JA - Nine HQ stations representing JARL will be active from various
regions of Japan for the IARU HF World Championship (11-12 July):
Call Band/Mode Location

8N1HQ 15m-CW Kimitsu City, Chiba
8N1HQ 160m-CW, 10m-CW Minato Ku, Tokyo
8N1HQ 80m-Ph Minami-Ashigara City, Kanagawa
8N2HQ 10m-Ph Nakatsugawa City, Gifu
8N3HQ 15m-Ph Nara City, Nara
8N3HQ 40m-CW Kobe City, Hyogo
8N3HQ 20m-CW Miki City, Hyogo
8N4HQ 80m-CW, 40m-Ph Okayama City, Okayama
8N8HQ 20m-Ph Iwamizawa City, Hokkaido
Each station may be heard on other bands in the week before the
contest. All QSOs will be confirmed automatically via the bureau.
[TNX JA1BPA]
LX - Once again LX0HQ will represent the Luxembourg Amateur Radio
Society (RL) in the IARU HF World Championship. There will be
twenty operators for nine stations from Eschdorf (QTH of LX7I,
webcam at http://www.lx2a.com) and Esebuer (QTH of LX0RL). The new
QSL route is via LX2A. Bureau cards can be requested at
lx0hqgrlx.lu and the log will be uploaded to LoTW. [TNX LX2A]
OH - Look for UA1ANA, RA1AGL and RV1AE to be active as OH2DZ/p,
OH/RA1AGL/p and OH/RV1AE/p from Reposaari Island (EU-173) on 3-6
July. [TNX robinsons.ru]
S5 - Nineteen operators will run the twelve S50HQ stations (10-160
metres CW and SSB) that will represent ZRS during the IARU HF
World Championship (11-12 July). QSL via the Slovenian QSL bureau
and LoTW. [TNX S50U]
SV - Alexandros/SV8CYR, Vassilis/SV8CYV, Ilias/SV8FMY and Giorgios/
SV8IJZ will be active as SX8GR from Samos Island (EU-049) for the
Aegean VHF Contest (4-5 July, rules at http://www.5-9report.gr/).
They will operate SSB and CW on 6 and 2 metres, and on 40 and 80
metres during their nights. QSL direct to SV8FMY. [TNX SV8CYV]
SV - Gabi, HA1YA will be active as J48YA from Zakynthos Island (EU-052)
on 8-21 July, and from Thassos Island (EU-174) from 25 August to 8
September. He will operate on 6, 4 and 2 metres, as well as on the
HF bands. QSL via home call. [TNX DL8EBW and MMMonVHF]
UA - Alex, RA1QY plans to operate as RA1QY/1 from several islands in
Onega Bay, White Sea on 4-11 July. IOTA groups concerned are
EU-147 and EU-153, with Purluda Island (EU-153) as main target.
Details can be found at http://robinsons.ru/ (click on "News
RRA"). QSL via RA1QY ,direct or bureau. [TNX RA1QY]
YL - Special callsign YL90AIR will be used through 31 December to
celebrate the 90th anniversary of the Latvian Air Forces. QSL via
bureau and eQSL.cc [TNX YL3AD]

PACIFIC TOUR ---> Gerben, PG5M reports that the dates for his September operations from Kiribati and Tuvalu [425DXN 947] have been swapped. The updated schedule is as follows:
06-07 September Fiji requested call 3D2G
08-14 September Western Kiribati T30G
15-16 September Fiji requested call 3D2G
17-23 September Tuvalu T2G
24-27 September Fiji requested call 3D2G
Gerben will operate CW only. QSL via PG5M, direct or bureau. Updates will be posted at http://www.dx.to/ [TNX PG5M]

Direttore Responsabile I2VGW

DX SUMMIT ---> In the process of making the DX Summit service more focused on younger user segments and non-amateur radio population, two features have been added recently to the Radio Arcala (OH8X) DX Summit portal (http://www.dxsummit.fi/). Each spotting and spotted callsign is automatically linked to qrz.com, providing a more human link to the personal profiles of people and to their pictures. Additionally, each line carries the name of the DXCC country spotted.
In a few months time, custom selected filters will be provided to the public allowing users to receive personalized spots. While initially the selected spots will be sent to your personal e-mail address, the ultimate aim is to offer an SMS (short message service) option to DX Summit users. This service is a non-profit exercise for Radio Arcala, but donations will be gratefully accepted. A Help Desk for regular users and for S/W developers is being set up, and support is currently channelled through the relevant button: donations will be used to help fund exclusively the DX Summit Help Desk function, and OH8X will send you a Radio Arcala wall calendar postpaid to those who donate. Support related to the calendar is limited to the months of July and August 2009. [TNX OH8X]

NCDXF ---> The Northern California DX Foundation Board of Directors is pleased to announce the appointment of Ed Muns, W0YK, as an Advisor to the NCDXF Board of Directors. Ed's primary duty, along with Doug Bender, WW6D, will be working with the NCDXF website (http://www.ncdxf.org). Since May 2008, NCDXF has provided financial help to 4W6R (Timor Lorosa'e), VK9XWW (Christmas Island), VK9CJW (Cocos-Keeling), OJ0B (Market Reef), VK9DWX (Willis Island), A5100A (Bhutan), E44M (Palestine), FW5RE (Wallis & Fortuna), K5D (Desecheo Island), VK9LA (Lord Howe Island) and S04R (Western Sahara). Contributions can now easily be made on-line using a SSL secured web server (https://www.ncdxf.org/donate). [TNX W0GJ]

QSL 4S7BRG ---> The new QSL route for Mario, 4S7BRG is via LZ3HI. Cards can be requested direct (Emil Stoikov, P.O. Box 8, 6000 Stara Zagora, Bulgaria) or via the bureau.

QSL HQ9R ---> It seems that quite a few people are still sending cards for HQ9R to the former QSL manager (N6FF), who has been a Silent Key since August 2007. Please note that the correct QSL route is via K5WW. [TNX K5WW]

QSL VK9LA ---> "After much haggling with the Australian Customs Department, we have finally received the QSL cards from Czech Republic", Bill Horner, VK4FW says. He had planned to have all direct QSLling done by the end of June, but this is no longer possible. On 2 July Bill left home for a two-month family holiday. He processed and mailed as many cards as he could before leaving, so "many of you will receive your cards within a few days, but there will be also many that will not". Please be patient.

QSL GALLERY ---> The large collection of QSL cards on Les Nouvelles DX's web site has been updated. Twelve different galleries include cards for the ten Most Wanted DXCC Entities (306 QSLs), the 58 deleted DXCC entities (961 QSLs), obsolete prefixes (2613 QSLs), stations from Magrebh from 1947 to 1962 (315 QSLs), Antarctic bases (768 QSLs) & TAAF (Terres Australes and Antarctiques Francaises, 248 QSLs), the various French DXCC island Entities in the Pacific Ocean (251 QSLs) & the Indian Ocean (96 QSLs), pre-1945 countries (631 QSLs), French Departments (535 QSLs) and USA (50 QSLs), plus a gallery for cards not accepted by DXCC (107 QSLs). Several cards are still needed and your participation is encouraged - please visit http://LesNouvellesdx.fr and send your comments to lesnouvellesdx@... [TNX F6AJA]

TOP LISTS ---> The latest Topband, Topmode and Toplist listings are now available at http://www.425dxn.org/awards/toplist/index.html. Please note that QSOs confirmed through LoTW or included in on-line logs are eligible for listing. Send send your scores, as well as any request for further information, to Erminio Pandocchi, I2EOW (i2eow@...)

VY1JA QRT ---> Jay, VY1JA (N8JA) says his work stint in VY0 has concluded, and he is back home in the Yukon. His last logged QSO was made on 19 October 2008 and he is retiring from amateur radio. His station has been dismantled, and he is giving/selling everything to "younger Yukon hams". Steve, N3SL will continue to keep his logs and answer QSLs, while Akio, JA3JM handles QSLling for Japan. [TNX N3SL]

WHQS AWARD ---> "QTC", the Polish Amateur Radio Journal, sponsors the 2009 W-HQ-S award for working at least ten HQ stations during the upcoming IARU HF Contest. Rules and picture of the certificate can be found at http://www.skjkc.pl/pga/index.php?go=news&dzial=swiat&id=362 [TNX SP2FAP]

ZK2V ---> Chris, ZL1CT reports that, despite "flat" band conditions, he made 15817 QSOs (including 1279 QSOs on RTTY) 160, 80, 60, 40, 30, 20, 15 and 12 metres during his recent ZK2V DXpedition to Niue (http://www.zk2v.com/). Jeff, N8CC was the overall leader with 16 band-slots out of a possible 20. QSL via N3SL, direct or bureau. All QSOs have been uploaded to LoTW, resulting in more than 2000 QSO matches.

10153. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-07-03 22:11:02 UTC
From: Paul Dunphy
Topic: 9721 Message: 10153

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Jul 03 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 184 Issued at 2200Z on 03 Jul 2009
IA. Analysis of Solar Active Regions and Activity from 02/2100Z
to 03/2100Z: Solar activity was very low. No flares occurred during
the past 24 hours. The solar disk was void of sunspots.
IB. Solar Activity Forecast: Solar activity is expected to be very
low for the next three days (4-6 July).
IIA. Geophysical Activity Summary 02/2100Z to 03/2100Z:
The geomagnetic field was quiet during the past 24 hours.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be quiet for the next three days (4-6 July).
III. Event Probabilities 04 Jul-06 Jul
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF Green
IV. Penticton 10.7 cm Flux
Observed 03 Jul 067
Predicted 04 Jul-06 Jul 068/068/068
90 Day Mean 03 Jul 070
V. Geomagnetic A Indices
Observed Afr/Ap 02 Jul 002/003
Estimated Afr/Ap 03 Jul 002/003
Predicted Afr/Ap 04 Jul-06 Jul 005/005-005/005-005/005
VI. Geomagnetic Activity Probabilities 04 Jul-06 Jul
A. Middle Latitudes
Active 05/05/05
Minor storm 01/01/01
Major-severe storm 01/01/01
```

10154. Fwd: [ham-antennas] 80m monoband 3elements yagi impedance enigma

Yahoo group: DX-IS (2009)
Date: 2009-07-04 14:43:17 UTC
From: Dale Cole K8TS
Topic: 10154 Message: 10154

Lotta time, effort, and DEEP pockets!

Some guys go to any lenght.....sounds like a peace offering to the prop gods.....

Dale K8TS

Subject: [ham-antennas] 80m monoband 3elements yagi impedance enigma

Dear friends,
I did write last week about 'joining coax' because I had some doubts that Peter & Andy kindly helped me to remove.. Now, I am still joining the coax of my antenna feed-line using two PL259 :-) so, for the moment, no problems, no short circuit etc.

I did ask that question also because I had some doubts and strange results from my present experiment: I am experimenting with a choke balun on a 3 el. mono-band wire Yagi for the 80m.

Last year I converted my classical homemade Half Wave Wire DIPOLE for 80m band (horizontal, 15 meters from the ground with homebrew 1:1 balun), to a Full size 2 elements wire yagi for the 80m. I did the conversion simply adding a wire reflector that was long about 125 feet.

I used the ARRL hand book formulas and many internet sources.

The director dipole arms were 18.8 meters each (61.67 feet each),

the wire section 1.5mm (0.06 inches section, about AWG15) + plastic shield.

The old dipole was perfectly tuned on 3.780 MHz, SWR 1:1, for voice operations.

The 2 wire elements were about 60 feet from the ground, hanged between 4 trees.

The Driven element was horizontal; 'parallel' to the sloping ground of my QTH and, naturally, the dipole was also sloping, but mainly parallel to the "terrace" sloping ground. The ground is quite wet, I am in a mountain area (Apennines mountains Range 850m slm).

The dipole (Driven element) direction is beaming west.

I decided to add the Reflector element to the dipole to build a Full size 2 elements wire Yagi for the 80m.

At that time the reflector was 38 meters long (124,7 feet) and the reflector wire section 1.5mm (0.06 inches section = AWG15) + plastic shield.

The ARRL Radio Amateur Handbook gives the formula: 0.15 x lambda, to calculate the reflector distance from the director, just to give a 'fair' compromise, anyway I also used other sources to find a good compromise.

The reflector wire spacing was "about" 8 meters from the director (+/- 1m or 2m).

Adding the 124,7 feet Reflector, the antenna have a lower radiation angle and MORE GAIN compared to the previous dipole.

I did receive very good reports locally (5/9+20 without any amplifier in almost all Italy) and I was able to receive more Dx stations, I worked USA a good number of times compared to my previous standards with a simple dipole.

After the winter (that destroyed all my wires antennas) I now try to add an additional element to build a: '3 ELEMENTS FULL SIZE YAGI FOR THE 80M BAND'.

At the present I took out all the other antennas and I am experimenting only with the homemade Full size Horizontal 3 elements WIRE YAGI for the 80m band (director of 37m, driven element of 37,4m and reflector of 39m) height 16 to 20 meters from the ground, elements spacing 11,8m) with 1:1 balun home made on ferrite rods.

I received a good help from Vlad (RW1AC Vladimir Askenov) from the RU1A club station, he gave me advice about the lenghts of the wire elements, checking them with his software. I also took some inspiration about 3 elements Yagi from Stephen VE6WZ's website http://www.qsl.net/ve6wz/intro.htm and from the ARRL antenna handbook.

After adding the third elements and changing the element lengths and their spacing to 11.8meters, the SWR (clearly without the tuner, straight from the antenna) with the old ferrite rods 1:1 balun was LESS THAN 2:1 FROM 3.620 TO 3.800 Mhz

The elements spacing 11.8m (in practice 12 meters "average").

The new 3 elements antenna was working very well for National and European QSOs, where I get a standard 5/9+10 dB, but I was not able to test it properly on DX because of the very bad propagation during summer (!) in 80m.

Anyway I noticed that the antenna was quite noisy: in 80m the noise level always 9 +20 dB average !

So I decided to take out the homemade 1:1 balun (built on straight ferrite rods) and to replace it with a CHOKE BALUN (UGLY BALUN) to check if the noise was going to diminish.

The previous experiment, the 2 elements wire yagi full size for the 80m was LESS NOISY and it was working pretty well also in DX.

My aim is to make the antenna resonating mainly on the 80m Dx window (3.795 to 3.8MHz), anyway it has a low SWR on all the 80m voice operation band. The lower SWR point is 1,3:1 @ 3.8 MHz.:

The 3 el. Yagi was working without tuner in all the 80m band for voice operation but was quite noisy (?) compared to my old experiment, the Yagi with 2 elements.

The ugly Balun (choke: 6 meters that is about 19feet, 13 turns) of LMR 240 it is well made, the coax ends of the balun are well separate. It looks pretty.

After replacing my ferrite balun 1:1 with the ugly balun the SWR worsted!! : 3:1 and more in all the 80m band. Very bad SWR..

I checked the choke, no noticeable problems, very nice and clean, no short circuit, all is ok. I even used the same coax without adding a PL259, so there are no breaks, I just coiled the old coax around an empty and open plastic drum without cutting it. The choke is at the centre of the dipole.

Do you have any general suggestion about this antenna experiment ?

In particular, why the choke balun is not working well, while the old 1:1 balun on ferrite road gave better results ?

I read many good reports on choke baluns (ugly) and I thought is was ok.

Actually the choke balun IT IS NOT WORKING AT ALL WITH MY YAGI, do you know why?

In your opinion could the antenna impedance be "less" (???) than 50 Ohms ? Can this be the problem ? Why the ugly balun is not working at all ?

You can find information and pictures about the antenna in this webpage here:
http://www.iz5ljb.eu/_sgg/m4m3_1.htm

Any suggestion is welcome !

Thanks again & 73

Max, IZ5LJB

(sorry for my broken English)

10155. Green stamps for Canada

Yahoo group: DX-IS (2009)
Date: 2009-07-04 21:09:23 UTC
From: John Geiger
Topic: 10155 Message: 10155

How many US greenstamps does it take for Canadians to mail a QSL to the US? Is 1 enough, or do they need 2?

73s John AA5JG

It's borderline, John, but ONE will no it. It costs $0.98 cents CDN to mail a letter to the US from Canada. However, we have to pay a tax on everything in Canada, including stamps! (Yes, a tax on a tax.) This varies from province to province, but the worst case in 13% like my province of Nova Scotia. So, a $0.98 stamp costs me $0.98 + $0.13 = $1.11 CDN. Given that a USD is worth about $1.10 CDN now, ONE GS will do it. If you send two, the recipient is making a huge profit. I never split hairs over a penny and the currency rates are always fluctuating anyhow. I get a fair number from US stations because I hand out grid squares on 6M and 5-10% of those I work send direct because they are playing the VUCC game. I always answer with one USD or one IRC. The best thing is to get a $0.98 CDN stamp and put it on a SAE, but that isn't always easy to find in the USA. The really frustrating one are those that put a load of US stamps on the SAE. They don't understand that other countries' post offices won't accept US stamps. :-)

To complicate matters more, if you buy more than $5 postage and it is for letters or parcels that are going OUTSIDE Canada, there is no tax charged. Therefore if a QSL manager saves up outgoing letters until they have 6 or more (for the USA), and takes them to the post office, it's $0.98 each with no tax.

You didn't ask, but for anywhere else other than the USA, it costs us $1.65 CDN (plus 13% tax if we don't accumulate over $5 worth.)

Thanks for the information Paul. I figured I could count on you to inform me. I need a few VE QSLs for the VUCC game. How does the outgoing bureau work up there? Do you have to be a member of RAC to use it, like we do with the ARRL in the US? I have tried QSLing via the bureau for 6m QSOs and my return rate hasn't been outstanding.

The buro works great, but you have to be a member of RAC to use it, just like you have to belong to the ARRL to use their bureau. I don't have exact figures and probably no on knows for sure, but it is estimated only 10-15% of Canadian Hams belong to RAC. (I belong!) That is likely why you are not getting a good return rate on bureau QSLs.

I've found the same to be true worldwide, and anything I really need, I QSL direct. This is getting assisted somewhat by LoTW, but most still don't use LoTW. (The ARRL won't accept LoTW matches for VUCC yet, anyhow.) I have about 35,000 QSOs uploaded to LoTW, and only have about 24% of them receiving matches. Most of those are from US station whose state or grid I already have confirmed multiple times, although some of the major DXpeditions in the past few years have been very good at uploading to LoTW.

If you really need a QSL for VUCC, the best thing to do is go direct. Even this can be less than you expect. On another list I saw a discussion in the past week between a number of US Hams on this topic. They were frustrated that even within the USA, they were getting less than a 50% return on direct QSLs with SASEs! Not even a "not on the log" return. Nothing at all.

If you work me on 6M and send for a card, you will get a QSL returned. Guaranteed!

10159. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-07-04 22:11:00 UTC
From: Paul Dunphy
Topic: 9721 Message: 10159

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Jul 04 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 185 Issued at 2200Z on 04 Jul 2009
IA. Analysis of Solar Active Regions and Activity from 03/2100Z
to 04/2100Z: Solar activity was very low. New Region 1024 (S27E02)
emerged early in the period and produced numerous B-class events
during the past 24 hours. The largest of these was a B8 at 0437Z.
The group grew rapidly and is currently a D type sunspot region with
an area of about 140 millionths. The magnetic analysis showed a beta
group with a single, East-West oriented polarity inversion line. The
frequency and intensity of flare activity from the region appeared
to be decreasing slightly during the last four hours of the period.
The remainder of the solar disk was quiet and stable.
IB. Solar Activity Forecast: Solar activity is expected to be
predominantly very low, but there is a chance for an isolated
C-class flare during the next three days (5-7 July) from Region
1024, especially if it continues to grow.
IIA. Geophysical Activity Summary 03/2100Z to 04/2100Z:
The geomagnetic field was quiet during the past 24 hours.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be quiet for the next three days (5-7 July).
III. Event Probabilities 05 Jul-07 Jul
Class M 05/05/05
Class X 01/01/01
Proton 01/01/01
PCAF Green
IV. Penticton 10.7 cm Flux
Observed 04 Jul 071
Predicted 05 Jul-07 Jul 070/070/070
90 Day Mean 04 Jul 070
V. Geomagnetic A Indices
Observed Afr/Ap 03 Jul 003/005
Estimated Afr/Ap 04 Jul 002/005

I agree, Dick, except the ARRL won't accept LoTW confirmations
for VUCC, and I know John is especially interested in collecting 6M
grid square confirmations. I don't understand why the ARRL won't
accept LoTW confirmations for one of their own awards, but it might
be due to a lack of resources to enhance the software to do so.

Presently LoTW is only good for DXCC and WAS (and CQ Magazine
accepts them for their awards -- at least WAZ, not sure about the rest.)

Paul, a follow-up question to your excellent explanation:

Any issues with US coinage ??

When the US dollar dropped below 1 Canadian dollar some time ago, I would send a green stamp with a 10c coin taped to a yellow sticky note since the coin is thin and doesn't weigh much. I got my requested cards back, but no one ever made a comment one way or another.

Since I sometimes find Canadian coinage (usually 1c, 5c or 25c pieces) in my pocket change, I guess the reverse is similar ... or is it ??

I wouldn't want to burden a VE station with underfunding, so is throwing in a dime or a quarter an option acceptable to our VE buddies ??

Hi John,

I'm in FN84 (FN84hr is the last two mean anything -- I think not for VUCC.) Not super rare but I haven't heard many in this grid on 6M this year. Either way, I'm usually around if the band is open . . . mainly hoping for an EU opening, but it usually occurs the other way. I hear lots of Ws and VEs in the central part of the continent. Occasionally get double hop into CA and the like, but mostly Ohio and Illinois sort of distance, so OK might be just a bit too far for single hop and too close for double.

We have a fairly significant cycle 24 spot that formed last night that has actually had a good affect on HF . . . I noticed it on 30/20/17 today although we are years away from F2 on 6, I fear. It might be my imagination, but it seems these cycle 24 spots are increasing in frequency. We might finally see some action come the fall and winter in terms of improved HF propagation.

Hi Will,

Yes, US and Canadian coins are interchangeable "at par", so it doesn't have to be a Canadian coin. I find US coins in my pocket every week and we can use them at any store, etc. US bank notes we can use at some stores, but usually we get stiffed by a lower exchange rate that we would obtain at a bank. I usually re-send US GSs out to DX stations I am looking to QSL, but some guys convert them to CDN to buy postage stamps.

Anyhow, the answer to your question is simple. If you want to be sure tape a dime or quarter (either US or Canadian) to your GS or QSL and you will be well over the cost of the return postage.

Hi Paul,

Looks like I need FN84. I have FN74 and 76 confirmed so it is possible from this distance. Much luck with EU on 6m this summer? I did work GW and G a little over a week ago for 2 new countries on 6m, and caught the V29 last night-probably shortly before Jimmy went QRT. That makes 5 new 6m countries this summer plus 16 new grids. Grids get a little tougher when you get over 450.

I have a VE1DX QSL from the early 80s, but I don't think that was you, was it?

Look up the term:

Seigniorage

That's why countries issue so many commemorative coins & stamps.

There is one place that issues enough stamps each year that they could air-mail

the entire population to anywhere in the world.

It's a very lucrative business.

I got VE1DX in 1996 -- I was VE1UK before that. VE1DX prior to 1996 was a guy named Andy in New Brunswick, and he is still very active and now holds the call VE9DX. It might have been him you worked, but he only got VE1DX around 1989-1990, I think. He was VE1ASJ before that. I don't know who would have held VE1DX in the early 1980's. Possibly someone from Prince Edward Island (now VY2-land), I seem to recall. If you have the card handy, I'd be interested in the name/address on it. I don't know the history of this call prior to Andy getting it ~1989.

I bet your FN74 is VE1YX (possibly still using his old call, VE1AVX, in the very early 1980s.) He is the king of 6M in Nova Scotia and has been for 30-40 years . . . and he is in FN74. Still very active. He was running a string of Ws on 6M today.

Congratulations on the new ones on 6M on Es. They are hard to come by that way, especially from the central USA. Although most of this week EU was skipping over us and guys farther inland were working them. I managed to work the TZ6EI so that is my prize of the year. I still have a lot of holes, and we need F2 propagation to fill them.

73, Paul VE1DX

Dick answered your question regarding the 'quarter'. But, he ducked the comment regarding education. That's a very sore subject.

Ham radio education is in no better shape. Here in the USA some people who can't "speel" HAMM RAYDYIO can have the highest license [Extra Class] in just one day of cramming short term memory.

I used to teach Ham Radio Classes: 2 hours a night for 12 weeks to prepare for a Technician Class license. I did not teach Q&A! I taught basic theory and UNDERSTANDING! I used to insist on a basic 5 wpm CW proficiency, even though it's no longer a requirement, as a person's commitment to LEARN. [Lack of commitment leads to lack of dedication.] But, locally, getting your first license is almost guaranteed with a 4 hour Saturday morning class cramming Q&A followed by a VE session. I quit teaching!

Then, after the new licensee gets home I get a phone call asking me: "How long is a 1/2 wavelength dipole for 20 meters?" Or: "My new solid state linear just blew up! Why?" Or: "My VSWR is 1.5:1 and I can't get it down! Is that bad?"

Progressing up the ladder with a time in grade requirement does have much to recommend it. But, it doesn't sell 'raydyios'. And selling 'raydyios' has become the purpose of changing regulations!

Conclusion: Ham radio, in the USA, has been dumbed down [Lack of commitment leads to lack of dedication.] and is a dying technical interest.

The USA government has much data to support the action of coinage. The service life of a coin can reach 50+ years, and is much less costly to produce. The service life of a GS is measured in terms of a few years and is more costly to produce. It makes great government cost saving sense to issue and USE coins. I use the various $1 coins at all my local merchants.
But government cost savings is anathema to government vested interest.

Canada got it right! A $1 and $2 coin makes lots of fiscal sense. Every week I pick up $25 in coins, one roll, and put the coins into circulation. ... OK I'm weird!

BTW: in USA history there was a great debate in the 1910s and 1920s regarding converting from coinage to paper money .. just a historical note.

The U.S. currently has three (3) dollar coins:

Susan B. Anthony
Sacajawea
Presidential (don't know how many diff prez are on the coins)

Here's one way that can happen:

After the contest the fellow generates the ADIF from his contest program, uploads to the eQSL & LoTW servers, and goes to bed.

The next day he forgets to import the contest log into his "daily" logging program. As time passes, he's less and less likely to catch the missing log.

Your QSL arrives in his mailbox. He checks his daily log. NIL. He does not make the connection.

If this was a 160m contest contact, you might suggest he also check his contest log.

I admit that I have forgotten to dump contest logs into my regular logging program. Usually when I get a NIL card I look to see what contests were that weekend (I don't operate too much during the week) and see if I have a contest log for that time period. I usually find the call in a contest log.

The USA is not alone, sadly, in dumbing down the requirements for an amateur radio license. Canada, as well as most of the "western" countries, has done the same thing. As a former instructor to potential hams, I agree with Dave's comments. In fact, although I am still registered as a volunteer examiner, I'd estimate that in the last 10 years I have had fewer than a half dozen calls from folks interested in writing a test.

I am dismayed when I listen on the bands and hear some of the "blasphemy" committed by new arrivals to our ranks.

As a Canadian who has dealt with coinage for $1 and $2 since their inception, I want to comment on two things.

In my travels, it has not been uncommon for me to collect as much as $20-25 in "change" in the run of a single day. This weighs heavily in one's pocket until it can be exchanged for bills. It is terribly inconvenient and the government, in it's wisdom, made both the "loonie" and the "twoonie" far larger and heavier than they ought to be.

Canada has also failed to produce enough 50-cent pieces for decades and while a limited number are minted annually, they are not now normally in circulation.

I have seen bills from some European countries which appear to be super-laminated and I suspect these would outlast the normal paper currency by several years.

It would certainly make it easier for Canadians to send cash with QSL requests if we had bills instead of a sickly coloured $1 coin and a ridiculously large and heavy and not attractive $2 coin.

And to top it off, I am particularly pleased when a "foreign" ham sends me a Canadian $1 bill with a QSL request. And the better the condition of the bill, the broader the smile on my face.

I suspect you're right. I was first licensed in 1967. At the time, the older folks commented on the dumbing down of the exams because we no longer had to draw schematics of things on the exams. We still had to identify them and the components in them.

1967 is far enough back that you can notice a difference in things now. There are both positive and negative changes in ham radio since then. There was no internet back then and no personal computers. No calculators either - we did our work with slide rules and paper. Or if you were lucky you had one of those mechanical monster calculating machines or a hand-held Curta calculator (also mechanical - you turned a crank on top to do the calculations). [I'll bet most of those are in museums now!] So the advent of computers and advances in technology have improved things. We have radios now that can do things we didn't even dream of back in the 60's. We can design antennas on the computer and build them and they outperform what we had back then. Parts that didn't even exist in the 60's are now available and cheap for those who still build their own stuff.

But I think the hobby is now competing with the internet and other aspects of the technology for newcomers' attention. A very few see the true magic of radio. Most people who aren't hams don't get it and would rather spend their time on internet or with their X-boxes, etc. They have shorter attention spans and want exams that don't require much effort. I wonder how many people have gotten a license, think the only aspect of the hobby is 2m FM and give it up after a couple years?

I remember what got me hooked on ham radio - a teacher who taught a few of us ham radio classes after regular school hours in 8th grade had a few of us up to see his station one afternoon. Even let us say a few words to someone in a far away place into the mic. I was completely fascinated. Maybe that's what we need more of. Field Day is a great way to introduce people to our hobby. There were several people who visited our site this year. I had fun explaining things to some of them.

I think if the hobby dies it's only because we haven't continued this activity of showing people what it is and what it can do. Even in this high-tech world there's one thing you don't see every day - someone with a small dish on a tripod somewhere. I set my dish up in many locations along Lake Michicigan in Wisconsin as a rover in the 10 GHz contest for the last few years. I got quite an audience in many places. I thought it was great fun to show them what I was doing. Maybe one or two of them got their licenses. I can only hope.

Based on your comment and those of others, Dick, I suspect what you say is true. I'm happy to say that I have experienced little of the kind of behaviour you mention, probably because I don't often listen in the phone bands anymore. Yes, I have heard guys, from whom I would have expected better manners, but it is often the newcomer whose antics and jargon on the air leave me with wide and fiery eyes.

No doubt about it, we aren't what we used to be and I can't and won't expect it to ever be what it was. Society is constantly changing.

But I can still express my displeasure. Like, I mean, that's, like, my right, right?

☐
Here's one way that can happen:

After the contest the fellow generates the ADIF from his contest program, uploads to the eQSL & LoTW servers, and goes to bed.

The next day he forgets to import the contest log into his "daily" logging program. As time passes, he's less and less likely to catch the missing log.

Your QSL arrives in his mailbox. He checks his daily log. NIL. He does not make the connection.

If this was a 160m contest contact, you might suggest he also check his contest log.

Subject: [DX-IS] side note on qsl's

I did not get into reading tthe mail on the "green stamp" thread, but there was a lot of talk about bureos, lotw, directs, yada yada.....

One thing about qsling and being a member of a bureo that I have found interesting........On occassion I will upload my log after contests to eqsl, for those who do like to use it. After uploading recently I looked at what matches might be there that really matched mine. A particual W* made a match, and I needed him real bad for 160 WAS. Took down the info, checked my log, and sent a qsl direct. Came back NIL. Wonder how we made a match?

And that is fine. I don't expect most people to get it. That doesn't bother me. If you don't understand the magic of radio, I really don't want you to be a ham. It seems like we have this obsession (fueled in big part by the ARRL and CQ) that everyone should be interested in ham radio and want to get a license. I could really care less how many hams we have, as long as we have quality ones. Most of the hams we get today in my area only view ham radio as a means to an end, instead of the end itself. They want to chase tornados (and maybe qualify for a Darwin Award) and only get a license for the communication aspect of that activity. They could care less about ragchewing, awards, DXing, HF, etc.

My wife doesn't care at all about ham radio and I have no feeling that I want to convert her-as long as she lets me operate.

Yes, but it has gotten worse. And you have to admit, the QSOs we now hear are not the extreme techinical quality that we were promised when they dropped the code test and all of these Ph.D in EE (who could get a Ph.D but not learn the code) became hams.

I am dismayed when I listen on the bands and hear some of the "blasphemy" committed by new arrivals to our ranks.
It is by no means limited to the new arrivals. The cesspools populated by long-time foul-mouthed Extra Class operators have been around forever.

Hi Paul,

VE1ASJ is a callsign I hadn't thought of in a while. Used to work Andy about every contest, glad to know he has a VE9 callsign now. When did the "breakup" of VE1 into VE1, VE9, and VY2 occur? Were stations in NB and PEI required to change prefixes, or could they keep their VE1 call if they wanted?

I have 2 VE1DX QSLs, one from the 10 meter contest in 1982 and one from the 1984 CQWW SSB contest. The call belonged to a E. Garth Harper in Albany, PEI.

I have worked VE1YX a few times on 6m.

I got VE1DX in 1996 -- I was VE1UK before that. VE1DX prior to
1996 was a guy named Andy in New Brunswick, and he is still very
active and now holds the call VE9DX. It might have been him you
worked, but he only got VE1DX around 1989-1990, I think. He was
VE1ASJ before that. I don't know who would have held VE1DX in the
early 1980's. Possibly someone from Prince Edward Island (now
VY2-land), I seem to recall. If you have the card handy, I'd be
interested in the name/address on it. I don't know the history of
this call prior to Andy getting it ~1989.

I bet your FN74 is VE1YX (possibly still using his old call, VE1AVX, in the very early 1980s.) He is the king of 6M in Nova Scotia and has been for 30-40 years . . . and he is in FN74. Still very active. He was running a string of Ws on 6M today.

Congratulations on the new ones on 6M on Es. They are hard to come by that way, especially from the central USA. Although most of this week EU was skipping over us and guys farther inland were working them. I managed to work the TZ6EI so that is my prize of the year. I still have a lot of holes, and we need F2 propagation to fill them.

I'm guessing here John, but I think around 1994 or
1995. Someone else who has old documentation laying around might be
able to give an exact date. Nova Scotia retained VE1 and NB was
assigned VE9 and PEI was assigned VY2.

Existing Hams in NB and PEI were allowed to retain their VE1
calls on the assumption they would slowly disappear through
attrition. Some kept them, and others applied right away for calls
with the new prefixes.

All new NB/PEI calls issued since the date (whenever it was in
94 or 95) must be VE9 or VY2. As time goes by, it is more and more
likely when you hear a VE1 he or she is in Nova Scotia.

Absolutely, Al. I was just jumping in because I see a lot of old experienced hams blaming the new ones for all the bad conduct. When I was a Novice in the summer of 1961 there were already lids and foul-mouths holding court. It is not a new phenomenon and human nature well ensure that it will never entirely go away.
